1. Creating Project

This section contains quick tutorials to help you start working with TemplateToaster. It includes steps for creating the new projects, saving your project, opening the recent projects, and explains how to export your theme/template in your desired CMS.

Creating Project:

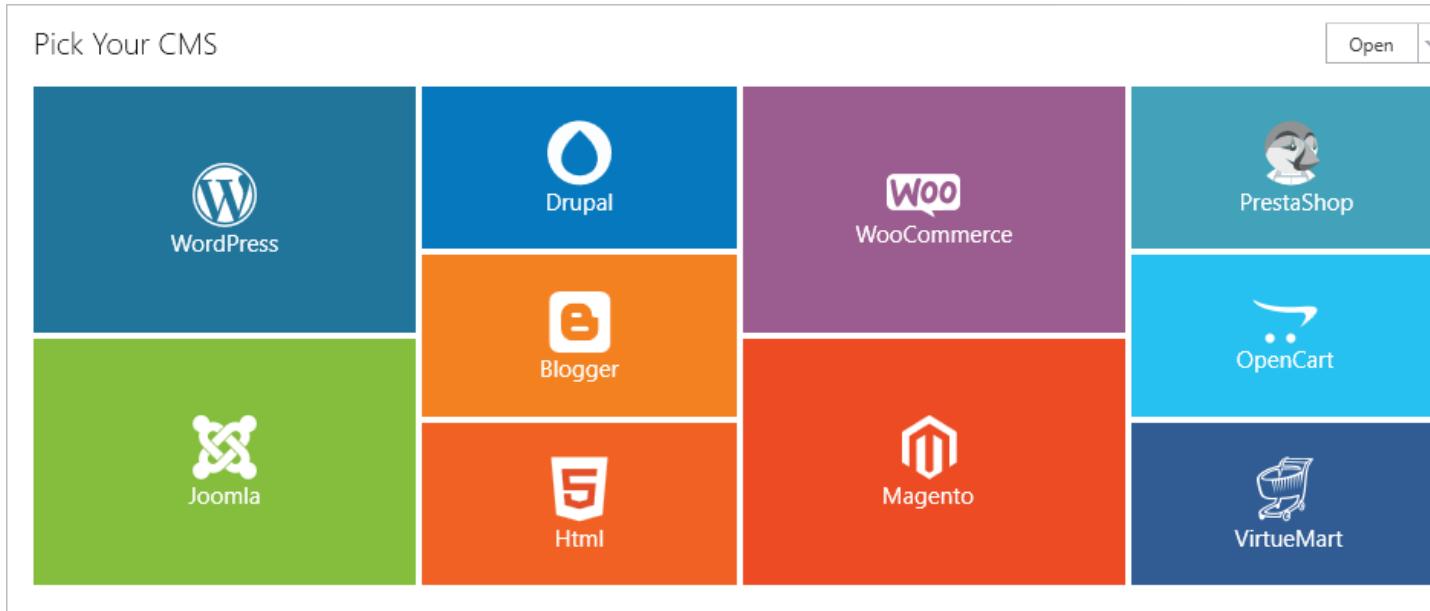

- [Creating a New Project](#)
- [Preview & Export Theme/Template](#)
- [Saving a Project](#)
- [Opening a Project](#)

-

1.1. Creating a New Project

To create a new project with **TemplateToaster**, you can follow the steps as mentioned below:

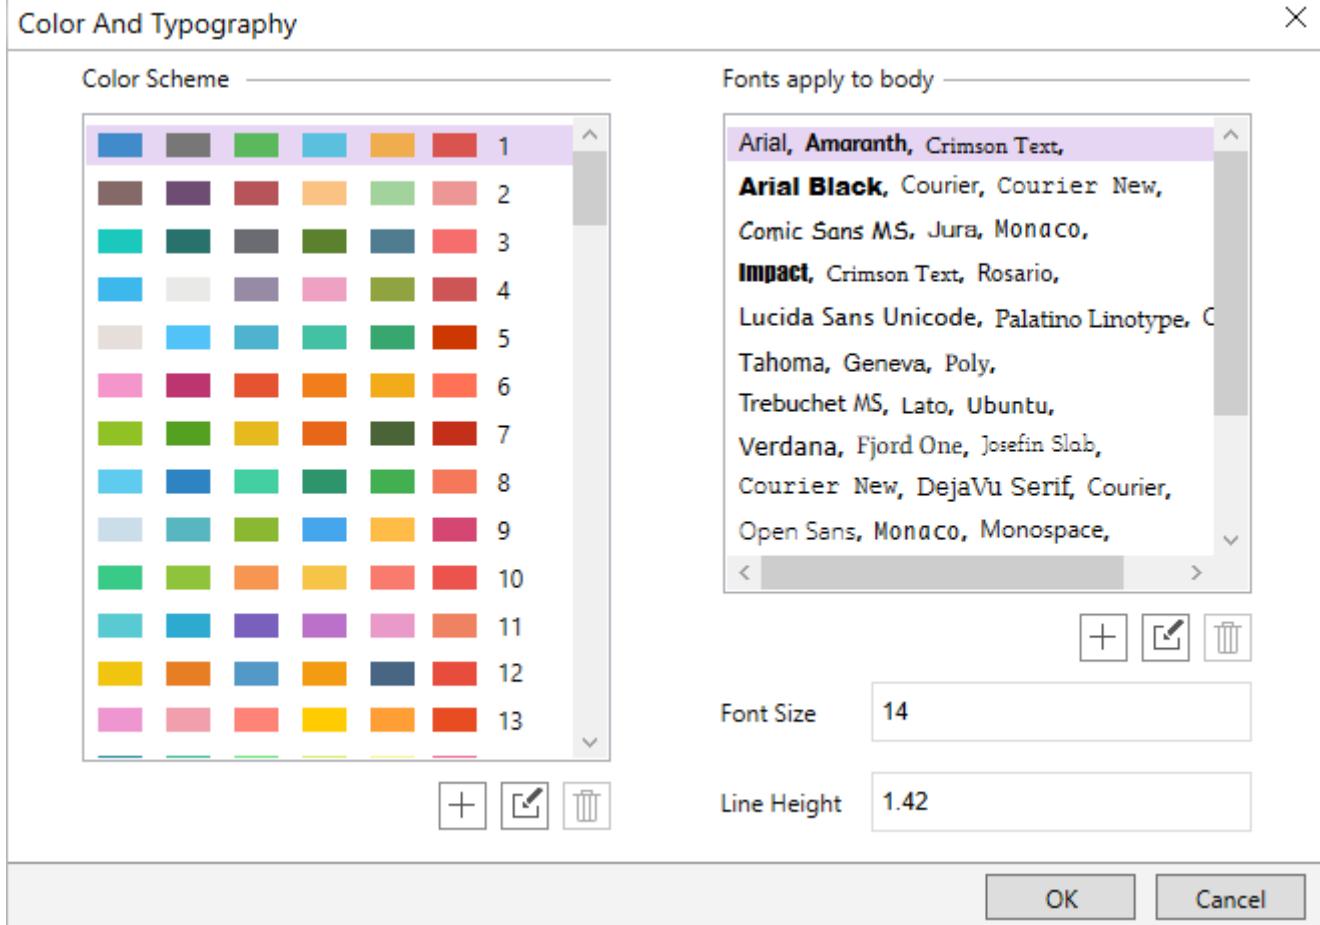

- [Select Desired CMS](#) - Select your Desired CMS for starting a new theme/template/website.

- [Start theme/template From Scratch or Select Sample Templates](#) - Design your new theme from scratch or select sample template from the '**Go With Sample Templates**' option.

A screenshot of two web interfaces side-by-side. On the left, under "Go With Sample Templates", there are two sample website designs: one for a creative studio and another for a steel products company. Both designs feature large hero images and navigation menus. On the right, under "Start From Scratch", there is a blank canvas interface with a grid layout and a "Modify" button at the bottom right. Above the canvas, there is a dropdown menu labeled "All Categories".

- [Choose Color Scheme & Typography options](#) - Choose your desired Color scheme and typography for your new theme/template.

- [Main Interface of the Software](#) - In this, the main interface of the software will be shown after the installation and activation of the product.

Desktop Tablet Mobile

3.1.1. Select Desired CMS

You can select any option from the start-up screen and go ahead to design a theme/template or a website.

1

WORDPRESS

WordPress is the simplest and most popular content management system. Millions of the websites are using this content management system. WordPress is mostly used for the following types of websites:

- Blogs
- Portfolios
- Membership websites
- Shopping stores

2

DRUPAL

Drupal is an open source, PHP-based content management system. It is a flexible platform to develop complex and large websites. Following types of websites are preferably made with Drupal:

- Government websites
- Large e-commerce and Business
- Social networking
- File storage websites

WOOCOMMERCE

3

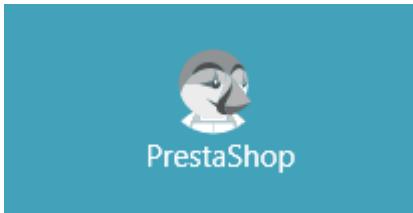

An adaptable e-commerce platform which takes care of logistical and technical requirements by providing the hundreds of free and paid WooCommerce extensions. Some of its main features are:

- Seamless integration with WordPress
- Strong daily inventory management
- Pre-installed payment gateways
- Secure and up-to-date coding standards

PRESTASHOP

4

PrestaShop is an open source e-commerce web development platform. It is based on PHP language and supports MySQL database management system. Below are the factors that make PrestaShop an easy to use e-commerce CMS:

- Customizable themes for the websites
- Add-ons to enhance the built-in functionality
- Meant for all types of business
- Supports enormous payment gateways

JOOMLA

5

Joomla is an open source and free content management system. You can build up any kind of website with Joomla. Yet, the developers like to use Joomla for following types of websites:

- Complex Blogs

- Government Websites
- Business and e-commerce
- News Websites

6 BLOGGER

Blogger is a popular blog publishing platform. You can publish your blogs for free on this platform. A blog is generally published with the sub-domain as blogspot.com. But, you can use your own custom domain too. Following are the major reasons to use this platform for publishing blogs:

- Customizable blog templates
- Inbuilt support for Google Adsense
- Multiple blogs from one account
- Seamless integration with Google+

7 HTML

Hyper Text Markup Language (HTML) is the standard markup language used for creating web pages. Choosing this option, you can create a static website in a short time. Below are major features possessed by TemplateToaster for designing an HTML website:

- Google and Custom fonts with dynamic font styles
- Add YouTube videos to the website
- Follows HTML5 and CSS3
- W3C validation ensures compliance with web standards

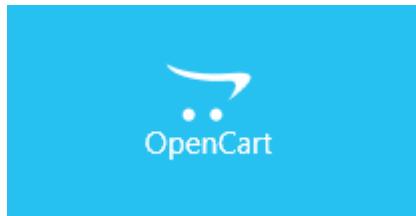

8 MAGENTO

Magento is a renowned shopping cart software. It is an open source platform which is written in PHP language. It uses MySQL/MariaDB relational database management system. Following factors make it the favourable shopping cart software:

- Handle all stores from one admin panel
- Enormous modules for extended functionality
- Customizable themes for the desired look of e-stores
- Supports all major payment gateways

9 OPENCART

An effective and customizable platform for e-commerce stores, OpenCart takes pride in transparency, open code, community vision and no catches.

The main features of OpenCart are as follows:

- Multi-store management with custom settings for each
- Multi-currency and Multi-lingual
- Hundreds of world-renowned shipping methods
- Recurring Payments option to keep control

VIRTUEMART

10

The best fit for low to medium level traffic websites, VirtueMart supports an unlimited number of products and categories. It is based on Joomla MVC framework having features like:

- Supports multiple prices for a single product
- Inventory Management with virtual stock option
- Multi-currency format with auto updation
- 8 checkout options with shipment tracking

Open

11

You can select the '**Open**' option to locate your project from the Browse window that will open after clicking "Open". A "Double - Click" on the desired project will open it in the TemplateToaster.

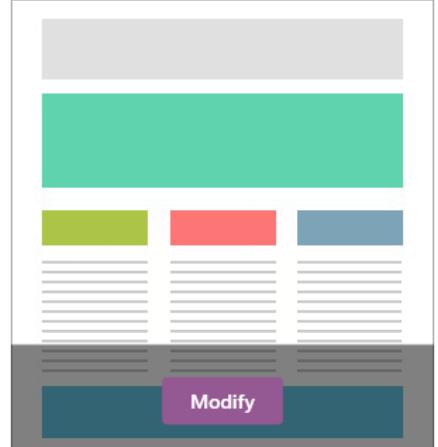

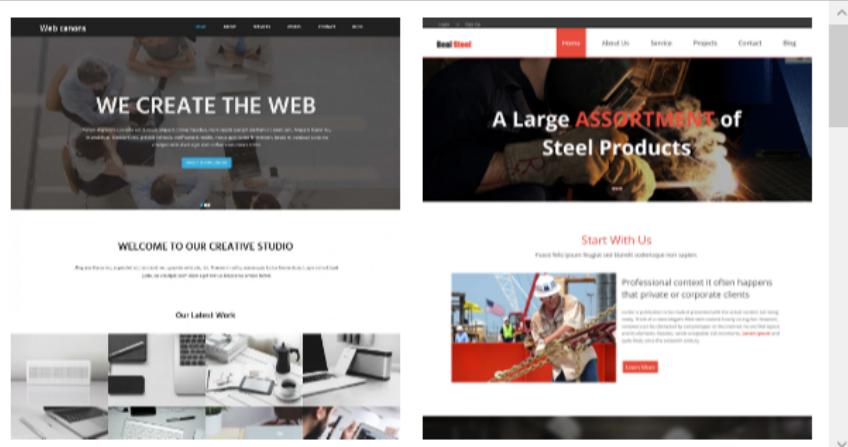

If you want to open any **recent project** then just click the **arrow** to get a list of recently opened projects. Just select the desired project to directly move on that.

3.1.2. Start Theme/Template from Scratch or Select Sample Templates

Go With Sample Templates

All Categories

Start From Scratch

1 TEMPLATE CATEGORY

1

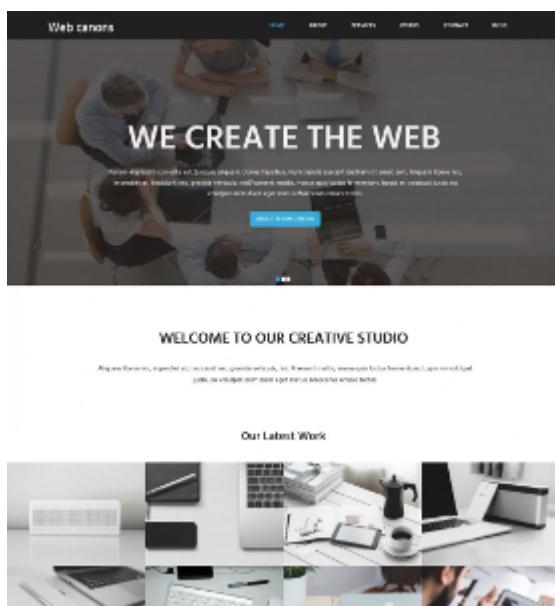

All Categories

It is a drop-down list for different template categories. You can choose one category from many like Business, Education, All categories etc. Then the Template Gallery will display the related sample templates according to the choice made.

2 SAMPLE TEMPLATE GALLERY

2

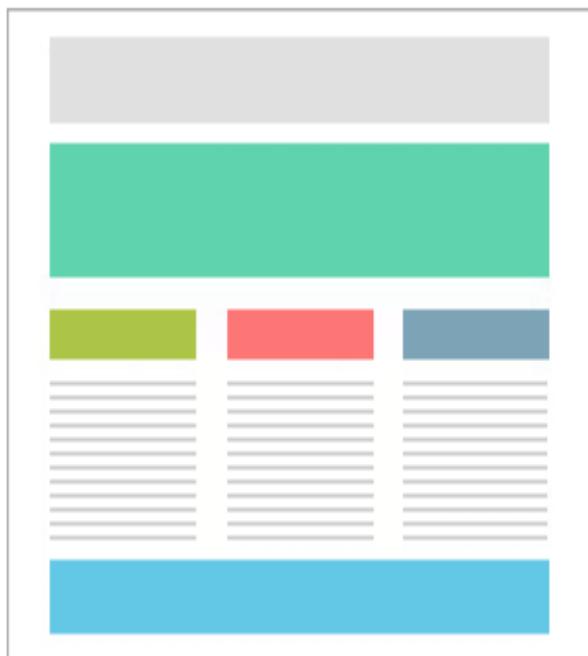

Click **Modify** to select a template from the sample templates and customize its design according to your preferences.

3 START FROM SCRATCH

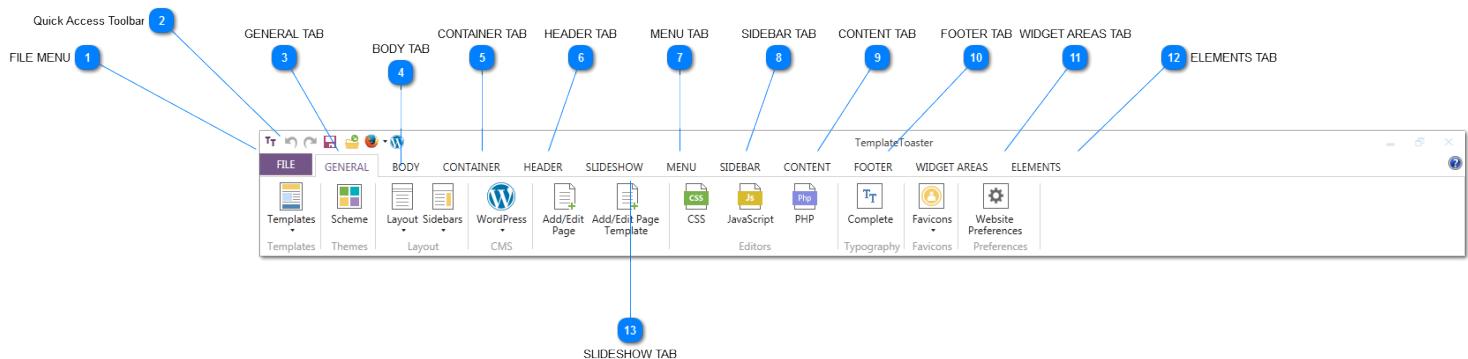

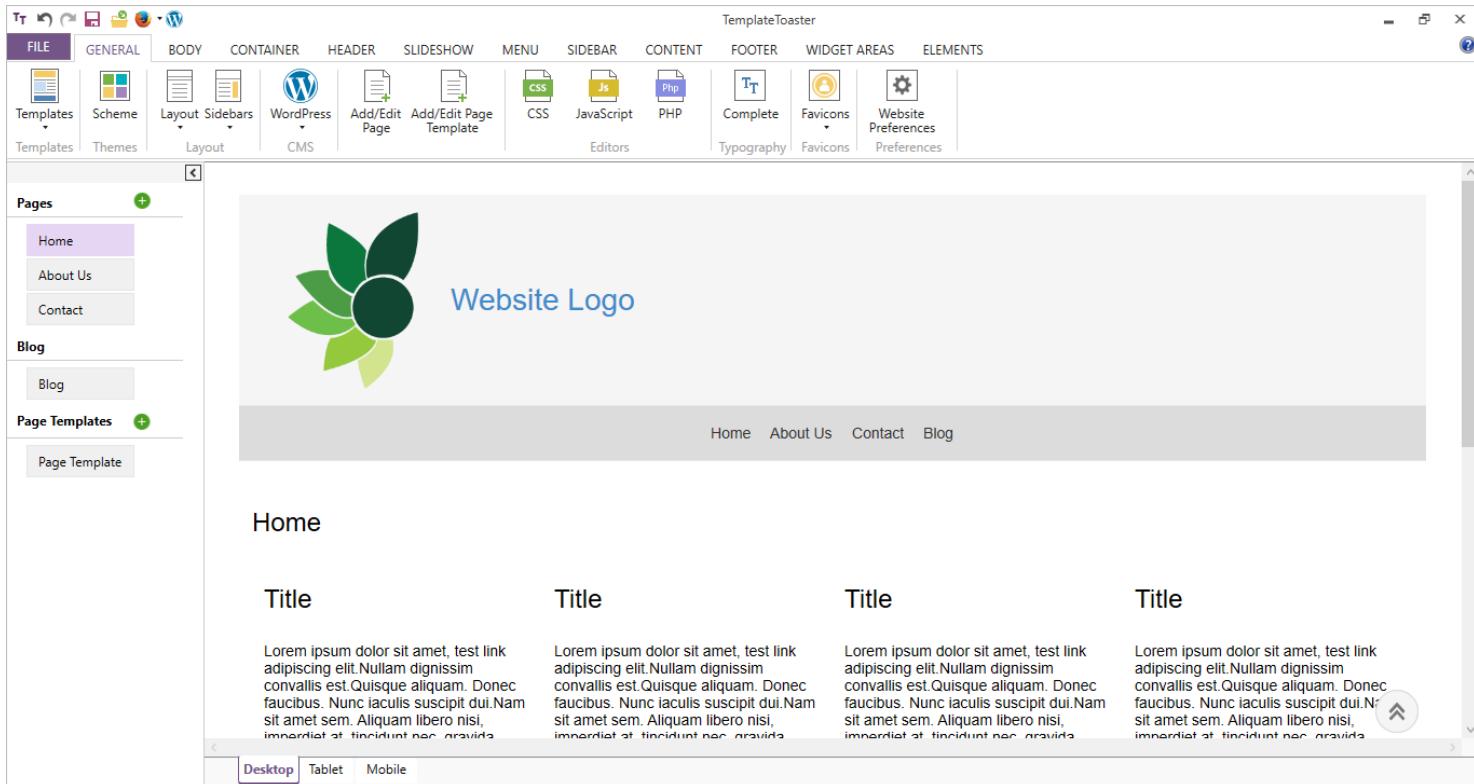

3

Click **Modify** on 'start from Scratch' screen to design your template from scratch.

3.1.3. Main Interface of Software

This is the main user interface of the software from where you can start designing your new theme/template.

1 FILE MENU

File menu contains a **list** of various commands to perform different functions like : creating a **new** project, **saving** the project, **opening** project, **exporting** the project and many more. For details, please refer the [File Menu](#) section.

2 Quick Access Toolbar

QAT displays a list of **frequent** actions performed by user: **Undo**, **Redo**, **Save**, **Open file**, **Preview**, **Export**. Please refer the [Quick Access Toolbar](#) Section for detailed explanation of these options.

3 GENERAL TAB

General Tab facilitates various options for designing a theme/template/website. These options include sample **Templates**, **Color scheme** and **Typography**, **layout**, **CMS** Selection option, Add/Edit page template, CSS and Javascript editors, and **favicons**. Refer the [General Tab](#) section for details.

4 BODY TAB

BODY

This tab contains options for designing the body of the theme/template or website. You can choose **background**, **texture** and **effect**, type of background i.e **fixed/scroll** and you can also customize the **scroll** up button for the template body from [Body Tab](#).

5 CONTAINER TAB

CONTAINER

This tab displays various options for deciding the **background**, **layout** and **effects** for the page. For further elaboration, please refer [Container Tab](#) section.

6 HEADER TAB

HEADER

This tab includes options for designing the header which includes header **position**, **background**, **layout**, **effects**, **foreground** images, **text areas**, **title** and **slogan**. It also contains settings for configuring the **logo** and **social media icons**. For details, please refer [Header Tab](#) section.

7 MENU TAB

MENU

It displays options to design the menu. Such as: some **preset styles**, **menu position**, **background**, **layout**, **effects**, **logo**, **foreground image**, **text areas**, **menu button** designing, **submenu** designing and **edit** menu. These all options are elaborated in [Menu Tab](#).

8 SIDEBAR TAB

SIDE BAR

Side Tab has options for designing the sidebars, such as: **sidebar position**, **background**, **layout**, **effects**, **height**. Please refer [Sidebar Menu](#) for details.

9 CONTENT TAB

CONTENT

It Includes all the options for designing the content part of the template/website. It has some **preset styles** for content, various options to set content properties, background, typography, texture, effects, shadow, lists, and table. Offers similar options for designing the **posts** and the **comment form** and the **comments**. Even, you can export theme with no or dummy content and **add new content later** from the WordPress dashboard. For further details, refer [Content Tab](#) section.

10 FOOTER TAB

FOOTER

This tab has options for designing the footer part of template or website. It has **preset styles** of footer, options for **layout** and **background designing**, choosing **texture**, **effects** and **shadow**, **browsing**

custom images to add in the footer, drawing **text area**, choosing **footer typography** and **social media configuration settings**. For more details, see [Footer Tab](#).

11 WIDGET AREAS TAB

WIDGET AREAS

This tab gets active when you select WooCommerce, WordPress, Magento, Joomla, Opencart. **Module Position Tab** will appear in place of Widgets Tab If you choose **Joomla**. **Block Reference Tab** will appear if you choose **Magento** or **OpenCart**. It has features to design the **widgets/Module/Block**, like: container properties ,container background, header properties, header background, texture, effects, shadow, border, height, typography, content properties and content background. Let's move to [Widget Areas Tab](#) to know more about it.

12 ELEMENTS TAB

ELEMENTS

Element tab contains options for designing the BOOTSTRAP based elements like **Buttons**, **Input field**, **Pagination**, **BreadCrumb**, **Block Quote**, **Label**, **Alert**, **Badges**, **Line**, **Check Box**, and **Radio Button**. Please refer [Elements Tab](#) Section for details.

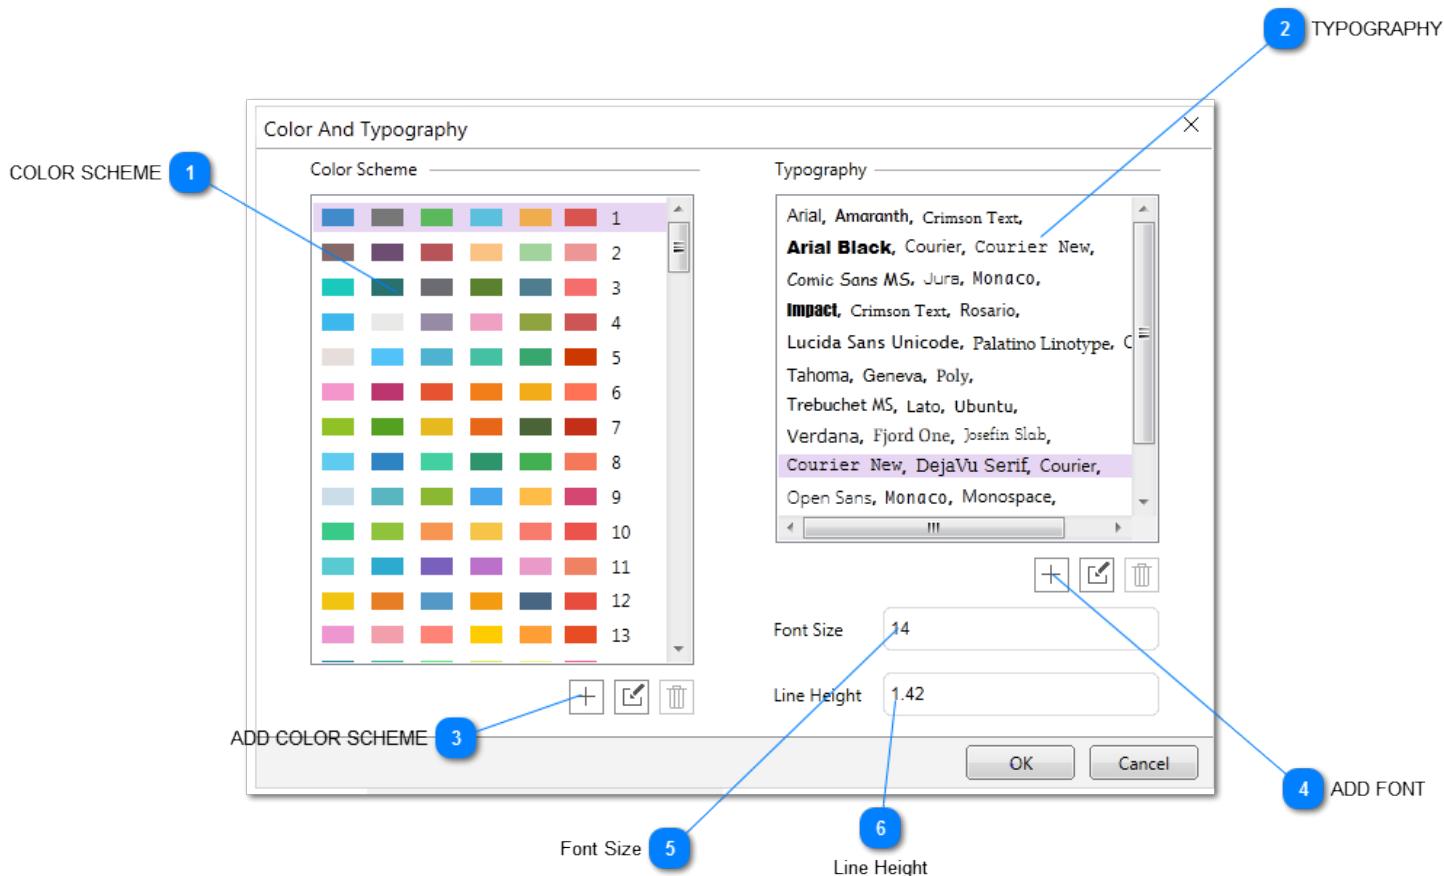

13 SLIDESHOW TAB

SLIDESHOW

It includes all options for creating a slideshow such as: **slideshow position**, **transition effects**, **button**, **pagination**, **background**, **layout settings**, **effects** (texture, effects, shadow), **foreground images**, **text area** and **logo browsing**. If you want to remove the slideshow from your theme/template/website then just uncheck the checkbox. You can get further information in [Slideshow Tab](#).

3.1.4. Choose Color Scheme & Typography Options

This screen will display on the main window by default, so you can choose a color scheme and typography for your project beforehand. If you would like to change the color scheme and typography later too, you can do it easily by selecting the **General tab --> Scheme**. TemplateToaster provides the flexibility to change the text style anytime during the designing process.

1 COLOR SCHEME

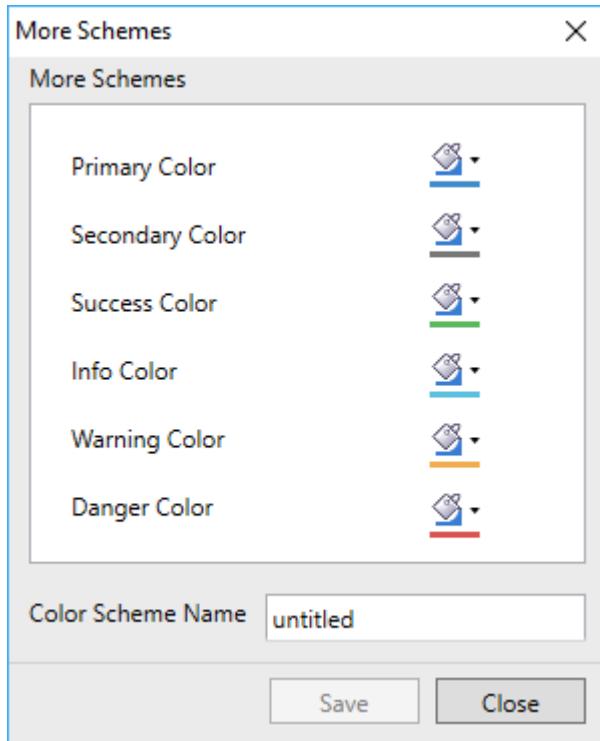

TemplateToaster avails you with the hundreds of pre-installed color schemes which are BOOTSTRAP based. You can see all the color schemes by scrolling the list down and choose the desired-one for your project.

2 TYPOGRAPHY

For defining the text style of your template/website, you are given typography options such as Font Family, Font Size and Line Height. You can specify the font size and line height in the corresponding boxes given or go with the default values.

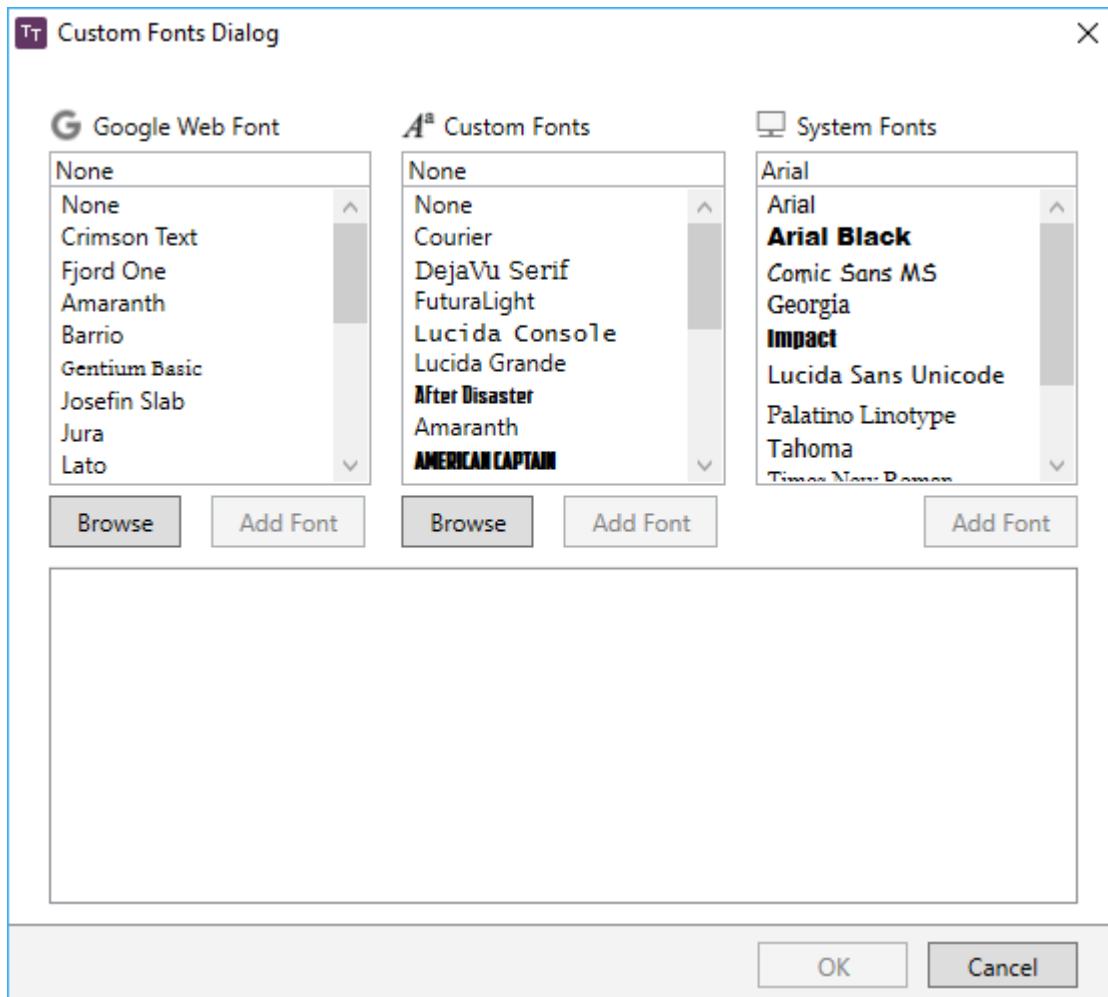

3 ADD COLOR SCHEME

Even you can customize your own color scheme with "+" button given under the color scheme list. When you click this button, the **More Schemes** dialog will open as shown below. You can select different **Primary, Secondary, Success, Info, Danger, Warning** colors to specify a new color scheme and name it as you wish. For details, [see this](#).

4 ADD FONT

When you click the "+" button under the typography list, a new dialog will appear as shown below. In this **Custom Fonts Dialog Box**, you can browse more fonts from a huge collection of **Google Web Fonts**, **Custom Fonts** and **System Fonts**. So, you can add any font into the Typography list according to your need. For more details, [see this](#).

5 Font Size

In this text box, you can specify the required font size for the chosen typography scheme. By default, its 14.

6 Line Height

This is to specify the line height where the default line height is 1.42. You can make changes as per your need.

1.2. Preview & Export Theme/Template

-Preview of a Theme/Template:

Before exporting, you can preview your theme/template that how it looks on browser. For that, we have two methods:-

1) Quick Access Toolbar : Select preview option from Quick Access Toolbar where you can also make choice for required browser.

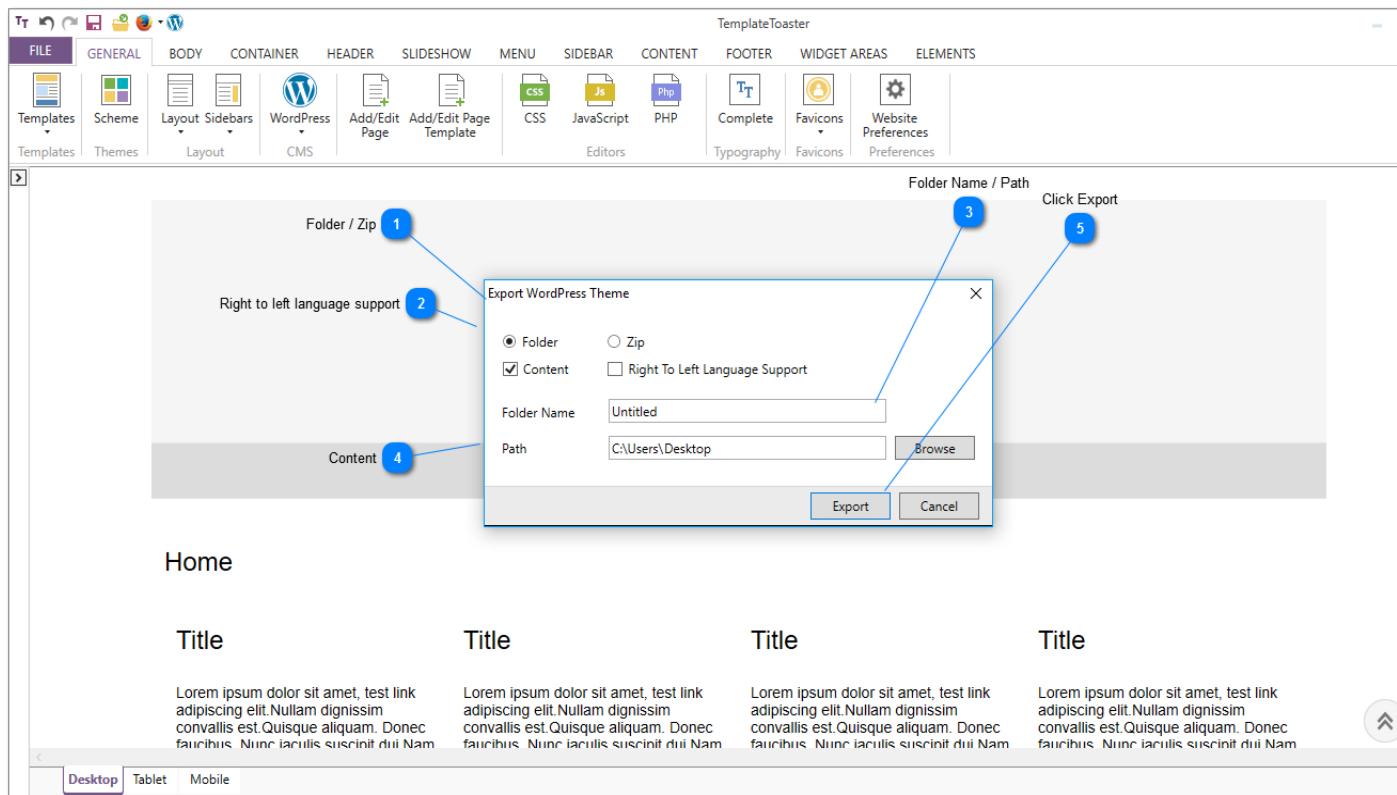

2) File Menu : **Select File Menu --> Preview .**

-Export a Theme/Template:

Now, you can export your design/theme/template in WordPress by clicking this button and at the same position, you will get the export option of the CMS you are working on.

A screenshot of the TemplateToaster software interface. The top menu bar includes FILE, GENERAL, BODY, CONTAINER, HEADER, SLIDE SHOW, MENU, SIDEBAR, CONTENT, FOOTER, WIDGET AREAS, and ELEMENTS. A red box highlights the 'GENERAL' tab. Below the tabs are various tools for template editing, such as Templates, Themes, Layout, CMS, Editors, and Preferences. On the left side, there's a sidebar with sections for Pages (Home, About Us, Contact), Blog, and Page Templates (Page Template). The main preview area shows a website layout with a header containing a 'Website Logo', a navigation bar with links to Home, About Us, Contact, and Blog, and a content area titled 'Home'. Below the content area, there are four columns, each with a title and placeholder text. At the bottom, there are tabs for Desktop, Tablet, and Mobile, with the Desktop tab selected. A watermark 'TemplateToaster' is visible across the preview area.

2. After clicking the Export button you will get a screen as shown below:

1 Folder / Zip

Right To Left Language Support

In this screenshot you can see that you have an option of exporting the theme/template in the folder or zip form, so you can select accordingly that you want your theme to be in zip or in folder form.

2 Right to left language support

Folder Name Untitled

If you want your theme to Support Right to Left Language then you just need to check the checkbox of 'Right To Left Language Support'.

3 Folder Name / Path

Path C:\Users\Desktop

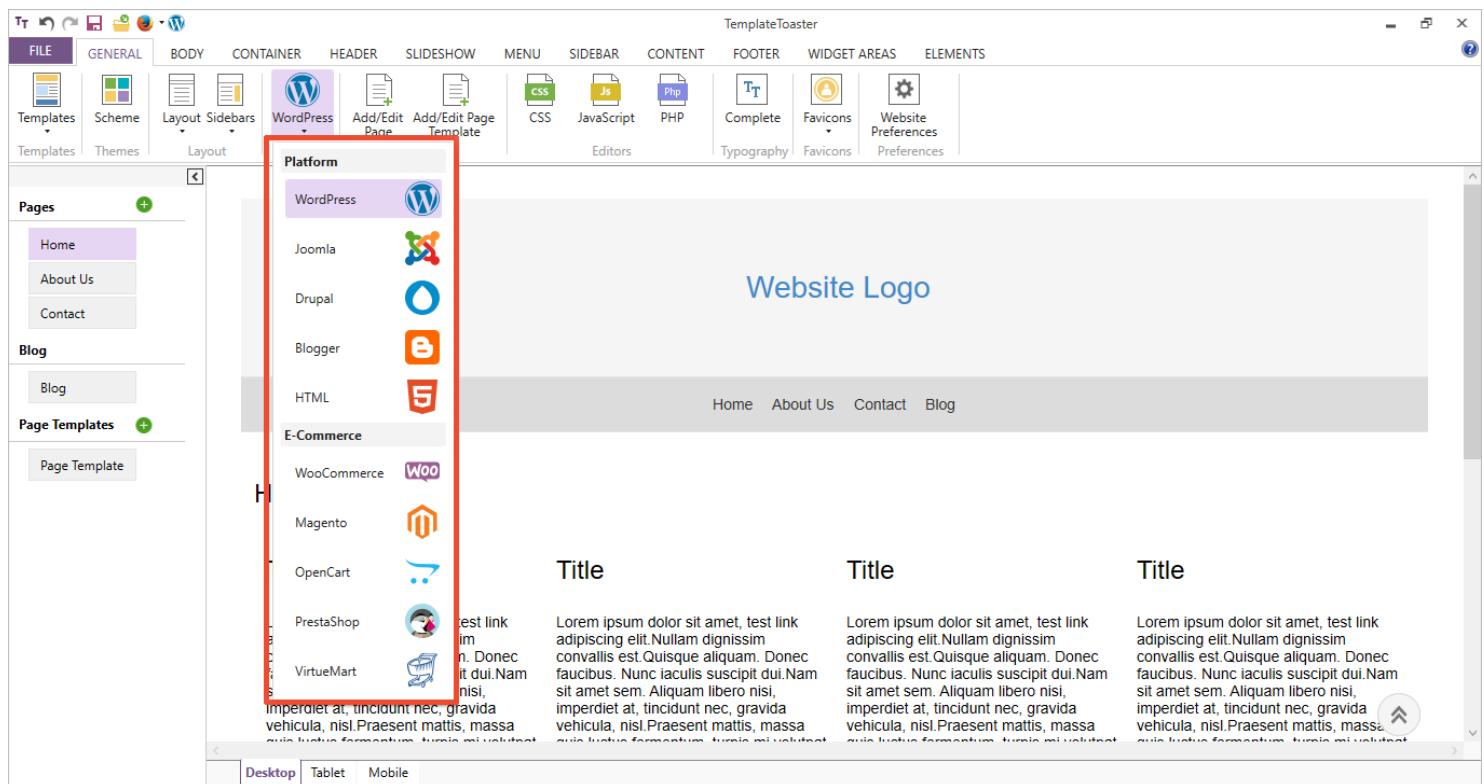

After that select the folder name and path accordingly.

4 Content

Content

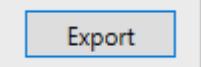

This check box facilitates you to export the template with/without content .If you check it, the template will be exported with content.

3. You can Export your theme/template in different CMSes . As you can see in the screenshot shown below that there are 10 different CMSes, so you can export your theme for your desired CMS the same way as you have exported in WordPress (Explained Above).

If you are unable to understand something while using our software, you can connect to us anytime through [Contacts](#).

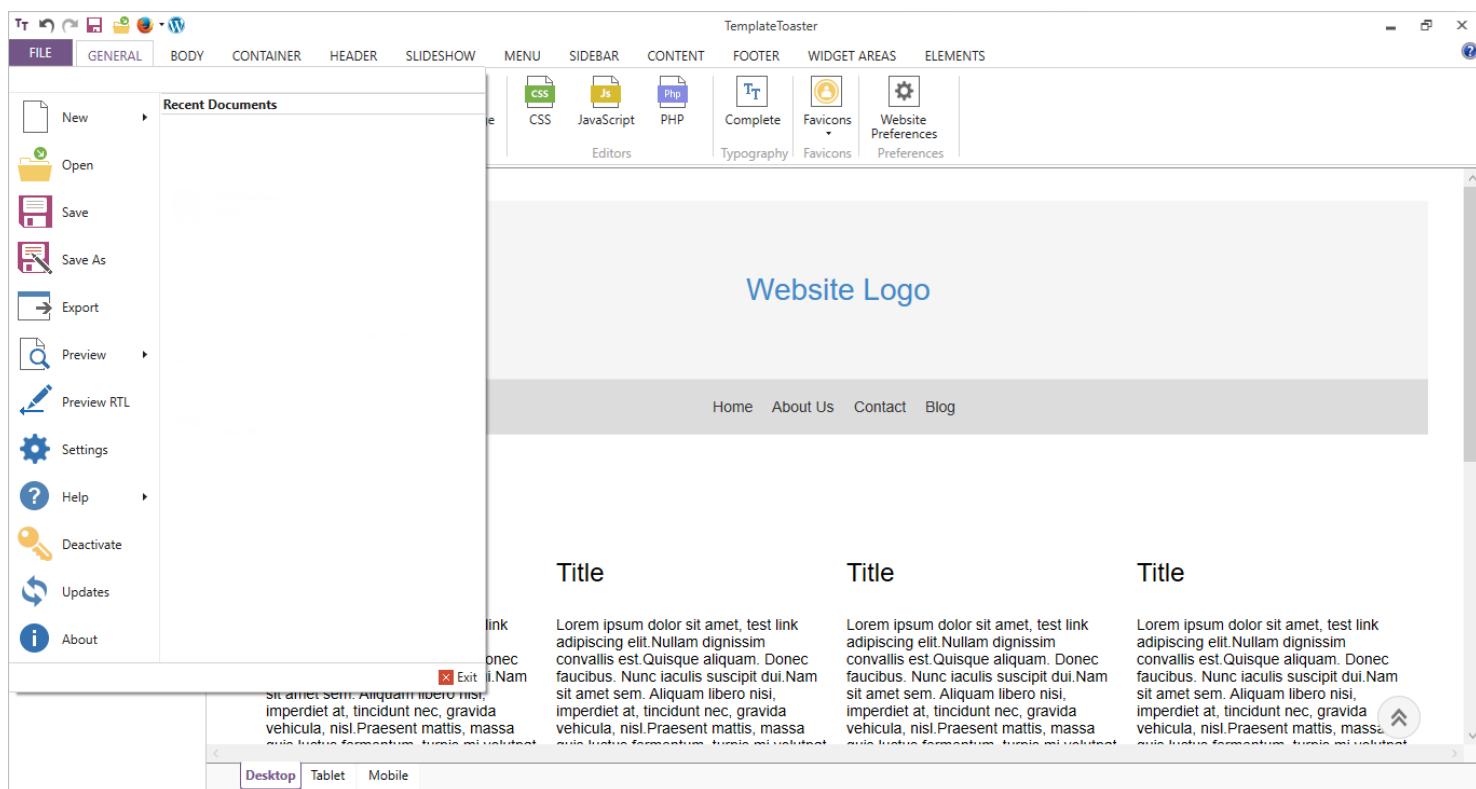

Click Export

5 

Click on Export. Your theme will be exported safely.

1.3. Saving a Project

Once you activated the product, you can also save your project for future references. So to save a project, you have following options:

1 Save Button

When you are done with the designing part of your theme/template, you can save it by simply pressing save button from top menu of the screen.

2 Save

Save

You can also save your theme/template by choosing the '**Save**' option from **FILE** menu.

3 Save As

Save As

You can select the '**Save As**' option from the **FILE** menu to change the location of your project or to create a new copy of it .

4 Close Button

After saving your theme/template you can close it by simply pressing  Close Button. You can use the same theme/template in future by opening it and that will be discussed in detail under [Opening Project](#) part.

