## SECTIONS

- A | Introduction to OpenType®
- B | Font and Designer Information
- C | Supported Layout Features
- D | Language Support
- E | Type Specimens

## SECTION A INTRODUCTION TO OPENTYPE®

### WHAT IS OPENTYPE?

OpenType® is a cross-platform font file format developed jointly by Adobe and Microsoft. The two main benefits of the OpenType format are its cross-platform compatibility (the same font file works on Macintosh and Windows computers), and its ability to support widely expanded character sets and layout features, which provide rich linguistic support and advanced typographic control.

OpenType fonts can be installed and used alongside PostScript® Type 1 and TrueType fonts.

The range of supported layout features may differ in the various FontFont OpenType packages, therefore each OpenType package will be accompanied by this FF Info Guide listing the layout features supported by this specific font package.

You'll find a glossary of all available OpenType layout features in Section B of the general FF OpenType User Guide.

## ABOUT FF UNIT OT REGULAR ITALIC

FF Unit was designed by Erik Spiekermann and produced by Christian Schwartz. FF Unit is the grown-up, no-nonsense sister of Spiekermann's famous FF Meta. With FF Unit, puppy fat is off, some curves are gone and the shapes are tighter. While FF Meta has always been a little out-of-line and not exactly an over-engineered typeface, FF Unit is less outspoken and more disciplined. It is – like FF Meta – very suitable for use quite small and large, but FF Unit lacks some of the diagonal strokes and curves that give FF Meta its slight informality. However, FF Unit is not cold or uptight, just cool: no redundant ornamentation, just a lot of character. The tighter shapes make it suitable for big headlines set tight. Smaller sizes benefit from the increased contrast between vertical and horizontal strokes and open spacing. Thin and Light perform well set large, displaying the characters to their advantage. There is a great difference in weight between the Thin and Ultra, providing a good range of weights for contrasting combinations. Alternative characters (a, g, i, j, l, U, M) make for interesting headlines. The Small Caps are a bit larger than normal, making them suitable for abbreviations and acronyms. The many weights include old style, regular, and tabular figures.

## ABOUT ERIK SPIEKERMANN

Prof. Dr. h.c. Erik Spiekermann studied History of Art and English in Berlin. He is information architect, type designer (FF Meta, ITC Officina, FF Info, FF Unit, LoType, Berliner Grotesk et al) and author of books and articles on type and typography. He was founder (1979) of MetaDesign, Germany's largest design firm with offices in Berlin, London and San Francisco. Projects included corporate design programmes for Audi, Skoda, Volkswagen, Lexus, Heidelberg Printing, Berlin Transit, Duesseldorf Airport and many others. In 1988 he started FontShop, a company for production and distribution of electronic fonts. He holds an honorary professorship at the Academy of Arts in Bremen, is board member of ATypI and the German Design Council and Past President of the istd International Society of Typographic Designers as well as the iiii International Institute of Information Design. In 2003 he was awarded the Gerrit Noordzij Prize for Typography from the Royal Academy in The Hague, Netherlands. In 2006 received an honorary doctorship from Pasadena Art Center. In 2001 he redesigned The Economist magazine in London. His book for Adobe Press, "Stop Stealing Sheep" has recently appeared in a second edition and both a German and a Russian version. His corporate font family for Nokia was released in 2002. The exclusive family of typefaces for Deutsche Bahn (the German railway system), designed with Christian Schwartz, was awarded the Federal German Design Prize 2007. He left MetaDesign in 2001 and now runs SpiekermannPartners with offices in Berlin, London and San Francisco.

Clients include Bosch, Deutsche Bahn, Pioneer Investment, Messe Frankfurt, Nokia, Birkhäuser Verlag Basel and many others.

---

#### **ABOUT CHRISTIAN SCHWARTZ**

Christian Schwartz is an independent type designer living and working in New York City, where he is principal of Schwartzco Inc., and a partner in Orange Italic. A graduate of the Communication Design program at Carnegie Mellon University, Schwartz first worked at MetaDesign Berlin, developing typefaces for Volkswagen and logos for a number of corporations. He then returned to the US and joined the design staff at The Font Bureau, Inc., working for a wide range of corporate and publication clients. Schwartz set out on his own in 2001, first forming Orange Italic with product designer Dino Sanchez and recently Schwartzco Inc. He has released commercial fonts with FontBureau, Village, FontFont, House Industries and Emigre. Schwartz was awarded the prestigious Prix Charles Peignot in 2007, given every four or five years to a designer under 35 who has made “an outstanding contribution to the field of type design” by the Association Typographique Internationale. Also in 2007, Schwartz and Spiekermann received a gold medal from the German Design Council (Rat für Formgebung) for their Deutsche Bahn typeface system. Schwartz’s typefaces have been honored by the Smithsonian’s Cooper Hewitt National Design Museum, the New York Type Director’s Club, and the International Society of Typographic Designers, and his work with Barnes has been honored by D&AD.