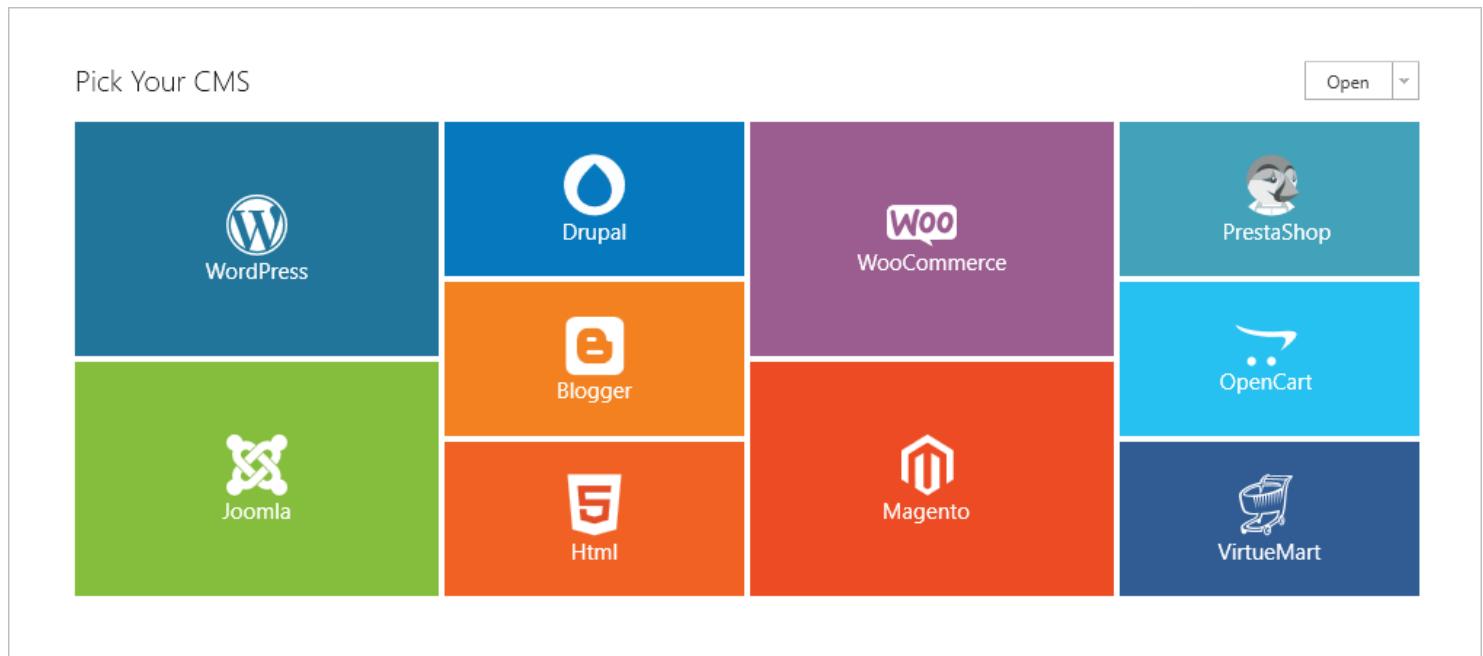

1.4. Opening a Project

In this section, you will see how you can open your saved theme/template. There are two methods for opening a project as following:

1. From Start-up Screen

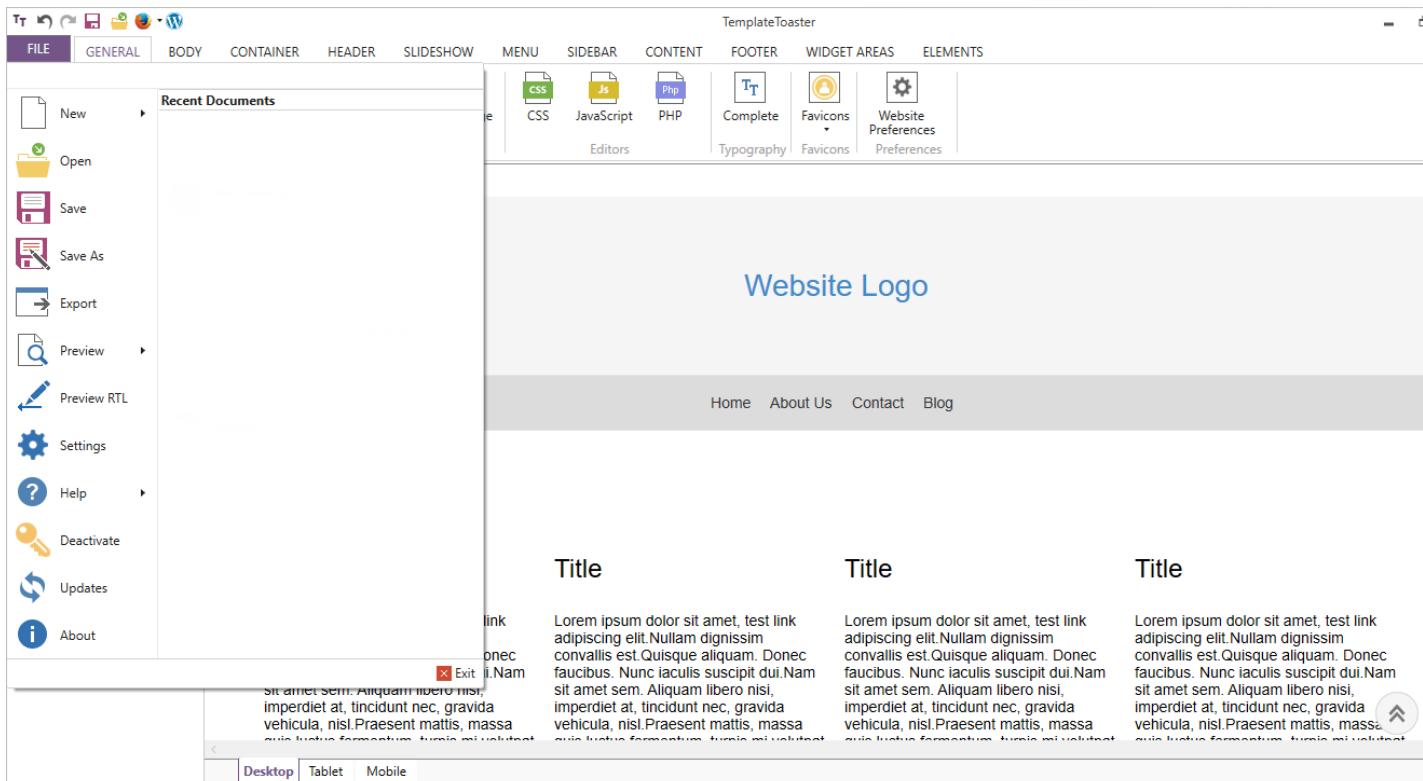

You can select the '**Open**' option from the startup screen as shown below. When you select 'Open', a browse window will open. You can locate your project there and a "Double - Click" on the desired project will open it in Template Toaster.

If you want to open any **recent project** then just click the **arrow** to get a list of recently opened projects. Just select the desired project to open it .

2. From File Menu

You can also select the **Open** option from the **FILE** menu and can open your desired theme/template.

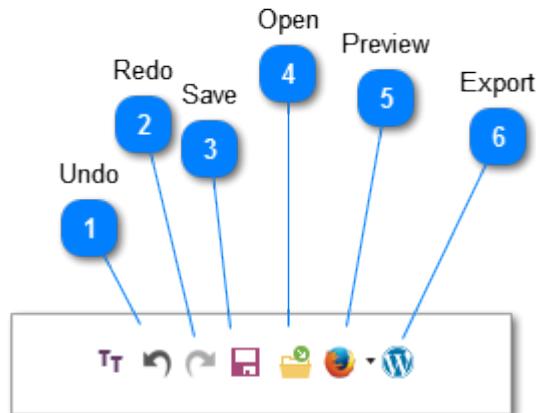

2. Design Your Template

For designing theme/template, there are various options which are provided in TemplateToaster. These options are as follows :

- [Quick Access Toolbar](#)
- [File Menu](#)
- [General Tab](#)
- [Body Tab](#)
- [Container Tab](#)
- [Header Tab](#)
- [Slideshow Tab](#)
- [Menu Tab](#)
- [Sidebar Tab](#)
- [Widgets/Modules/Block](#)
- [Sidebar Menu](#)
- [Content Tab](#)
- [Footer Tab](#)
- [Widget Areas Tab](#)
- [Elements Tab](#)
- [Editor Tab](#)
- [Dialog Boxes](#)

2.1. Quick Access Toolbar

The Quick Access Toolbar allows you to accomplish some tasks that are very frequently required by the user. The options available in the toolbar are undo, redo, save, open, preview and export.

1 Undo

Removes all the changes that you have made in the current working session.

2 Redo

Restores the changes that have occurred since the last **Undo**.

3 Save

Saves the changes that you have made in the Theme/Template/Website under the (.ttr) file extension. **Ctrl + s** can be used for the same results. It is a shortcut to the save option in the file menu.

4 Open

Opens an existing (.ttr) file on your system. The **open** option is a shortcut to the Open Tab present in the **File** menu. The same task can also be performed through **Ctrl + o**.

5 Preview

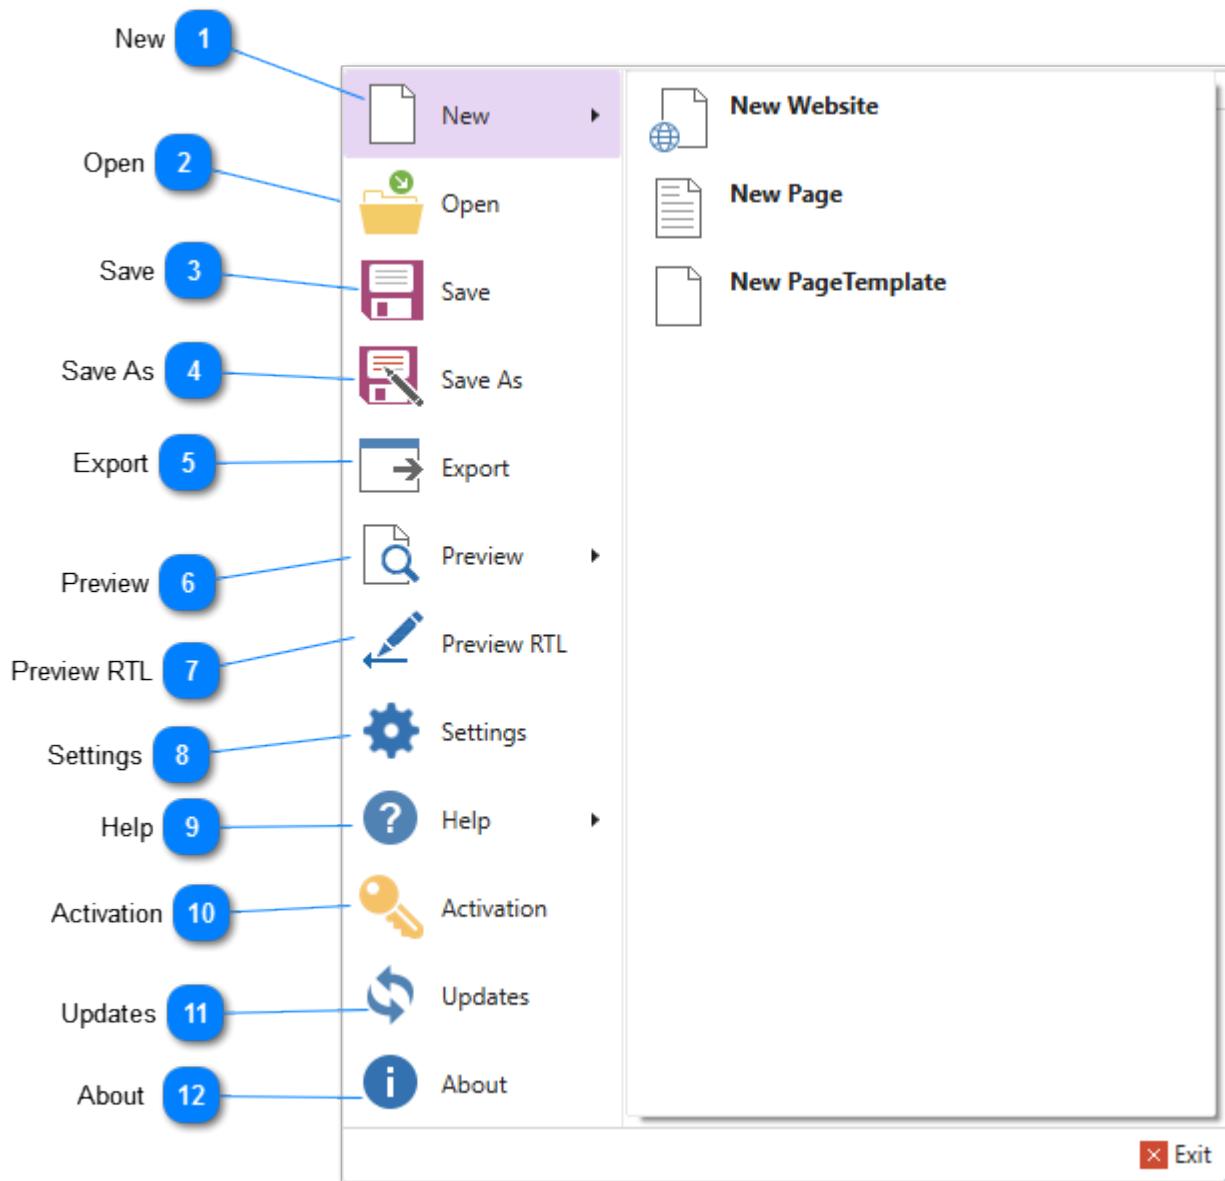

Gives a preview of the current Theme/Template/Website in the browser window. The **preview** option also facilitates you to select the browser you want to use for the preview by clicking on the small drop-down arrow.

6 Export

Provides the functionality to export the theme/template/website that you have designed using TemplateToaster. A detailed step by step information is present [here](#).

2.2. File Menu

1 New

Gives you the choice to open a new website, a new page, or a new page template.

2 Open

With this option, you can open any existing TemplateToaster project (.ttr). You can also use **Ctrl + o** shortcut to open an existing .ttr file.

3 Save

Save

Saves your TemplateToaster project (.ttr). You can also use **Ctrl+ s** shortcut to save your file. You should frequently save your work to avoid any accidental loss of data.

4 Save As

Save As

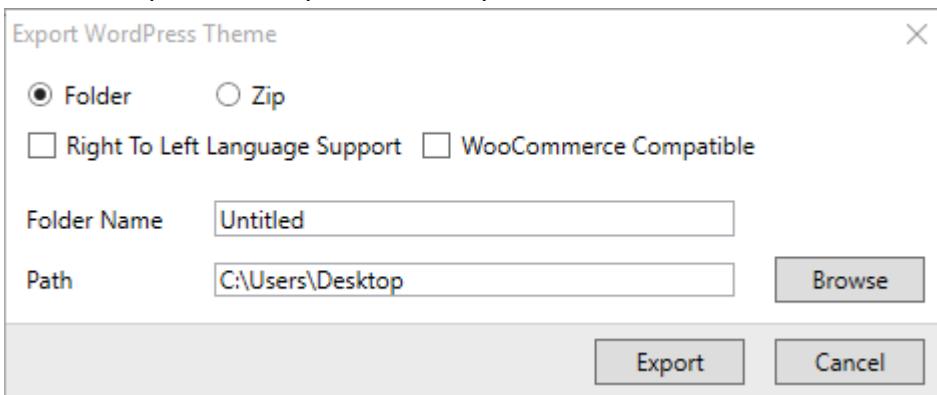

Avails the user to save the same (.ttr) file with a different name and/or at a new location. Basically, it provides the functionality of producing multiple copies of the same (.ttr) file.

5 Export

Export

Exports the template to install on your CMS (WordPress, Joomla, Drupal, Magento Prestashop, Blogger). You can export the template into a Zip file or a folder.

6 Preview

Preview

Gives a **preview** of your template/website in the browser or you can use **Ctrl + p** shortcut, that will also serve the same purpose.

7 Preview RTL

Preview RTL

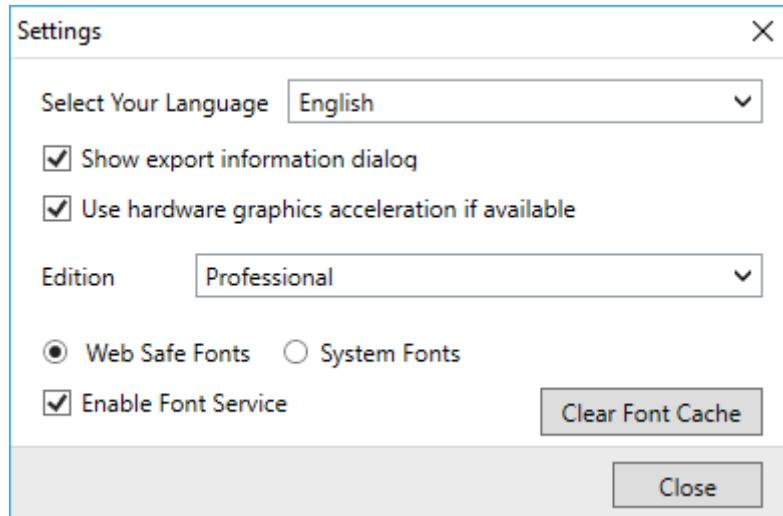

Gives the preview of your template/website in RTL format (for Right to Left languages like Arabic).

8 Settings

Settings

Helps the user to make some important **Application and Font Settings**. When you click **Settings**, the following window will open:

- **Select Your Language**

Template Toaster offers you a range languages top choose from, in which you are comfortable to work. Such as Arabic, Danish, Dutch, English, French, German, Spanish, Turkish and much more.

- **Show export information dialog**

If you want to view the Export Template Dialog Box, Check it. By default, this is checked.

- **Use hardware graphics acceleration if available**

Uncheck this option if your application is running too slow. This could be due to bad graphics drivers.

- **Edition**

It displays the type of TemplateToaster Edition you choose at the time of Installation. Standard Edition allows you to create templates but with limited features.

Professional Edition enables advanced functions that boost productivity when working with large and complex websites. By using this, you will be able to use all the extended features of TemplateToaster.

- **Web Safe Fonts**

You might know that operating systems have a pre-installed set of Fonts. A user can't see the fonts of a particular system on another system. But, there are some fonts which can be visible by the user on all types of operating systems. Those fonts are called Web safe fonts and are recommended by the seasoned designers. By checking this option, you can avail web safe fonts.

- **System Fonts**

You can use any font that is supported by Windows if you select this option.

- **Enable Font Service**

If checked, a font cache will be maintained.

- **Clear Font Cache**

This is used to clear the old font cache.

Redirects you to the online tutorial of Wordpress, Joomla, Drupal, and rest of the CMSs supported by TemplateToaster.

Activation

Activation

10

Helps the user to enter the activation code in input field to activate the software.

Updates

Updates

11

Provides the information about latest update of TemplateToaster if available.

About

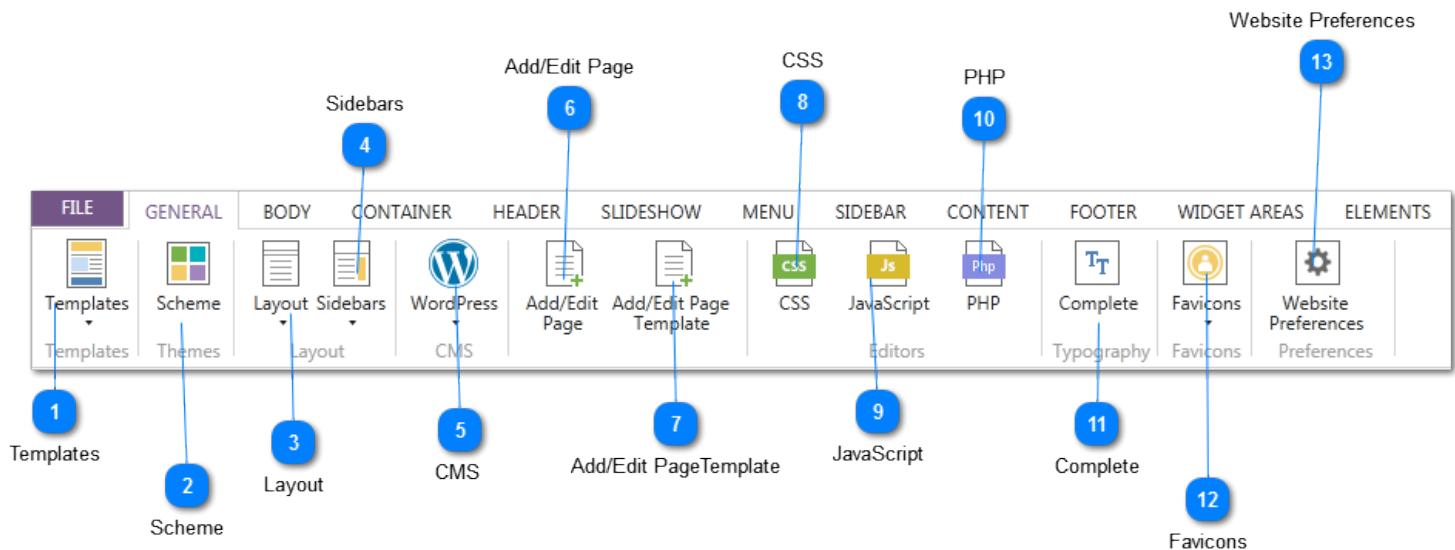

About

12

Displays your license information like Version, Mode, Activation key etc.

2.3. General Tab

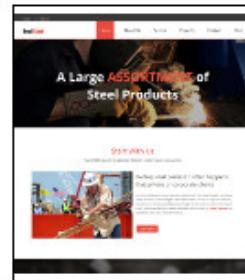

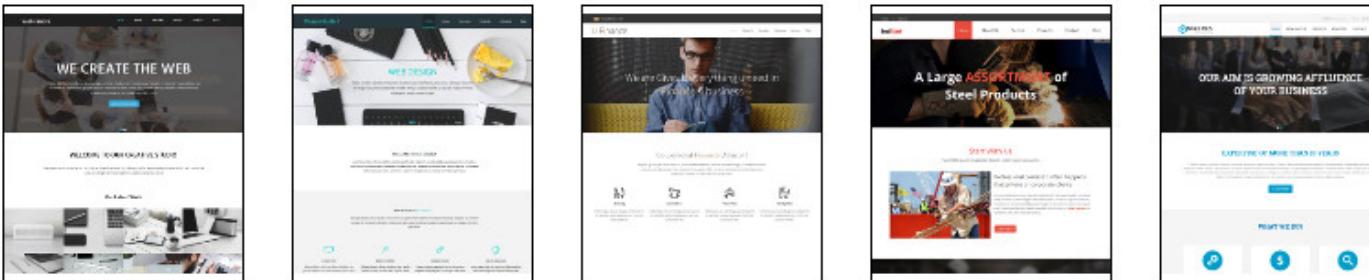

1 Templates

Templates

Displays a **gallery of sample templates**. You can choose any of these or can access more templates at your by clicking '**More Templates**'.

Sample Templates

More Templates

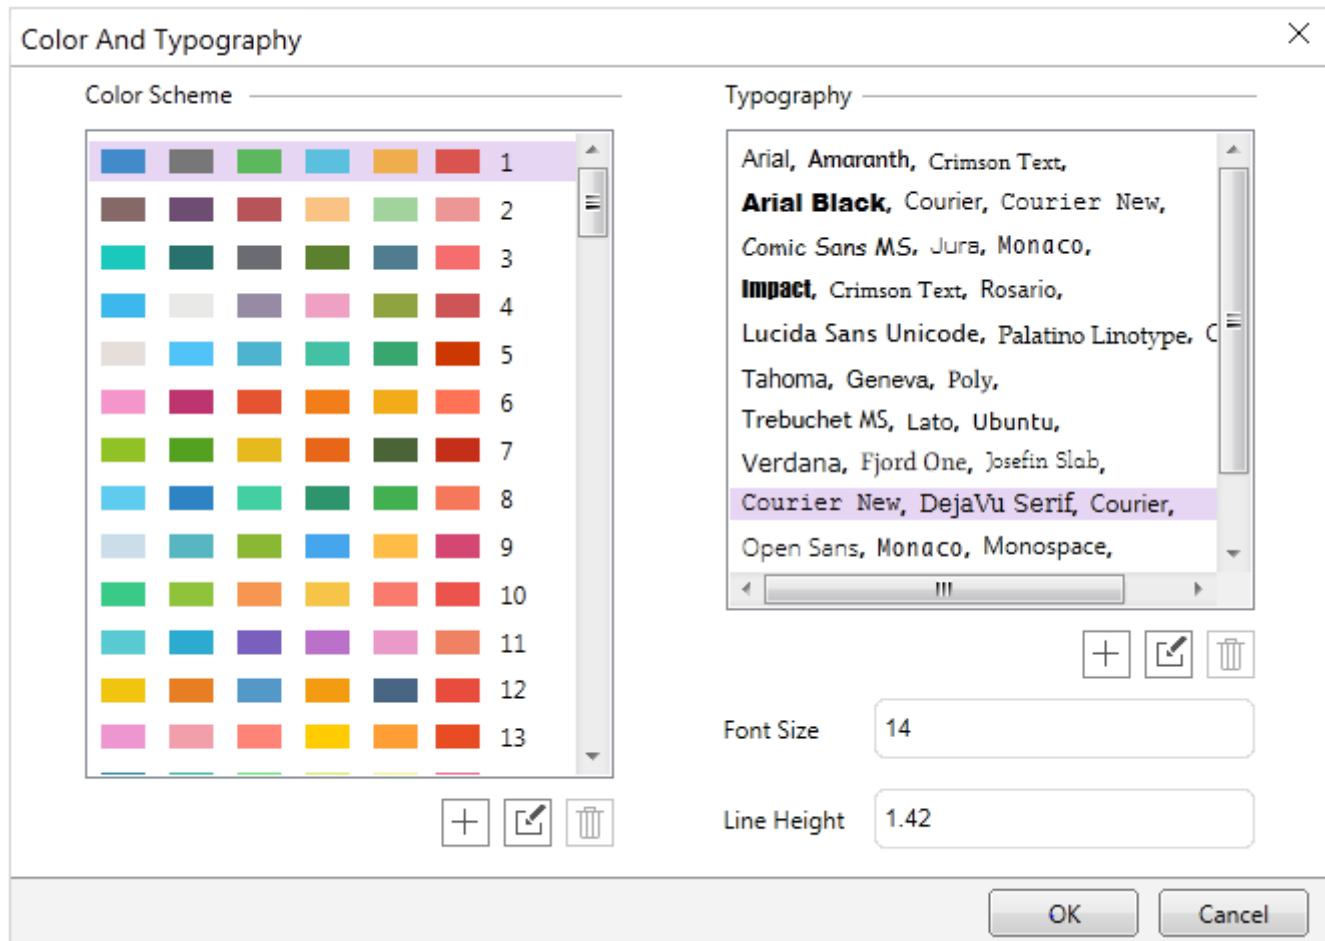

2 Scheme

Scheme

When you click the 'Scheme' option , a Color And typography window will open. From this, you can select any color scheme out of the hundreds or can customize one of your own. Similarly, you can choose a font typography that will reflect its effects in main window content as you hover the list of typography.

Even you can **add new Color scheme** and **font typography** , in addition you can edit the existing schemes too. For further details, please refer [Choose Color Scheme & Typography options](#) section.

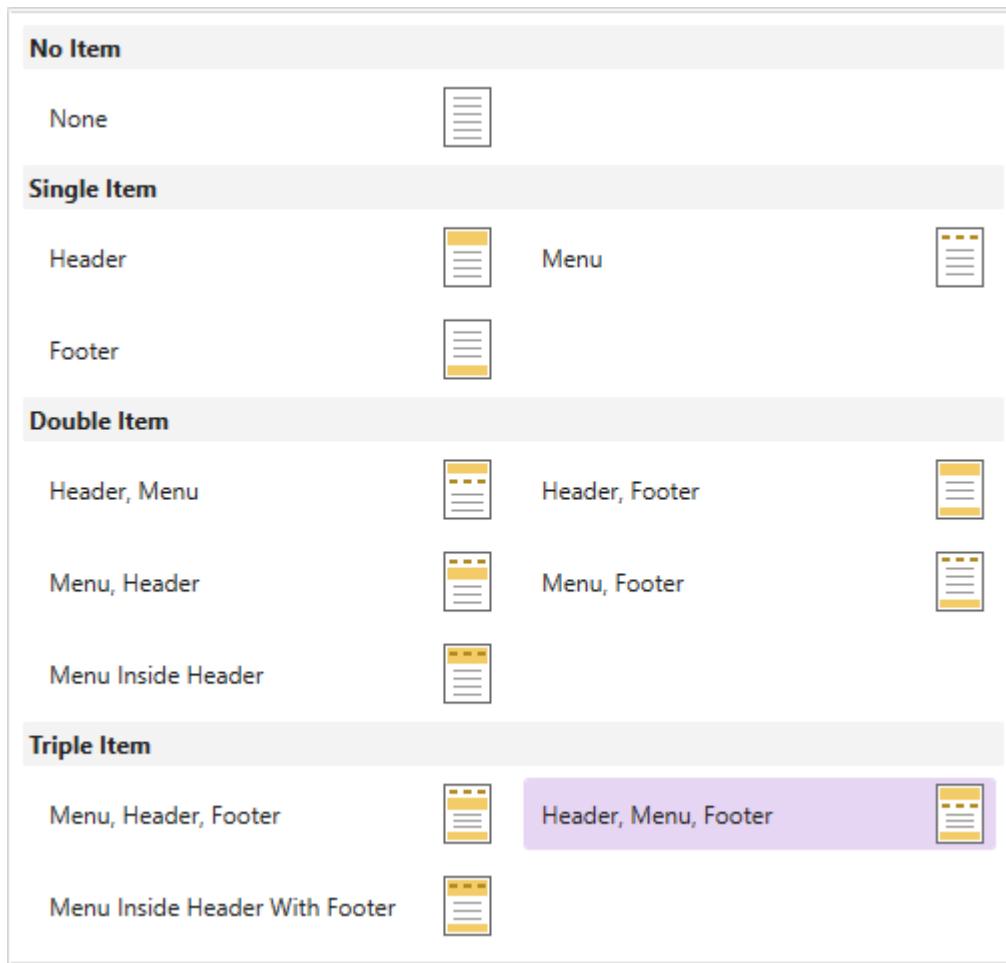

3 Layout

Layout

The window shown below will open when you click **Layout** and from here, you can select the any layout for template/website like Singe Item, Double Item, Triple item as per your need.

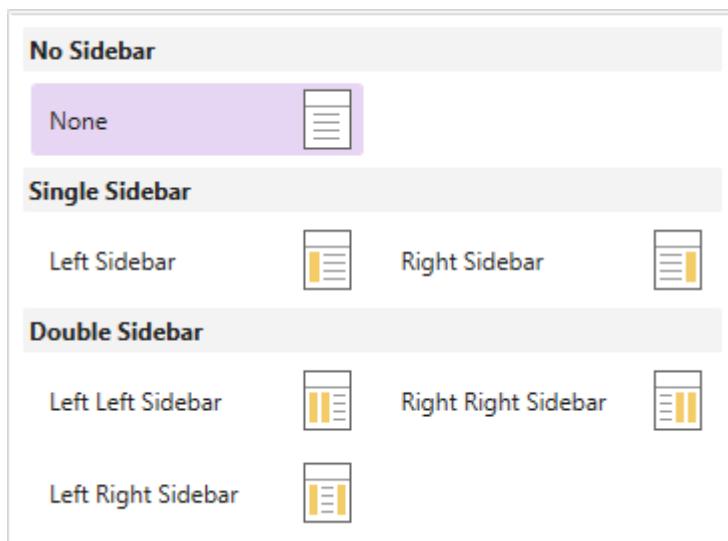

4

Sidebars

Sidebars

From Layout Group, click **Sidebars** to select sidebars for your template or website. Sidebars are vertical columns along the main content area of the template or website. You can place widgets/modules/blocks in the sidebars according to your need.

5 CMS

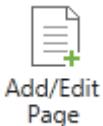

WordPress

You can switch from one template type to another with a single click on the **CMS**. For example, you can switch from WordPress to Joomla or any other type of CMS from the list shown below.

A screenshot of a software interface showing a list of platforms and e-commerce options. The list is organized into two main sections: "Platform" and "E-Commerce".

- Platform**
 - WordPress (selected, highlighted in purple)
 - Joomla
 - Drupal
 - Blogger
 - HTML
- E-Commerce**
 - WooCommerce
 - Magento
 - OpenCart
 - PrestaShop
 - VirtueMart

6 Add/Edit Page

Add/Edit
Page

In WordPress, HTML and WooCommerce; the Add/Edit Page dialog box will open when you click this option. From here, you can add/edit any desired page of your template or website.

Add/Edit Page

Home	<input type="button" value="Modify"/>
About Us	<input type="button" value="Delete"/>
Contact	
Name <input type="text"/> <input type="button" value="Add"/>	
Title <input type="text"/>	
Name should not contain special characters except - and _(underscore). First letter should not be a digit.	

7 Add/Edit PageTemplate

Add/Edit Page Template

Use this to add/edit desired page templates with Name and Title particulars in WordPress. A page template defines what design elements surround the content of a page (i.e. header, sidebar, footer etc).

Add/Edit Page

Page Template	<input type="button" value="Modify"/>
<input type="button" value="Delete"/>	
Name <input type="text"/> <input type="button" value="Add"/>	
Title <input type="text"/>	
Name should not contain special characters except - and _(underscore). First letter should not be a digit.	

8 CSS

CSS

Avails you to apply Custom Styles to your theme by appending the code in **style.css** file.

9 JavaScript

From Editors group, select JavaScript to add Custom Javascript to your theme that embeds the scripts in **custom.js** file.

PHP

10

Facilitates you with a PHP editor on a single click that will append the written code within the **functions.php** file.

The screenshot shows a 'PHP Editor' window with the title bar 'PHP Editor'. The main area contains the following PHP code:

```
1 <?php /* The PHP code written in this window will append within the functions.php file. */
2
3 ?>
```

At the bottom right of the editor window are two buttons: 'Save' and 'Cancel'.

Complete

11

Complete

A **Website Typography** wizard will open , when you click Complete. Select the item where you want to apply the typography changes - Headings (H1 to H6), Text (i.e. Paragraphs) or Complete and then choose the element from left panel. Choose font, font style, font size, font color, alignment, and effects from the options lying on the right side of the wizard. Click "Save" to apply the changes you made. For complete information about this, you can see [Website Typography](#).

Favicons

Favicons

Use to apply a Favicon on your website. TemplateToaster provides a huge collection of pre-designed Favicons from which you can make a selection.

You can also browse your own favicon with a single click on '**More**'.

Website Preferences

13

Website Preferences

Facilitates the user to set preferences for the website. A **Preferences** dialog will help the user to make following settings:

Preferences

Responsive Layout	<input checked="" type="checkbox"/>
CSS Prefix	ttr_
Theme Version	1.0
Theme URL	www.templatetoaster.com
Author Name	TemplateToaster
Author URL	www.templatetoaster.com
License	GNU
License URL	http://www.gnu.org/licenses/gpl-2.0.html

-CSS Prefix

Adds a desired css rule to every matching style tag of a class and ID of the exported template/theme/site.

-Author name

Edits the name of author to include your name.

-Author URL

Displays the homepage url of theme author.

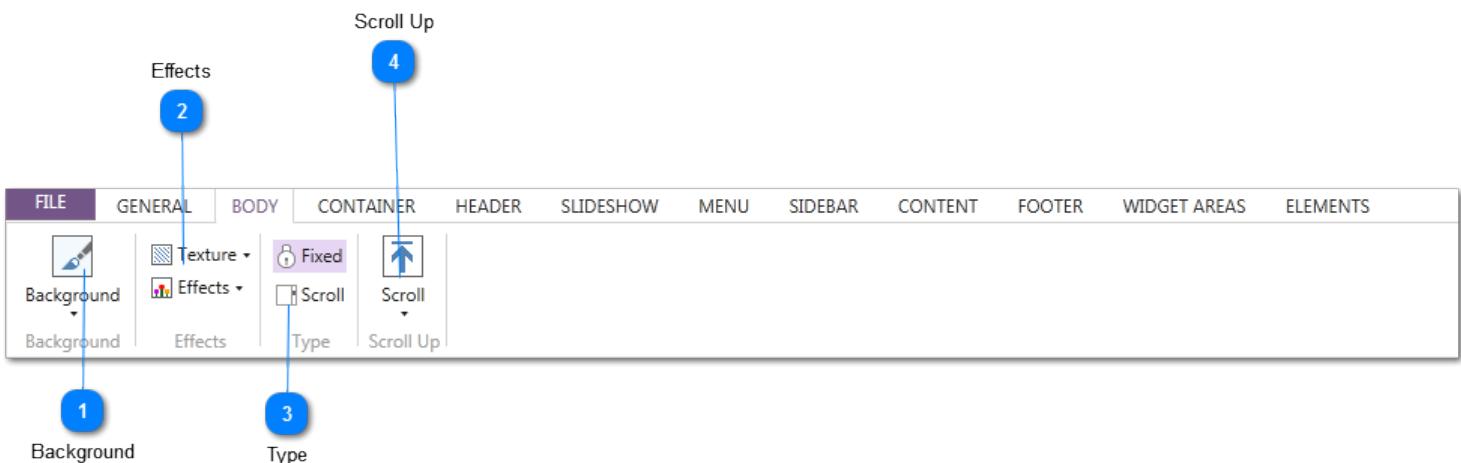

-License

Provides the license for your theme.

-License URL

Provides the Uniform Resource Locater (URL) for the license.

2.4. Body Tab

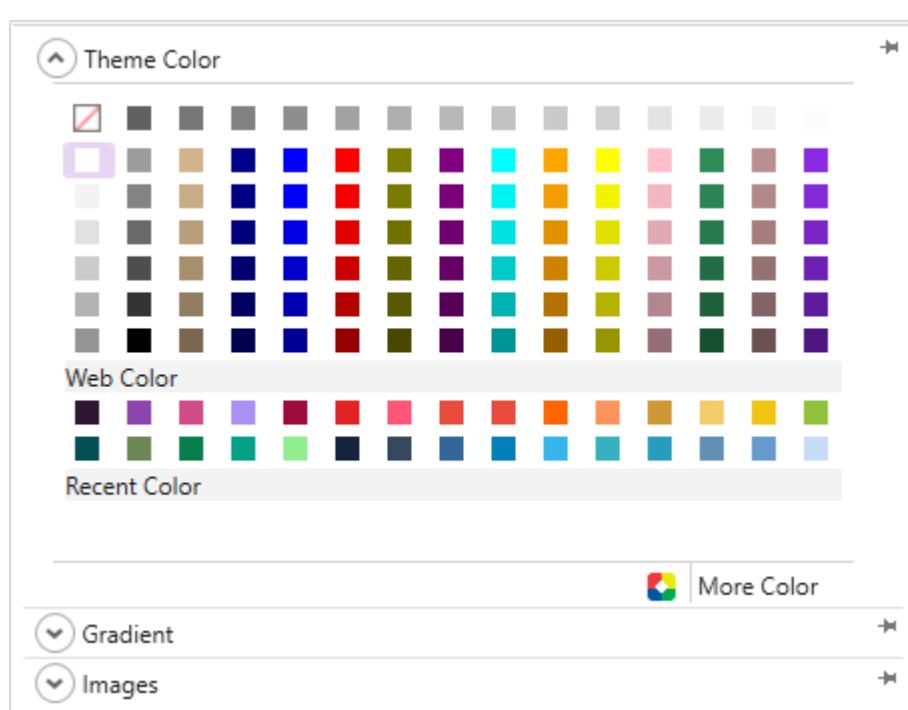

1 Background

Background

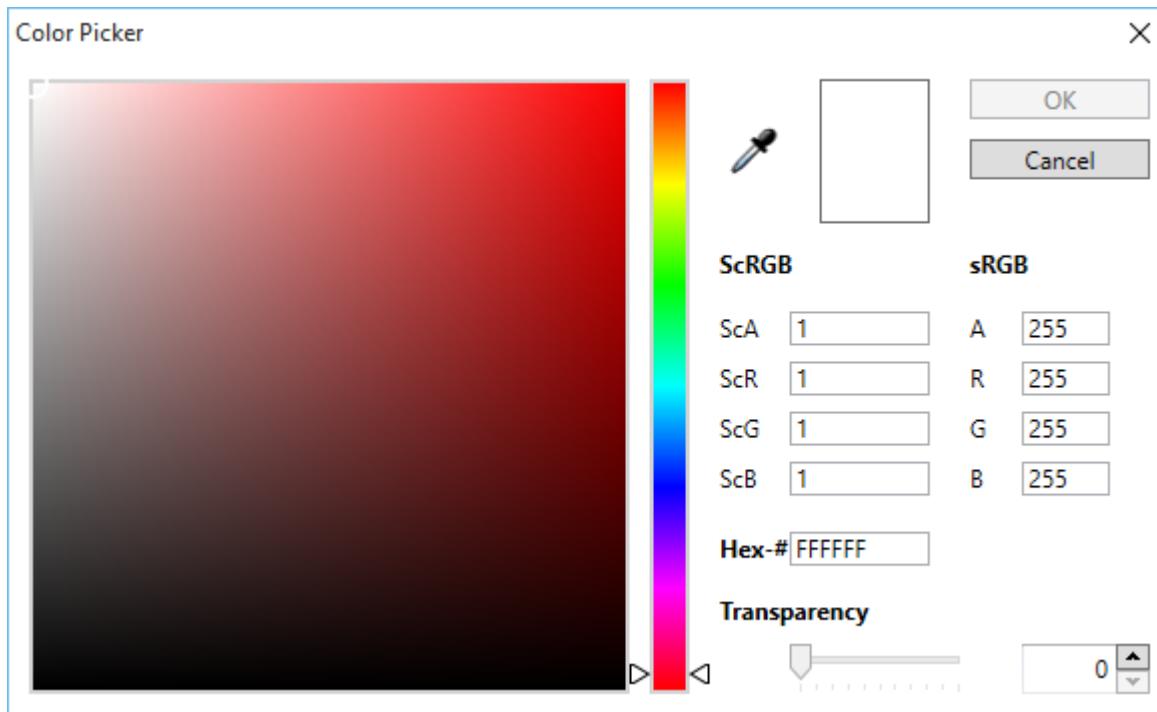

▼

Applies a preferred color, gradient, or image to the **body background** of your template or website. TemplateToaster offers extended background options:

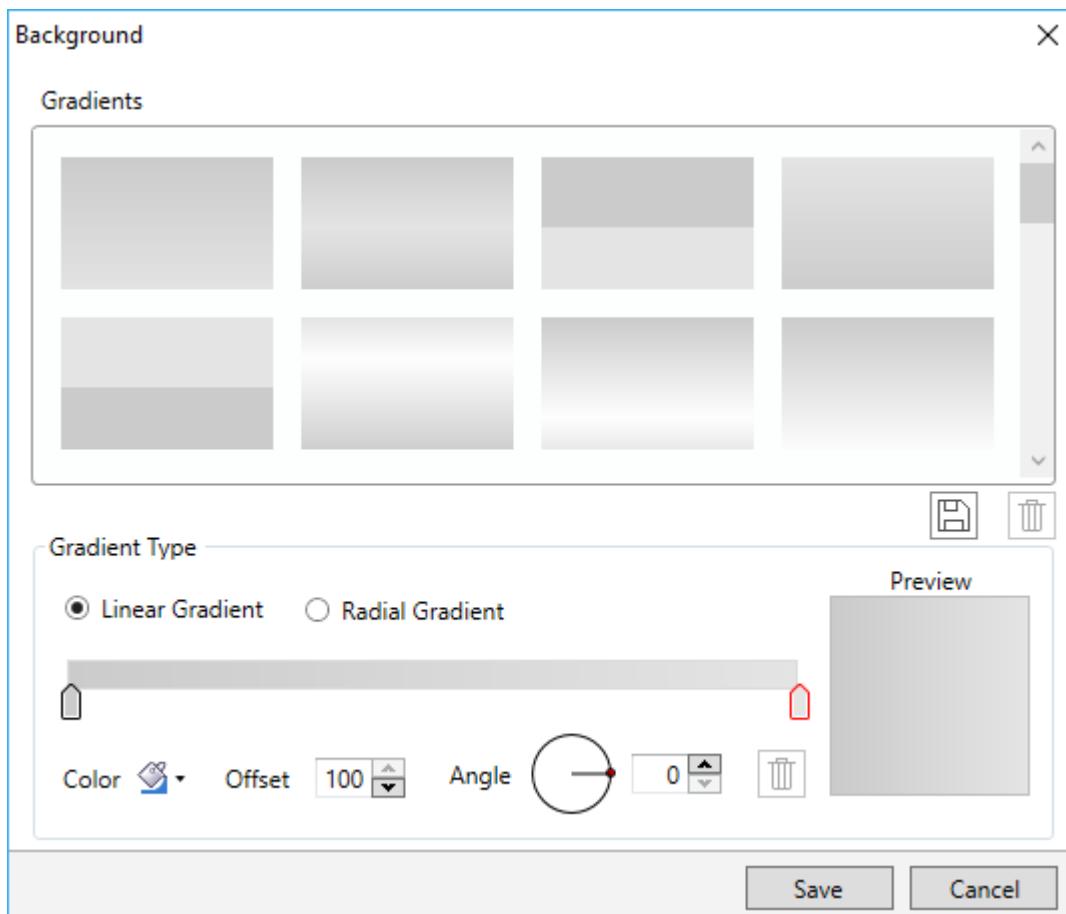

Color picker-

TemplateToaster gives you a color picker to choose a color for the background. [Here is](#) the full description, for

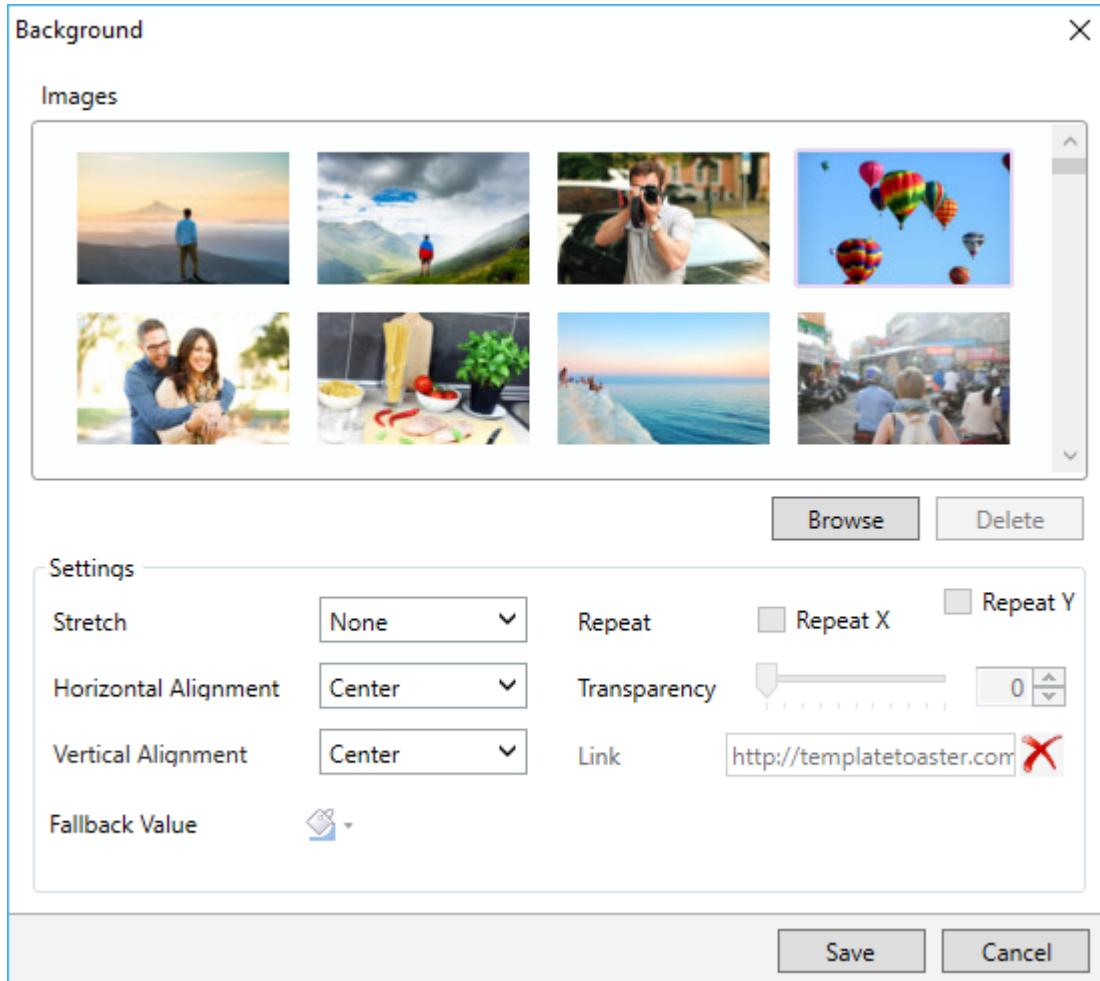

Custom Gradient-

You can create custom gradients with a preferred angle, color and offset choices for template body. You can see more information about creating and saving the custom gradients, [see this](#).

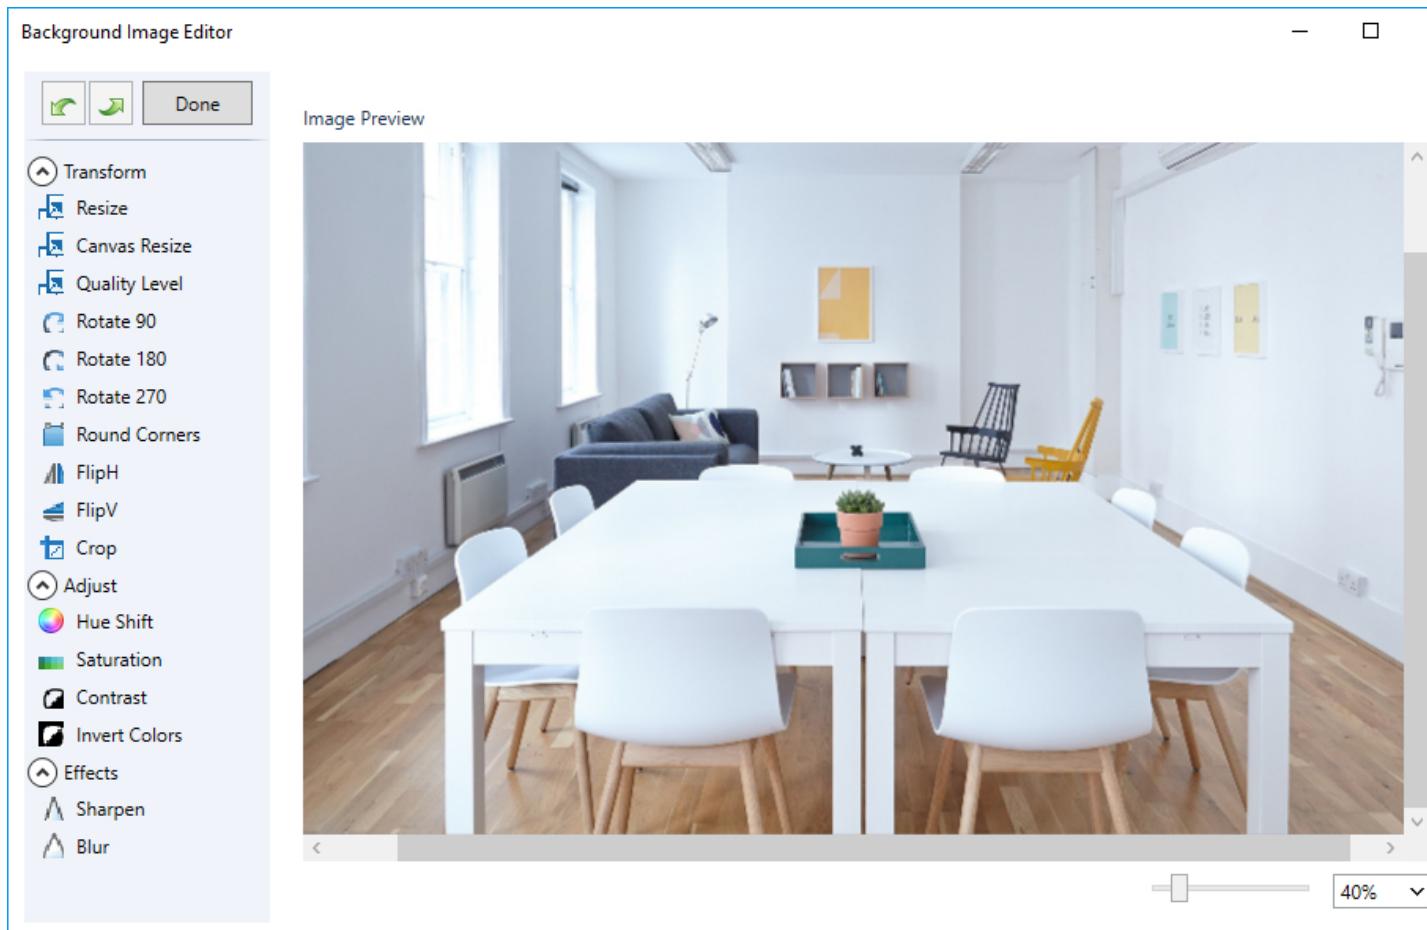

Browse Images-

You can apply an image to the background of the template body. TemplateToaster offers an inbuilt gallery of free images and your custom images too.

You can even edit the browsed images. TemplateToaster provides an image editor with a dozen of edit options images. For detailed information, [see this](#).

Effects

2

Effects ▾

In Effects Group, you can make Texture and Effects settings.

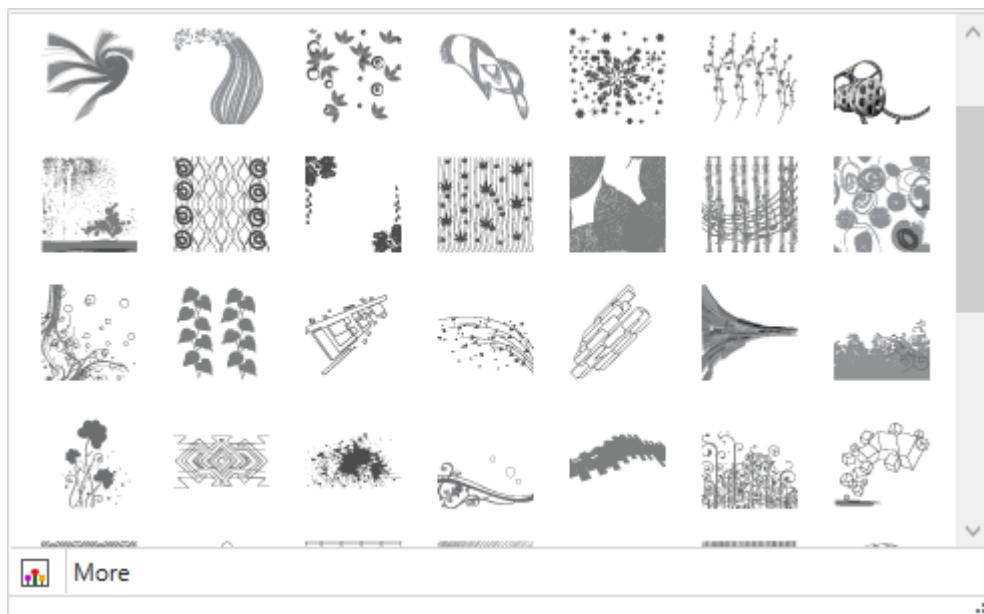

Texture- To apply the **texture** to the **background** of the body.

More:

You can customize the transparency of texture by clicking "More". [Here](#) are the more details about texture.

Effects-

Use this to apply the **effects** to the body background.

More -

You can customize the transparency of the effect by clicking "More". [Here](#) are the details.

3 Type

Avails you with two different settings for the body background as:

Fixed-

Choosing Fixed type, the body background will remain fixed with respect to browser viewport.

Scroll-

Choosing scroll type, the body background will scroll along the elements in browser viewport.

4 Scroll Up

Scroll

Shows a scroll up button on the template or website. Many preset designs of scroll up button are available, even you can browse more if required.

More -

To customize the design of scroll up button. For more details about customizing the Scroll Up button, click [here](#).

2.5. Container Tab

1 Background

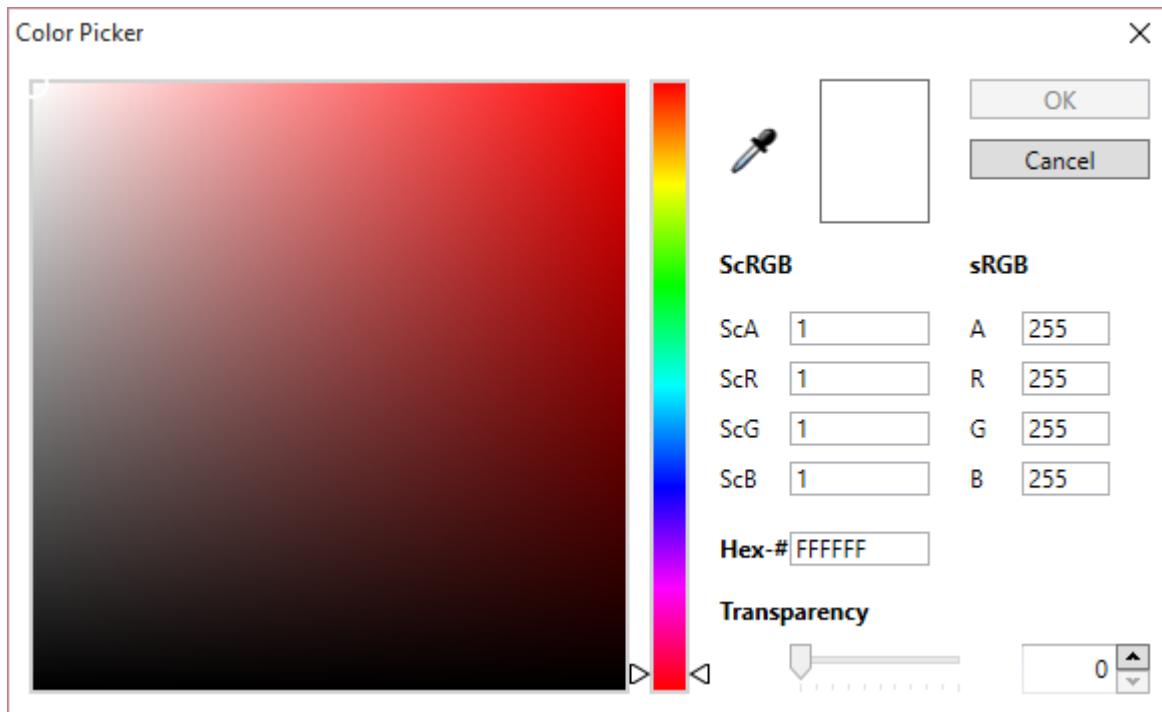

Use this option to set your preferred color, gradient, or image to the page background of your template or website. The following extended background features -

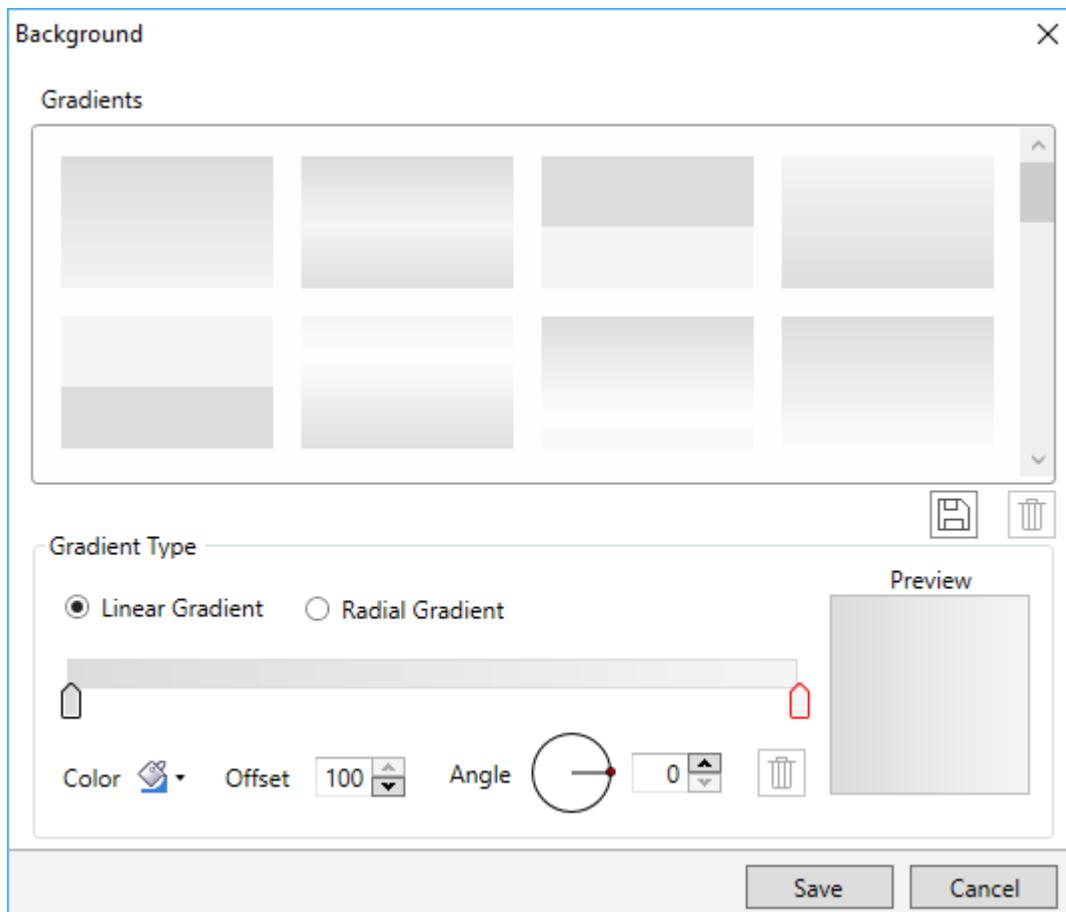

Color picker-

TemplateToaster gives you a color picker to choose a color for the background. [Here is](#) the complete description.

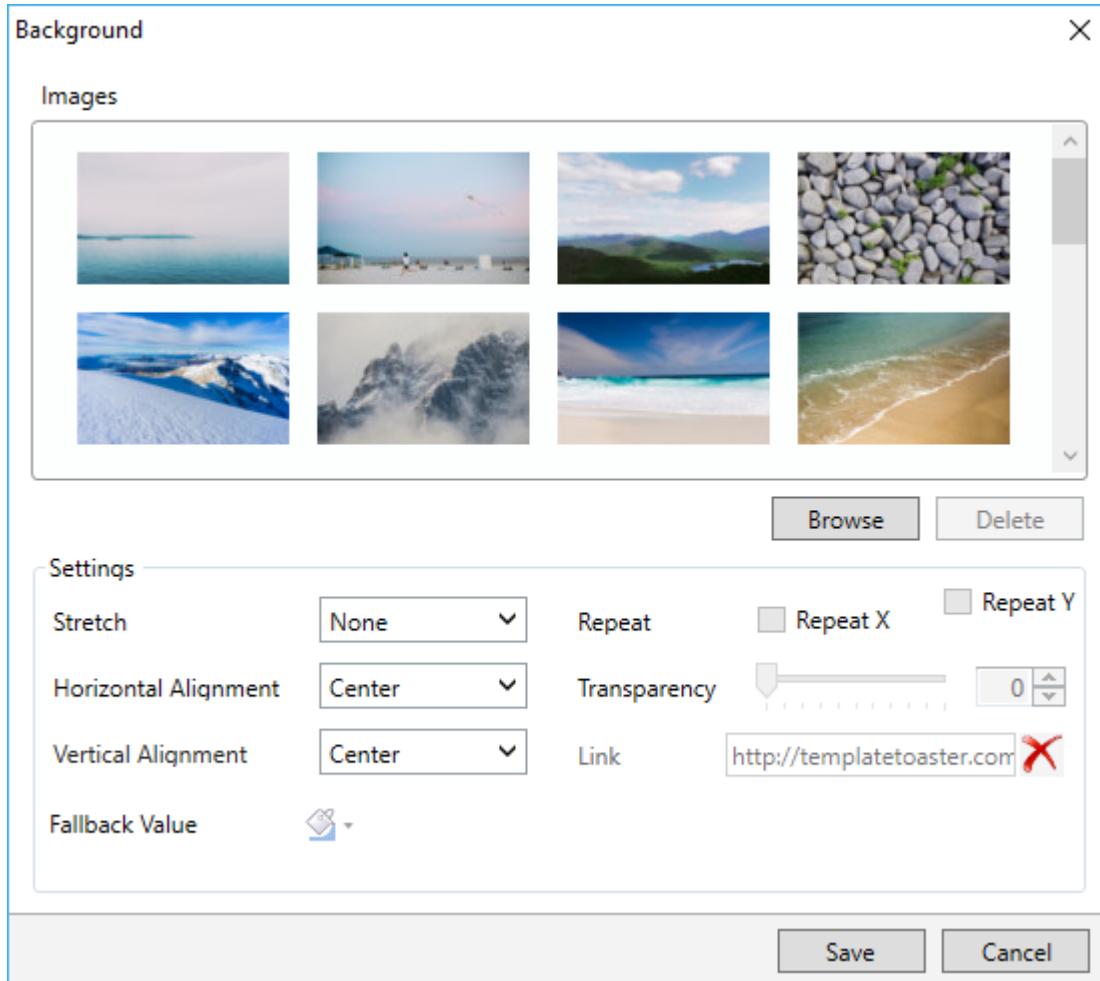

Custom Gradient-

You can create custom gradients with a preferred angle, color and offset choices. You can save the gradients as well. This section will guide you through the process of creating and saving the custom gradients.

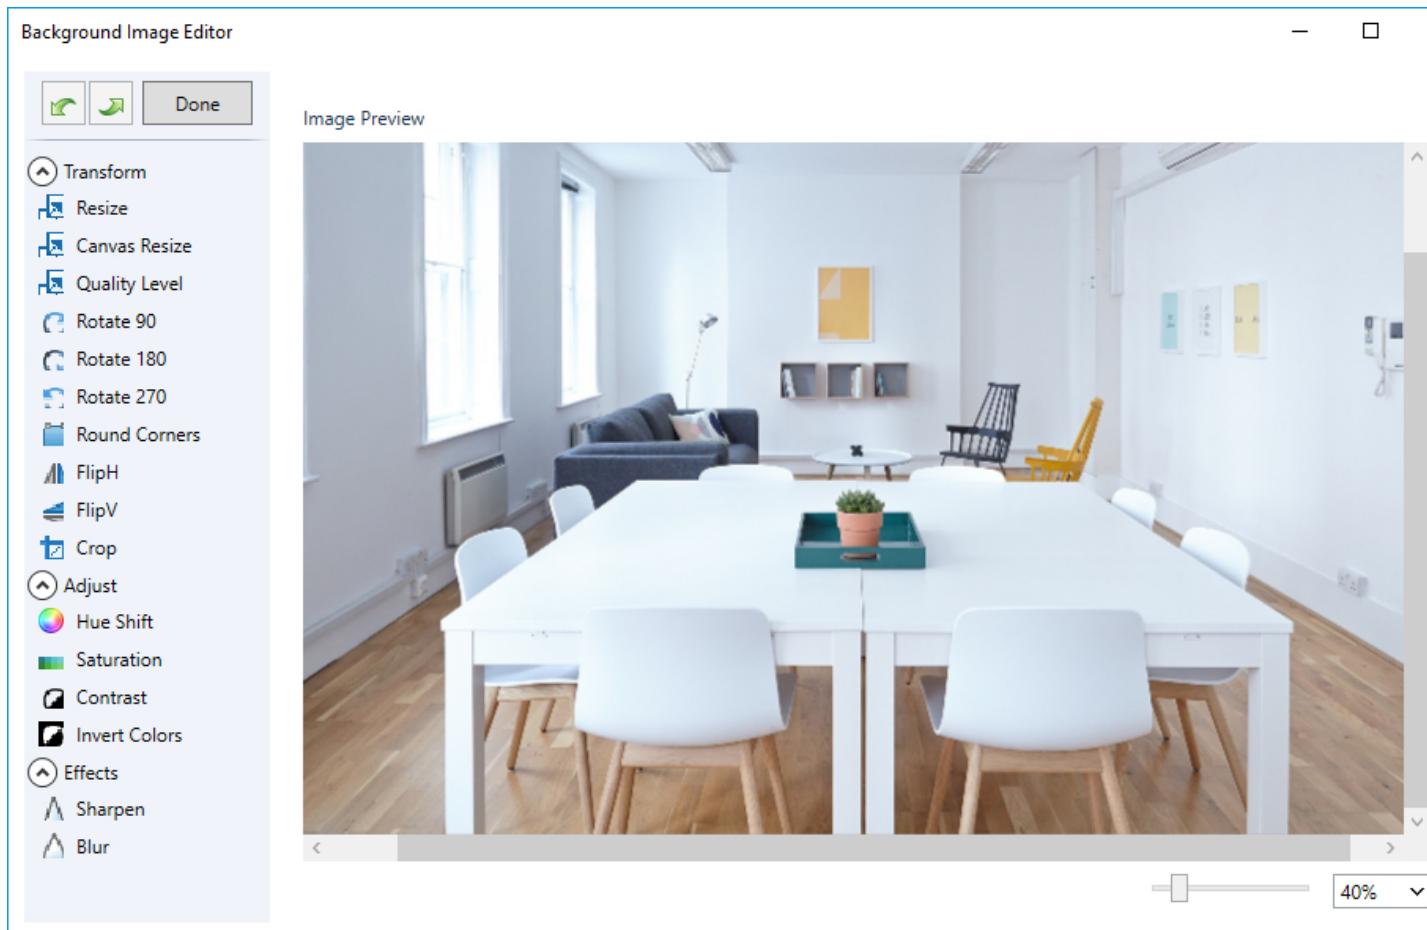

Browse Images-

You can apply an image to the background of the template body. TemplateToaster has an inbuilt stock of free images as well as a facility to upload your custom images.

You can even edit the browsed images with help of TemplateToaster **Background Image Editor** that gives a chance to customize the images. For details, [see this](#).

2 Layout

Layout ▼

TemplateToaster gives two choices to set the layout of the page. These are -

Fixed Width Layout -

In this layout, the dimensions of the site is bound to a certain number of pixels (px). You can select element width in pixels. Header, Menu, Slideshow, Sidebar, and Footer are the elements whose width is bound to pixels.

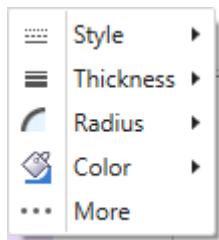

Fluid Width Layout -

In this layout, the dimensions are calculated in percentage (%). If you choose fluid width layout of your template/website, you can select the width of Header, Menu, Slideshow, Sidebar, and Footer in percentage.

3 Border

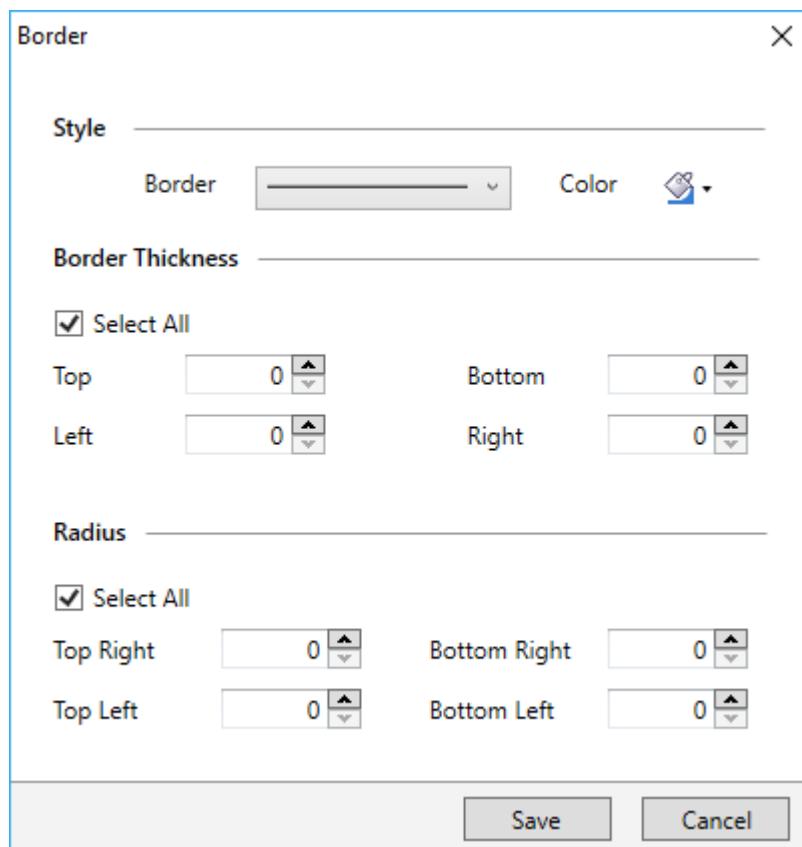

Border ▼

With 'Border' option, you can customize the border of the page. You can use Style, Thickness, Radius and Color options to customize it.

More -

"More" is for more border customization options. [See this](#) to know the usage of every option given for designing the border.

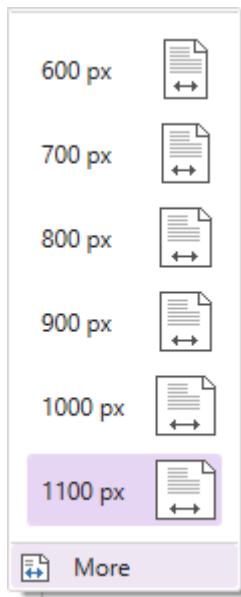

4

Width

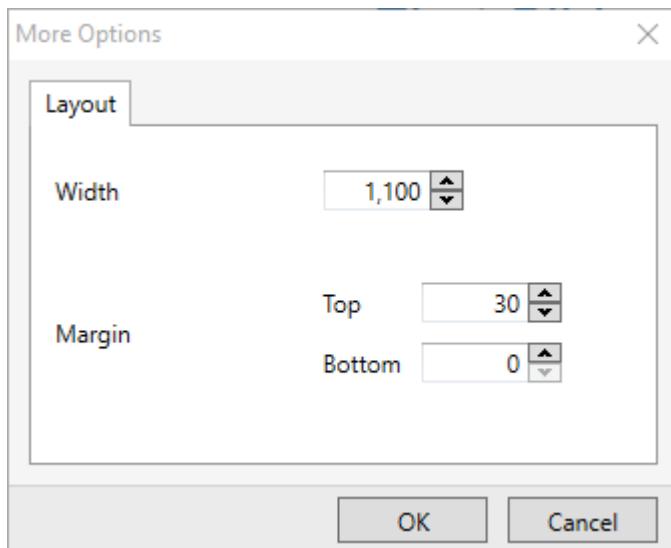

Use this to change the width of the page.

More -

Specifies the custom width of the page.

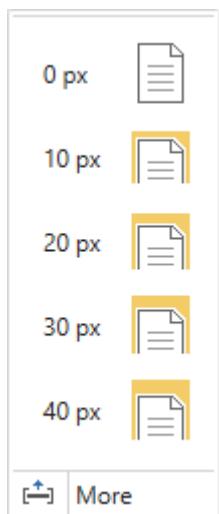

5

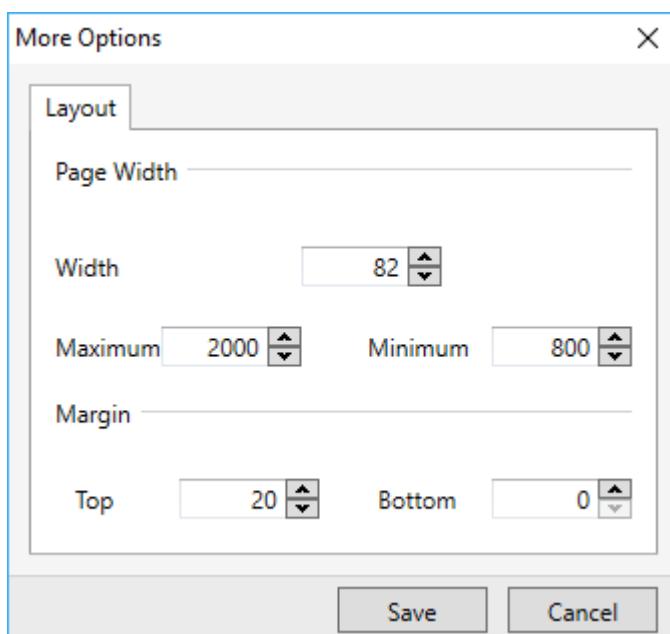

Margin

With this, you can select top and bottom margins of the page.

More -
Specifies the custom margin values.

6 Texture

Texture ▾

Use this to apply a texture to the page background.

More -

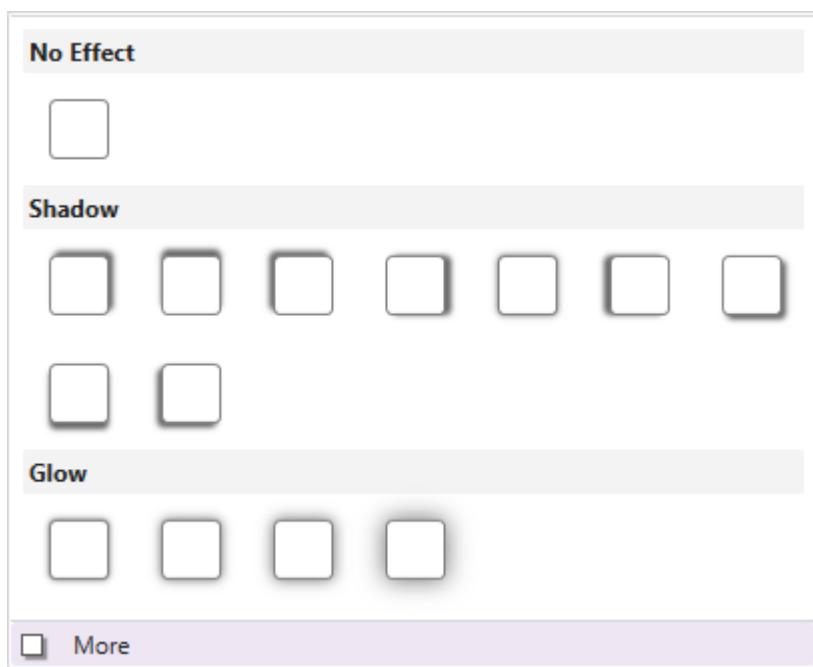

You can customize the transparency of texture with "More". [Here](#) are the details.

Shadow

7

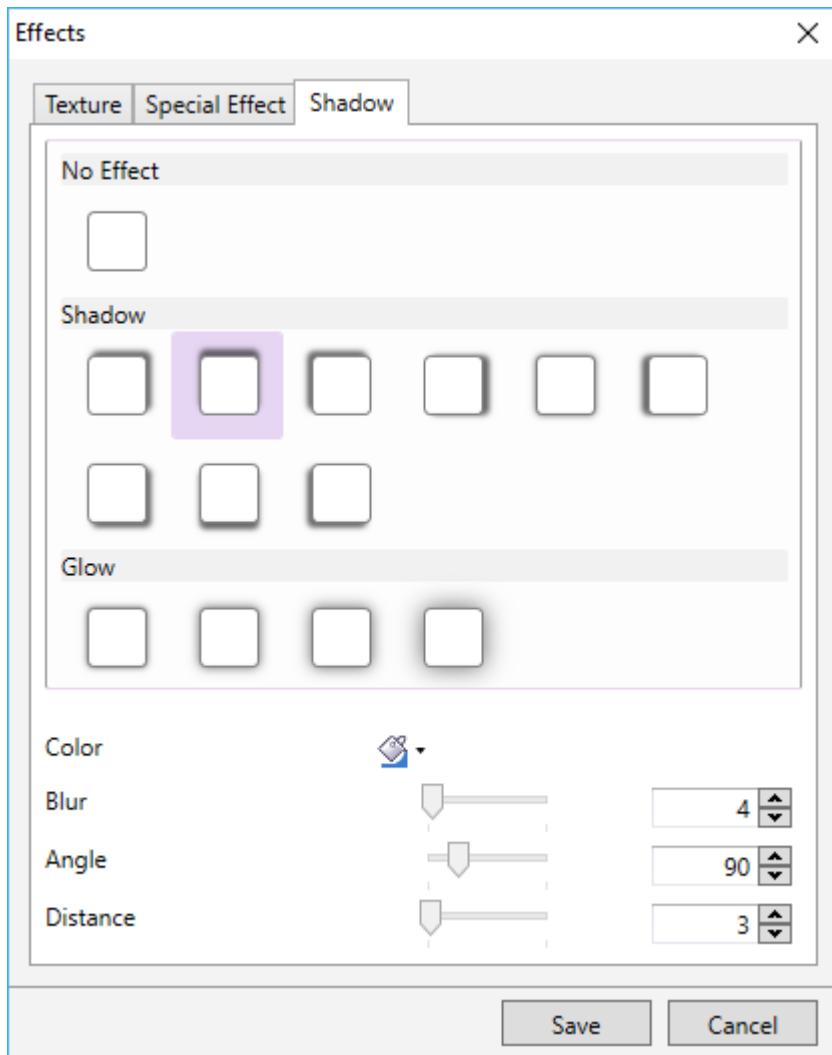

Shadow ▾

Applies a shadow effect to the page background.

More -

To customize the color, angle, blur, and distance of the shadow effect. [Here](#), you can get more details.

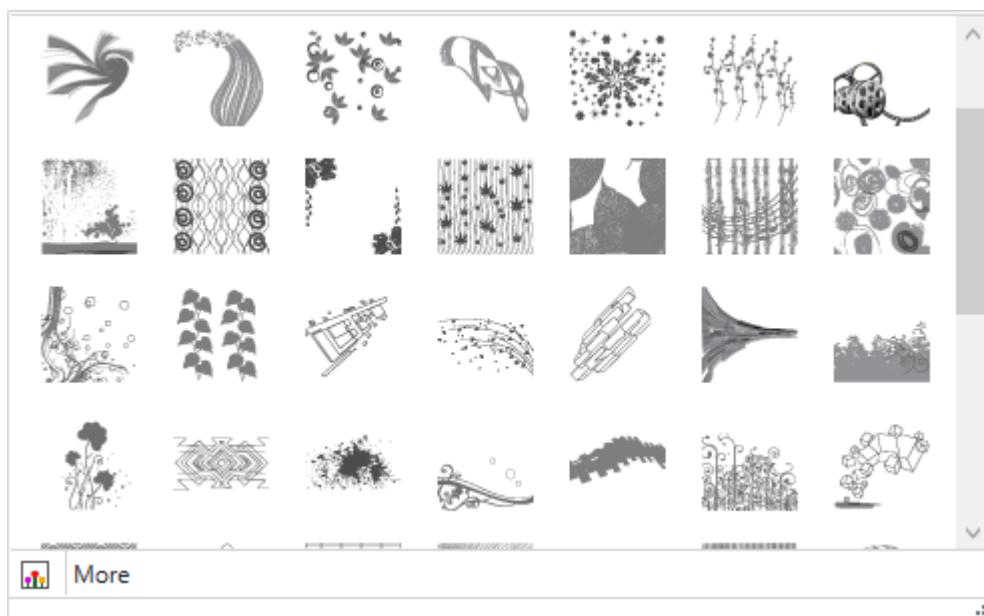

Effects

8

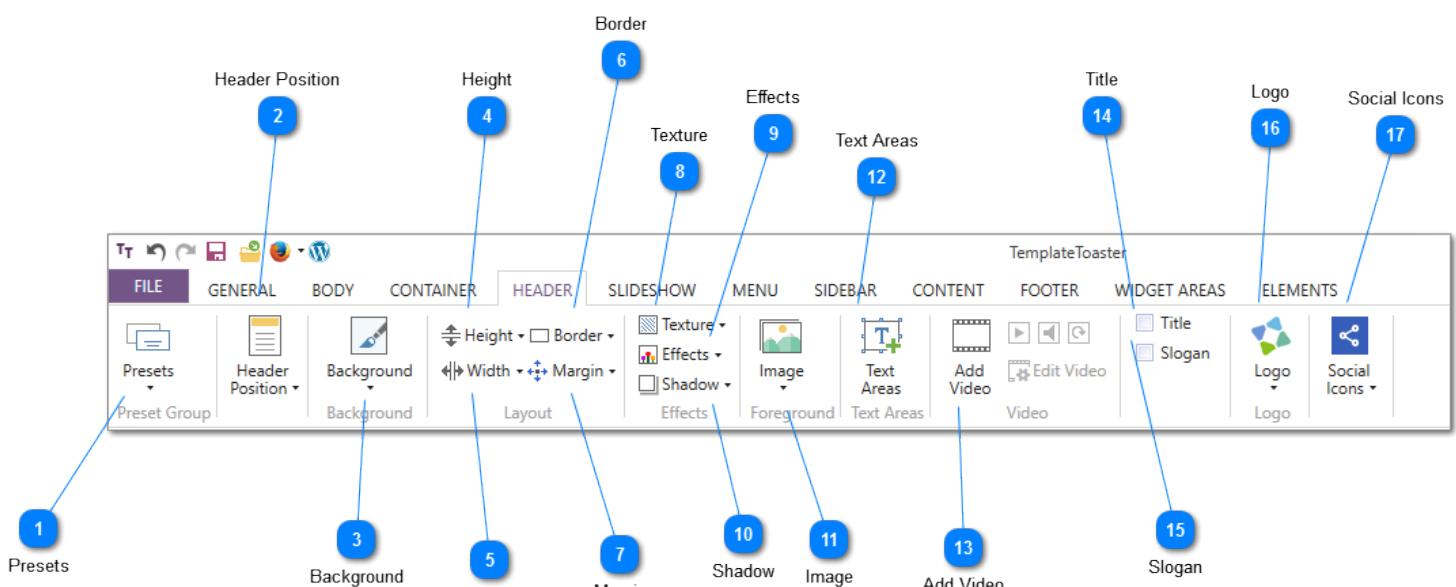

To apply an effect to the page background from the available collection of effects.

More-

To customize the transparency of the effect. [Here](#) are the more details.

2.6. Header Tab

1 Presets

Presets

See pre-designed styles of the header. You can choose a pre-designed header style and modify its look as per needs of your template or website.

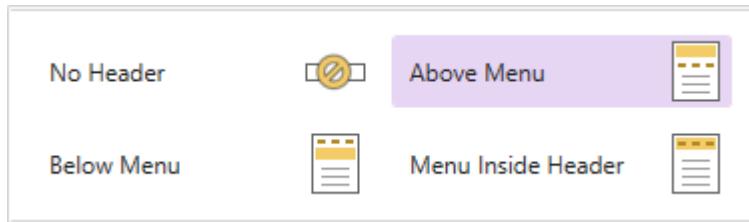

2 Header Position

Header Position

Changes the header position. Header can be placed above or below the menu, or place menu inside the header. Even if you don't want any header then "No Header" option is also available.

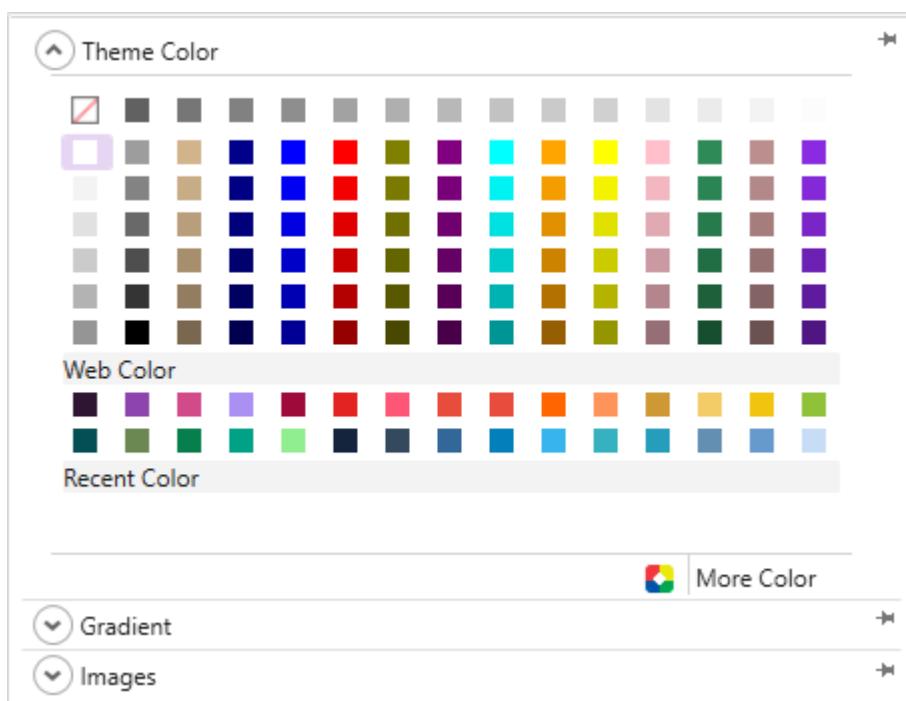

Background

3

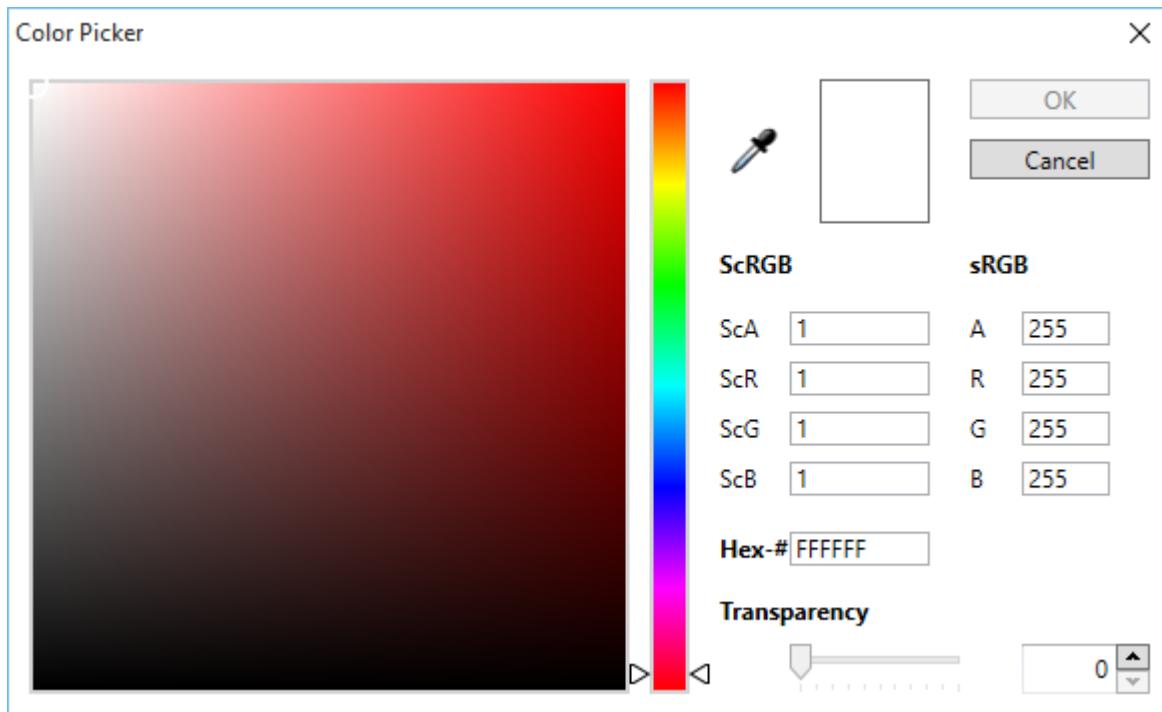

Use to apply a preferred color, gradient, or image to the **header background** of your template or website. Tem

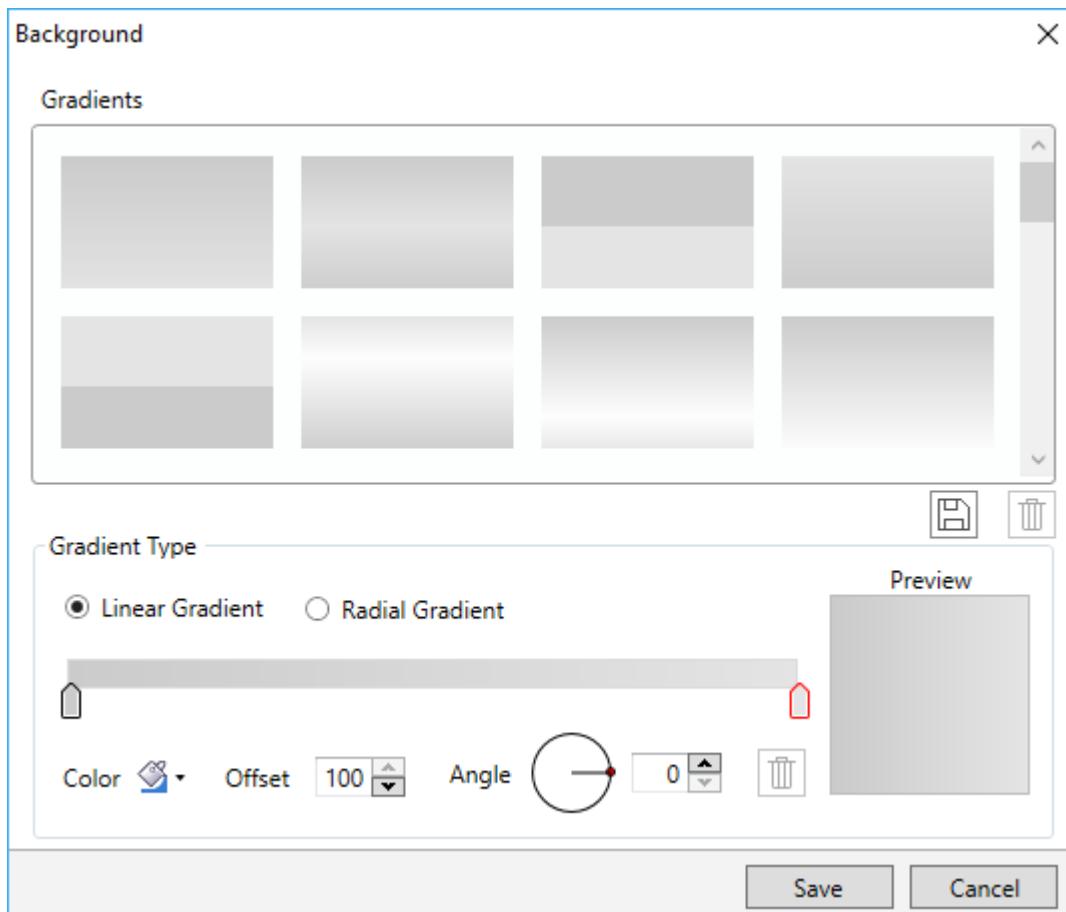

Color picker-

You can make use of a color picker to choose a background color. [Here is](#) the full description of it.

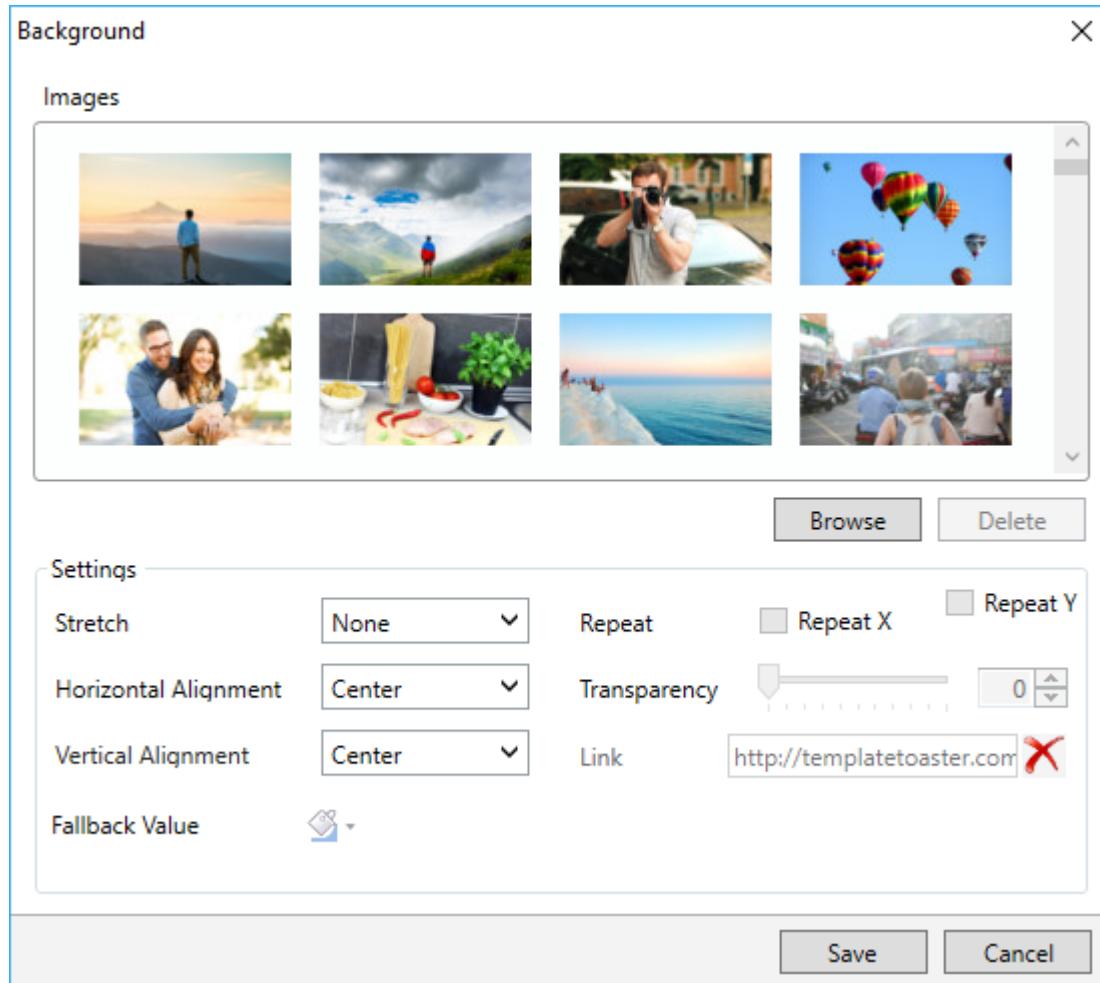

Custom Gradient-

You can create custom gradients with a preferred angle, color and offset choices. You can save the gradients as well. This section will provide information about creating and saving custom gradients.

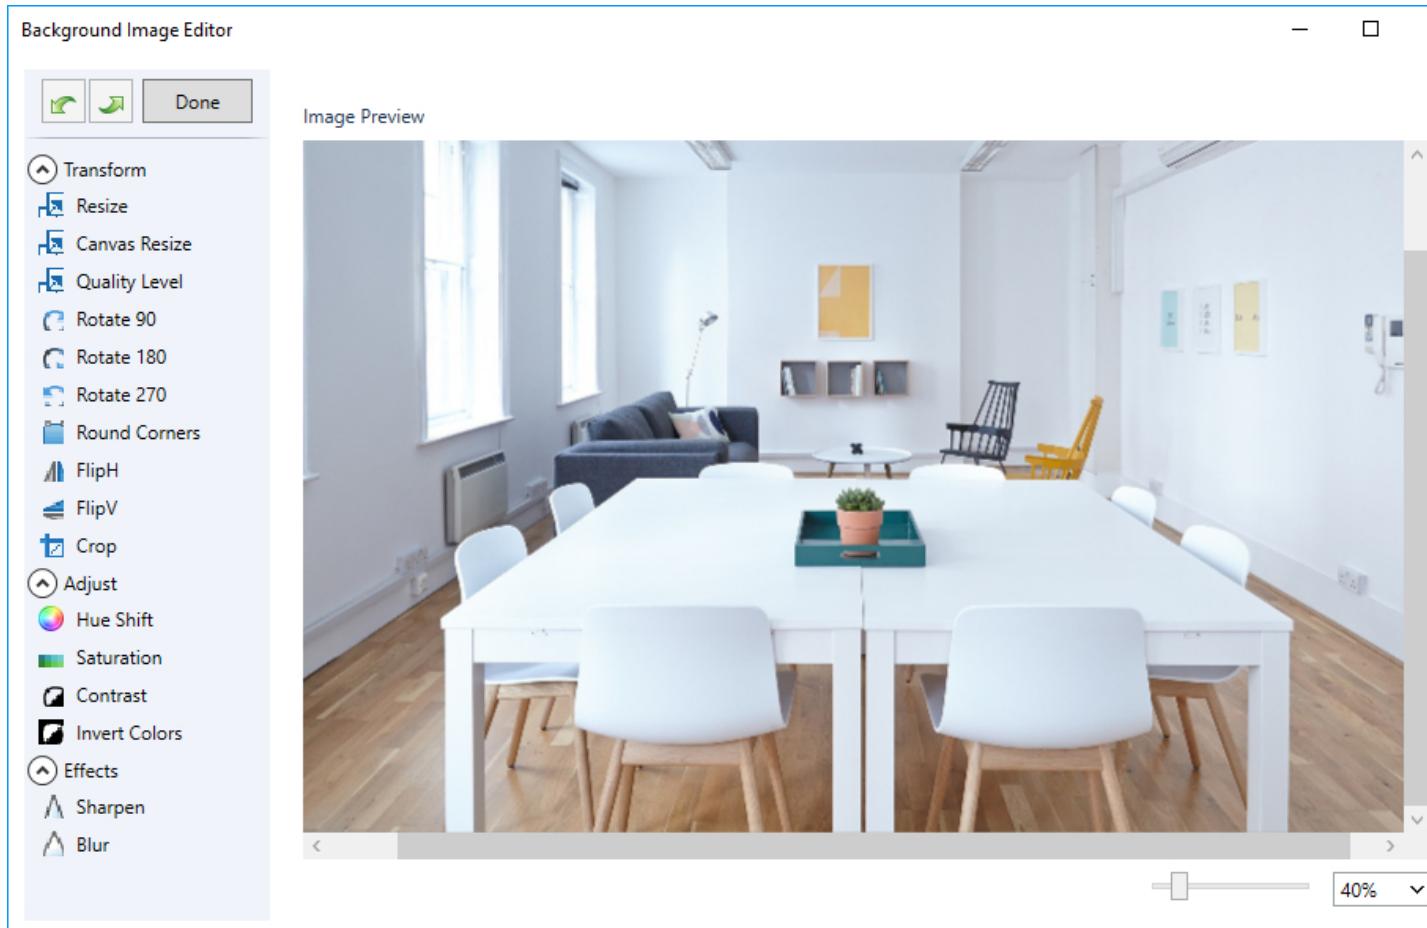

Browse Images-

You can apply an image in the background of the header. TemplateToaster has an inbuilt stock of free images. You can edit those custom images.

TemplateToaster has an image editor with a dozen of edit options to customize the browsed images. For detailed

4 Height

Height ▾

Changes the height of the header. You can even make the height of the header fit to screen.

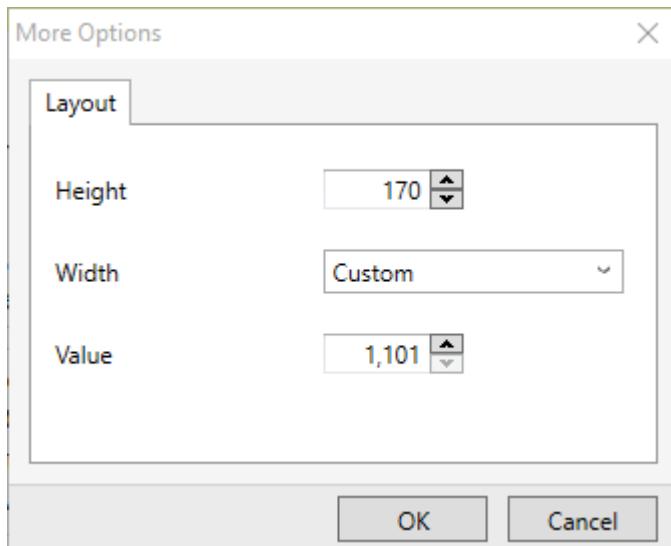

Fit To Screen	
100 px	<input type="text" value="100"/>
150 px	<input type="text" value="150"/>
200 px	<input type="text" value="200"/>
250 px	<input type="text" value="250"/>
300 px	<input type="text" value="300"/>
350 px	<input type="text" value="350"/>
<input type="button" value="More"/>	

Fit To Screen -

If you choose "Fit To Screen" option, the header will automatically adjust its height according to the browser viewport.

More -

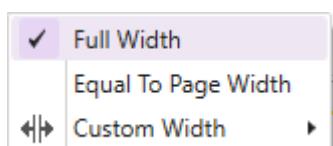

You can specify custom height by clicking "More".

5 Width

Changes the width of the header with. Three options are available for specifying the width of the header:

Full Width- Sets the width of the header equal to the width of the browser window.

Equal To Page Width- Makes the width of header equal to the page width. This option is activated by default.

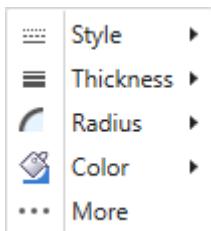

Custom Width- Allows you to specify the custom width of the header as per your need.

FILE	GENERAL	BODY	CONTAINER	HEADER	SLIDESHOW	MENU	SIDEBAR	CONTENT	FOOTER	WIDGET AREAS	ELEMENTS	FORMAT
<input type="button" value="Title"/>	Left: 106 Top: 49	Angle: 0										<input type="button" value="Typography"/>
	Alignment	Angle										<input type="button" value="Heading Type"/>
												<input type="button" value="Font"/>
												<input type="button" value="Color"/>

15

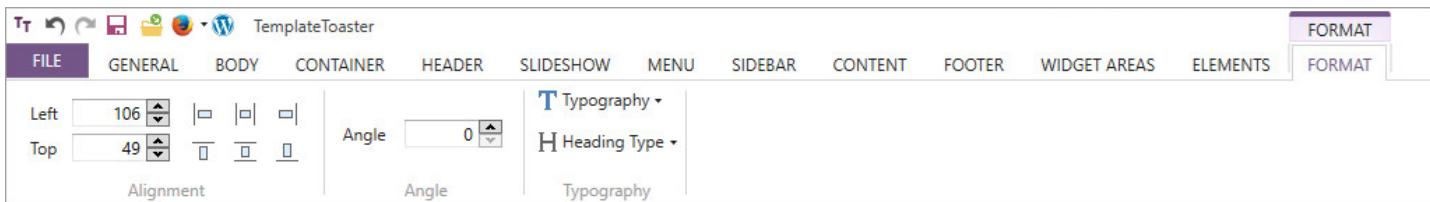

Slogan

Use this checkbox, to show or hide the website slogan on the header. By default, this is unchecked.

Slogan Formatting -

You can do formatting of Slogan. For this, click the Title and a format tab will appear as shown below. This form alignment, angle, typography and heading style (H1, H2, H3...H6) of Slogan.

16

Logo

Logo

Applies the logo of your brand on the header. You can choose the logo from TemplateToaster's logo stock or yo

More -

"More" is to browse your own logo. You can also link the logo to a URL.

Logo Formatting -

You can do formatting of Logo. For this, click the Logo and a Format tab will appear as shown below. This form alignment, height, width and angle of the Logo.

The screenshot shows the TemplateToaster software interface. The top menu bar includes FILE, GENERAL, BODY, CONTAINER, HEADER, SLIDE SHOW, MENU, SIDEBAR, CONTENT, FOOTER, WIDGET AREAS, ELEMENTS, and FORMAT. The FORMAT tab is currently selected. In the center, there are several input fields and dropdown menus for configuring the header section. These include Left (535), Top (23), Width (150), Height (120), Alignment, Layout, Angle (0), Typography, Orientation, and Text Alignment.

17 Social Icons

Social
Icons ▾

To configure a social media account in the header section of your template or website. You can choose the icons you want to use or browse your own custom social media icons.

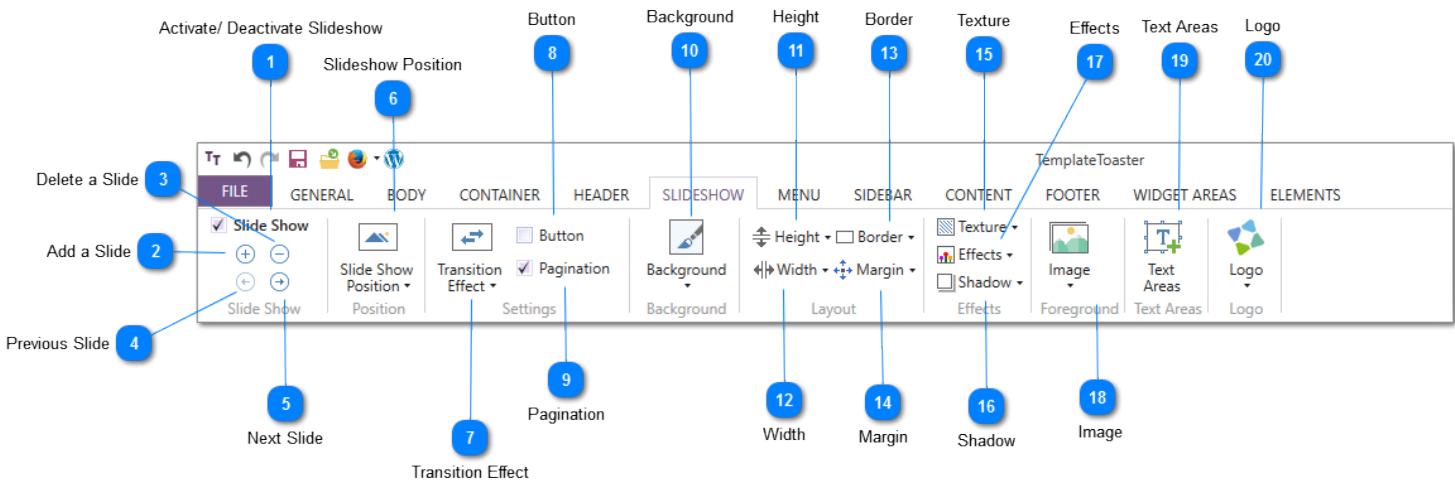

Social
Icons ▾

Social Icon Formatting -

You can easily format a Logo. For this, click the applied icon and a Format tab will appear as shown below. Then you can change the alignment, height, width and angle of the icons.

The screenshot shows the TemplateToaster software interface. The top menu bar includes FILE, GENERAL, BODY, CONTAINER, HEADER, SLIDE SHOW, MENU, SIDEBAR, CONTENT, FOOTER, WIDGET AREAS, ELEMENTS, and FORMAT. The FORMAT tab is currently selected. In the center, there are several input fields and dropdown menus for configuring a logo. These include Left (55), Top (49), Width (32), Height (32), Alignment, Layout, Angle (0), and other styling options.

2.7. Slideshow Tab

1 Activate/ Deactivate Slideshow

Slide Show

Check the slideshow box to activate/deactivate the slideshow on template/website.

2 Add a Slide

Adds a new slide.

3 Delete a Slide

Deletes a slide .

4 Previous Slide

Moves to the previous slide.

5 Next Slide

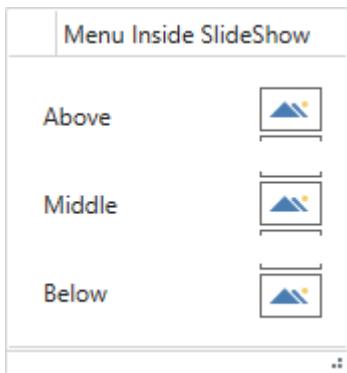

Moves to the next slide of the slide show.

6 Slideshow Position

Slide Show Position ▾

To position the slideshow. Position of slideshow can be changed with respect to the header and menu. So, there are three options for choosing slideshow position as :

- **Above** - Moves the slideshow above the header.
- **Middle** - Places the slideshow between the header and the menu.
- **Below** - Moves the slideshow below the menu.

Apart from these options, there is one more option. That is -

- **Menu Inside Slideshow** - The **menu will move** inside the slideshow on choosing this option.

7 Transition Effect

	Effect Name	Preview Icon
<input checked="" type="checkbox"/>	Apply On All Slides	
None		
Circle Reveal		
Radial Blur		
Slide Left		
Slide Top		

Transition Duration
 Transition Begin Time

Apply On All Slides-

You can choose an effect and configure the settings for an individual slide or for all the slides at a time. By default, this is checked. You can uncheck this option if you want to apply different effects on individual slides.

Transition Duration- Selecting Transition Duration option, you can set the transition duration for the slides. It specifies how many seconds or milliseconds a transition effect takes to complete.

Transition Begin Time- This enables you to define the transition begin time for the slides. It specifies how many seconds or milliseconds to wait before the transition effect of next slide will start.

8 Button

Displays the slideshow buttons on the slides. You can also customize its look and feel. For this, click the button. This tab allows changing button alignment, background, height, width, border and more.

9 Pagination

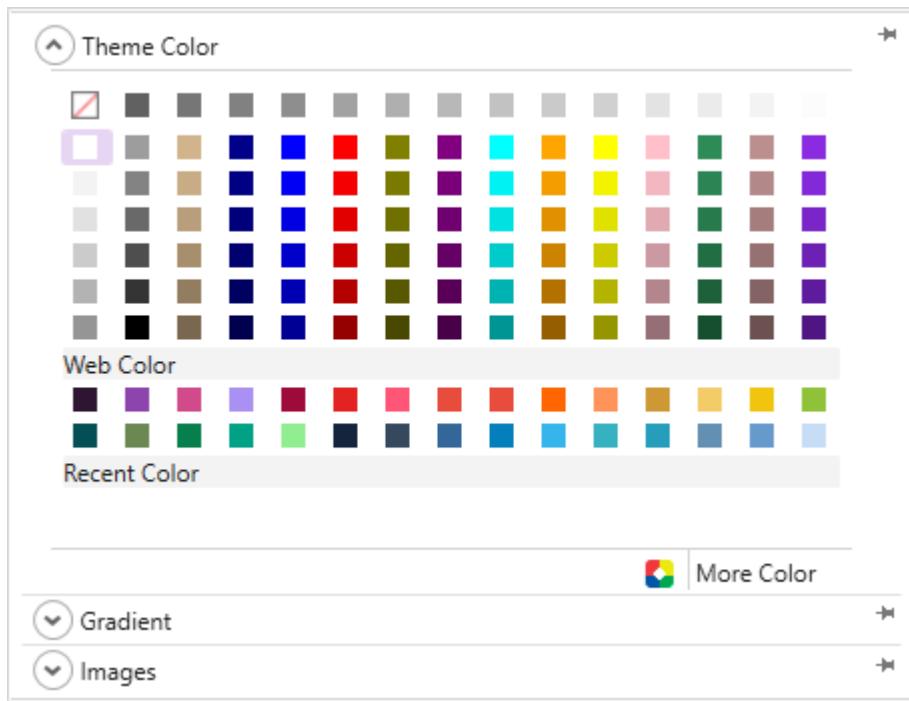

To add/delete the slideshow pagination. By default, slideshow pagination is active. You can deactivate it simply by uncheck the look of the pagination. For this, click the pagination bullets and a Format tab will appear. You can then change

10 Background

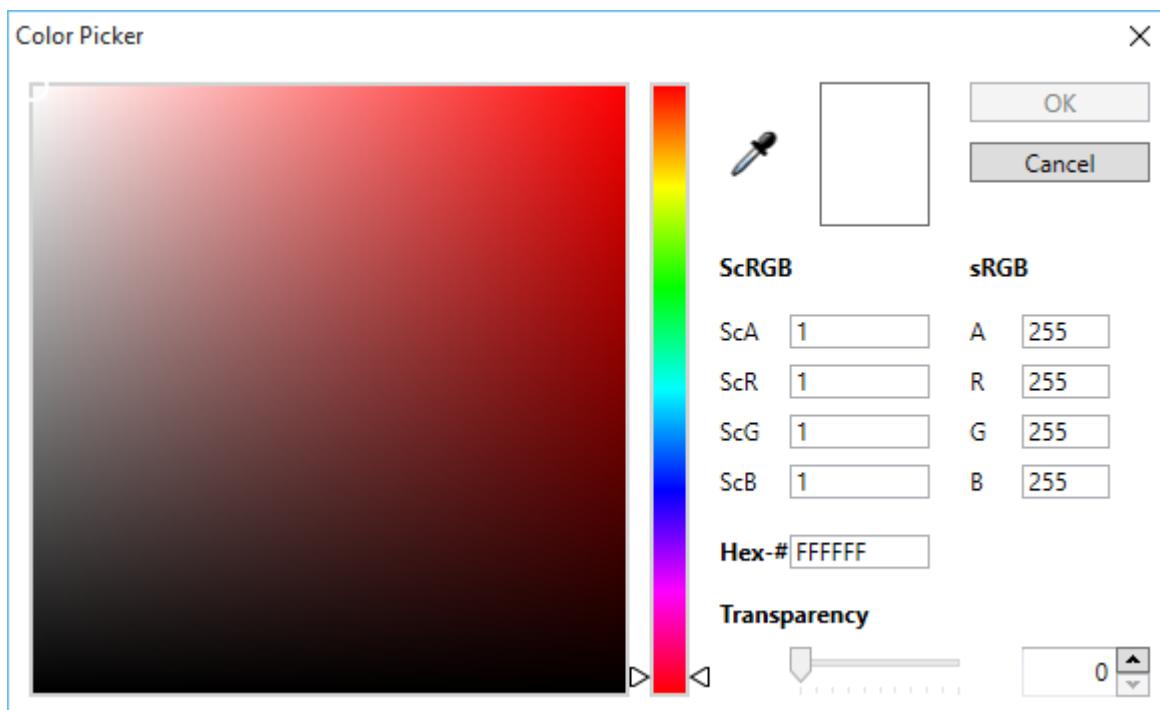

To choose a preferred color, gradient, or image to apply to the slide background of your template or website. To following extended background options -

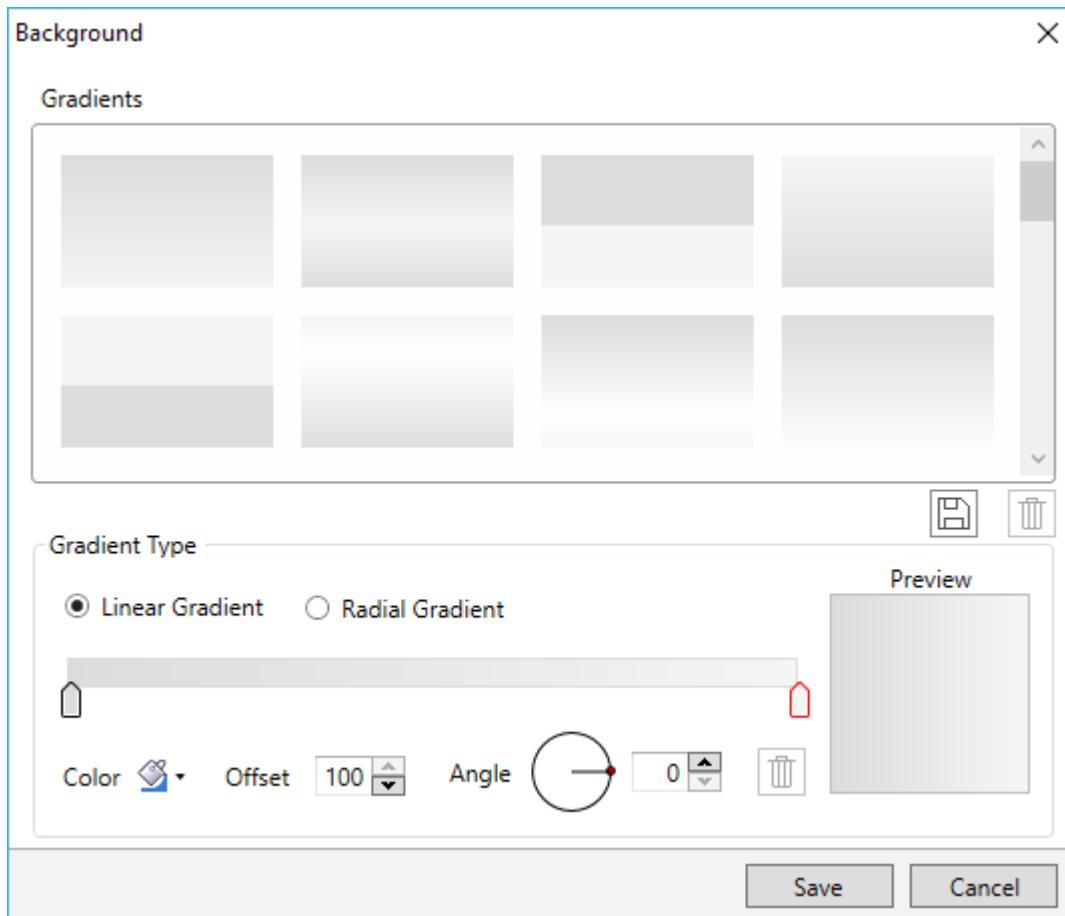

Color picker-

To apply an effect on the menu background.

More -

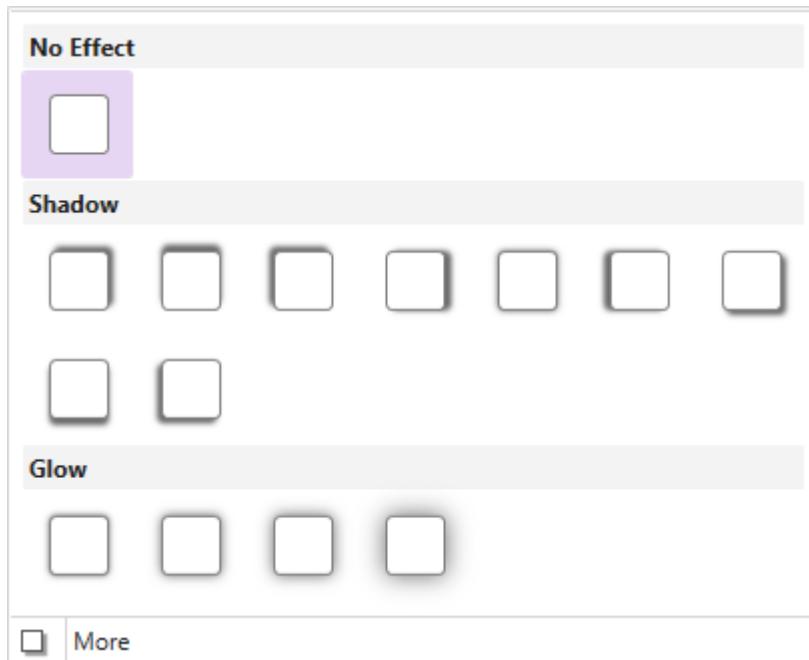

You can customize the transparency of the effect using "More". [Here](#) is the detail.

Shadow

12

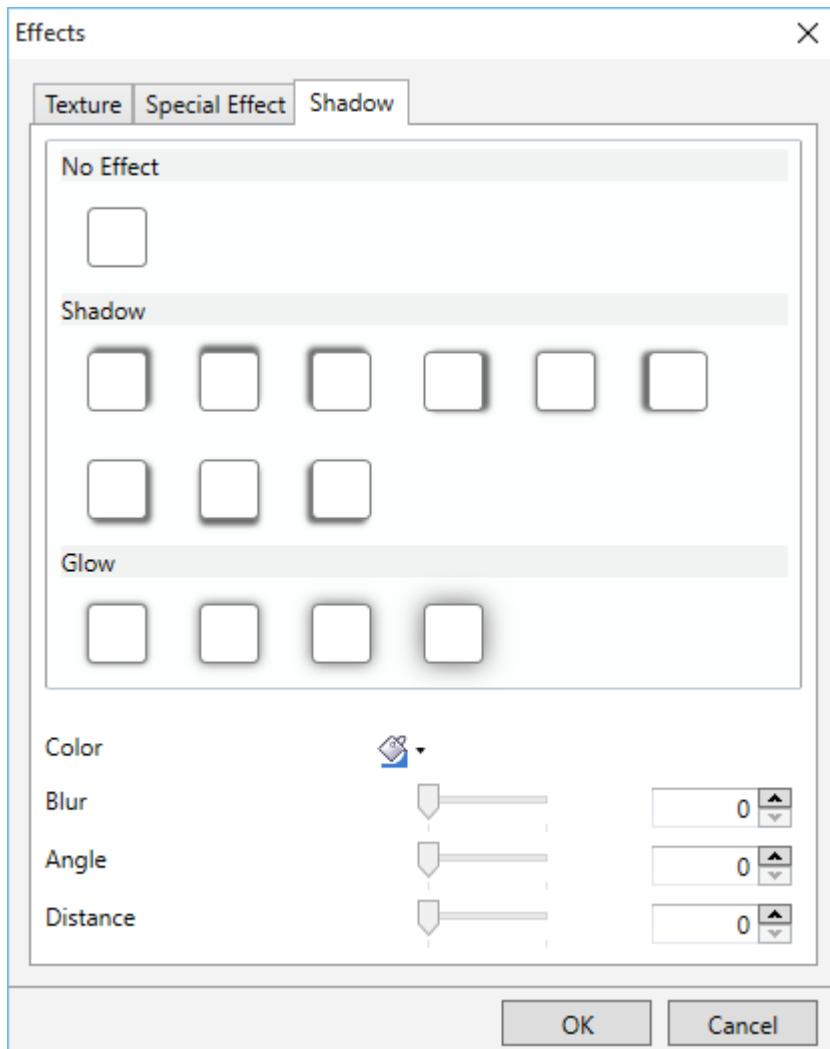

To apply a shadow effect on the menu background.

More-

With "More", you can even customize the color, angle, blur, and distance of the shadow effect. [Here](#), you can get more details.

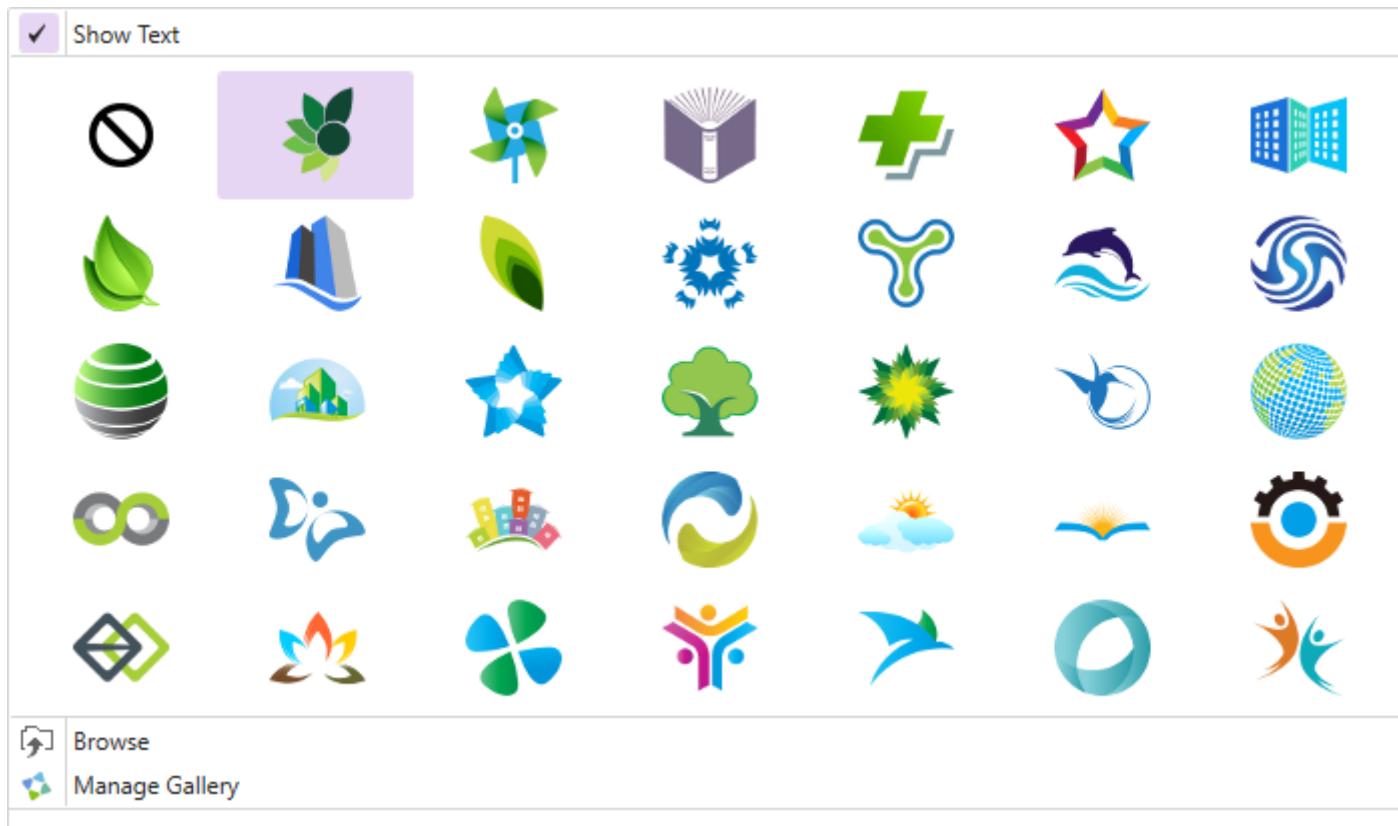

13

Logo

Logo

To apply a logo of your brand on the menu. You can choose the logo from TemplateToaster's logo stock or you

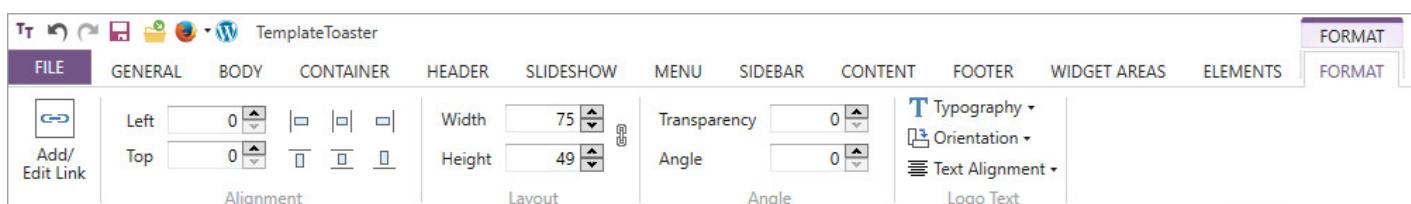

More -

Click "More" to browse your own logo. You can also link your logo to a URL.

Logo Formatting -

You can do formatting of the Logo. For this, click the Logo and a Format tab will appear as shown below. This changing the alignment, height, width and angle of the Logo.

Foreground Image

14

Image

Inserts a foreground image in the menu to make template/ website more professional and appealing.

A grid of 24 thumbnail images. The top row contains: a person taking a photo, a pink flower, a woman, a person in a beanie, a person taking a photo, a person in a cap, and a person with a floral crown. The second row contains: a person taking a photo, a couple, a person taking a photo, a woman thinking, a woman on a tablet, a person in a blue shirt, and a person in a hat. The third row contains: a person in a jacket, a woman, a couple, a boy, a person in a beanie, a blonde woman, and a person holding a child. The fourth row contains: a woman, a woman with a bouquet, and a person with a red cap.

Browse

Manage Gallery

More -

You can even link the image to a custom URL with More option. The link can be configured to open in a new window, transparency of the image and flip it around X or Y axis.

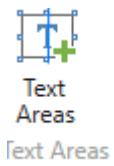

Foreground Image Formatting -

You can do formatting of the Foreground Image. For this, click the image and a Format tab will appear as shown below. You can change the alignment, height, width and angle of the foreground image.

The screenshot shows the TemplateToaster interface with the 'FORMAT' tab selected. The 'FORMAT' tab is located at the top right of the menu bar. Below the menu bar, there are several tabs: FILE, GENERAL, BODY, CONTAINER, HEADER, SLIDE SHOW, MENU, SIDEBAR, CONTENT, FOOTER, WIDGET AREAS, and ELEMENTS. The 'ELEMENTS' tab is also labeled 'FORMAT' at its top right. On the left side of the interface, there is a sidebar with icons for 'Add/Edit Link' (highlighted), 'Text Areas', and 'Text'. The main content area displays various settings for a foreground image, including alignment (Left: 0, Top: 0), layout (Width: 49, Height: 49), transparency (100), and angle (0). There are also checkboxes for 'Flip X' and 'Flip Y'.

Text Areas

15

To draw the text areas in the menu. You can add custom text, image, and video in your text areas. Click this option to open the text area. Just drag the cursor and you are done. You can also format the text area.

Text Area Formatting -

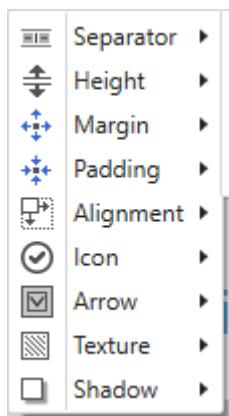

For text area formatting in the menu, click the text area. On your single click, a Format tab will appear as shown below. You can change the alignment, height, width, angle, and background of the text area. You can even apply effects and borders.

16 Menu Button Properties

Provides different Menu Button Properties as follows:

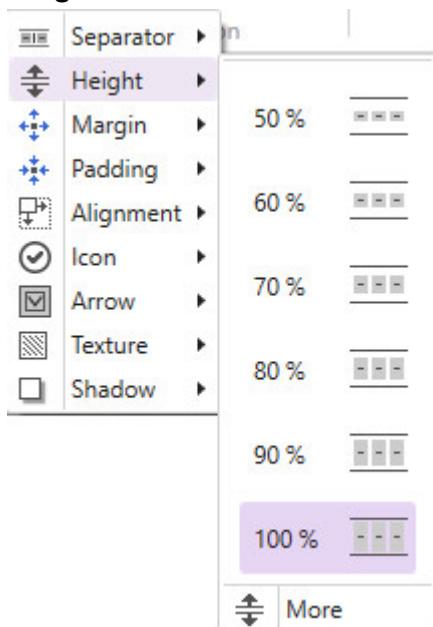

Separator-

Separator provides a horizontal or vertical dividing line. It is most commonly used in Menus and Tool bars. In above screenshot, the Separator is used between the first and second items of the menu bar.

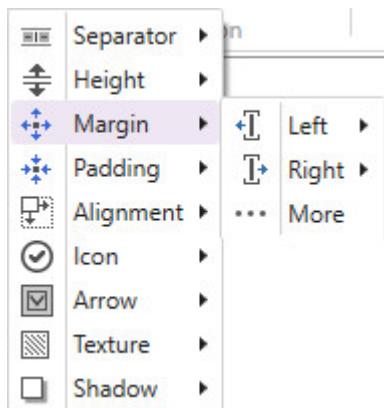

Height-

You can set the height of the menu according to your preference. You can choose from pre-defined values or you can click "More" to specify custom height of menu buttons.

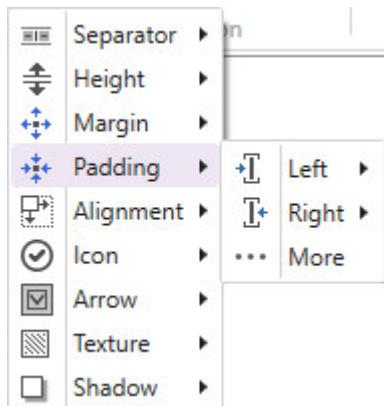

Margin -

Use this option to specify left and right margins of the menu buttons.

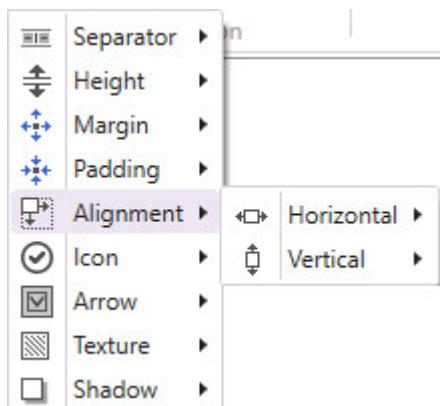

Padding -

To apply Padding on Menu buttons from the left and right sides.

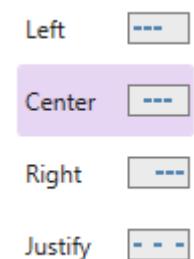

Alignment -

Aligns the menu buttons along the menu strip.

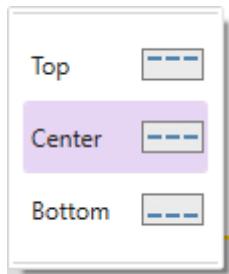

Horizontal Alignment-

To choose a preferred horizontal alignment for the menu buttons.

Vertical Alignment-

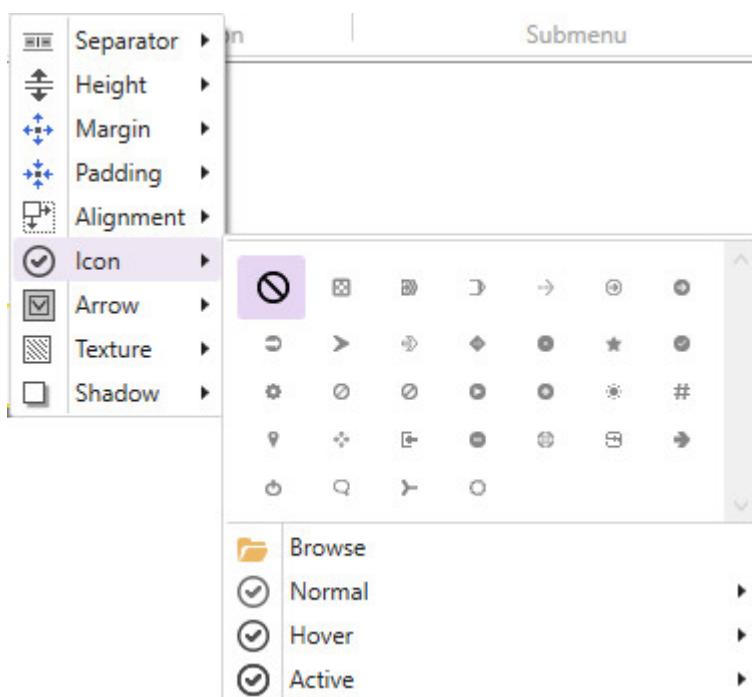

Aligns the menu buttons vertically in three different positions.

Icon-

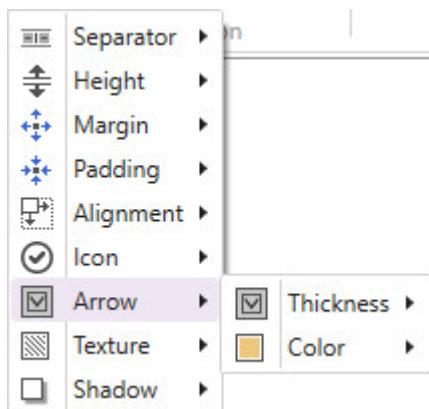

To use icons with menu buttons. For this, you can also browse your own icons.

You can change the color of icons for normal menu buttons, on hover, and active menu button for professional look.

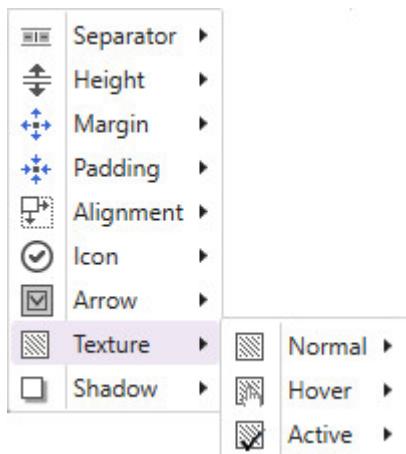

Arrow -

To apply an arrow with a menu item which have a submenu. You can change the thickness and color of the arrow.

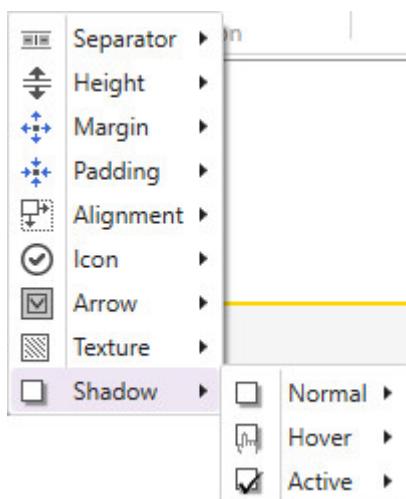

Texture -

Applies the texture on the menu buttons. You can apply the textures on Normal, Hovered and Active menu buttons.

Shadow -

To apply different shadow effects on the menu buttons.

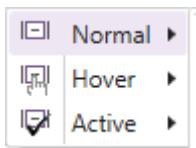

17

Menu Button Background

To apply different background colors for different states of a menu button.

Normal -

Background color for normal or passive menu button.

Hover -

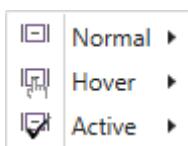

Background color for the menu button on hover.

Active -

Background color for the active menu button.

18

Menu Button Border

To apply and customize the border of menu buttons. You can craft the different border designs for different states of the menu buttons.

Normal -

Lets you to choose border properties for the normal or passive menu button.

Hover -

Specifies the border properties for the menu button on hover.

Active -

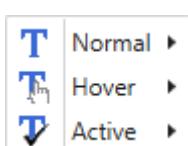

Sets the border properties for the active menu button.

19

Menu Button Typography

Defines the typography of menu buttons. You can set different typography for different states of the menu buttons.

Normal -

To set border properties for normal or passive menu button.

Hover -

Specifies the border properties for the menu button on hover.

Active -

To set the border properties for the active menu button.

20 Hamburger

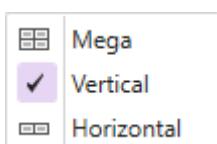

Gives the latest Hamburger look to the main menu.

21 Open (Submenu) On

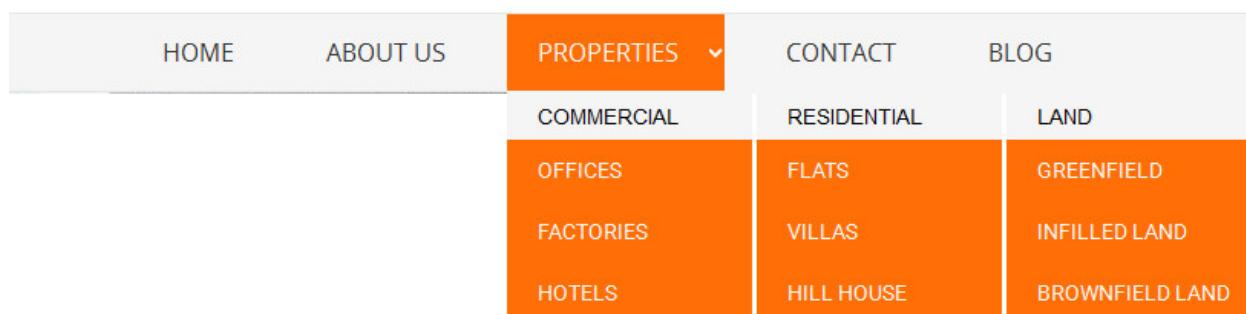

Offers you to make a choice to : open sub menu **on Click** or open submenu **on Hover**.

22 Submenu Layout

Produces a horizontal menu for your template/website. Like this

23 Design

This option is enabled when Hamburger is checked. It is used to set hamburger icon look that whether it will be Text, Icon or Text & Icon.

24 Toggle

Sets the different properties like Background, Border, Typography, Line, Alignment etc. at all the states

Normal, Hover and Active.

25 Slide

Specifies that how to open the menu- Slide Down, Slide Left, Slide Right, Pop up.

26 Submenu Container

Submenu
Container ▾

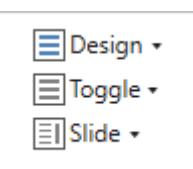

You can even customize the look and feel of the submenu container. Click this option to customize the background of submenu container, to design its border and to apply a shadow effect on it.

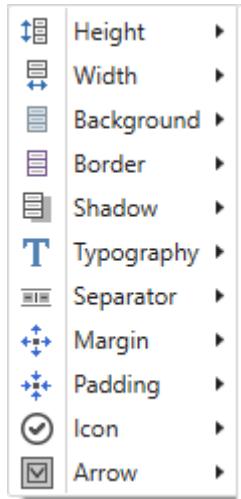

27 Submenu Item

Submenu
Item ▾

You can change the properties of Submenu Item like you can do with Menu Button.

**Height -**

Increases/ decreases the height of the submenu items.

Width -

Increase/ decreases the width of the submenu items.

Background -

Changes the background color of the submenu items.

Shadow -

Applies the shadow effect to the submenu items.

Hover Border -

Changes the look of border when the mouse is hovered over submenu item.

Hover Shadow -

Applies the shadow for the Hover state of the submenu item.

Separator -

Shows separators in the submenu items.

Margin -

Specifies the margin to the submenu items according to your need.

Padding -

Applies a padding to the submenu items according to your need.

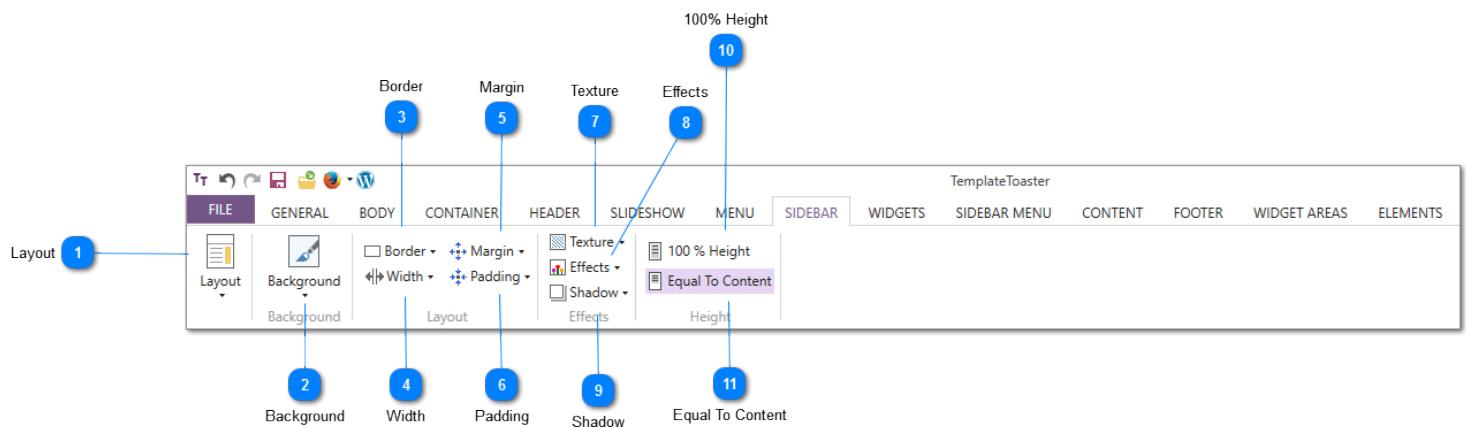

Icons -

Displays icons with the submenu buttons.

Typography -

Changes the typography of the submenu buttons.

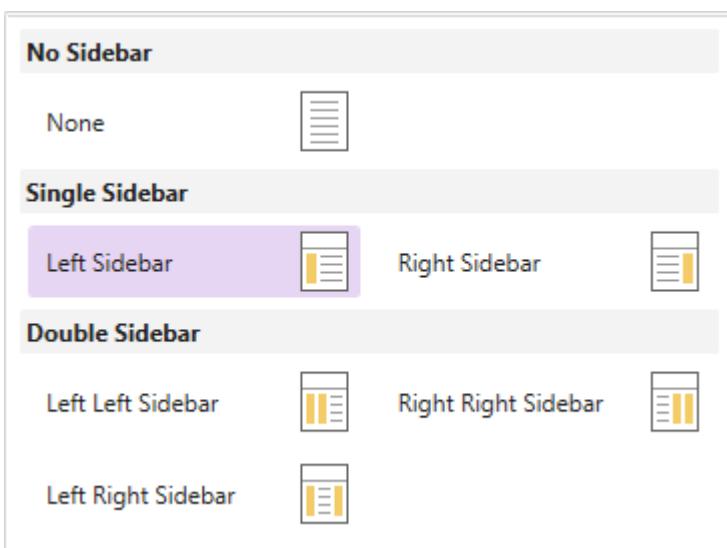

2.9. Sidebar Tab

1 Layout

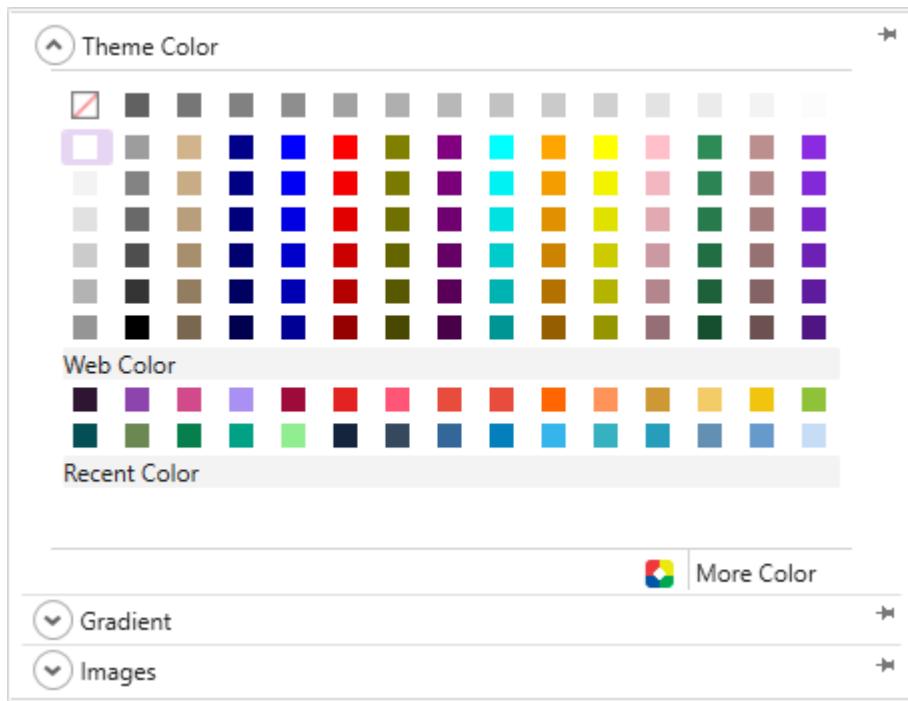

Layout option provides you various placement options for Sidebar. You can choose the preferred one from given layout choices.

2 Background

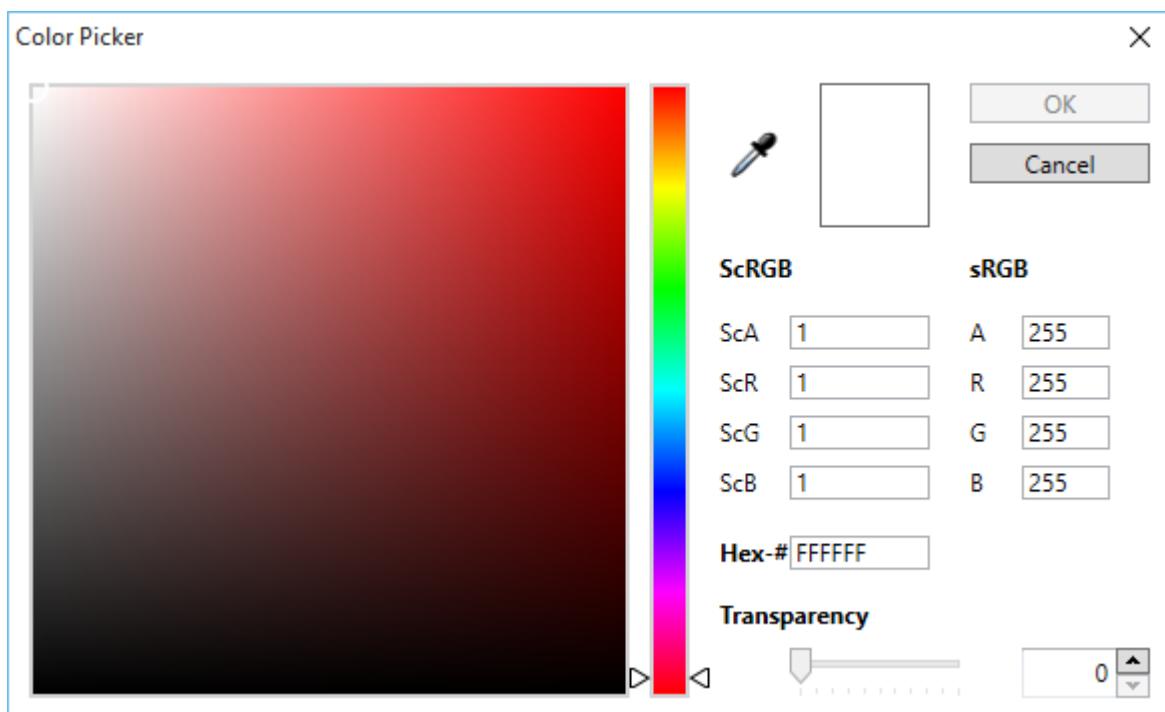

Avails you to choose a preferred color, gradient, or image to apply to the sidebar background. TemplateToaster extended background options -

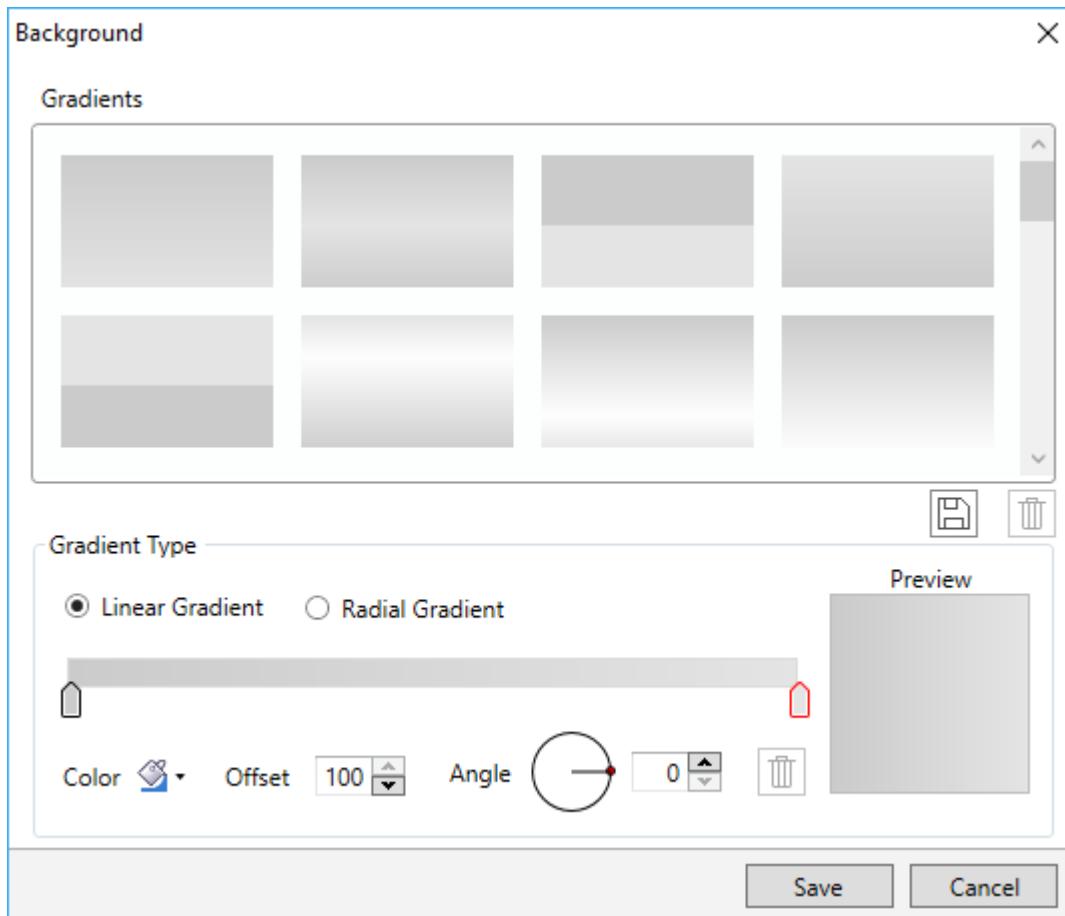

Color picker-

TemplateToaster gives you a color picker to choose a background color. [Here is](#) the full description.

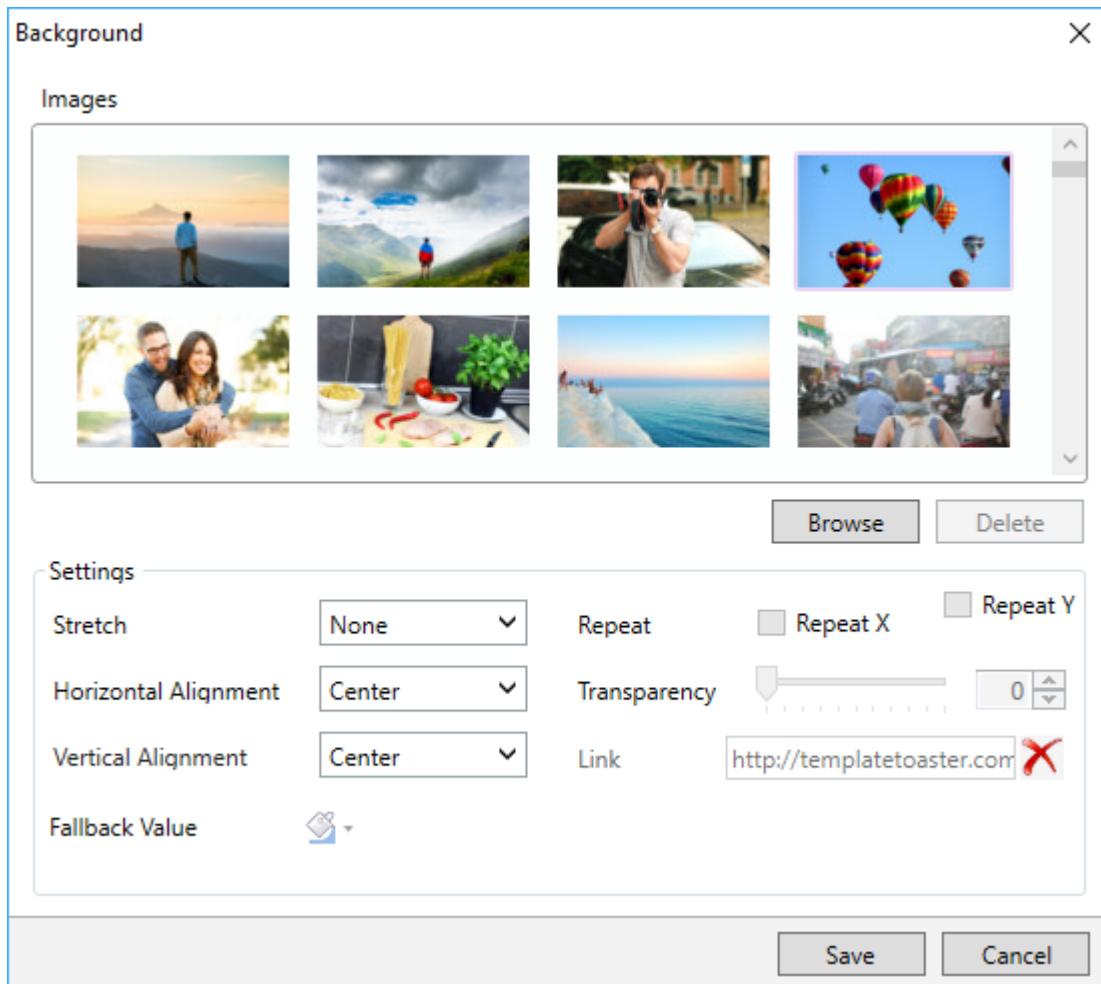

Custom Gradient-

You can create custom gradients with a preferred angle, color, and offset choices. You can save the gradients information about creating and saving custom gradients.

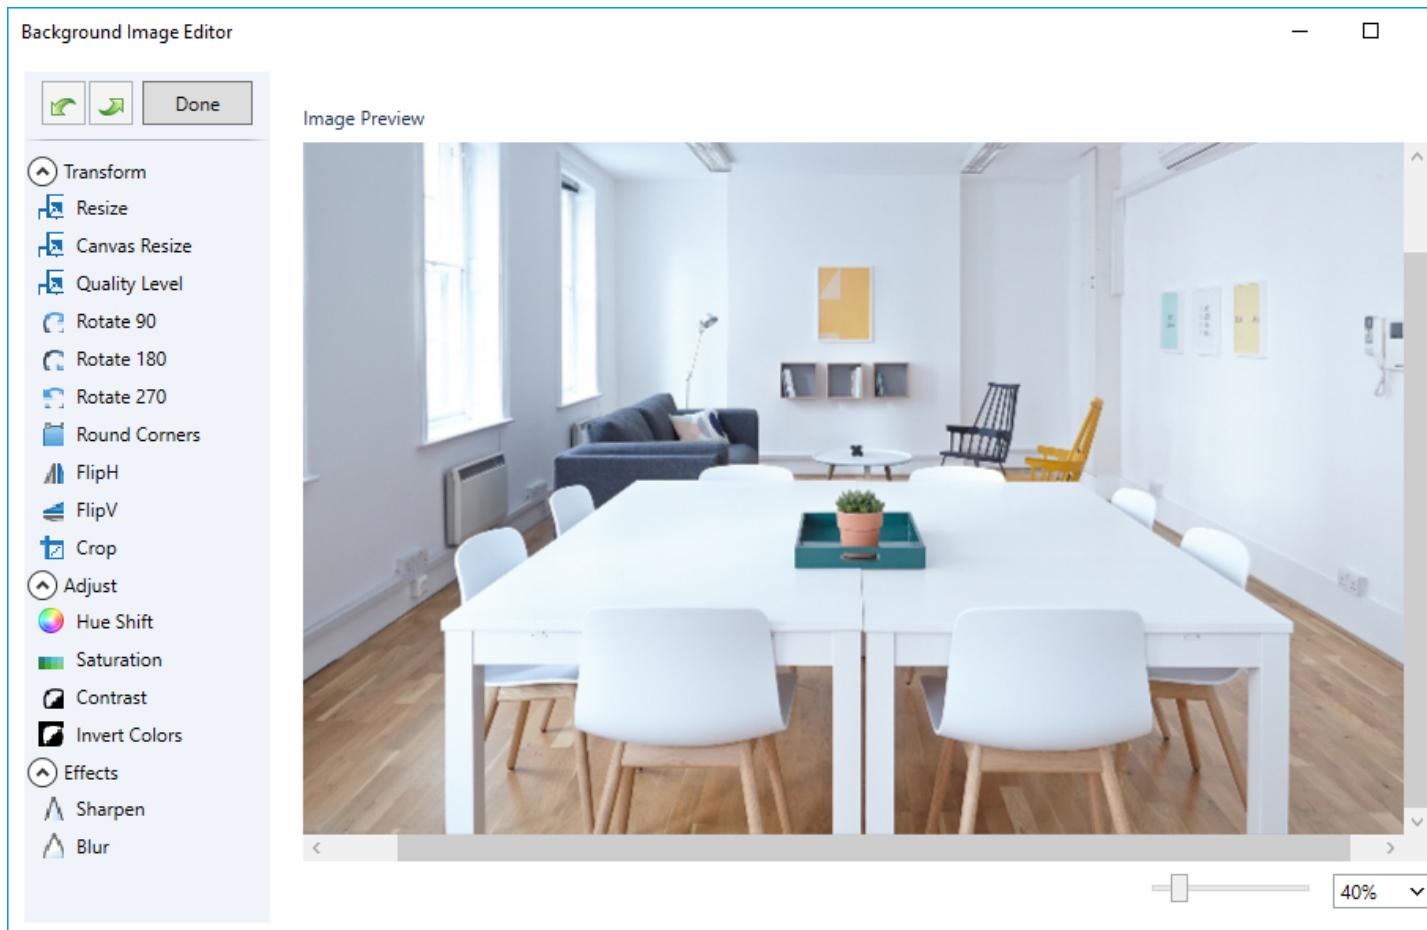

Browse Images-

You can apply an image in the background of the sidebar(s). TemplateToaster has an inbuilt stock of free images and custom images.

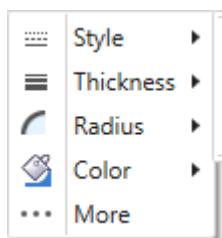

You can even edit the browsed image(s). TemplateToaster provides an image editor with a dozen of editing options for browsed images. For details, [see this](#).

3 Border

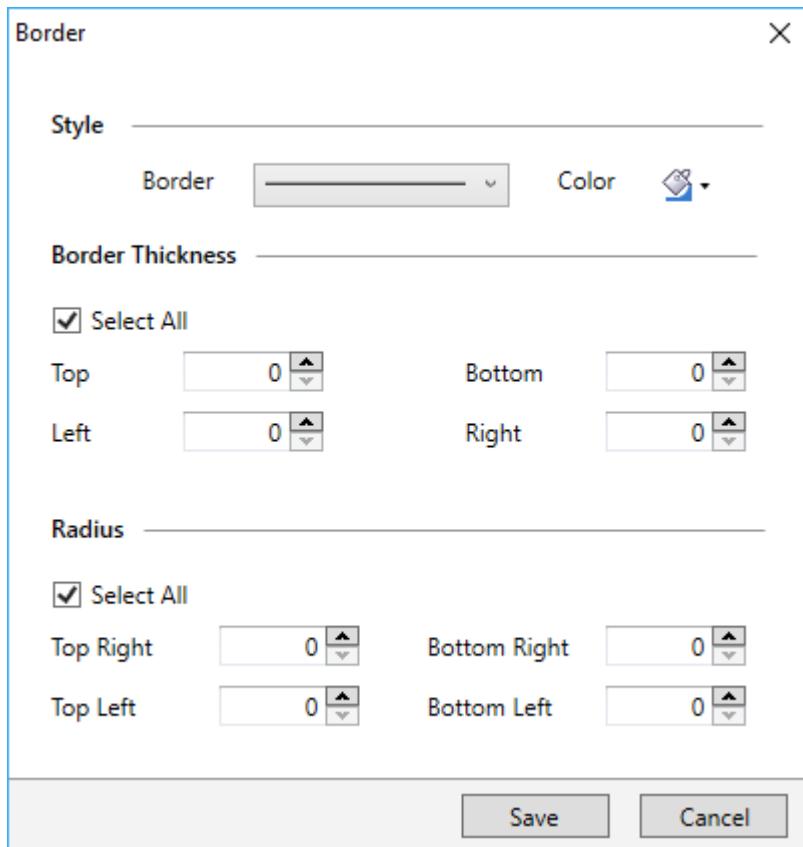

[Border](#) ▾

Customizes the border of the sidebar (s) by specifying Style, Thickness, Radius and Color .

More -

Click "More" for more border customization options. [See this](#) for details.

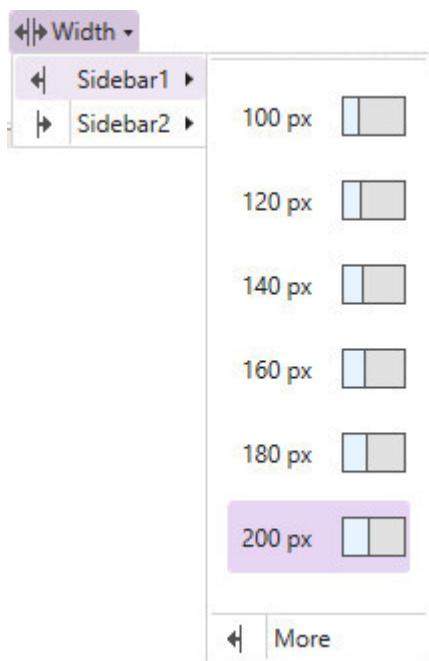

Width

4

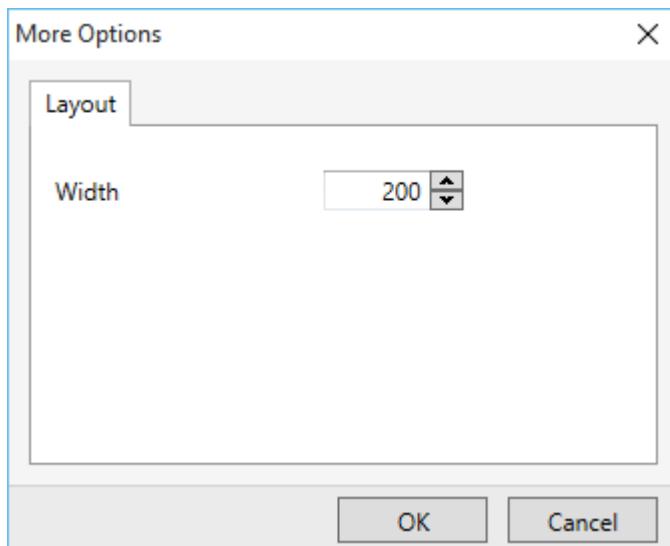

Changes the width of the sidebar(s).

Note: You can set the custom width in pixels if you have chosen Fixed width layout for your template/website. Otherwise, if you with Fluid width layout, you can set custom width in percentage.

More -

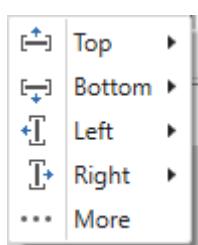

You can specify custom width clicking "More".

5

Margin

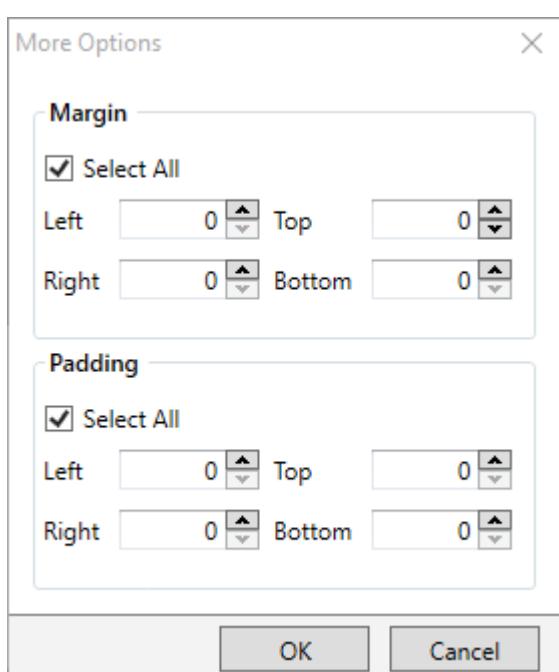

Margin ▾

On clicking this option, you can set the margin of the sidebar(s) for all sides (i.e. top, bottom, left and right).

More -

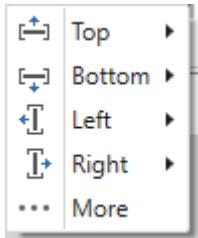

You can specify the custom margins using "More".

6 Padding

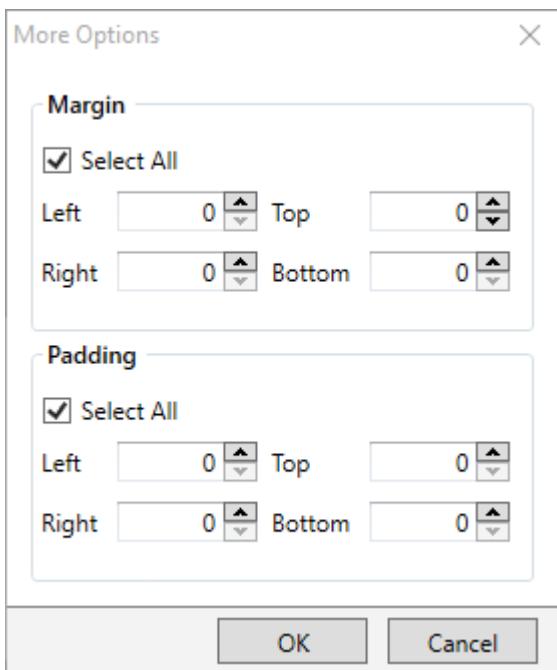

Specifies the padding of the sidebar(s) from all the sides i.e. top, bottom, left and right. Padding specifies the white space (or distance) between the content and the border of the element.

More -

You can specify custom padding with "More".

7 Texture

Applies a texture to the sidebar background.

More-

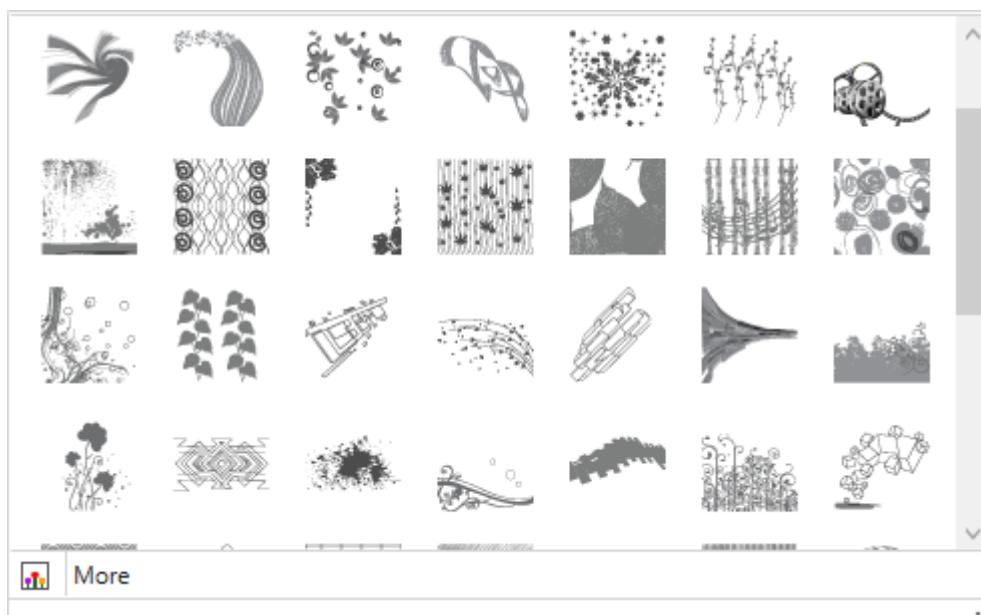

You can customize the transparency of texture using "More". [Click Here](#) for more details.

Effects

8

Effects ▾

To apply an effect to the sidebar background.

More -

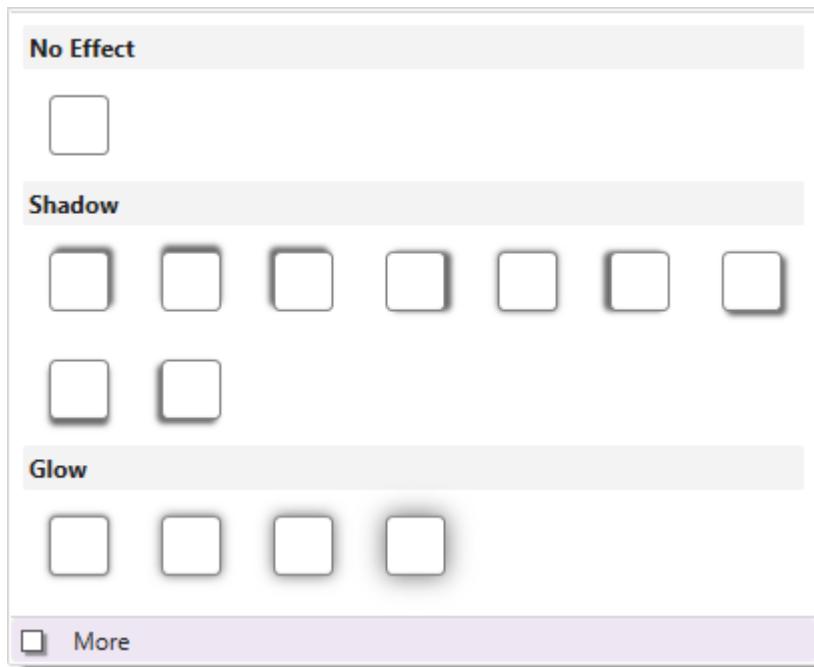

You can also customize the transparency of the effect with help of "More" . [Click Here](#) for more details.

Shadow

9

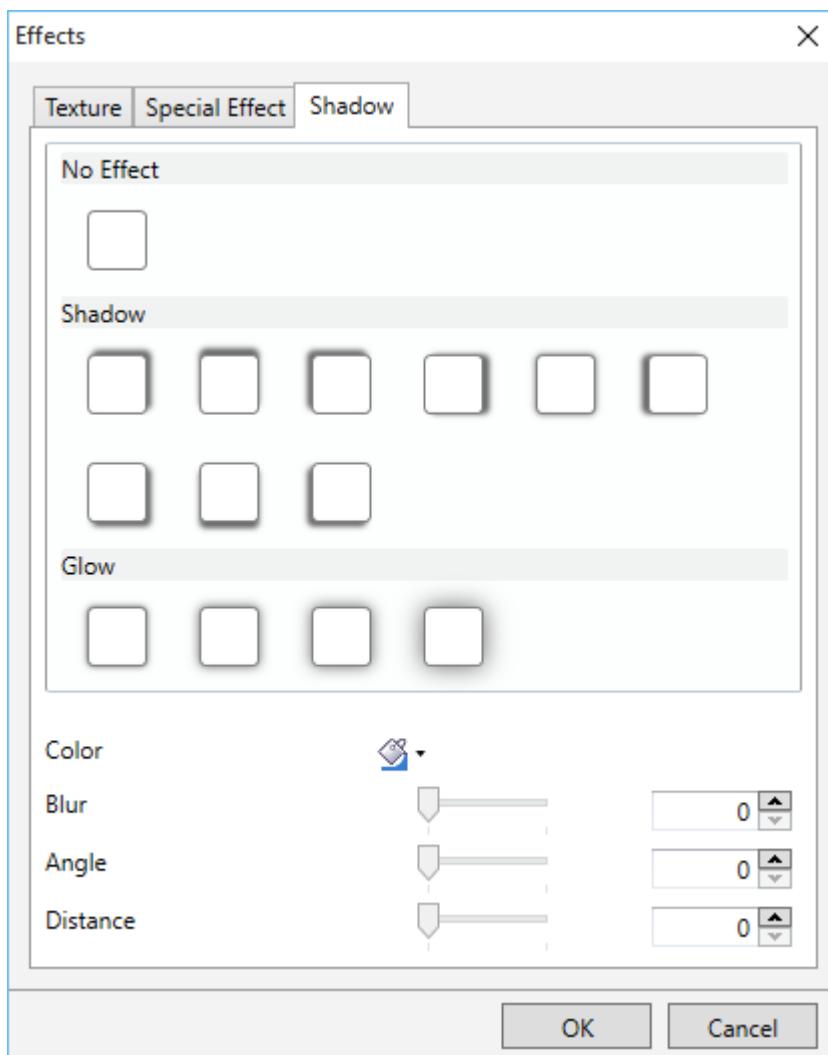

Shadow ▾

To apply a shadow effect to the sidebar background.

More-

Customizes the color, angle, blur, and distance of the shadow effect. [Click Here](#) for more details.

10

100% Height

100% height specifies that the height of the sidebar will be equal to the content height.

11

Equal To Content

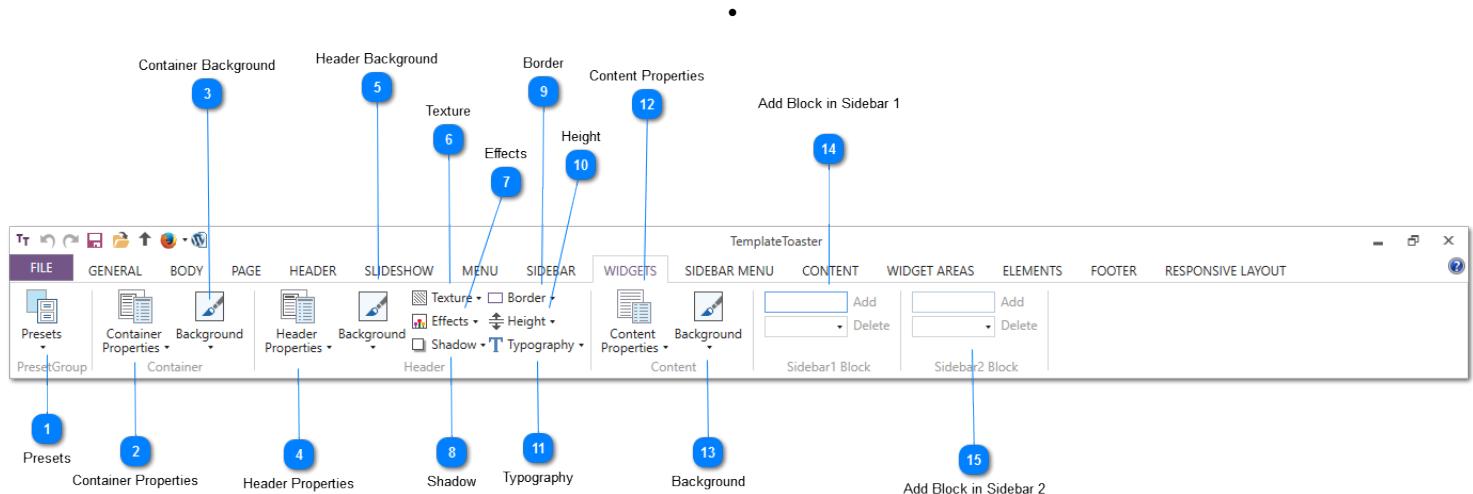

Equal to content means that the height of the sidebar will be equal to sidebar's content (Widgets, Modules etc.).

2.10. Widgets/Modules/Block

This tab will display if the design supports the sidebar. The name of the widgets tab changes according to the choice made for the CMS as follows:

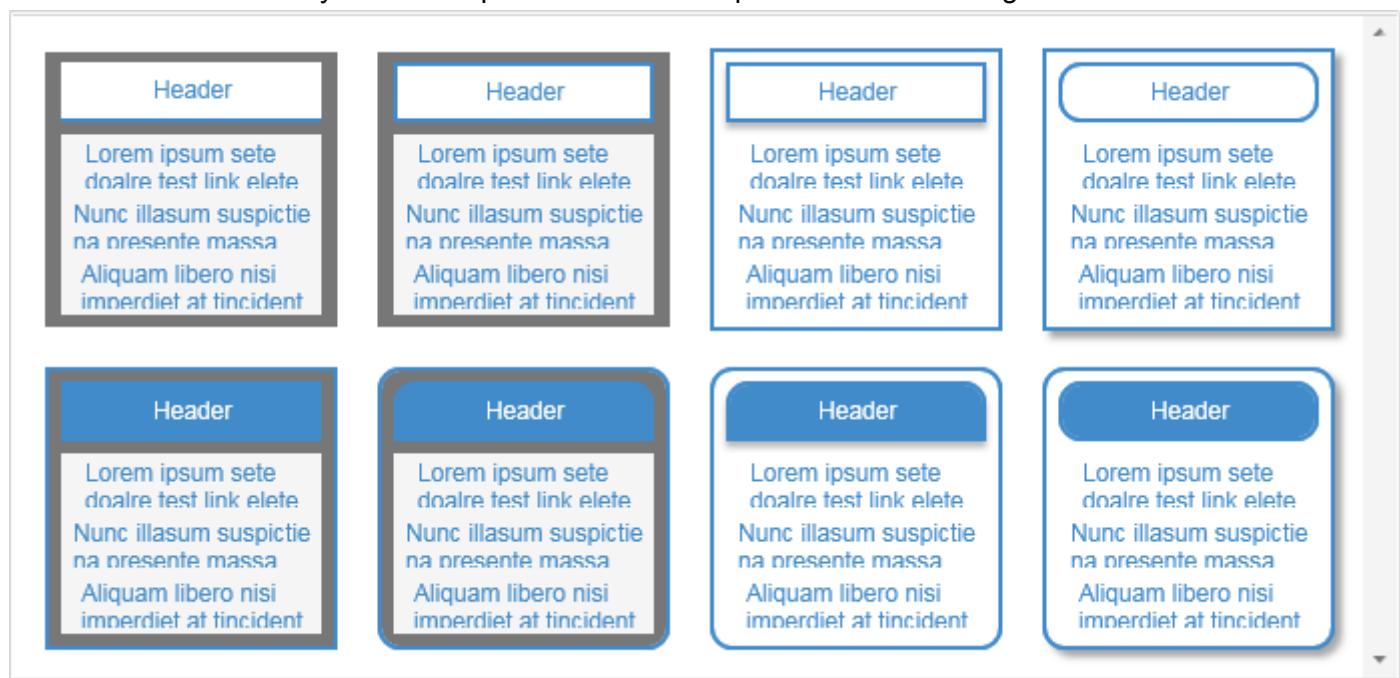

- Widgets :-** WordPress, Blogger, Magento, WooCommerce, OpenCart, Prestashop
- Modules :-** Joomla
- Block :-** Drupal, HTML

Presets

Displays a pre-designed set of styles for widgets/modules/ block. You can choose a pre-designed widget/module/block and modify its look as per need of the template or website design.

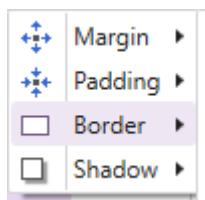

2

Container Properties

Container Properties ▾

Customizes the container of the widget/module/block according to your template/website.

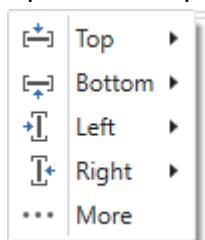

Margin :

Specifies the margin of a container for all the sides i.e. top, bottom, left and right.

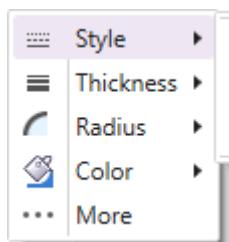

Padding:

Specifies the padding of the container from all the sides i.e. top, bottom, left and right.

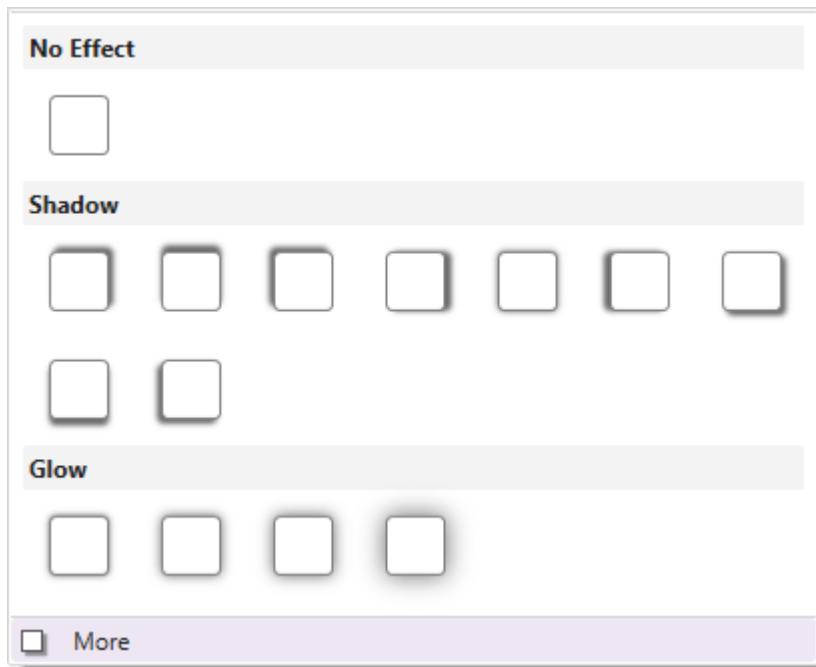

Border:

Customizes the border of a widget/module/block container. [See this](#) to know more about designing the border.

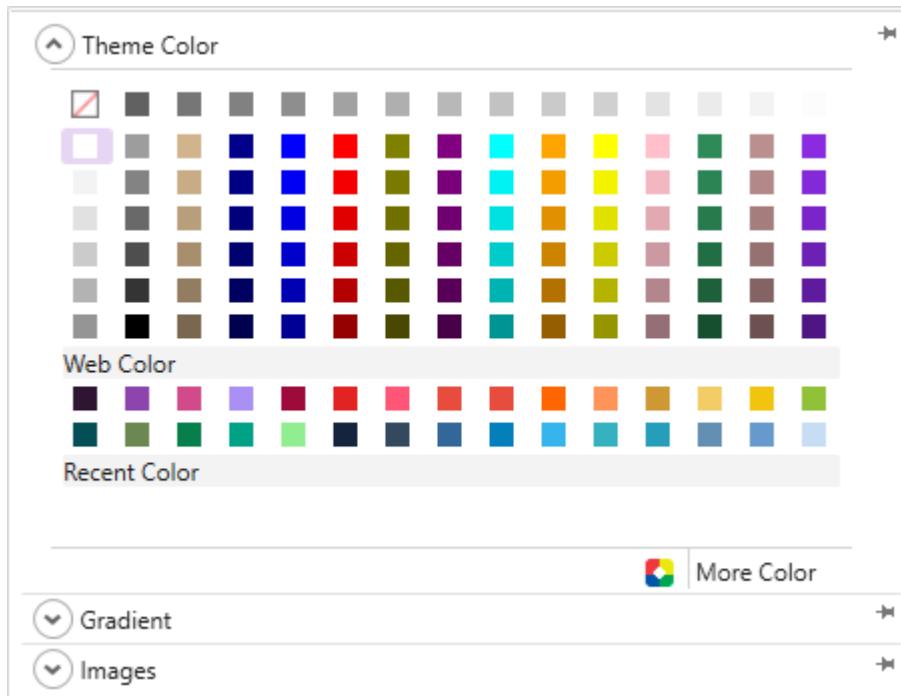

Shadow:

To apply a shadow effect to the container. [Click Here](#) for more details.

3 Container Background

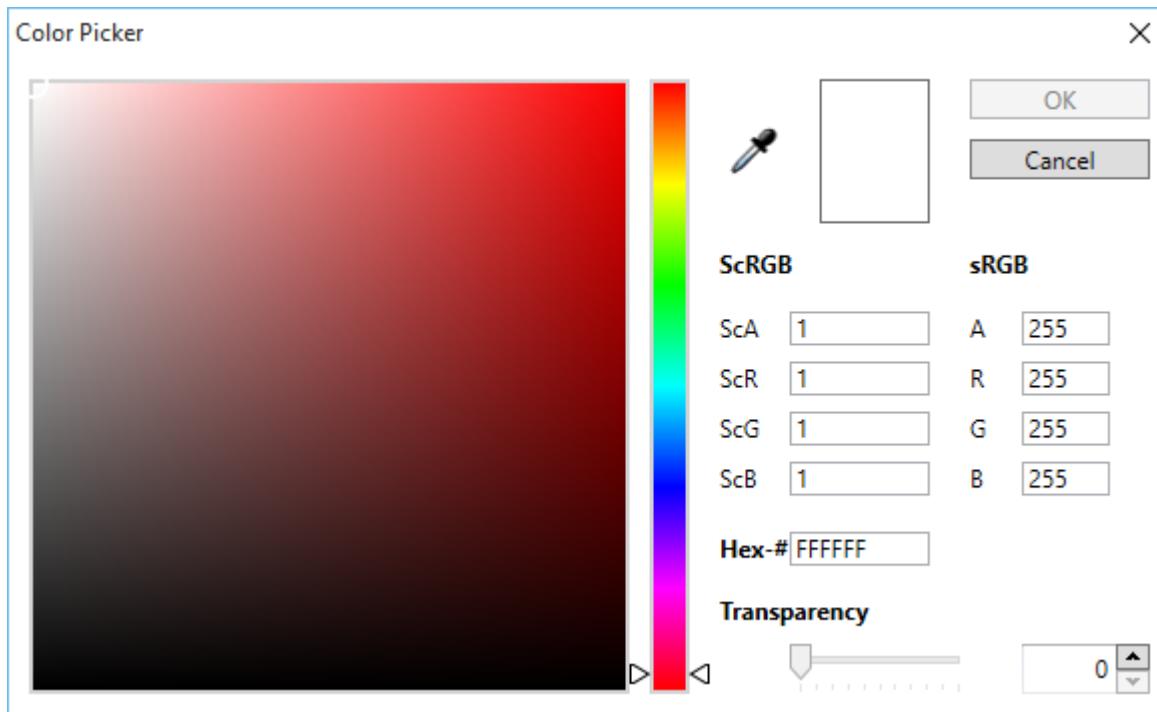

Background
Applies a preferred color, gradient, or image to the container background.

TemplateToaster provides the following extended background options-

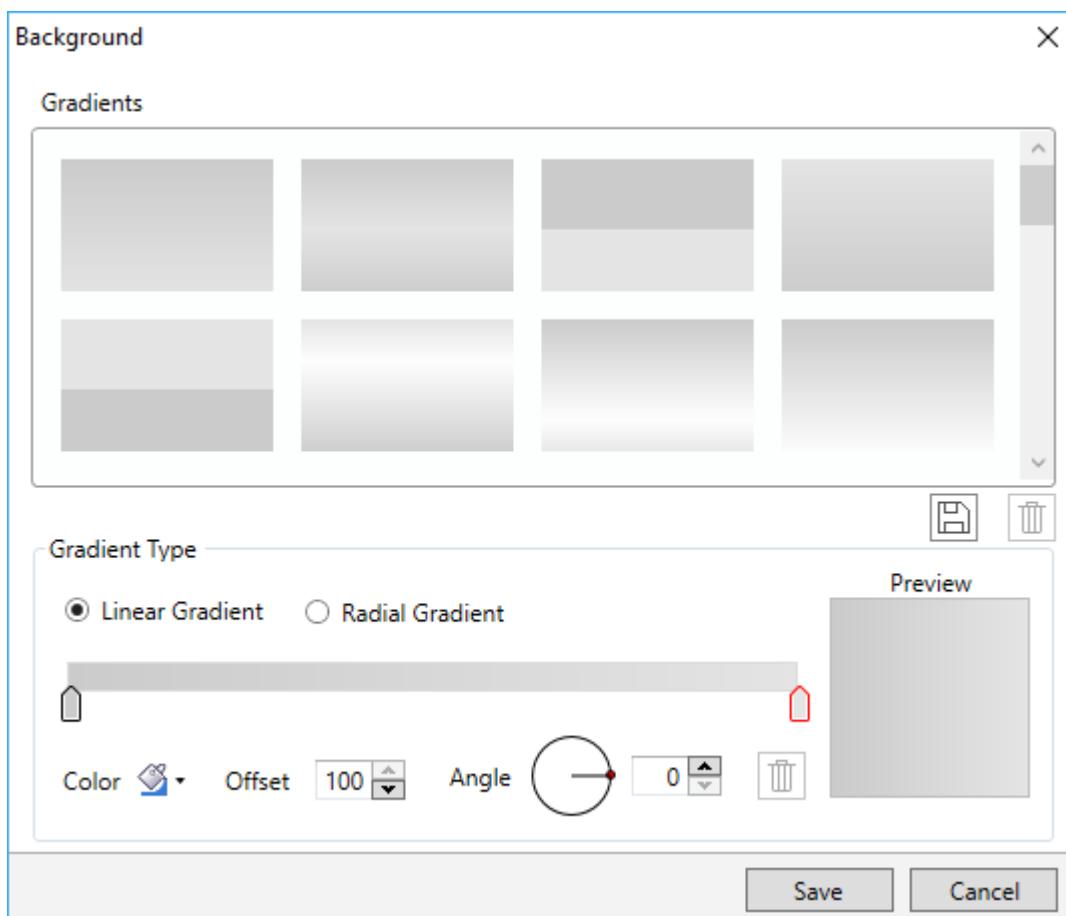

Color picker-

TemplateToaster gives you a color picker to choose a background color. [Here is](#) the full detail of a color picker.

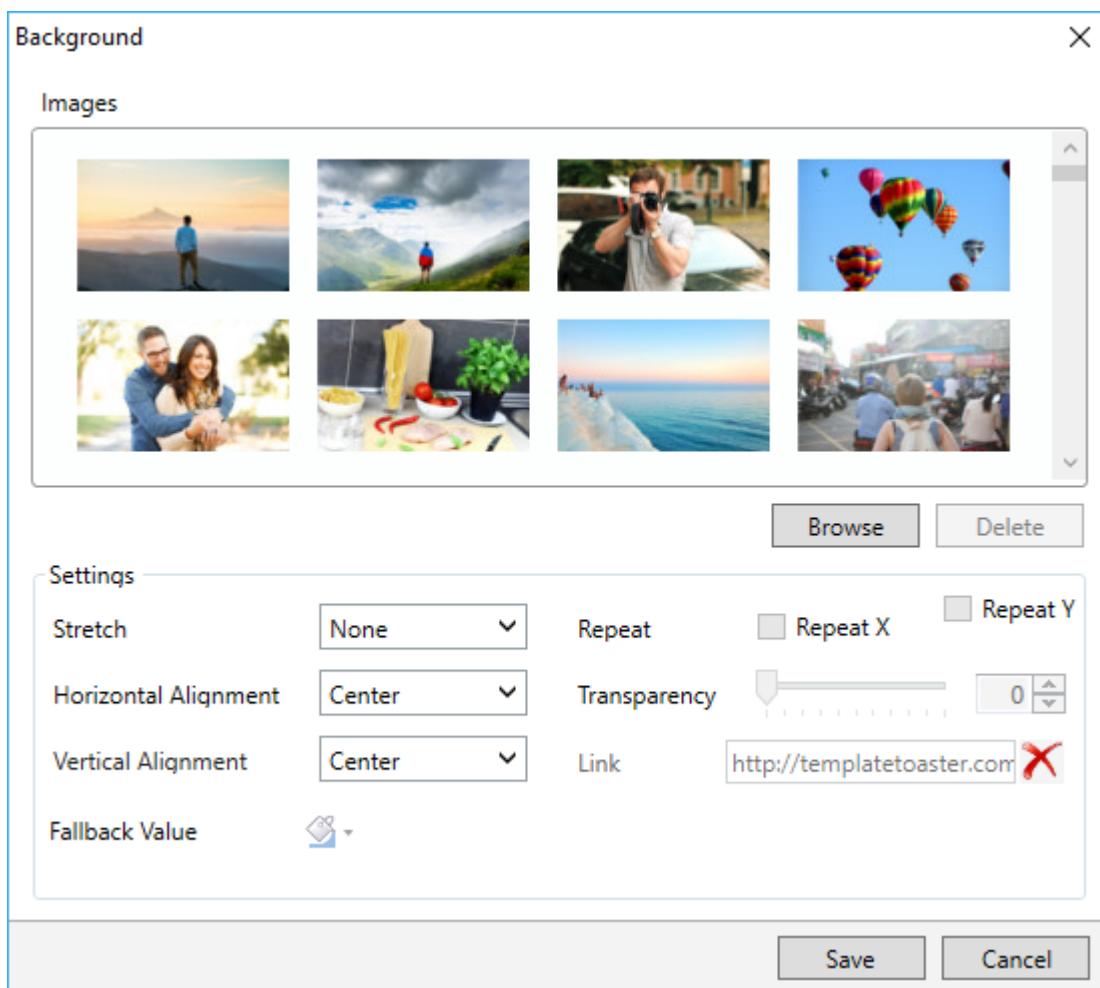

Custom Gradient-

You can create custom gradients with preferred angle, color and offset choices. You can save the gradients as information about creating and saving the custom gradients.

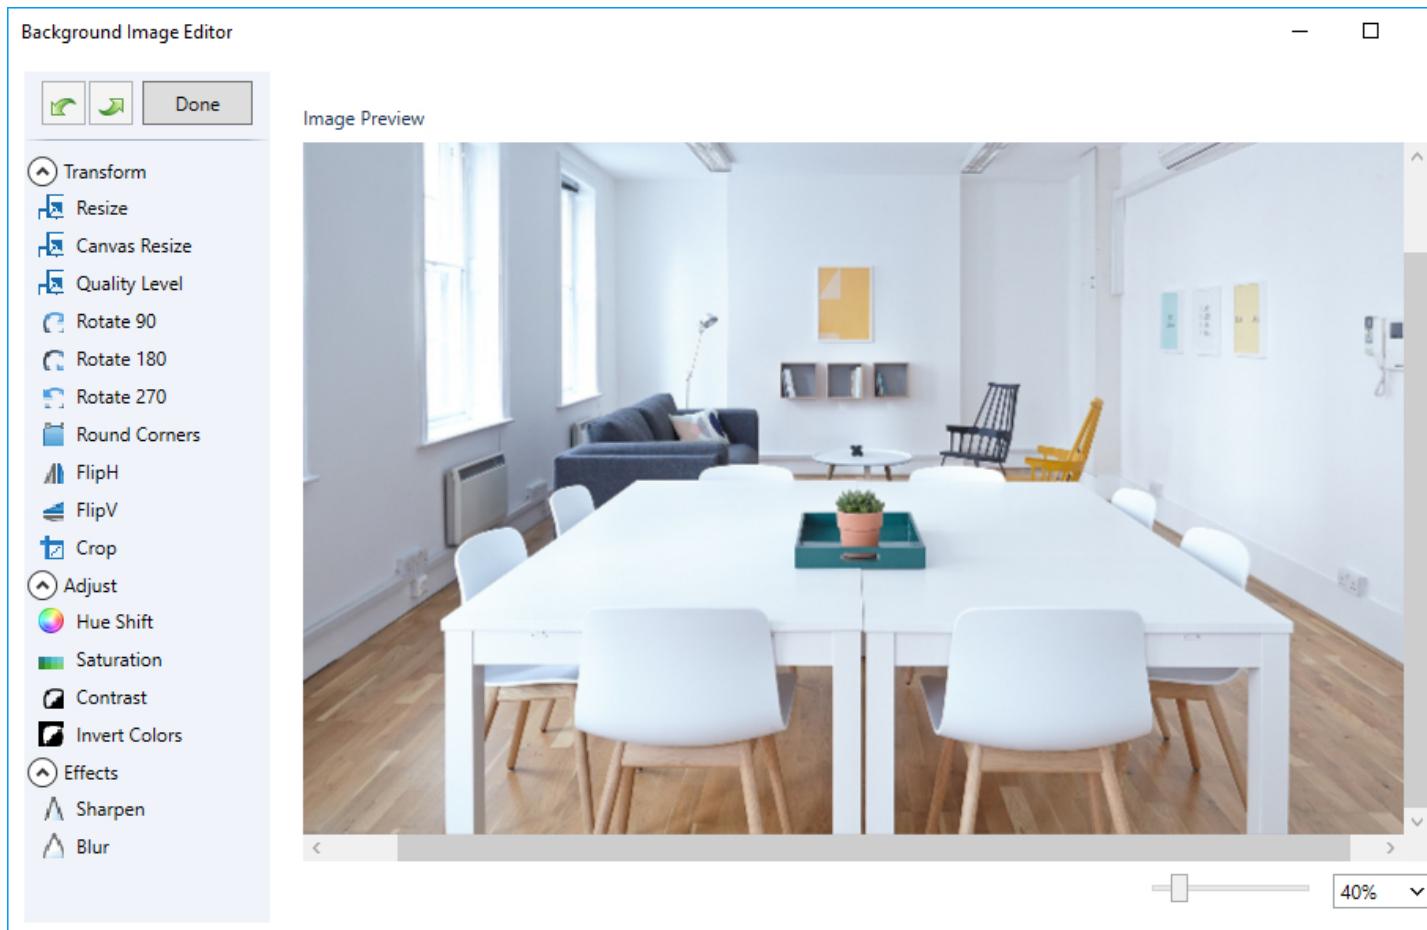

Browse Images-

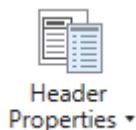

You can apply an image in the background of a Widget/Module/Block container. TemplateToaster has an inbuilt can browse and even edit those custom images.

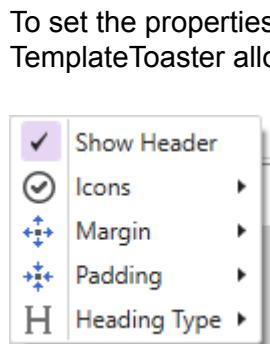

As shown below, TemplateToaster has an image editor with a dozen of edit options to customize the browsed

4 Header Properties

Header Properties ▾

Show Header-

Check the "Show Header" option to display the header of Module/Widget/Block.

Icons-

Display an icon with the Widget/Module/Block header. For this, you can even browse your own icons.

Margin-

Sets the margin of the header for all the sides i.e. top, bottom, left and right.

Padding-

Specifies the padding of the header from all the sides i.e. top, bottom, left and right.

Heading Type-

To choose desired heading type (H1, H2....H6) for the Widget/Module/Block header.

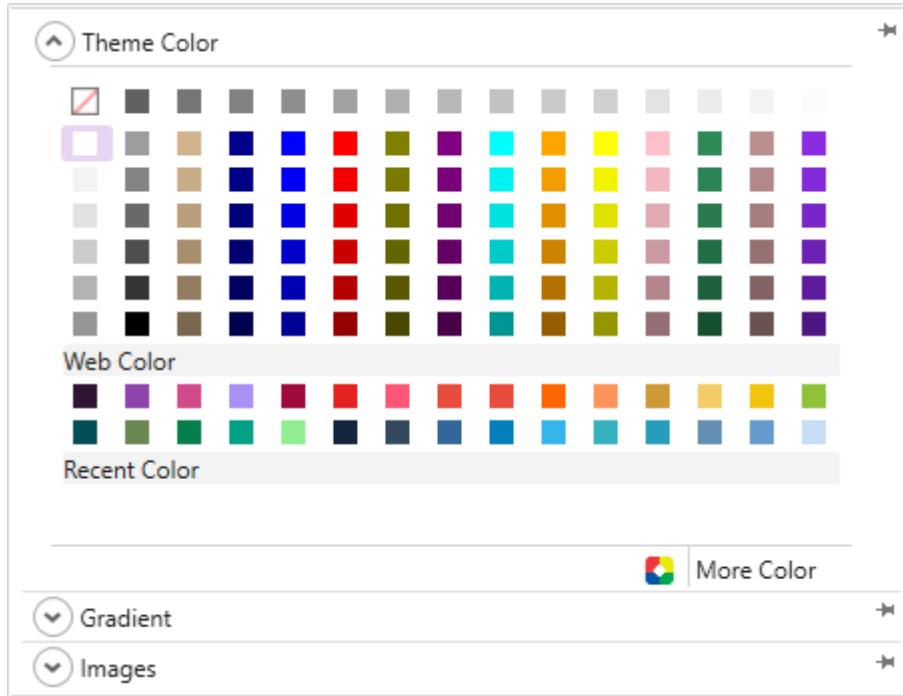

Header Background

5

Background

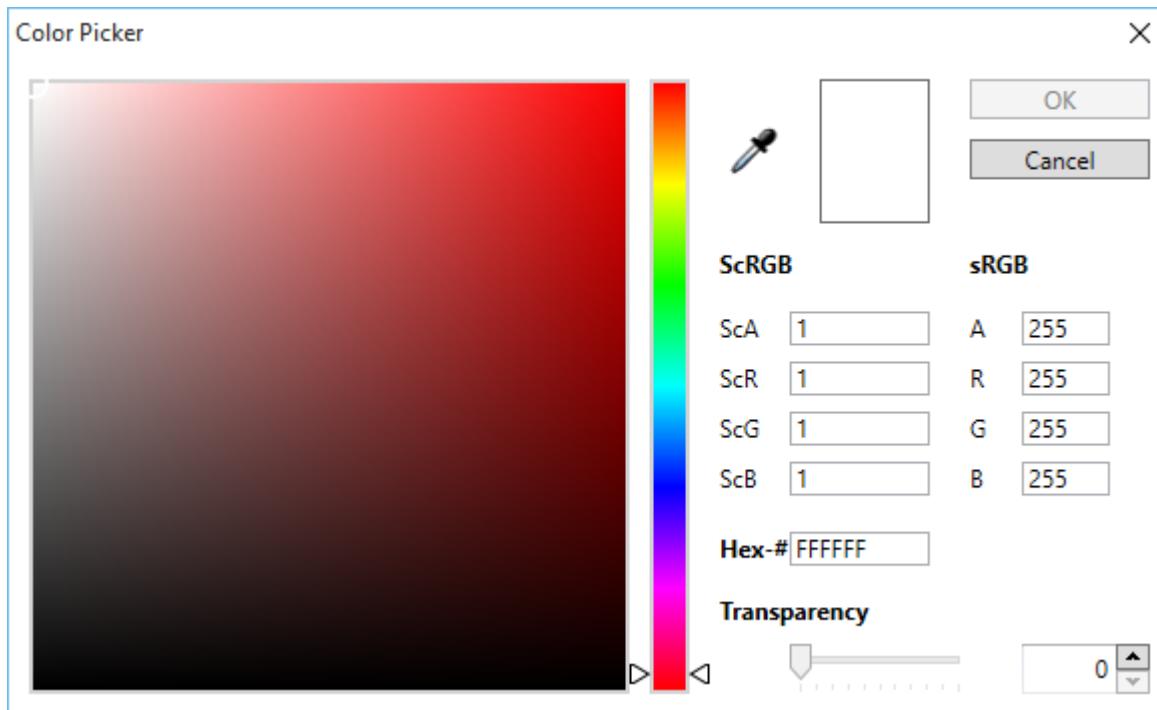

You can choose a preferred color, gradient, or image for the header background with this option.

TemplateToaster features following extended background options:

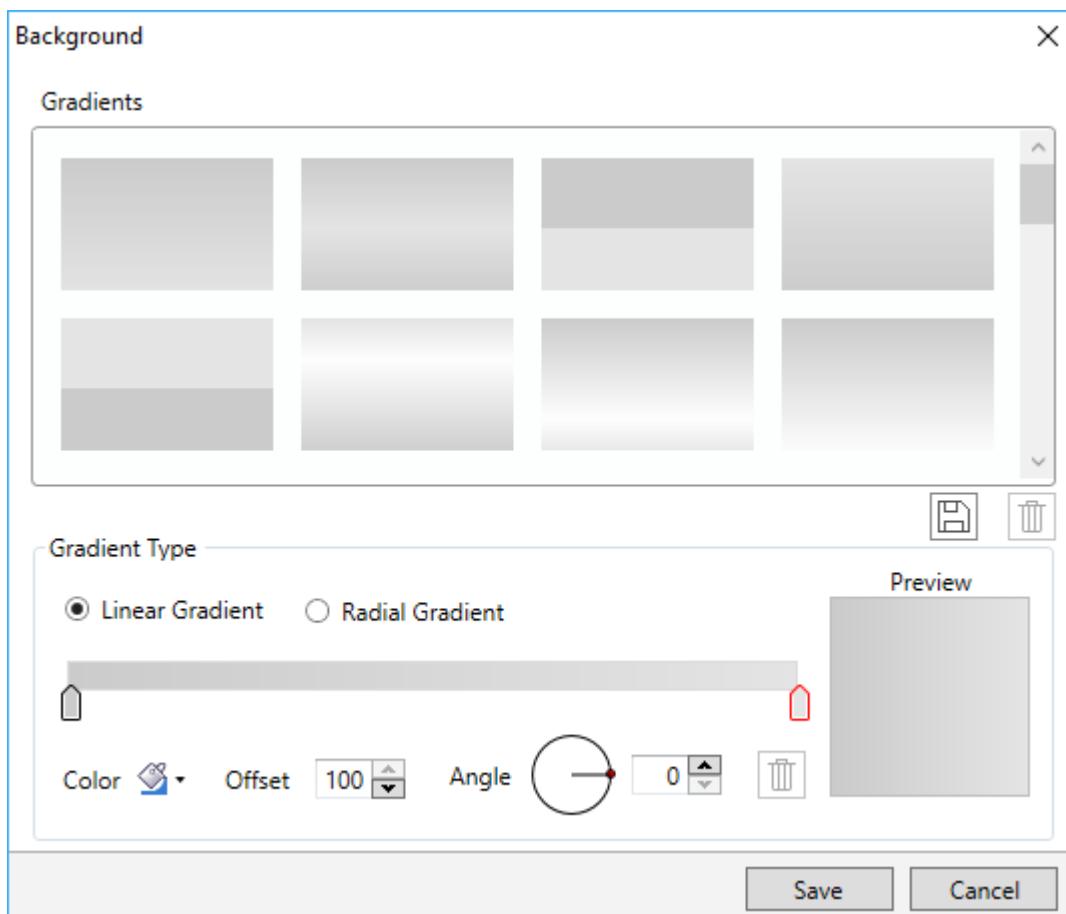

Color picker-

TemplateToaster gives you a color picker to choose a background color for the header of a Widget/Block/Modu

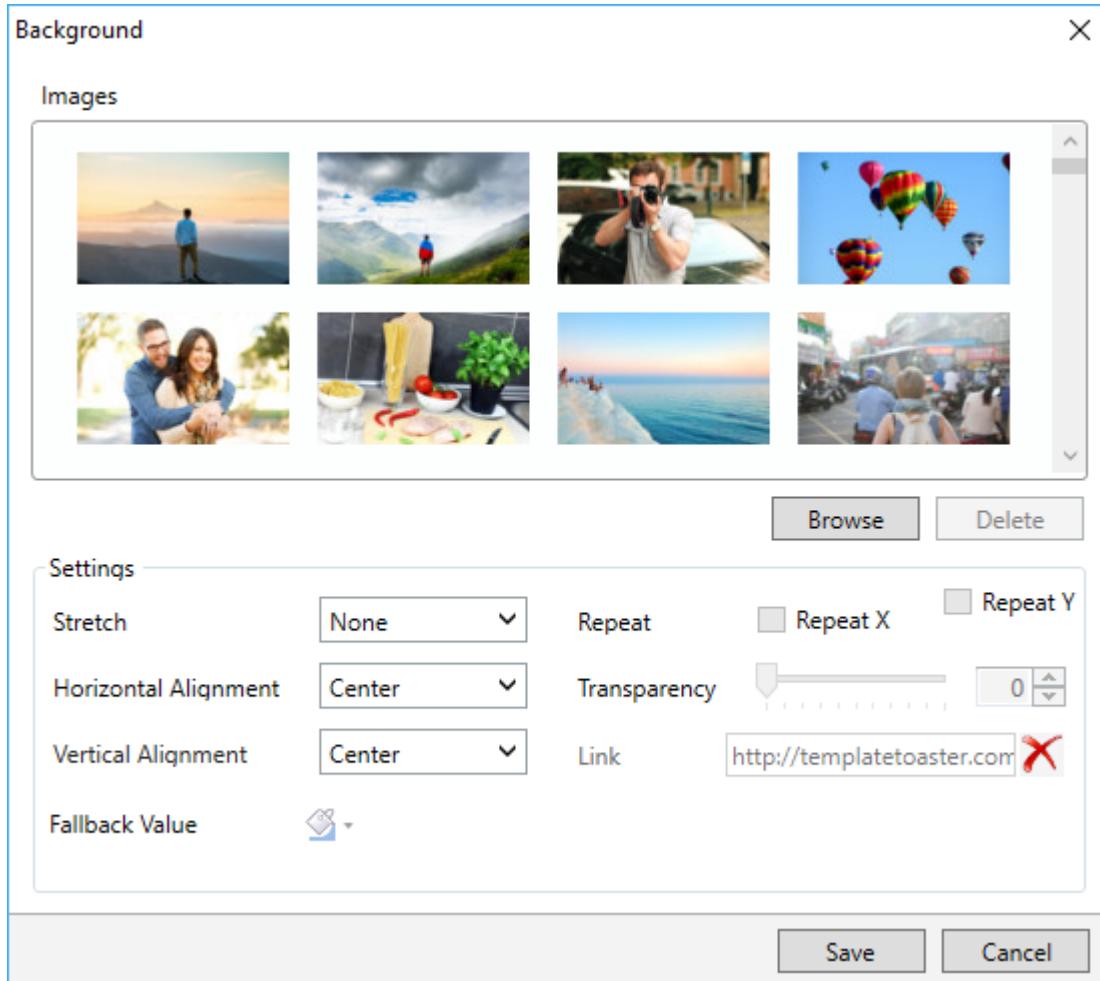

Custom Gradient-

You can create custom gradients with a preferred angle, color and offset choices. You can save these gradient information about creating and saving the custom gradients.

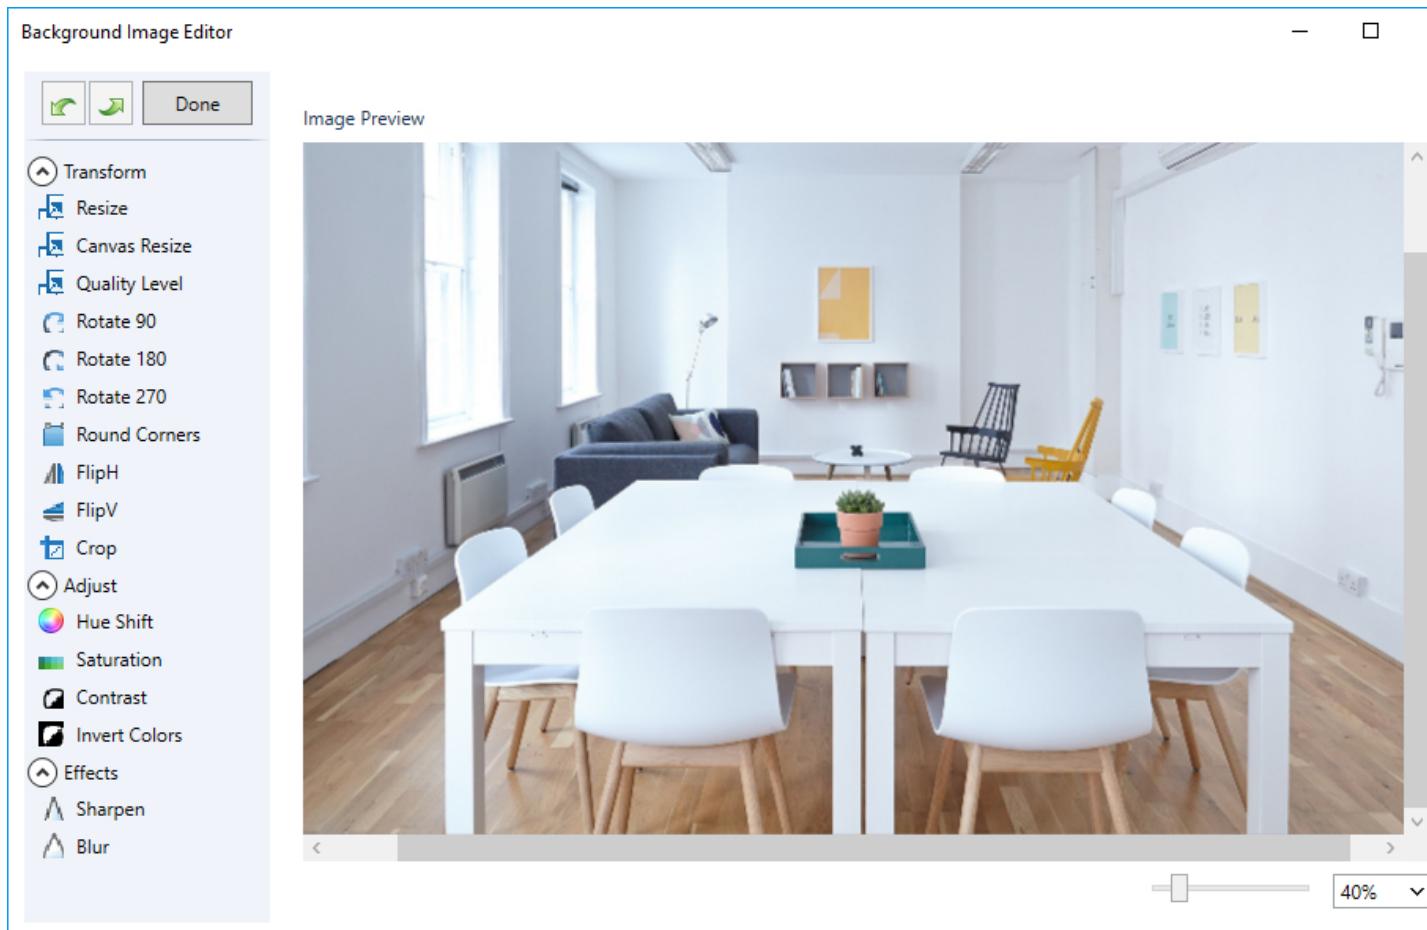

Browse Images-

Applies an image in the background of a Widget/Module/Block header. TemplateToaster has an inbuilt stock of browse and edit your custom images.

As shown below, TemplateToaster has an image editor with a dozen of edit options to customize the browsed

6 Texture

Texture ▾

To apply a texture to the background of a Widget/Module/Block header.

More-

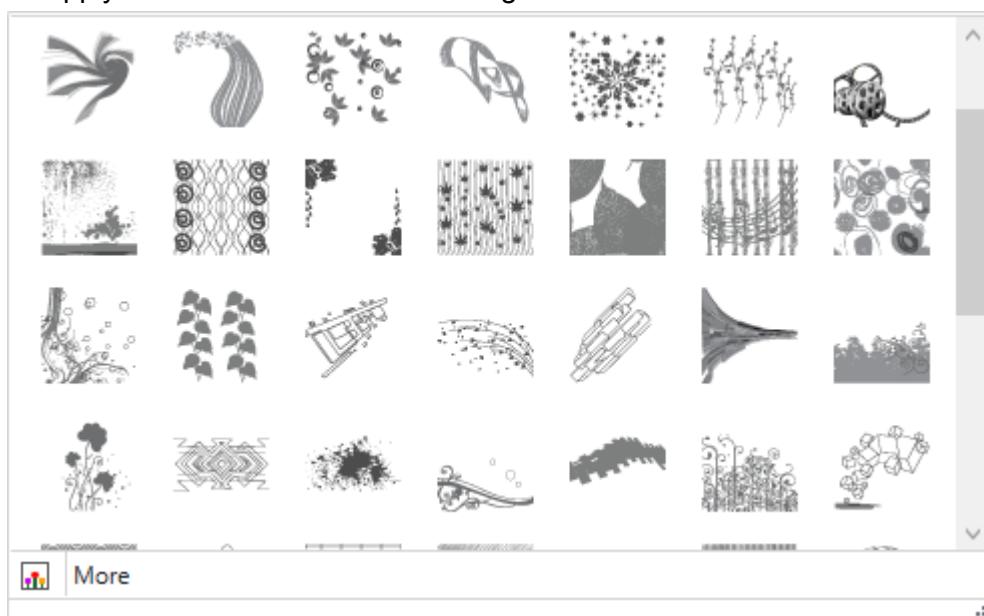

You can customize the transparency of a texture using "More". [Click Here](#) for more details.

7

Effects

To apply an effect on the sidebar background.

More-

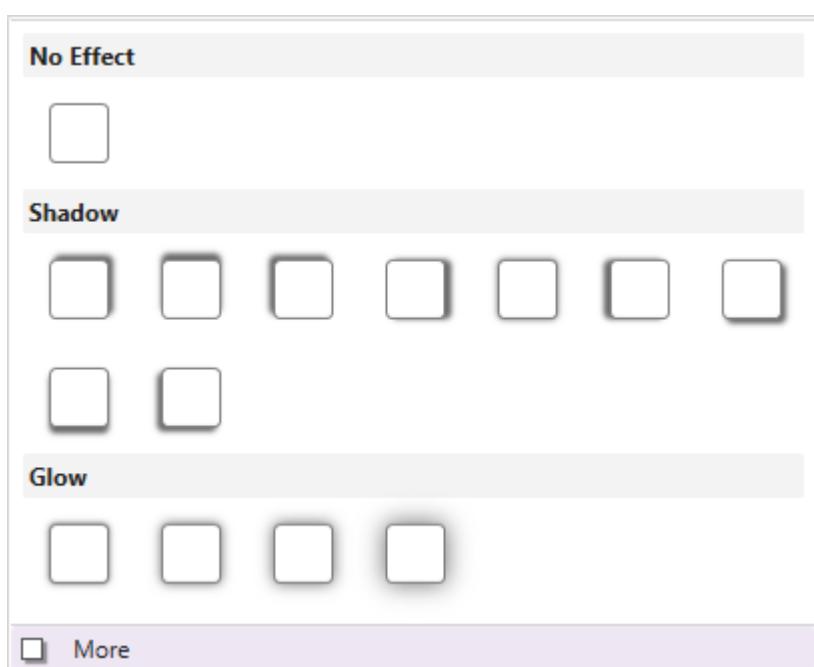

You can customize the transparency of the effect with "More". [Click Here](#) for more details.

8

Shadow

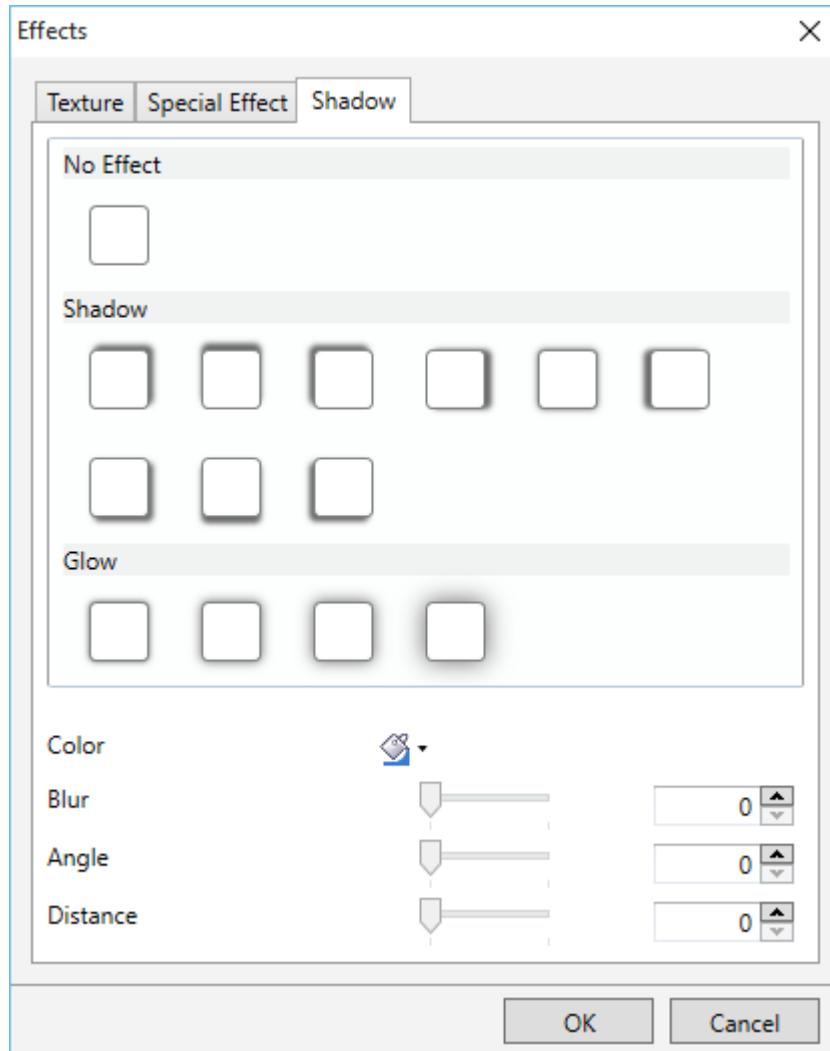

To apply a shadow effect to the menu background.

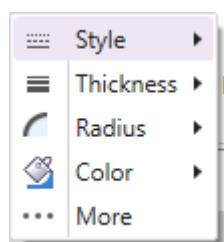

More-

With "More", you can even customize the color, angle, blur, and distance of the shadow effect. [Click Here](#) for more details.

9 Border

Border ▾

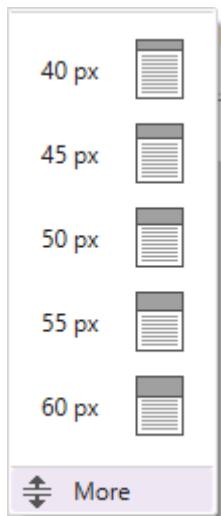

Customizes the border of the header. You can change the style of border, thickness of border, radius of the border corners and border color. [See this](#) to know more about designing the border.

10 Height

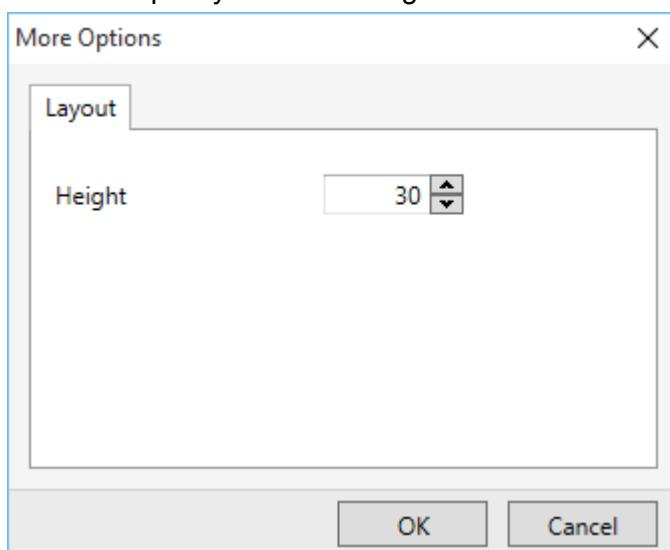

Height ▾

Specifies the height of the header.

More-

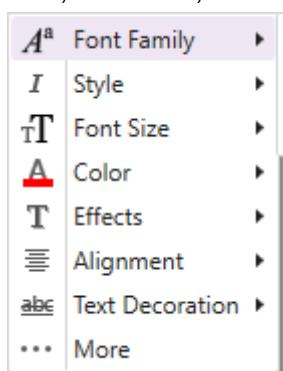

"More" to specify a custom height.

11 Typography

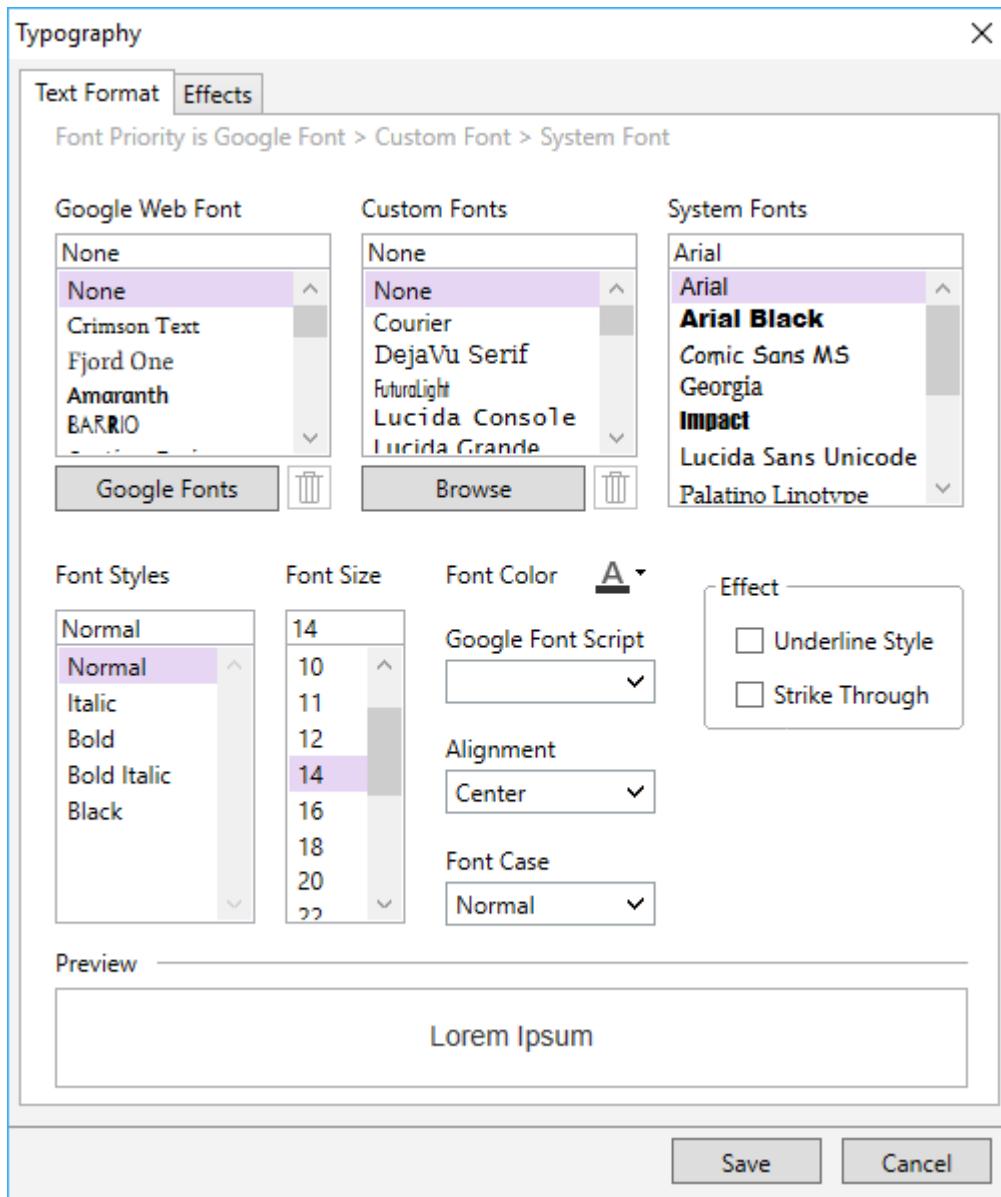

T Typography ▾

Changes the typography of the Widget/Module/Block header. You can select preferred font, style, font size, font color, font effect, text alignment and text direction for the Widget/Module/Block header.

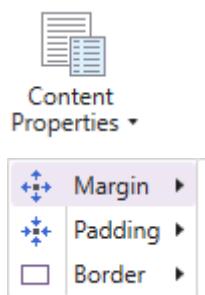

More-

Opens all the typography options in a single window as shown below.

12 Content Properties

To set the content properties of Widget/Module/Block such as Margin, Padding and Border.

13 Background

Changes the background of the content of the Widget/Module/Block.

14

Add Block in Sidebar 1

Manages the number of custom blocks in the first sidebar. You can add as many blocks in the sidebar as you need.

<input type="text"/>	Add
<input type="button" value="▼"/>	Delete

Add-

To add a block, just write the name of the block in the text box and press "Add".

Delete-

You can delete the block(s) if required. For this, select a block from the drop down menu and press "Delete".

Note: This option is provided when your template type is "WordPress" or "HTML".

15

Add Block in Sidebar 2

Manages the number of custom blocks in the second sidebar. You can add as many blocks in the sidebar as you need.

<input type="text"/>	Add
<input type="button" value="▼"/>	Delete

Add-

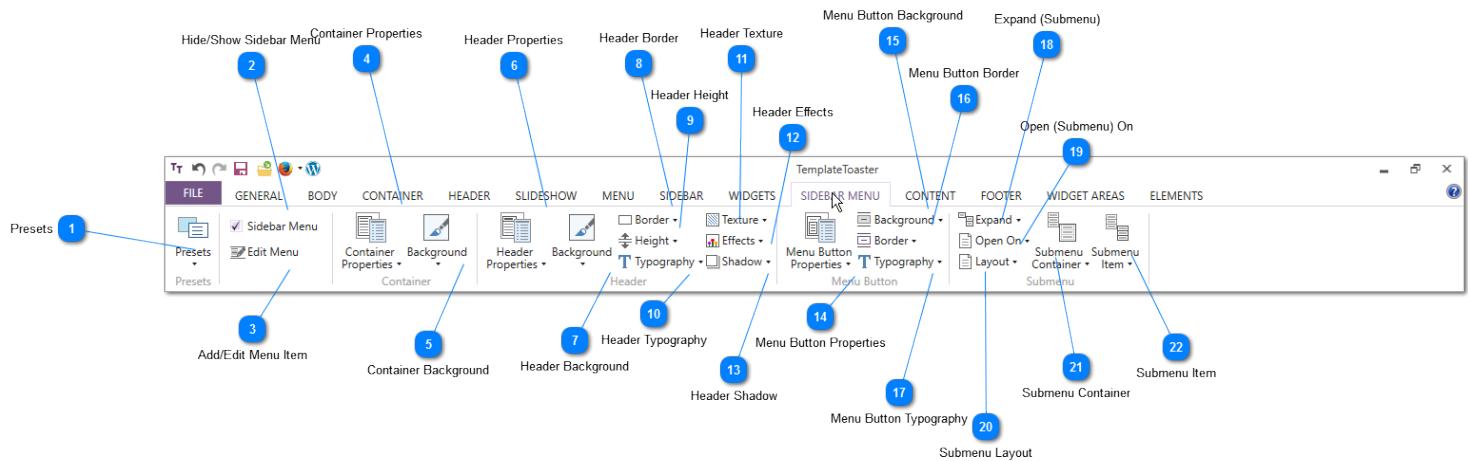

To add a block, just write the name of the block in the text box and press "Add".

Delete-

You can delete the block(s) if required. For this, select a block from the drop down menu and press "Delete".

Note: This option is provided when your template type is "WordPress" or "HTML".

2.11. Sidebar Menu

1 Presets

Set of pre-defined layouts for sidebar menu.

2 Hide/Show Sidebar Menu

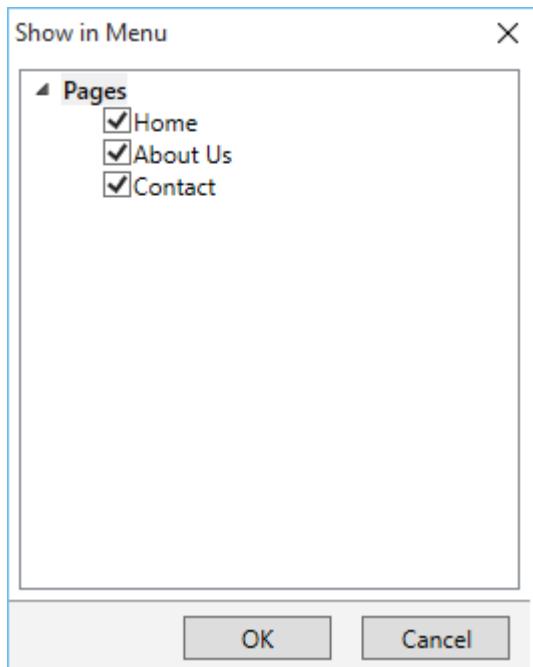

By default, the sidebar menu is active. If you would want to hide it, just uncheck this option and vice-versa.

3 Add/Edit Menu Item

Gives you the choice to select the page(s) on which you want to or don't want to show the sidebar menu.

4 Container Properties

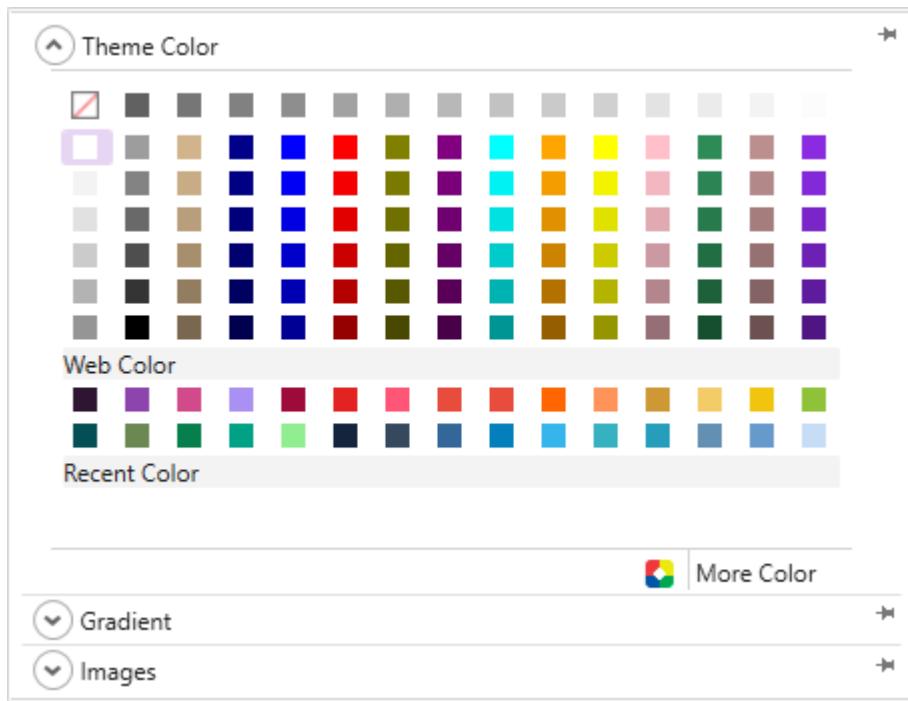

Modifies the properties of a submenu container like Margin, Padding, Border and Shadow.

5 Container Background

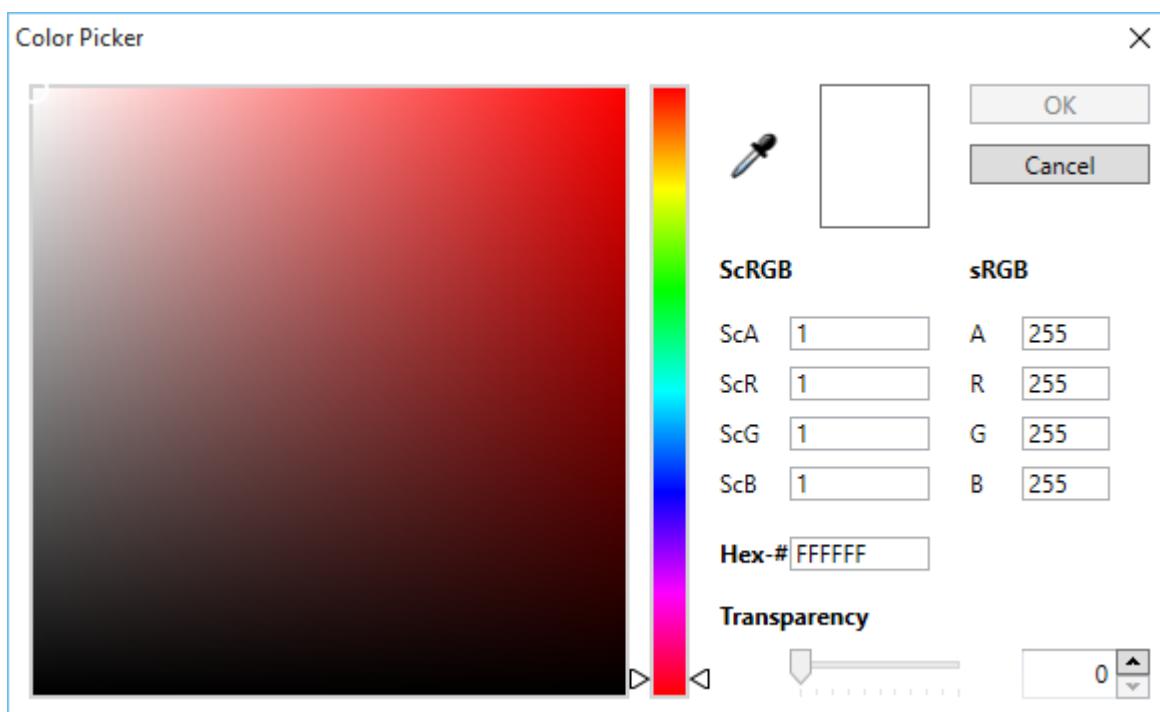

Applies a preferred color, gradient, or image to the menu's background.

TemplateToaster features the following extended background options-

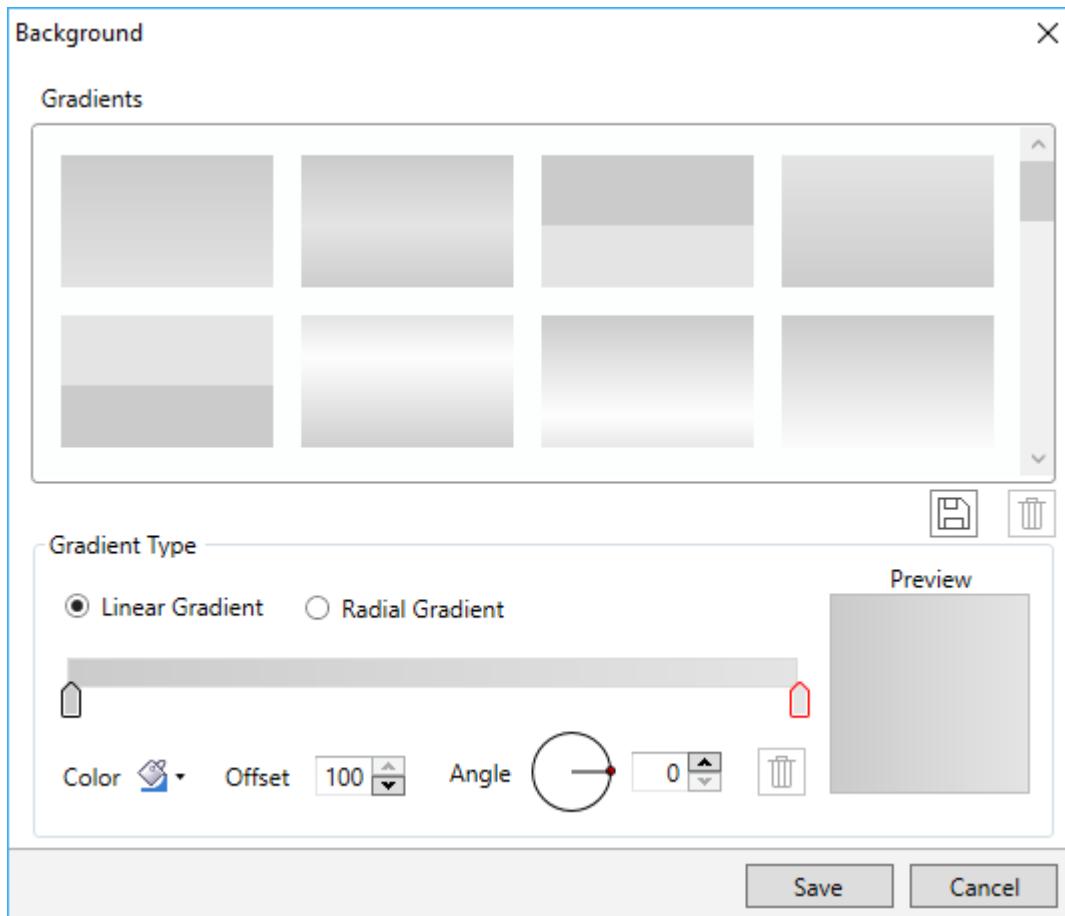

Color Picker-

TemplateToaster gives you a color picker to choose a background color. [Here](#) are the details of the Color Picker.

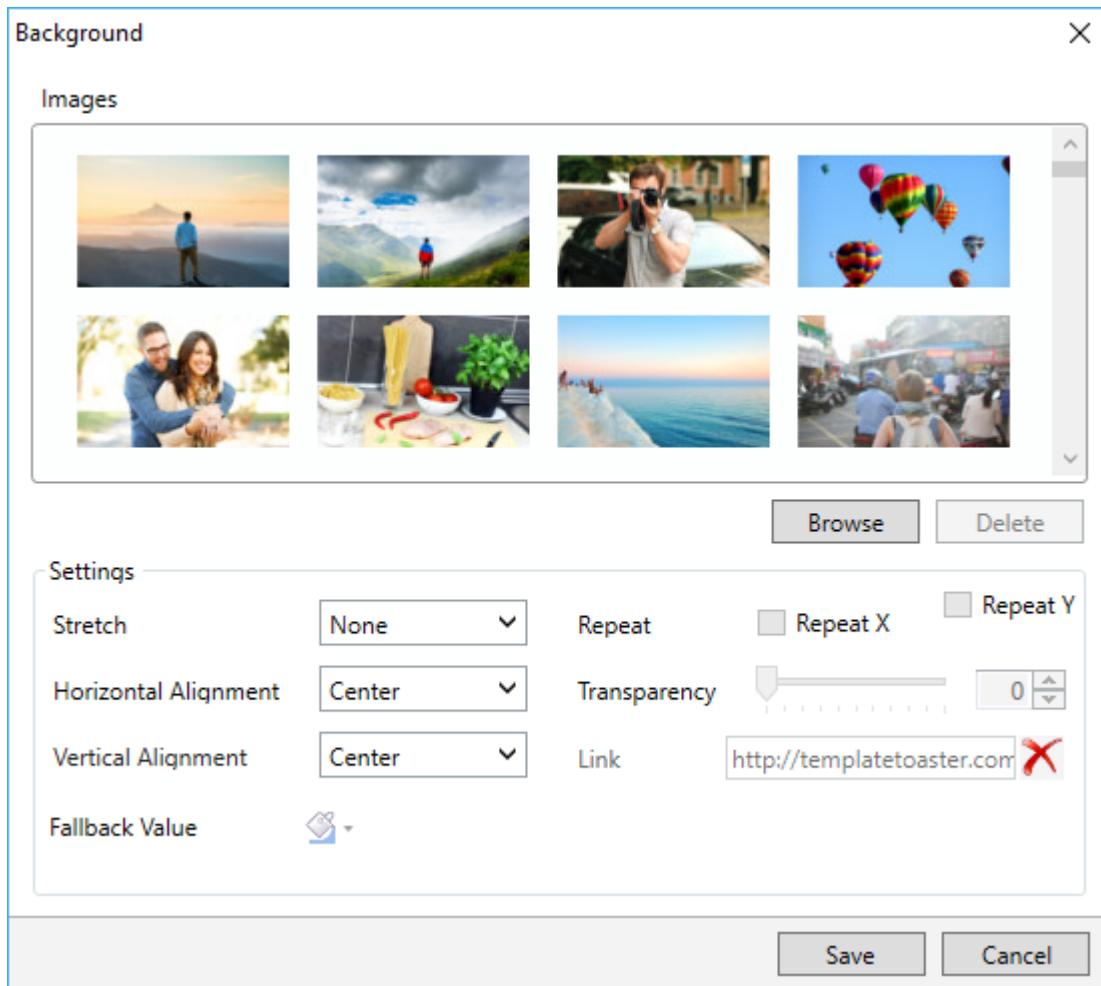

Custom Gradient-

You can create custom gradients with preferred angle, color, and offset choices. You can save the gradients as information about creating and saving the custom gradients.

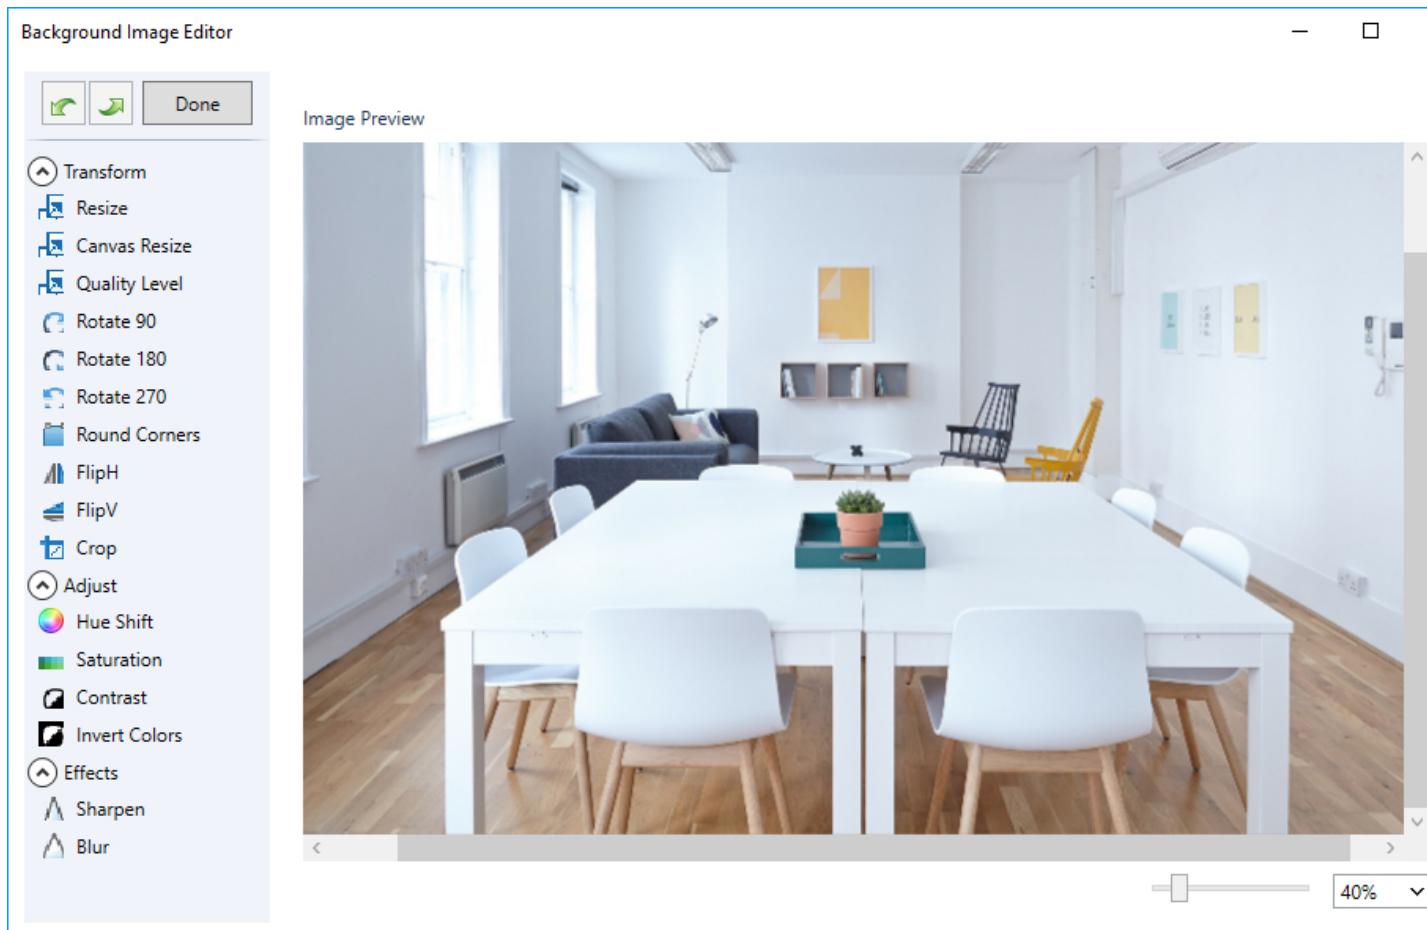

Browse Images-

You can even apply an image in the menu background. TemplateToaster has an inbuilt stock of free images. You can choose from the stock, or browse your custom images.

You can even edit the browsed images. TemplateToaster has an image editor with a dozen of edit options to edit images. For details, [see this](#).

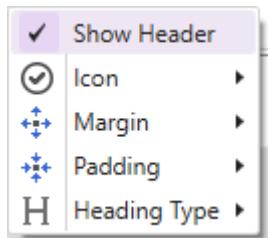

6 Header Properties

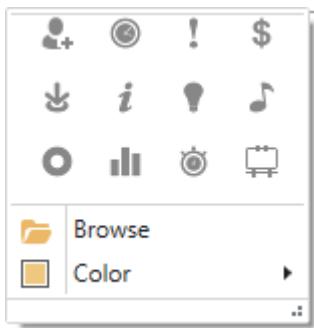

Header
Properties ▾

Customizes the look and feel of the Sidebar Menu's header. You can set the following properties that are available with header:

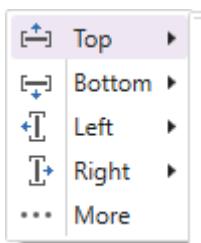

Icon-

You can use an icon with the header. When you click this option, you can see a small stock of icons, which are commonly used in the websites. But, if you have your custom icons, you can also browse those icons. An option to change the color of the icon is also available here.

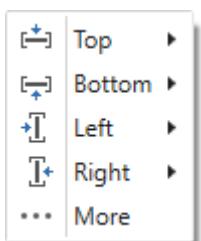

Margin-

Specifies the margin of the header for all four sides.

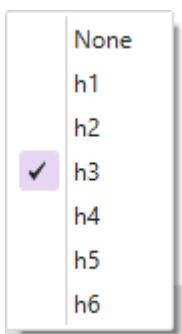

Padding-

Sets the padding of the header from all sides.

Heading Type-

To select a preferred heading type for the header of the sidebar menu.

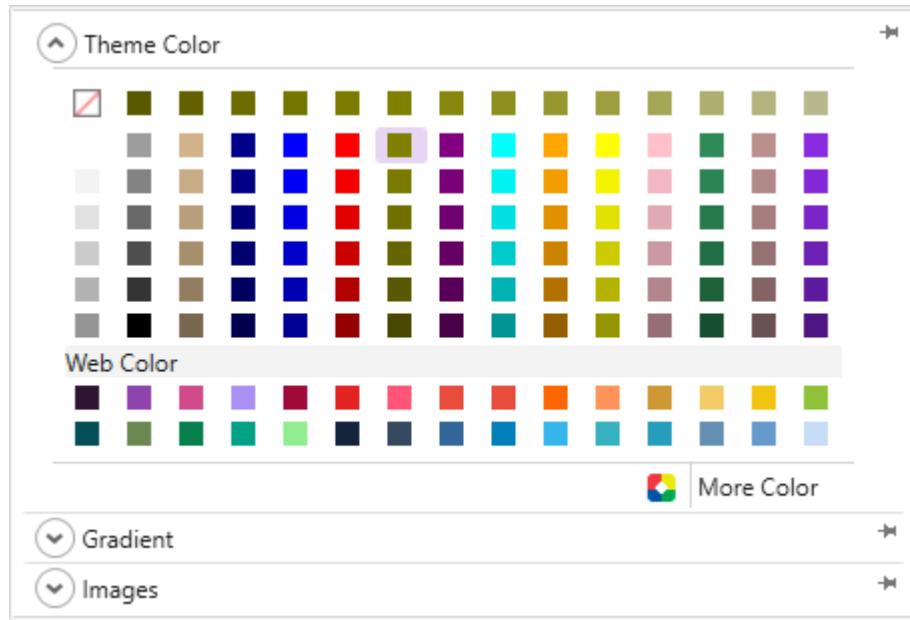

Header Background

7

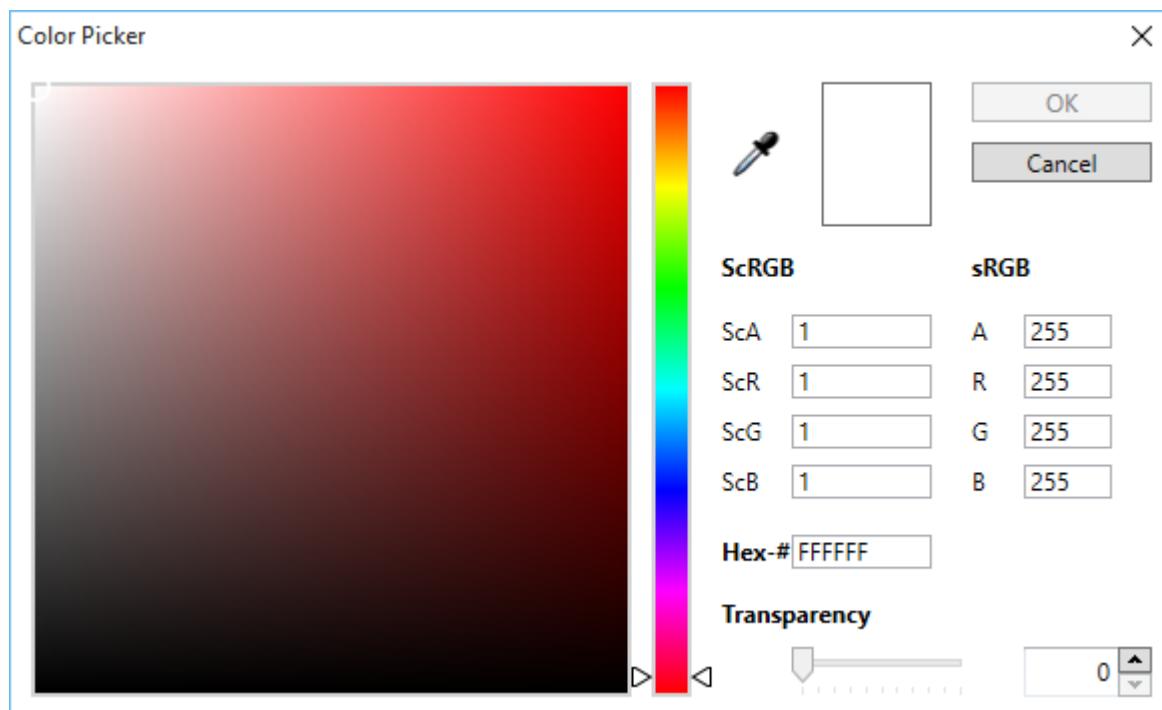

You can change the background of the sidebar menu's header. You can choose a preferred color, gradient, or background.

TemplateToaster has following options to modify the background-

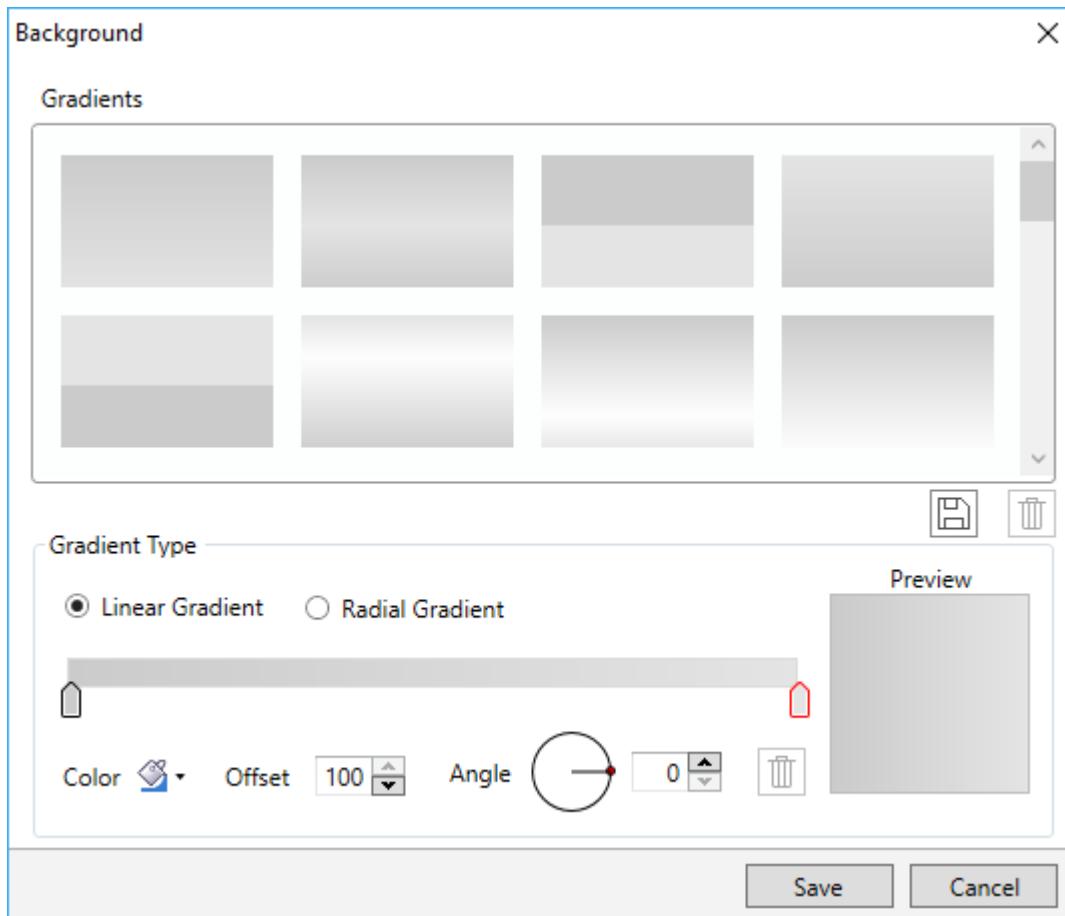

Color Picker-

You can use a color picker to choose a color from anywhere in the template/website. [Here](#) is the full description

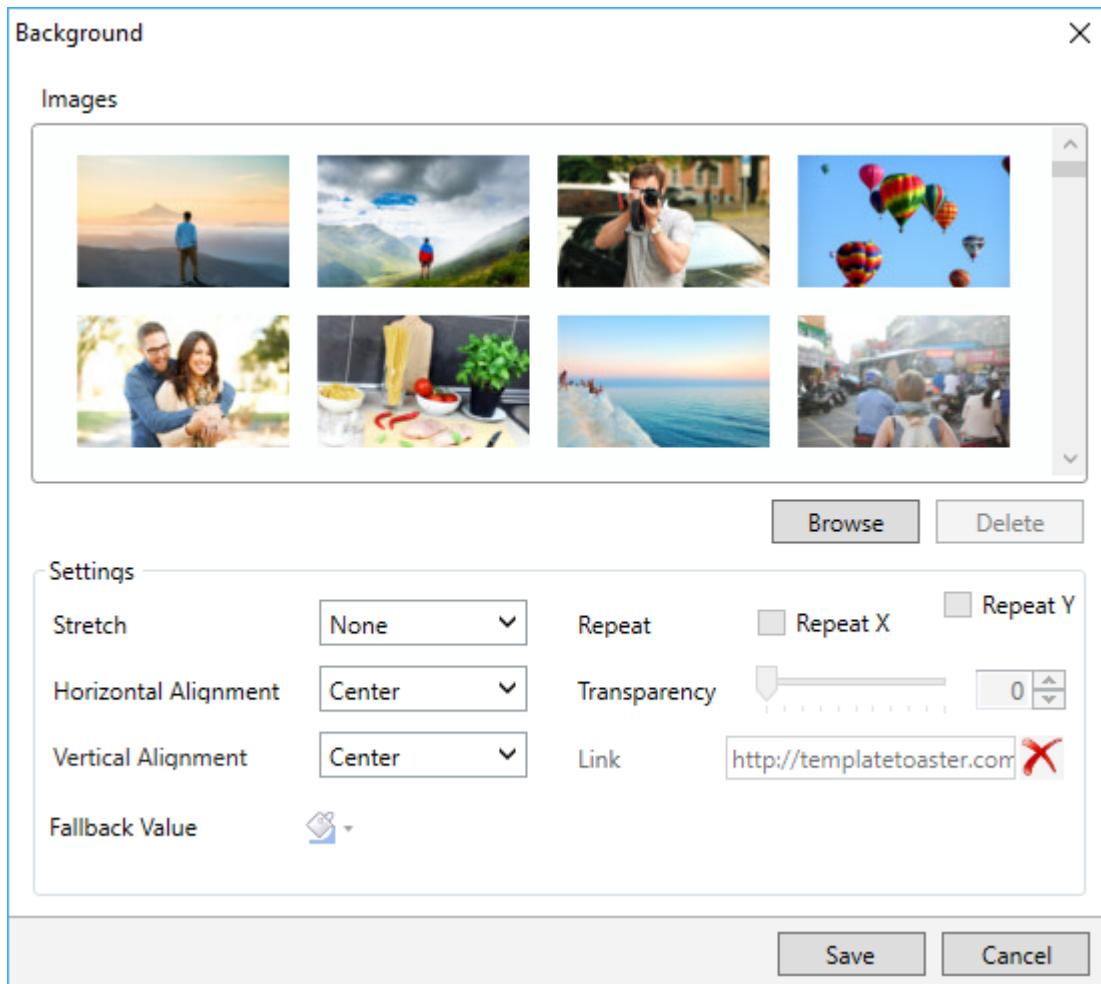

Custom Gradient-

You can create custom gradients with a preferred angle, color and offset choices. You can save the gradients a information about creating and saving custom gradients.

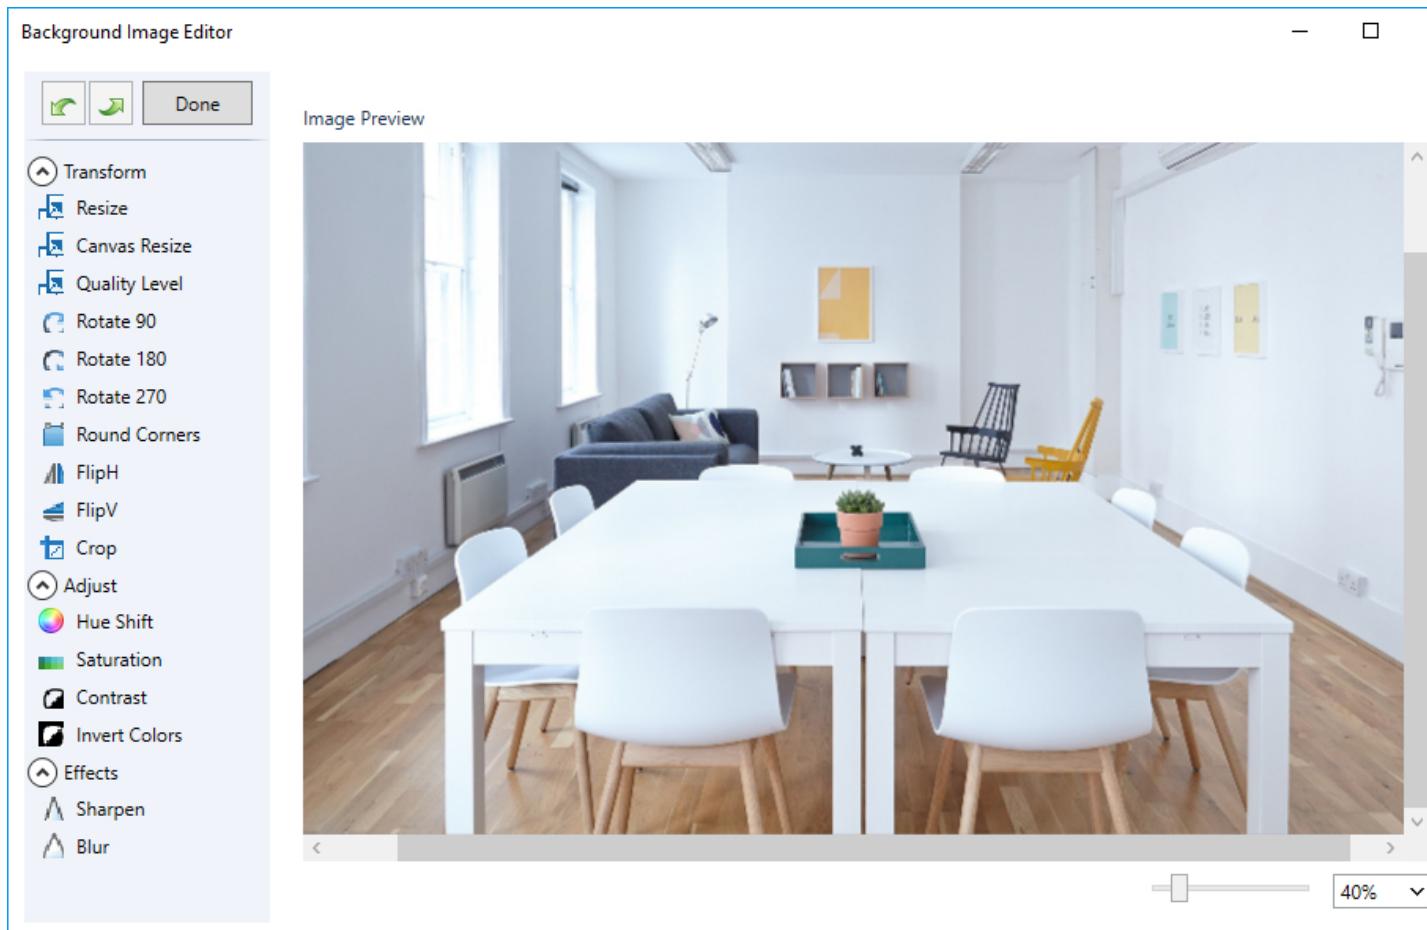

Browse Images-

TemplateToaster has an inbuilt stock of free images. You can select an image from the stock, or browse your own images.

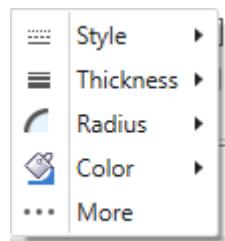

You can even edit the browsed images. TemplateToaster has an image editor with a dozen of edit options to choose from. For details, [see this](#).

8 Header Border

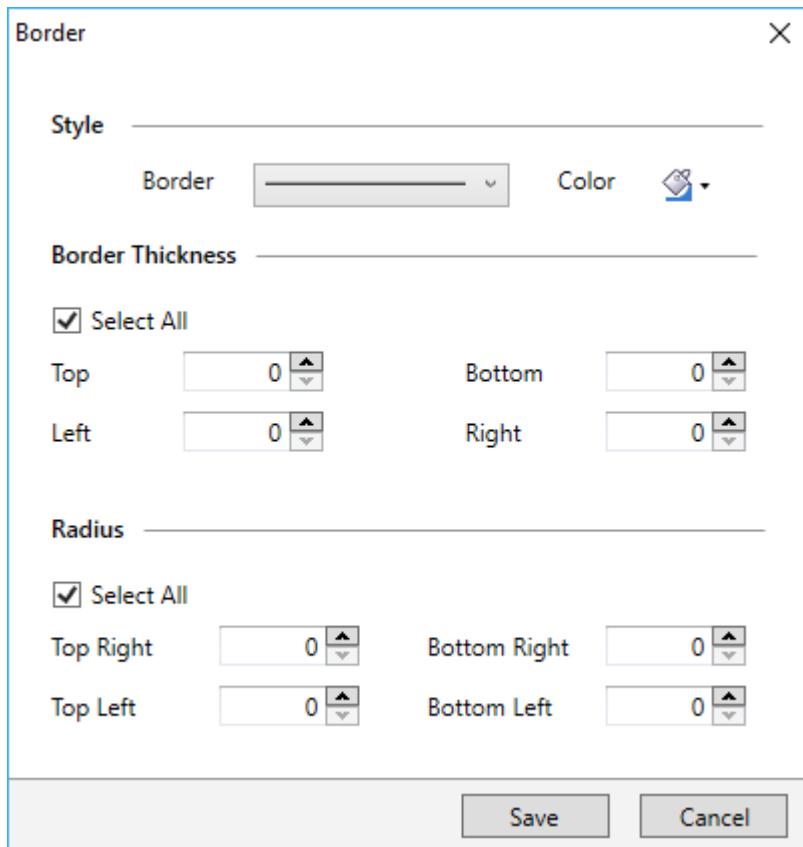

Border ▾

Customizes the border of the menu's header. You can select a preferred Style of the border, decide its Thickness, set the Radius of the edges, and choose the color.

More-

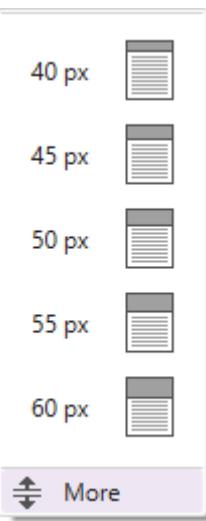

"More" lets you to explore more options for designing the border interactively. You can set different values of Thickness and Radius for individual side and edge of the border. [See this](#) to know more about designing the border.

9 Header Height

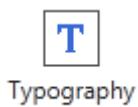

Specifies the height of the menu's header.

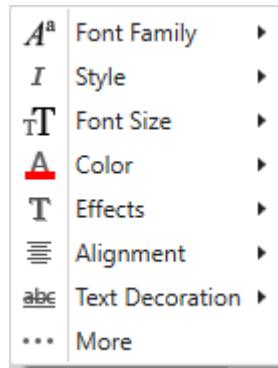

More-

"More" is used to specify custom height of the menu's header.

10 Header Typography

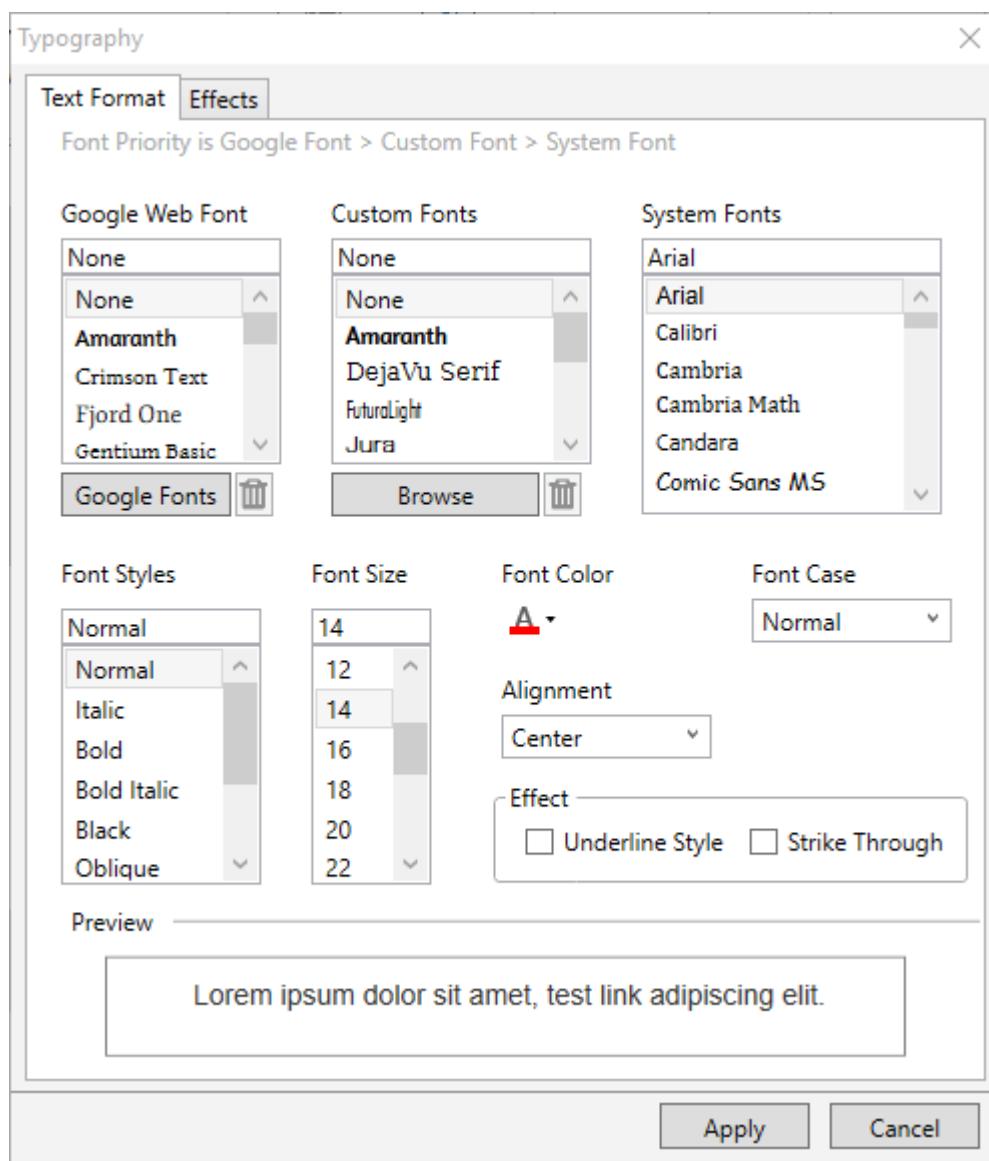

Defines the typography of the sidebar menu's header. The typography includes options for choosing font, style, font size, font color, font effect, text alignment and text decoration.

More-

With "More", you can open all the typography options in a single window as shown below. [Here](#) are the details.

11

Header Texture

To apply a texture to the background of the menu's header.

More-

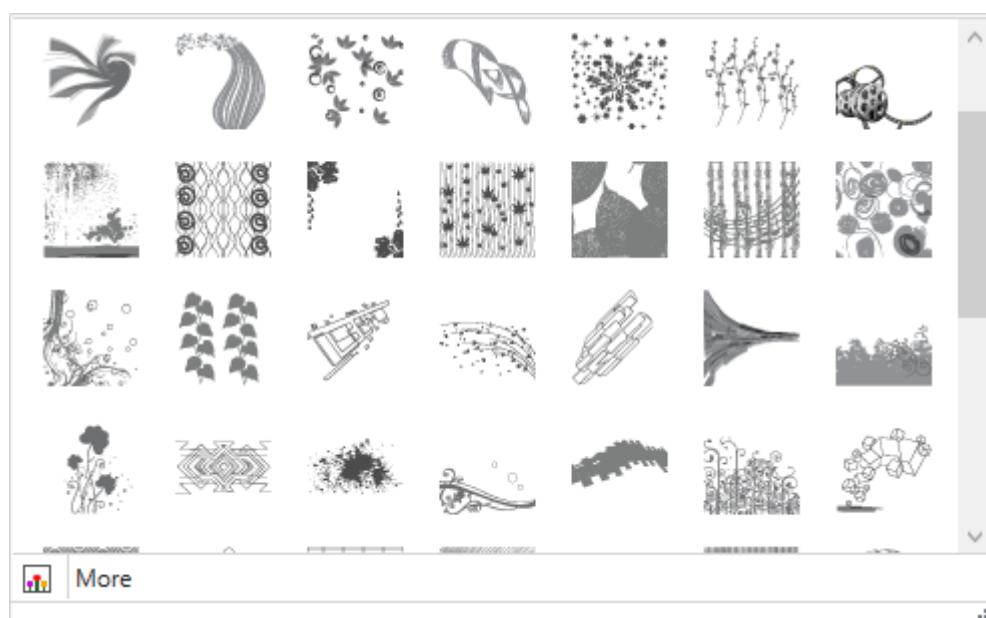

You can customize the transparency of texture with "More". [Click Here](#) for more details.

12

Header Effects

To apply an effect on the background.

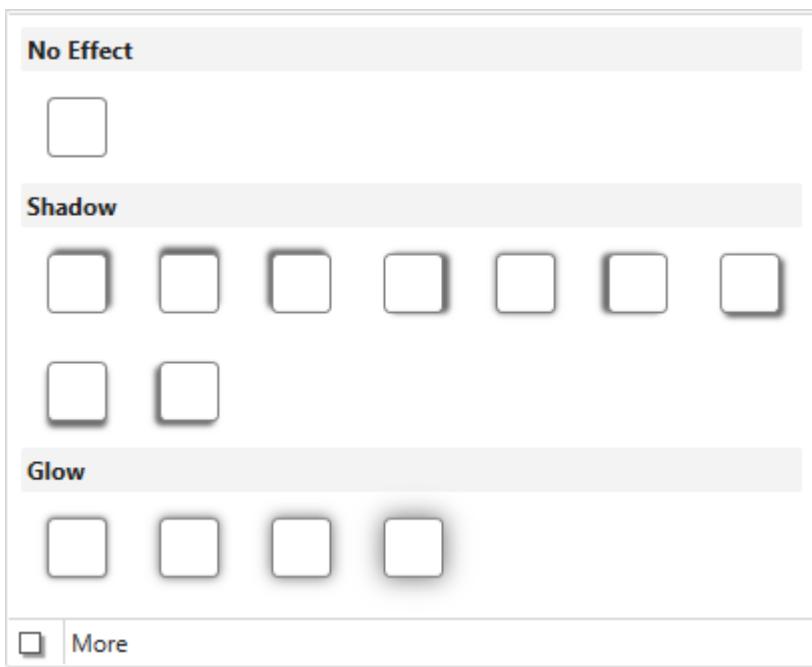

More-

You can customize the transparency of the effect with "More". [Click Here](#) for more details.

Header Shadow

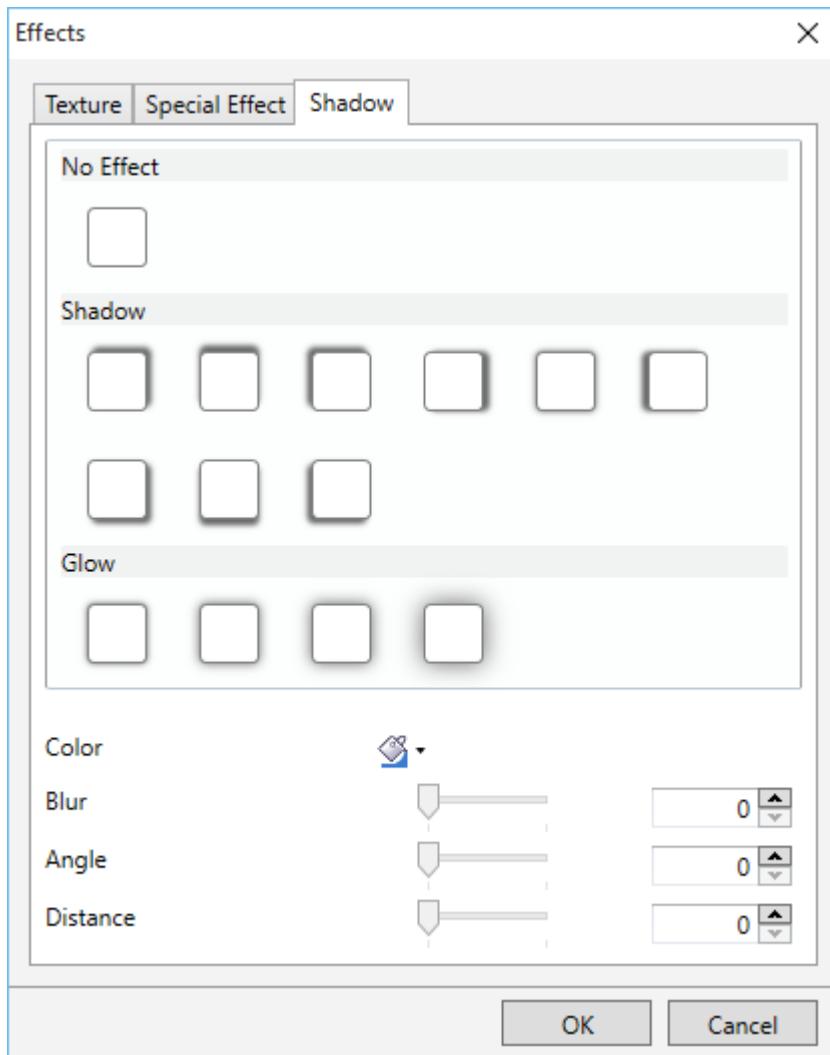

To apply a shadow effect on the header background.

More-

With "More", you can even customize the color, angle, blur, and distance of the shadow effect. [Click Here](#) for more details.

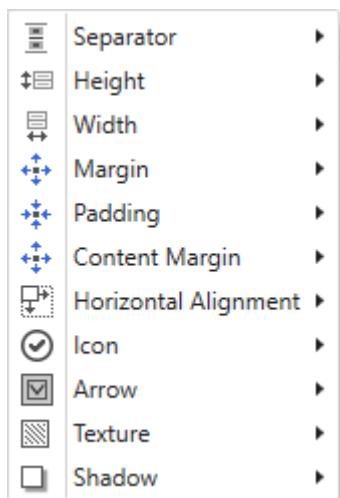

14 Menu Button Properties

Menu Button
Properties ▾

To set the properties of the menu button. You can apply separator between menu buttons, change their height, width, margin padding, specify content margin and more.

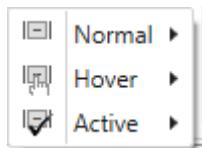

15

Menu Button Background

Changes the background of the Menu Buttons. You can separately apply the background for different states of the menu buttons. Such as Normal state, Hover state, and Active State.

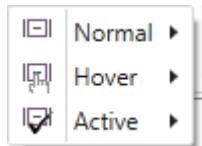

16

Menu Button Border

Designs the border of the Menu Button. This option expands a drop down list of options to design the border for different states of a menu button, like Normal, Hover and Active. So, you can differently design the border of a menu button for these three states.

17

Menu Button Typography

Typography

Defines the typography for the menu buttons. You can set different text styles for a menu button in Active, Normal, and Hover states.

18

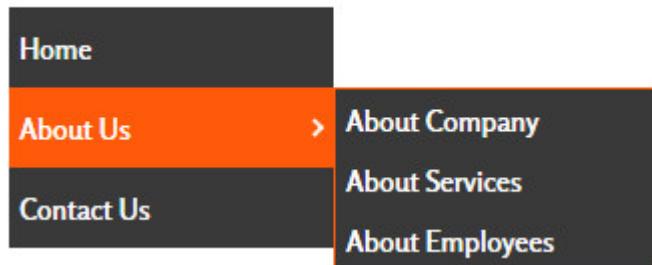

Expand (Submenu)

Avails the user with two choices to expand the submenu Horizontally and Vertically as follows:

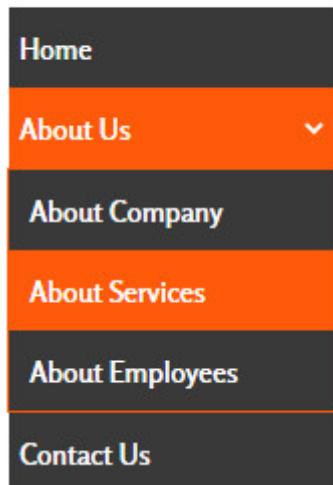

Changes the way menu opens up when you hover. If you select this option, the menu will open up in horizontal direction, as shown below.

Sidebar Menu

If you select this option, the menu will open up in vertical direction, as shown below.

Sidebar Menu

19

Open (Submenu) On

Specifies that whether the menu will open on click or on hover.

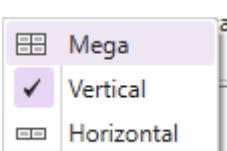

20

Submenu Layout

Gets active only when you select to expand the menu horizontally. With this, you can choose Mega, Vertical, or Horizontal style for the submenu.

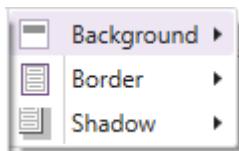

21

Submenu Container

Specifies the properties of the submenu container. You can change the background, border, and shadow effect of submenu container.

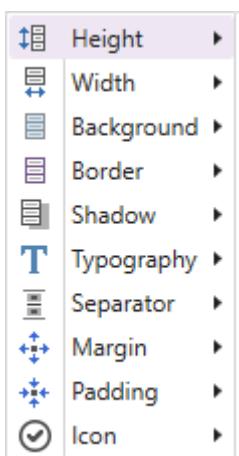

22

Submenu Item

Specifies the properties of the submenu items such as height, width, background, border, shadow, and more.

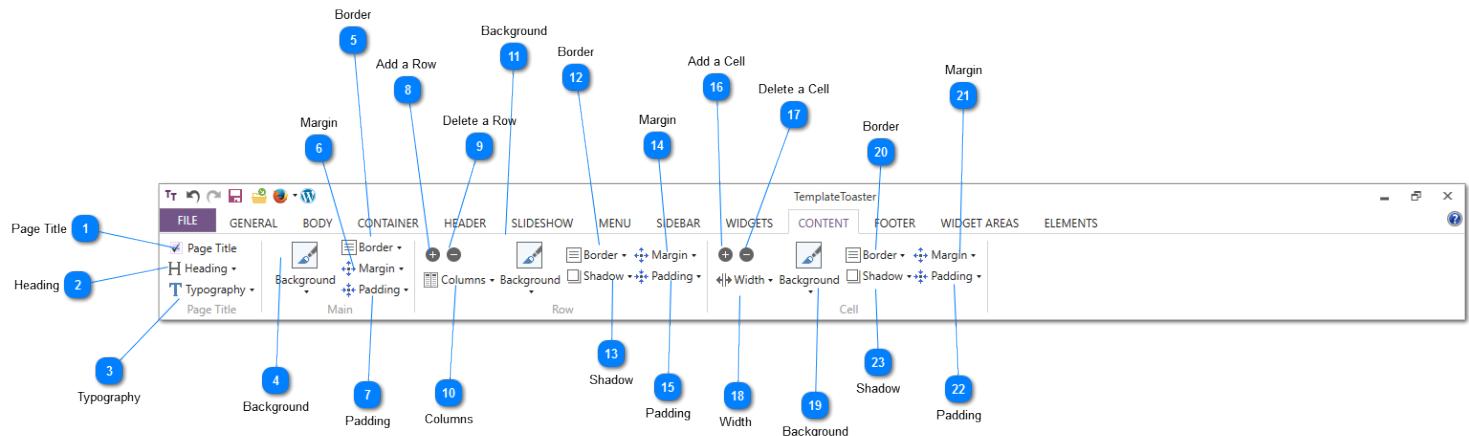

2.12. Content Tab

TemplateToaster is a template generator as well a website builder. As a template generator, it supports various content management systems which include WordPress, Joomla, Drupal, Magento, Prestashop, OpenCart, VirtueMart, WooCommerce, and Blogger. Hence, the **Content Tab** provides context specific options. Choose the context from the following list to learn about various options available in Content Tab:

- [WordPress](#)
- [Joomla](#)
- [Drupal](#)
- [Blogger](#)
- [HTML](#)
- [WooCommerce](#)
- [Magento](#)
- [Opencart](#)
- [Prestashop](#)
- [Virtuemart](#)

2.12.1. WordPress

WordPress is one of the most appreciated features of TemplateToaster. Owing to this feature, you can add the content of your website in your theme. Let's have a look at each option of the content tab:

1 Page Title

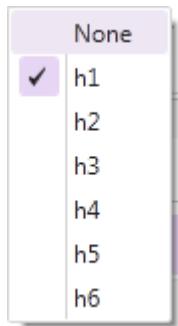

Lets the user to make a choice either to show or hide the **Page Title**. By default, this is checked.

2 Heading

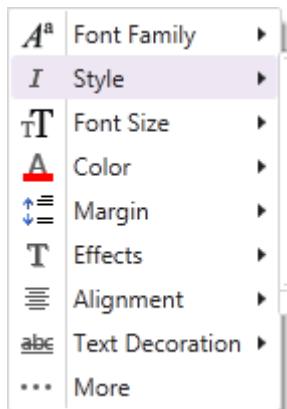

Displays a list of all the headings from h1 to h6 to choose from, for the page title for user convenience.

3 Typography

Defines the typography of the Page Title by specifying various options like Font Family, Style, Color, Margin and many more as shown below:

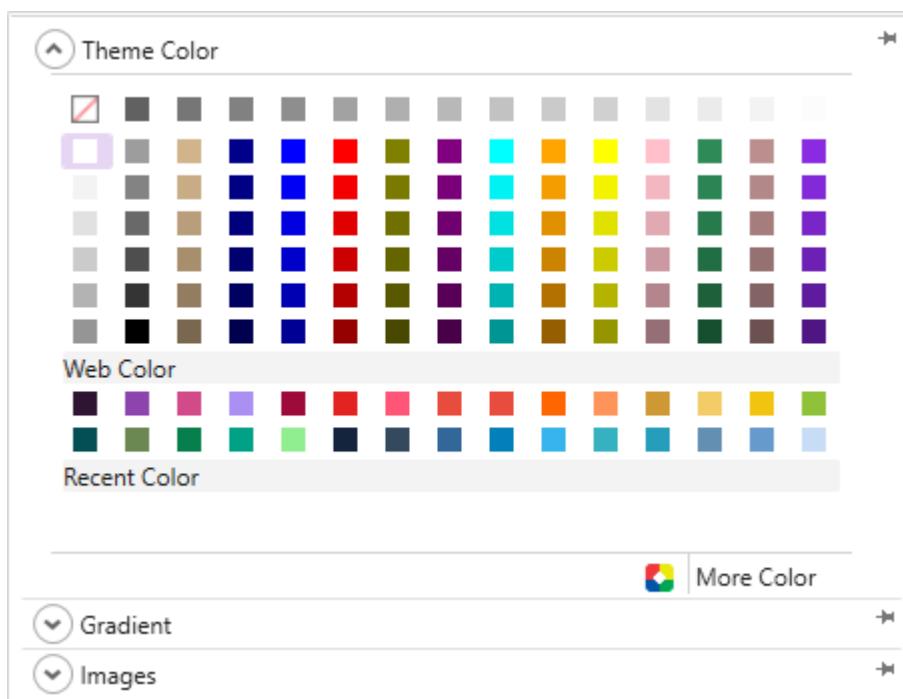

"More" facilitates the user to customize Text Formats and Effects for the Page Title.

Background

4

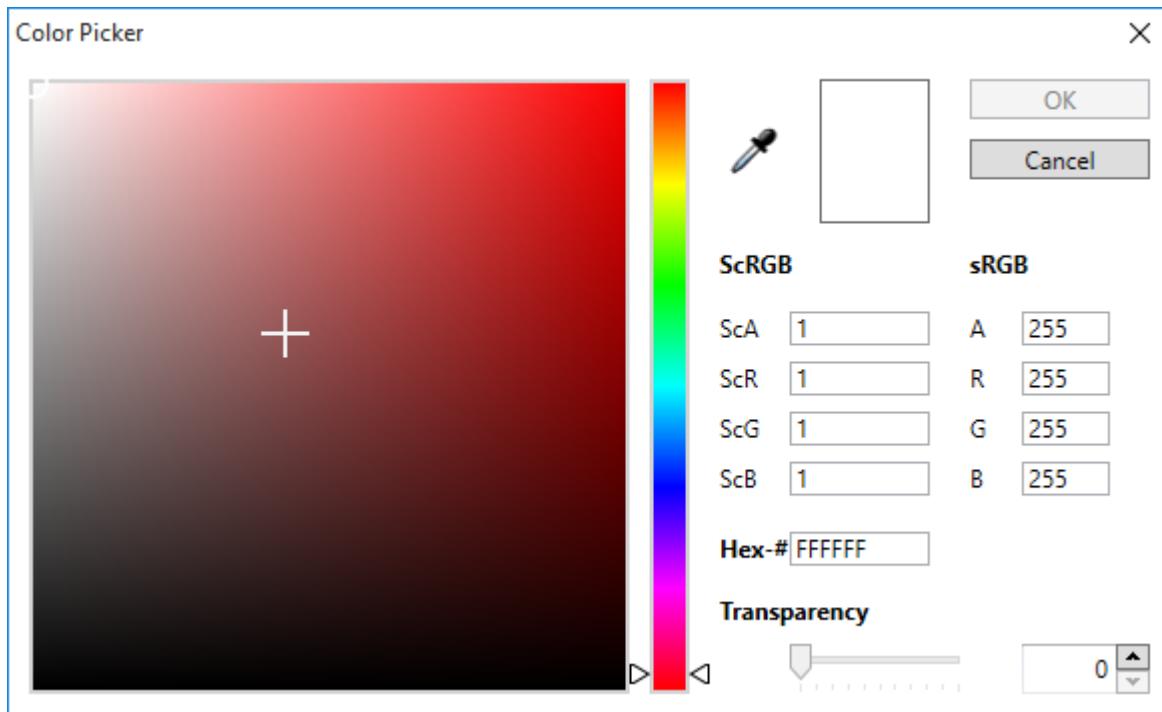

To apply a preferred color, gradient, or image to the background of the content of your WordPress theme. Tem following options for designing the content of your WordPress themes in a professional style.

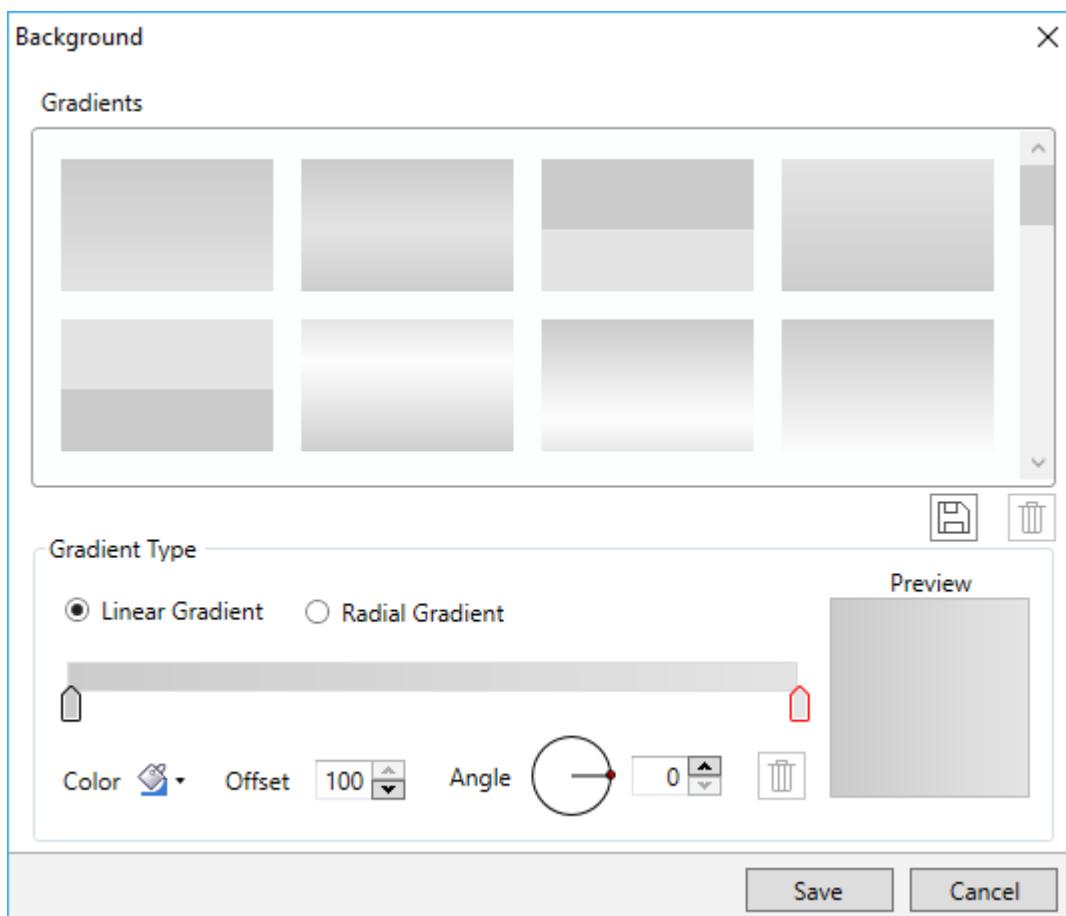

You can use the color picker for applying background color.

Color picker-

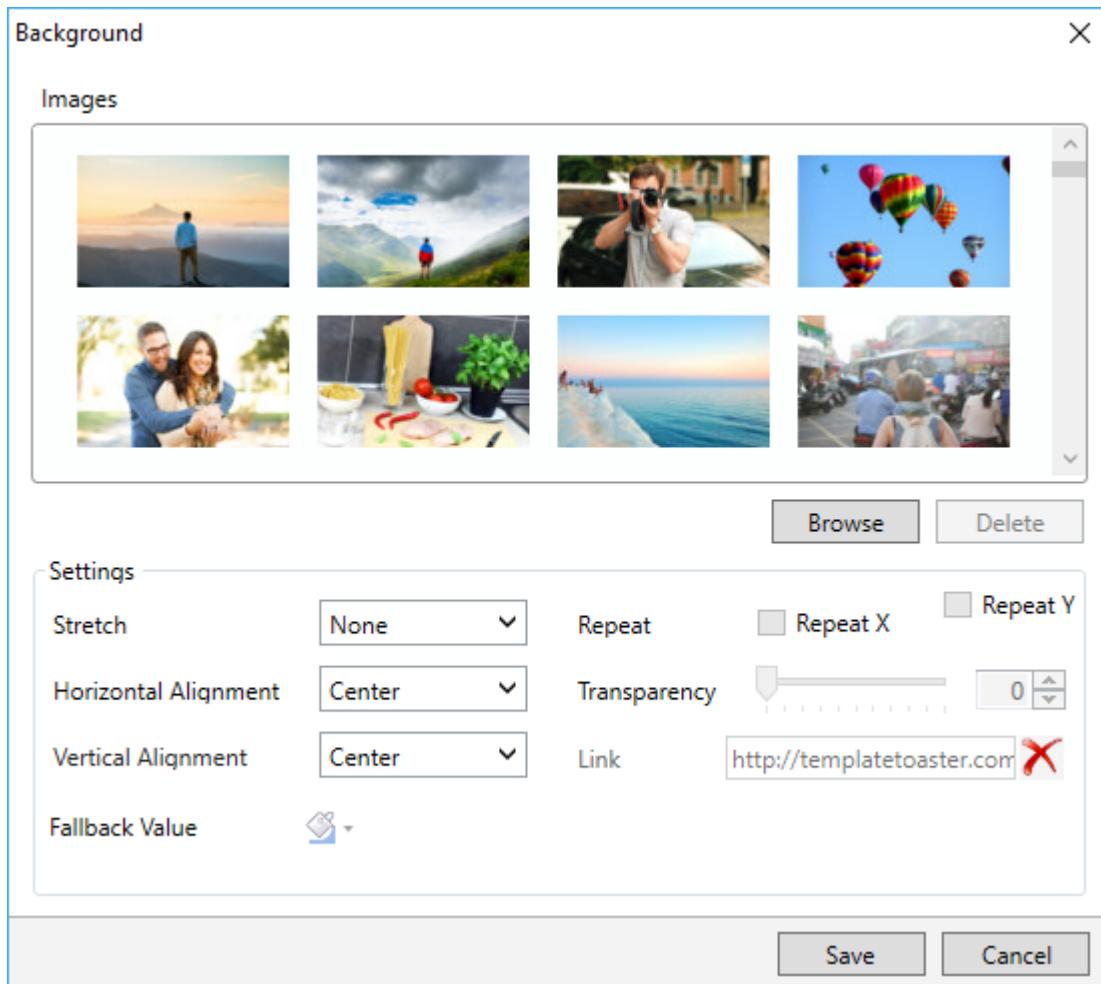

Custom Gradient-

You can apply a custom gradient in the background. You can have preferred angle, color, and offset choices for style. You can save the gradient for later use as well.

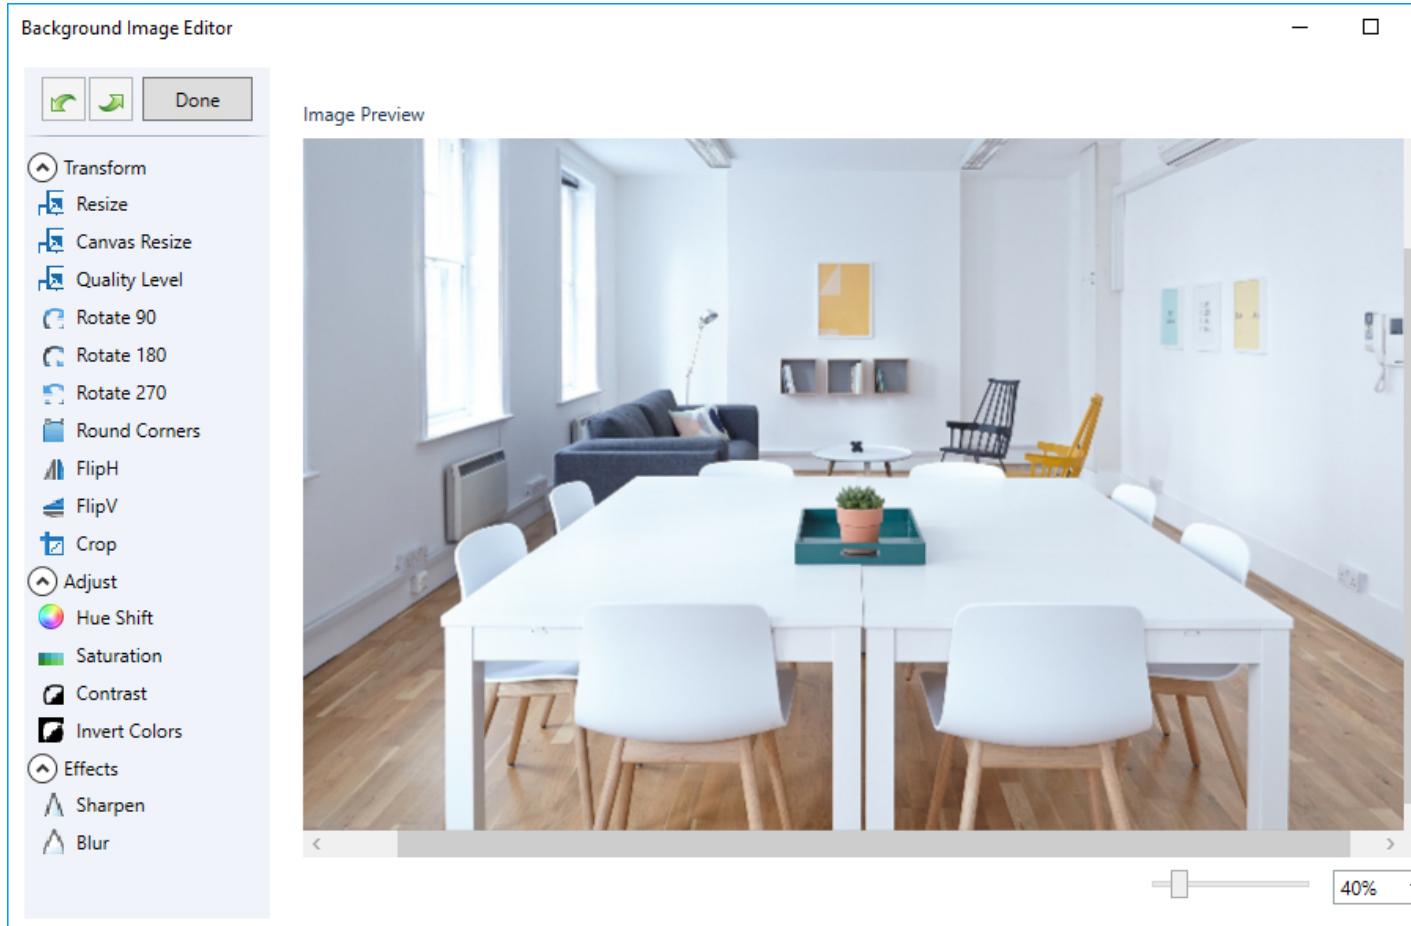

Browse Images-

You can apply an image in the background of the content. TemplateToaster has an inbuilt stock of free images or custom images.

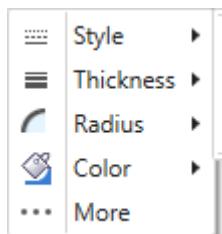

You can edit the browsed images as TemplateToaster provides an image editor with a dozen of edit options to images.

5 Border

Border ▼

Marks the border around the content area. You can set a preferred style, thickness, radius of edges and color for the content border.

6 Margin

Margin ▼

Specifies the margin for each side of the content area.

7 Padding

Specifies the padding for each side of the content area.

8 Add a Row

Adds a row in the content area.

9 Delete a Row

Deletes a row from the content area.

10 Columns

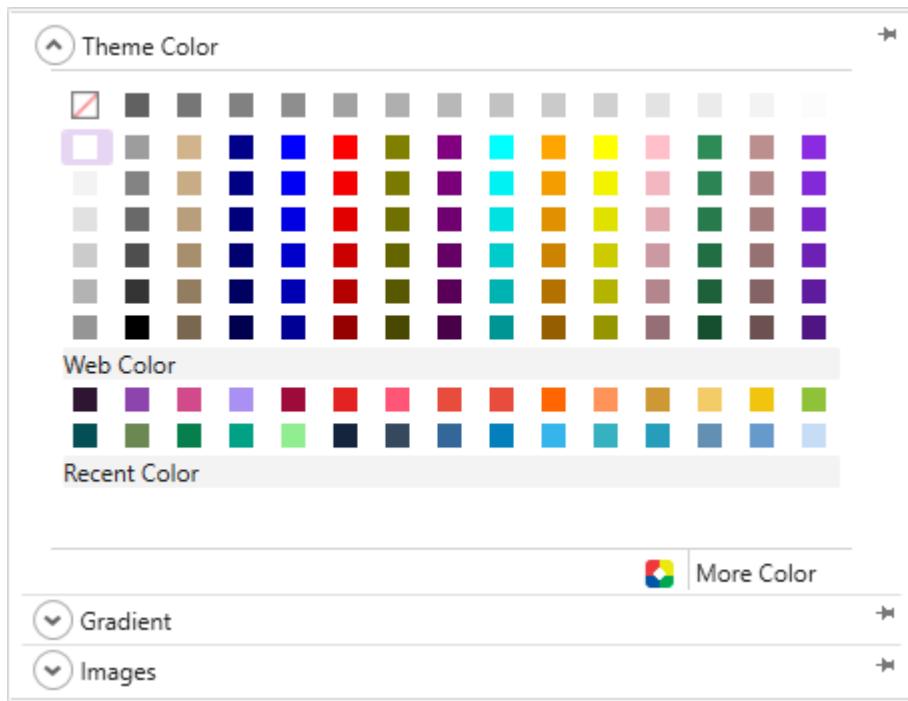

Enables you to select how many columns to keep in a single row.

11 Background

Background

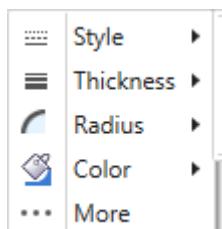

To change the background of the selected row of the content area. You can apply a preferred color, gradient, or image to the background of a row.

12 Border

Border

Customizes a border around the selected row of the content area. You can set a preferred style, thickness, radius of edges, and color for the border of selected row.

13 Shadow

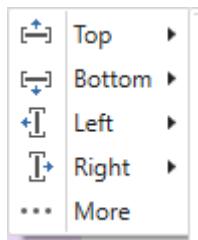

Shadow

To apply a shadow effect on the border of the selected row.

14 Margin

Margin

Specifies the margin for each side of the row.

15 Padding

Specifies the padding of each side of the row.

16 Add a Cell

Adds a cell in the row.

17 Delete a Cell

Deletes a cell from the row.

18 Width

Enables the user to change the width of a selected cell. You can change the width of an individual cell according to the need of your design. To change the width, just select the cell and click this option.

1	
2	
3	
4	
5

Specifies the width of the selected widget. You can change it.

23 Widget Positions

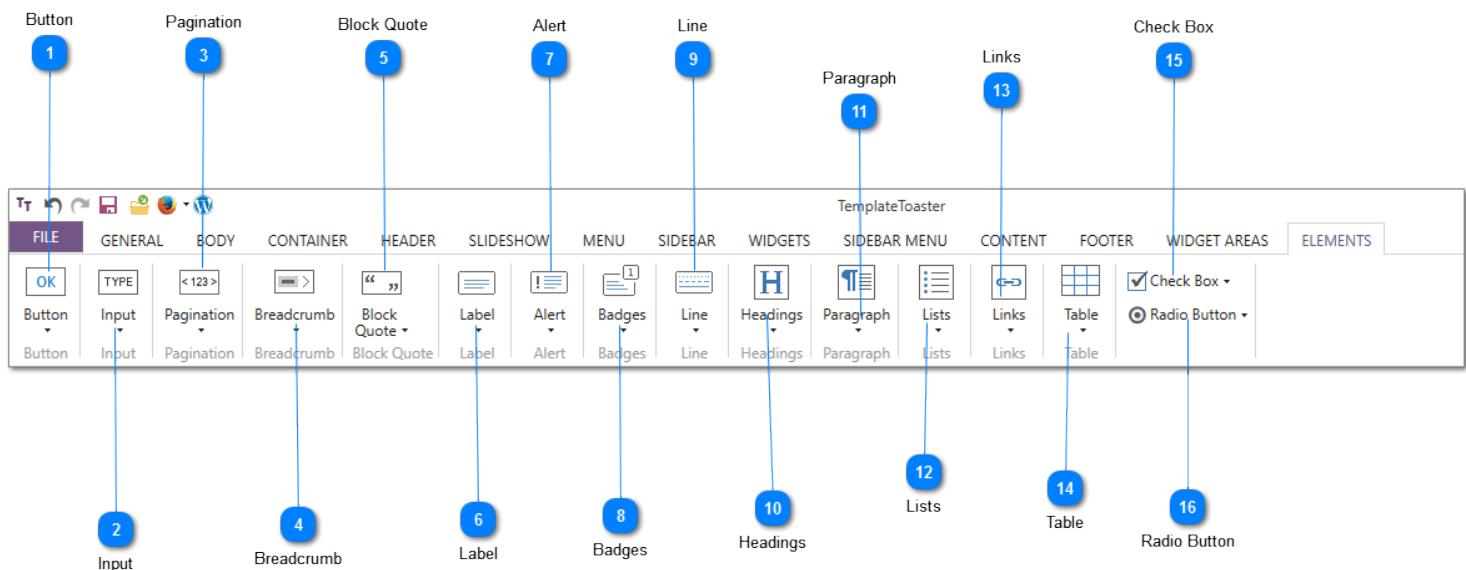

Shortcuts for the different widget positions for the user convenience. The given positions are:

- Horizontal Left
- Horizontal Center
- Horizontal Right
- Align Left to Page
- Vertical Top
- Vertical Center
- Vertical Bottom
- Align Right to Page

2.14. Elements Tab

The Elements Tab contains the options for designing the different user interface elements for the template/website such as Button, Input field, Pagination, Breadcrumb and more. Let us go through all the given options and their functioning.

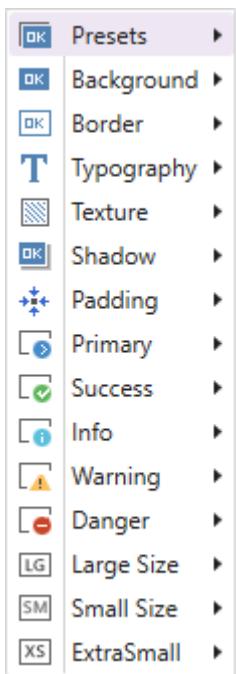

1. Button

Button

Displays a dropdown list as shown below when you click on it. All the options are explained as follows:

Presets-

With **Presets** option, you will be able to see a set of pre-designed buttons. You can choose any pre-designed button for your template/website and can change its look and feel as per your need. For this, following options are given by TemplateToaster.

Background-

Changes the background of buttons for Normal and Hover states. You can apply a color, a gradient, or an image in the background of button.

Border-

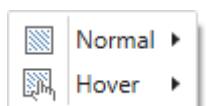

Designs the border of the buttons. For more professional look and feel of the buttons, you can choose different border for Normal and Hover states.

Typography-

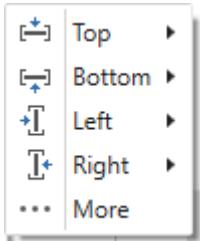

Avails you to change the text style or typography of the buttons. You can apply different text styles on buttons in Normal and Hover states.

Texture-

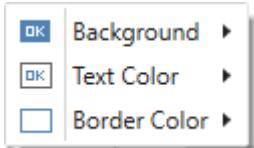

Applies a texture effect to the background of the buttons.

Padding-

Specifies the padding of the footer from all the sides.

Primary/Success/ Info/ Warning/ Danger-

You can design five types of BOOTSTRAP buttons with TemplateToaster: Primary, Success, Info, Warning, and Danger. For designing these buttons, Template Toaster offers Background, Text Color, and Border Color options.

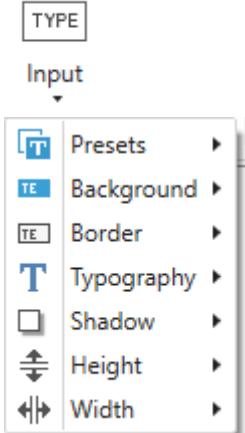

Large Size/ Small Size/ Extra Small-

Modifies the Font size of all size buttons (Large, Small and Extra Small). You can also change their border radius and padding too.

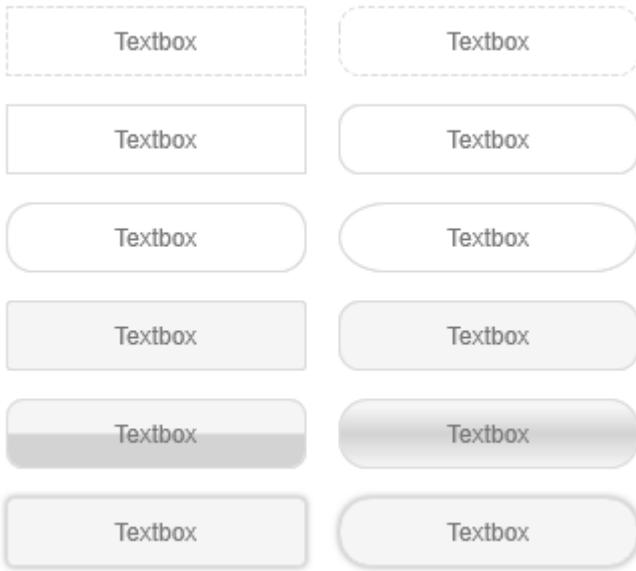

Input

2

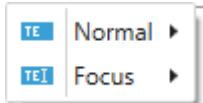

Input is a type of **form control** provided by BOOTSTRAP. You can design this control with following options.

Presets-

Facilitates you to select a preset style and then modifies its look and feel.

Background-

Modifies the background of an Input box. You can set different backgrounds of the box in Normal and Focused states.

Border-

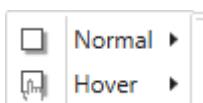

Designs the border of an Input box. You can design different borders of the box for Normal and Focused states.

Typography-

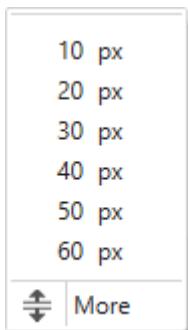

Defines the preferred text style for an Input box. You can set different text styles for Normal and Focused states of the Input box.

Shadow-

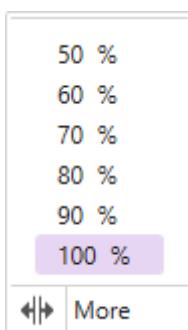

Applies a shadow effect to the input box. You can set different shadow effects for the Normal and Hover States.

Height-

Specifies the height of the Input box. With "More", you can even specify the custom value for the height.

Width-

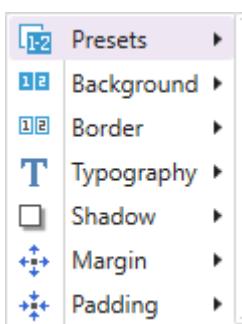

Sets the width of the Input box. With "More", you can specify the custom value for the width too.

3 Pagination

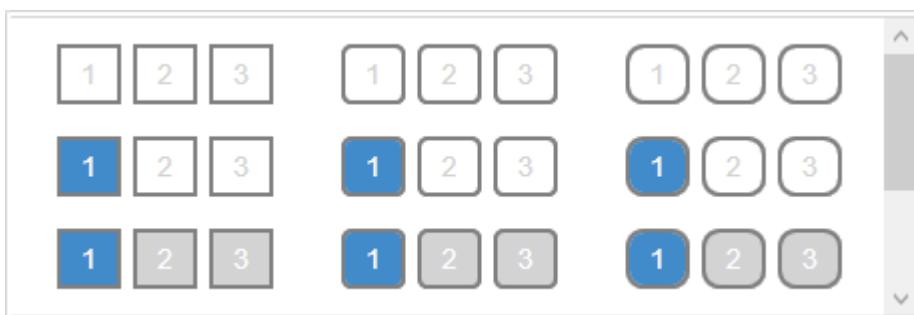

Pagination

For styling the pagination of your template/website.

Presets-

Avails you to select a preset style of pagination and then modify its look and feel.

Background-

Changes the background of the pagination for its different states. Just select the state of pagination for which you want to change the background and apply a preferred color, a gradient, or an image on the background of pagination.

Border-

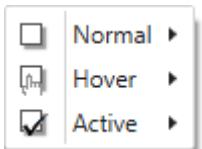

Designs the border of pagination. The border can be designed differently for the Normal, Hover and Active state of pagination..

Typography-

Defines the preferred text style for the pagination. You can set different text style for Normal, Hover and Active state of the pagination.

Shadow-

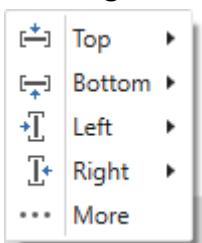

Applies a preferred shadow effect to the pagination. You can apply different shadow effects for the Normal, Hover and Active states.

Margin-

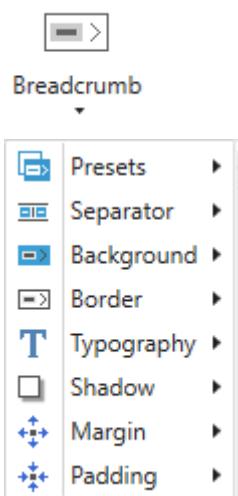

Specifies the margin of the pagination.

Padding-

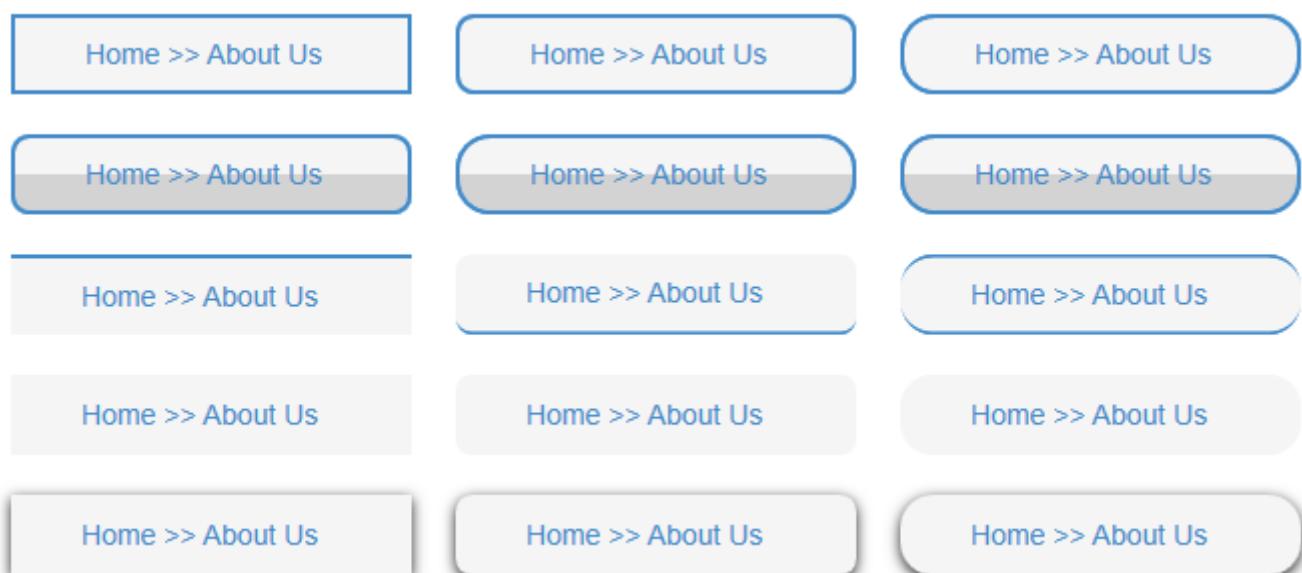

Specifies the padding of the pagination.

Breadcrumb

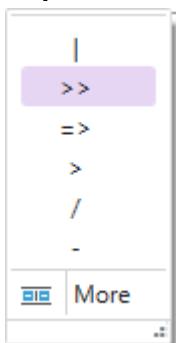

Designs the breadcrumb navigation of your template/ website.

Presets-

Selects a preset style of breadcrumb navigation and then modifies its look and feel.

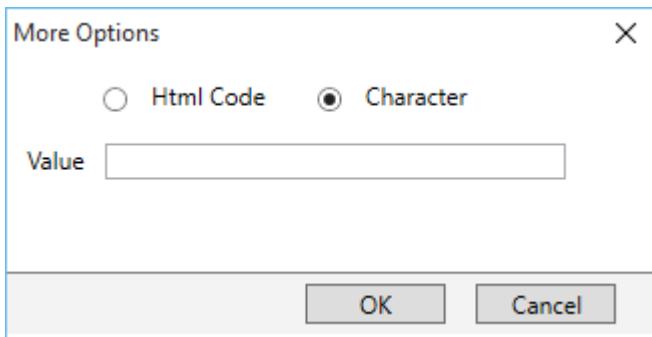

Separator-

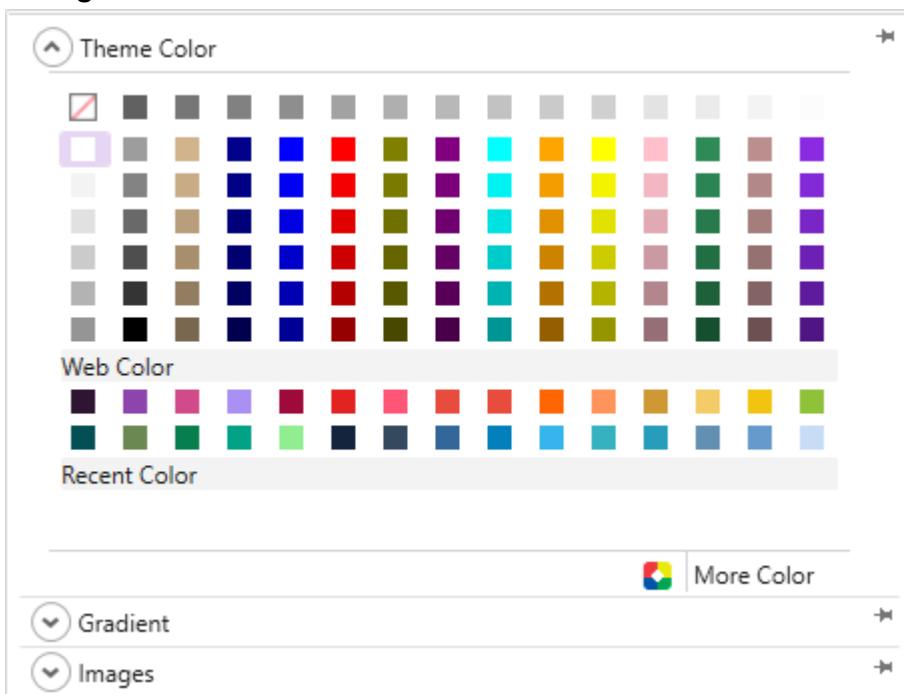

Selects a separator icon for breadcrumb.

More-

"More" facilitates you to specify a custom breadcrumb icon.

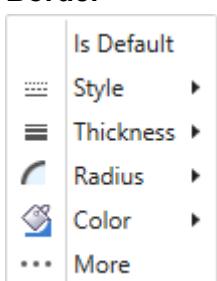

Background-

Changes the background of a breadcrumb. You can apply a preferred color, a gradient, or an image to the background of breadcrumb.

Border-

For designing the border of breadcrumb as per your need.

Typography-

Defines the text style of breadcrumb in the Normal, Hover and Active states.

Shadow-

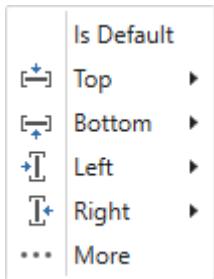

Gives a shadow effect to the breadcrumb.

Margin-

Specifies the margin of a breadcrumb.

Padding-

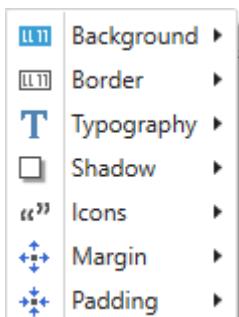

Specifies the padding of a breadcrumb.

Block Quote

5

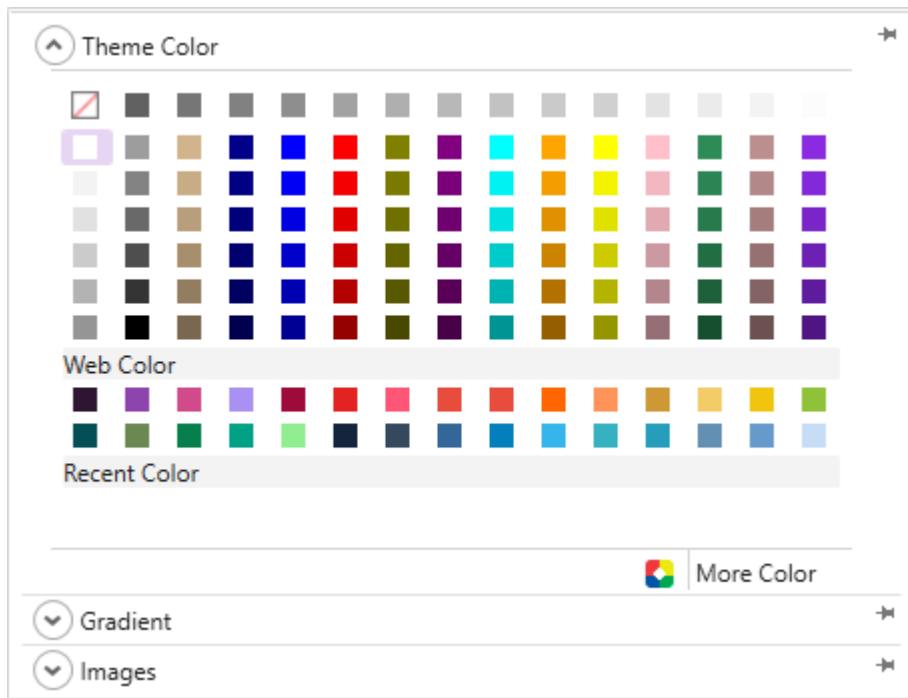

Block
Quote ▾

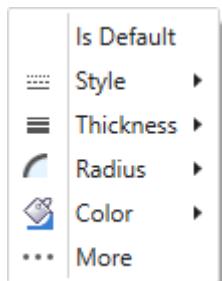

Designs the Block Quote element of your template/website.

Background-

Modifies the background of a Block Quote. You can apply a preferred color, a gradient, or an image to its background..

Border-

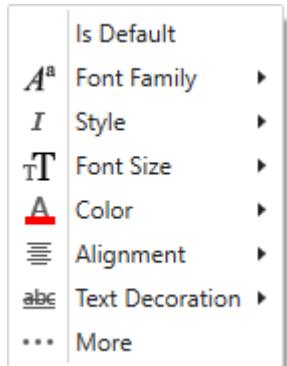

Designs the border of a Block Quote as per your need.

Is Default:

To apply a default style.

Typography-

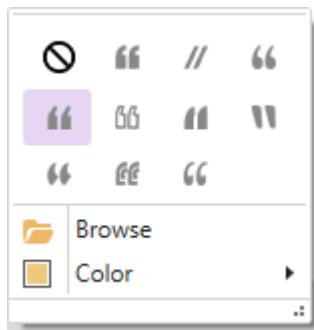

Defines the text style of a Block Quote element. You can choose a Font from preferred Font Family, choose a style for the Font, and much more.

Shadow-

Applies a shadow effect to the Block Quote.

Icons-

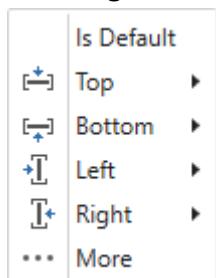

You can choose preferred icons for a Block Quote. You can even browse your own custom icons and set preferred color to those icons.

Margin-

Specifies the margin of a Block Quote.

Padding-

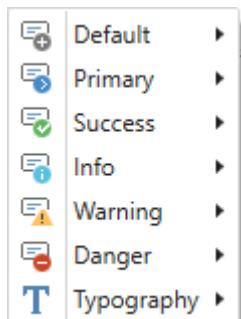

Specifies the padding for a Block Quote.

Label

6

Label

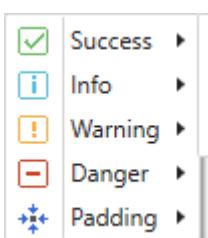

TemplateToaster allows to customize six BOOTSTRAP Labels, which are: Default, Primary, Success, Info, Warning and Danger. You can customize their background and text style in Normal and Hover states.

7 Alert

Alert

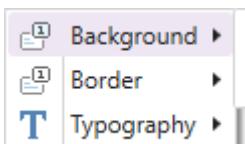

Customizes the BOOTSTRAP Alert messages. You can change the Background, Border, and Typography of each type of an Alert message.

8 Badges

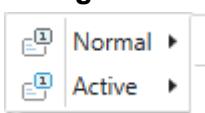

Badges

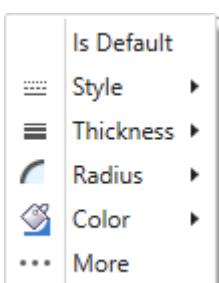

With this option, you can customize the BOOTSTRAP badges used in the template/website. You can change the background of a badge, can design its border, and can change its typography too.

Background-

You can apply different backgrounds to the badges for Normal and Active states. You can set a preferred color, a custom gradient or a custom image. You can also choose a gradient/an image from the stock of TemplateToaster.

Border-

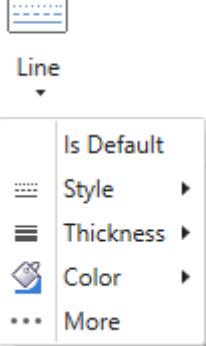

Design the border for badges with available options.

Typography-

Changes the text style of badges for Normal and Hover states.

9 Line

Designs the Lines used in your template/website. You can choose Style, Thickness, and Color of a line as per your need.

Is Default-

Check this option to apply the default style.

10 Headings

A screenshot of the TemplateToaster software interface. The top navigation bar shows tabs like FILE, GENERAL, BODY, etc., with 'ELEMENTS' selected. A toolbar below has buttons for OK, TYPE, Input, Pagination, Breadcrumb, Block Quote, Label, Alert, Badges, Line, and Heading. The main content area shows a website logo and a navigation bar with links to Home, About Us, Contact, and Blog. A context menu is open over the 'H1 Heading1' element, listing options for H1 through H6, followed by styling options like Font Family, Style, Font Size, Color, Margin, Effects, Alignment, Text Decoration, and More.

Selects the typography of Headings from **H1** to **H6** including color, font size, alignment etc.

11 Paragraph

Defines the typography for the paragraphs.

12 Lists

Specifies the typography for both the ordered and unordered lists.

13

Links

Links

▼

Sets the typography for links on the Active, Normal and Hover states.

14

Table

Table

▼

Specifies the typography of any table inserted on the page.

15

Check Box
 Check Box ▾

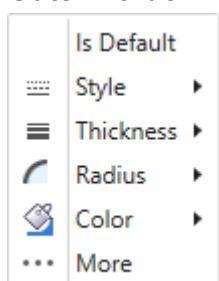

Modifies the appearance of the default checkbox.

Is Default-

Check this option to apply the default style.

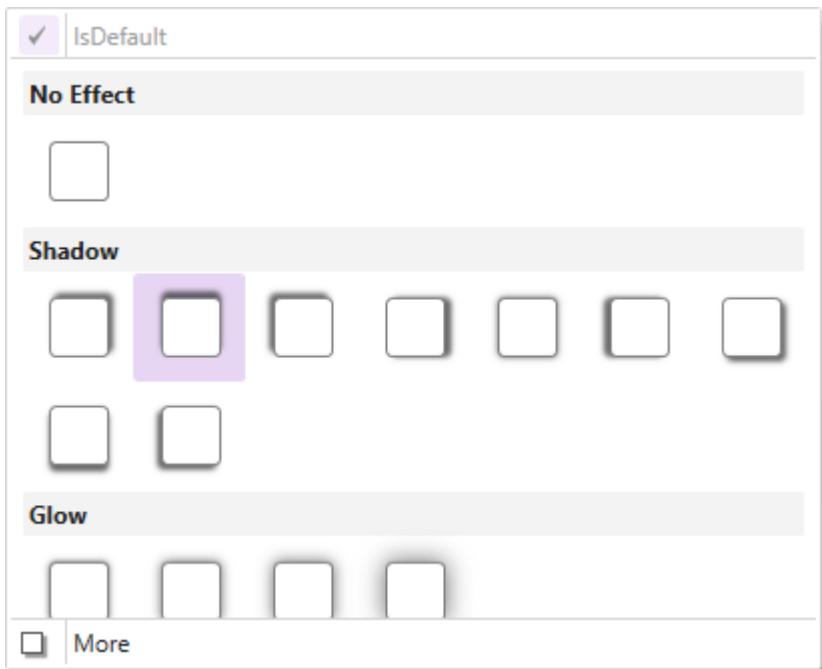

Style-

You can choose from two styles- Check and Fill.

Outer Border-

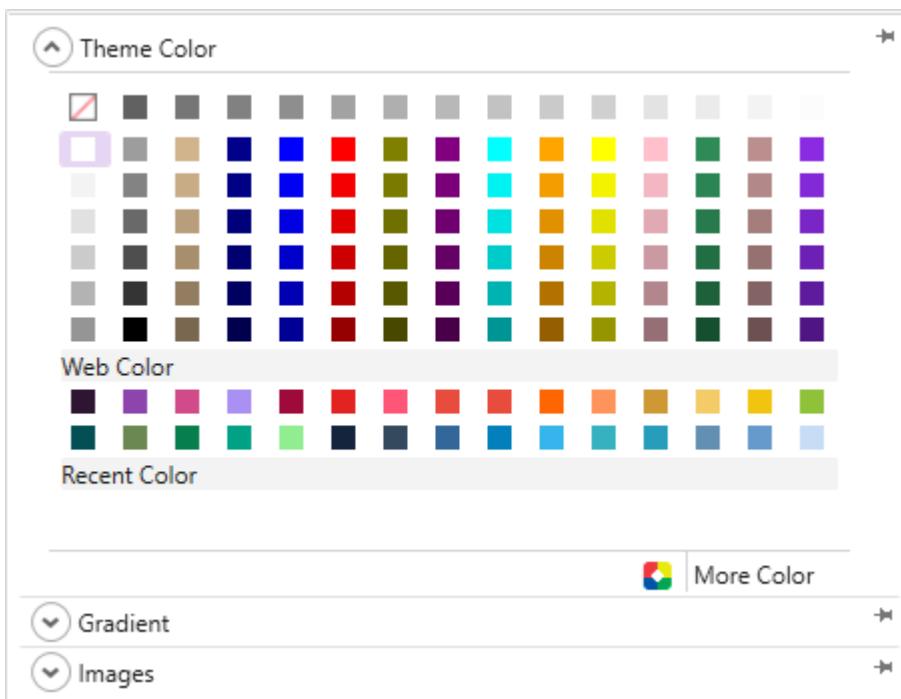

Designs outer border of the checkbox.

Outer Shadow-

To apply a preferred shadow effect to the checkbox.

Inner Fill/ Outer Fill-

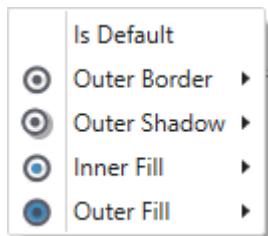

To add or change the checkbox fill. You can choose different color/ gradient/ or image for inner and outer fills.

Radio Button

16

Radio Button ▾

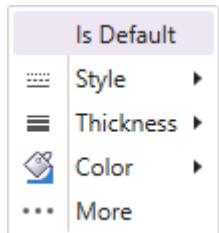

Modifies the look and feel of a radio button.

Is Default:

Check this option to apply a default style.

Outer Border-

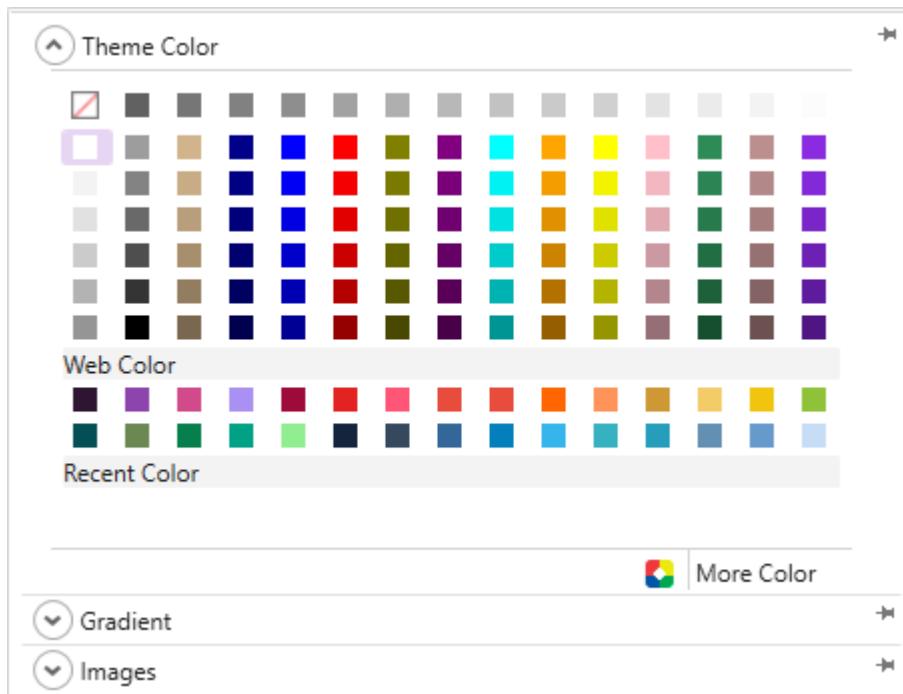

Designs the outer border of a checkbox.

Outer Shadow-

You can apply an outer shadow to the checkbox.

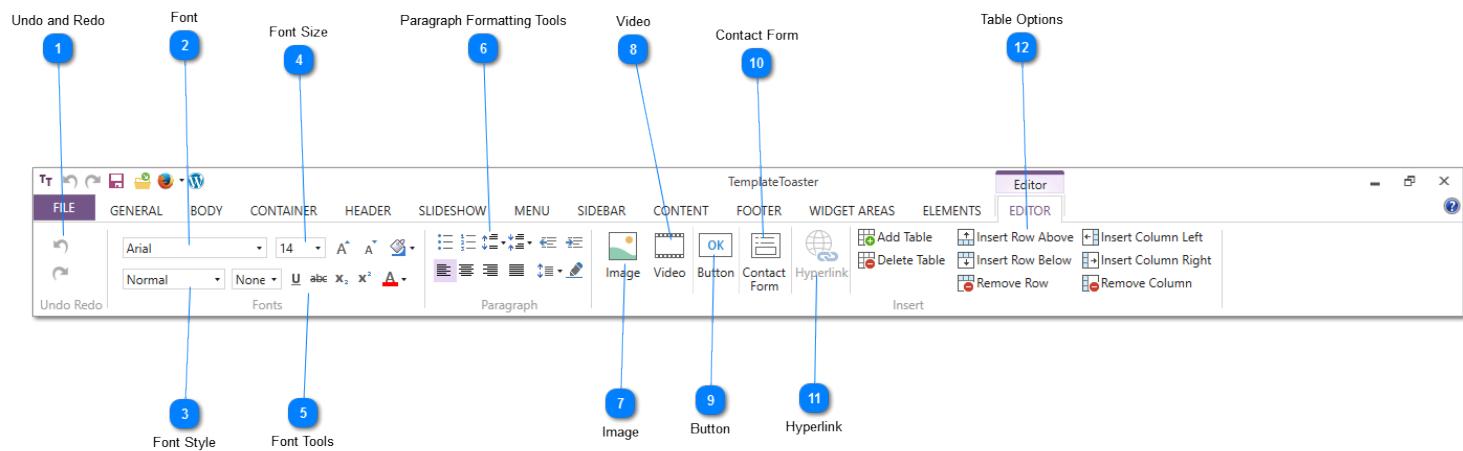

Inner Fill/ Outer Fill-

To add or change the Radio Button fill. You can choose a different color/ gradient/ or image for inner and outer fills.

2.15. Editor Tab

Editor Tab offers a number of editing tools to edit the content in WordPress, HTML, WooCommerce CMSes before exporting the theme/template.

1 Undo and Redo

These are the editing commands. Undo (**Ctrl+z**) reverses the most recent edit. This control helps the user to restore the unintentionally deleted text. Redo (**Ctrl+y**) can restore the changes that are undone using Undo. For example, if some text was inserted, Undo will remove it. Redo will insert it again.

2 Font

You can browse fonts from here. You can choose any type of font for your template/website as TemplateToaster supports Google Fonts, System Fonts and Custom Fonts.

3 Font Style

TemplateToaster supports dynamic font style. Hence, you can select a preferred style for your chosen Font.

- Normal
- Italic
- SemiBold
- SemiBold Italic
- Bold
- Bold Italic
- Oblique
- SemiBold Oblique
- Bold Oblique

4 Font Size

14 A A

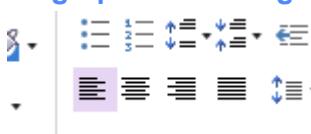

Select the text and use these options to increase/ decrease the size of the selected text.

Font Tools

You can customize the style and color of text with font tools.

Paragraph Formatting Tools

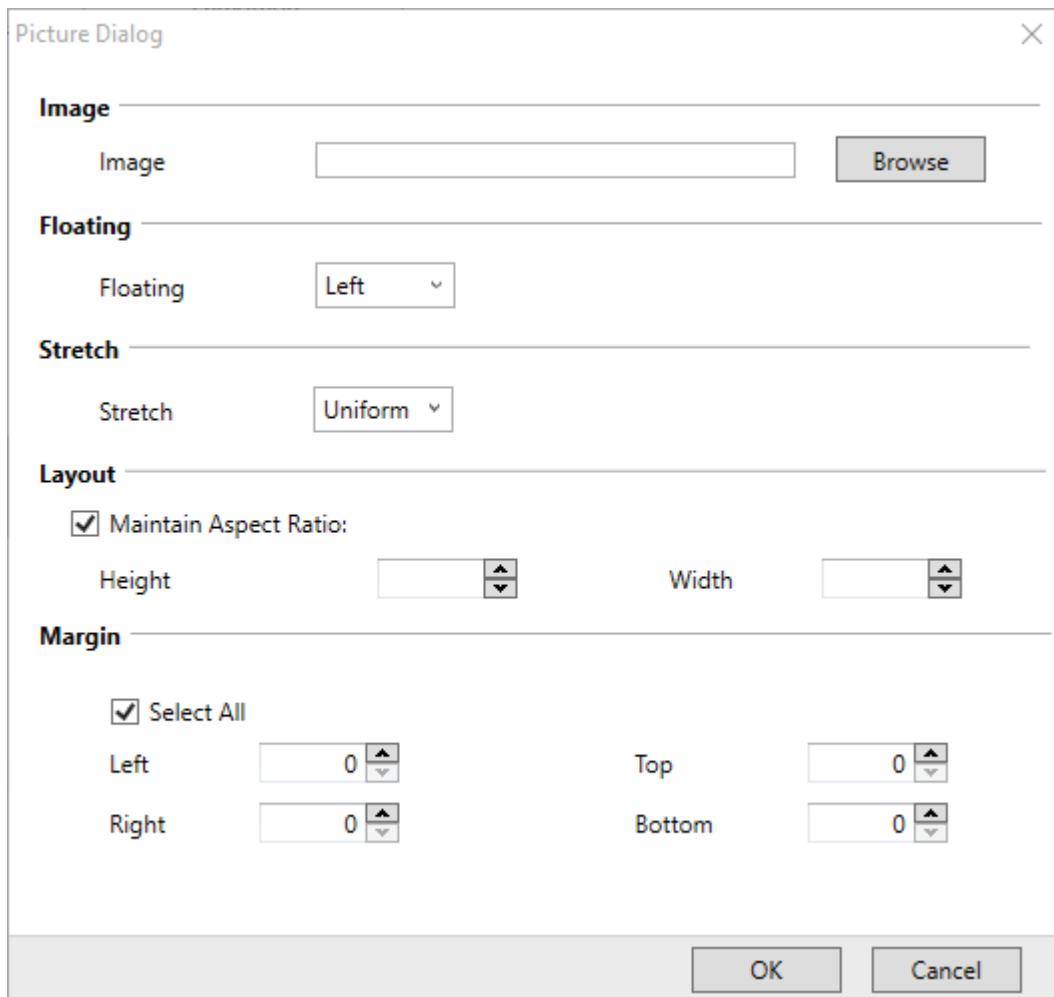

These tools allow you to align the text, set the indentation, specify line height, margin and draw a horizontal outline below the text.

Image

Image

Inserts a custom image (s) in the content box. Place the cursor where you want to insert the image and then click this button. For comprehensive knowledge about adding an image, [view this](#).

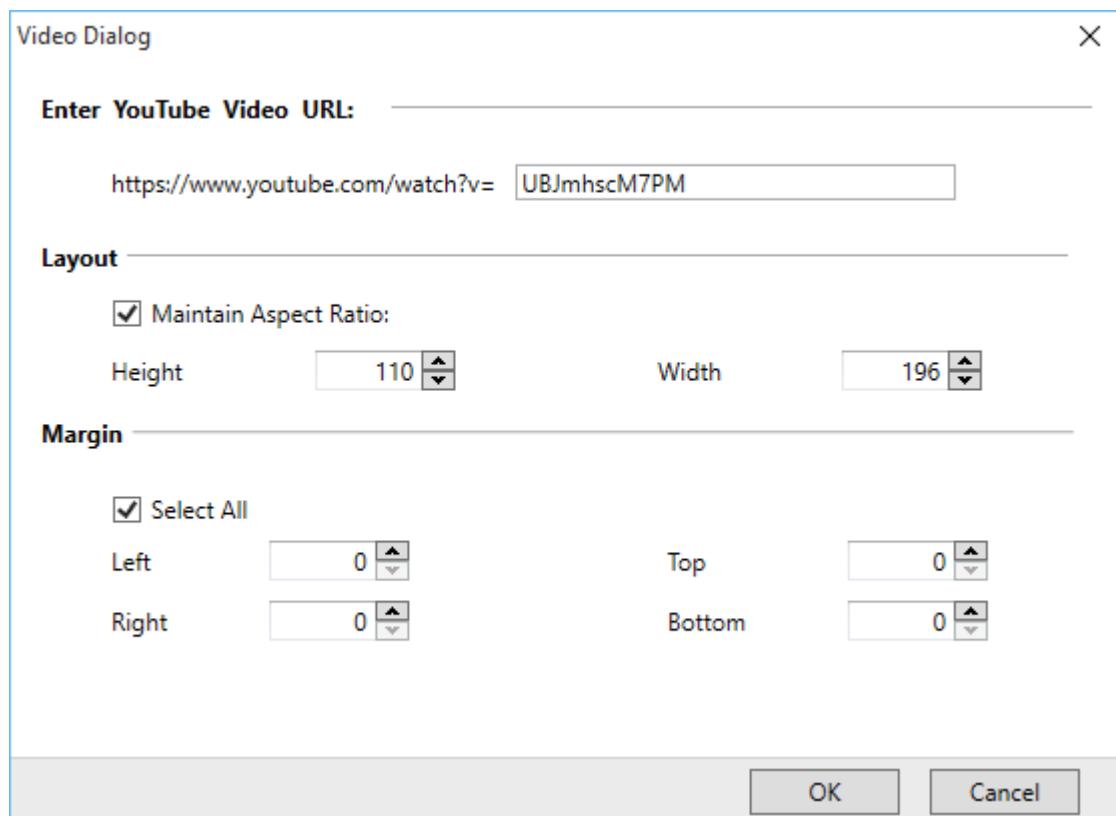

8 Video

Video

Inserts a YouTube video(s) in the content box. Place the cursor where you want to insert the video and then click this button. For more details about adding a video, [view this](#).

9 Button

Button

Inserts the button. Place the cursor where you want to place the button and then click this option. You can personalize the button according to your design with Elements Tab. [See this](#), for complete information.

More Options X

Header	<input type="text"/>
<input checked="" type="radio"/> External URL	<input type="text" value="http://"/> <input type="text"/> e.g. http://www.templatetoaster.com

2.17. Dialog Boxes

A dialog box is a small area on the screen in which you are prompted to provide information or select commands. TemplateToaster provides following dialog boxes:

- [Theme Color](#)
- [Custom Fonts Dialog](#)
- [Color Picker](#)
- [Gradient](#)
- [Background Images](#)
- [Texture](#)
- [Effects](#)
- [Shadow](#)
- [Border](#)
- [Complete Typography](#)
- [Picture](#)
- [Video](#)
- [Button](#)
- [Contact Form](#)
- [Scroll Up Button](#)
- [Hyperlink](#)

2.17.1. More Schemes

1 Color Scheme

You can make your own new color scheme by choosing preferred colors.

2 Color Scheme Name

Color Scheme Name

Specify the name of your color scheme in this text field.

3 Save

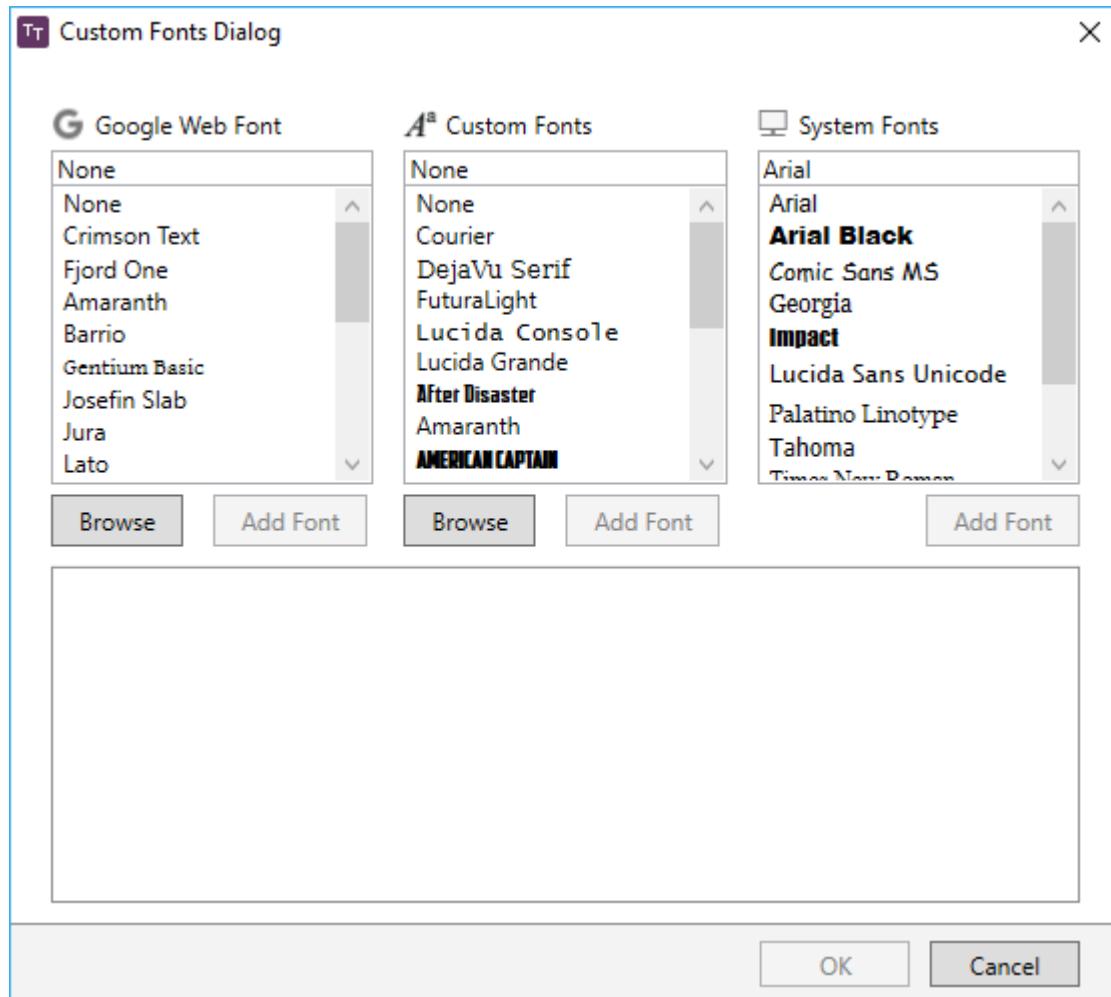

You can create as many color schemes as you want and save with their unique names using this option.

4 Close

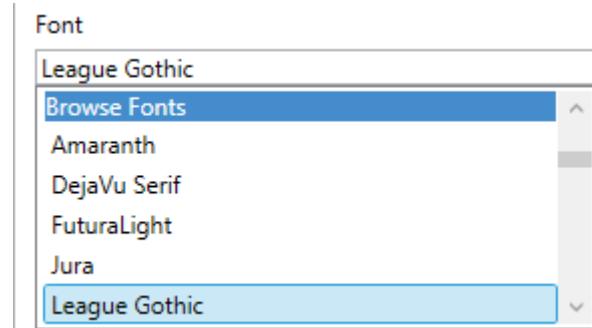

Press close button to drop the changes and close the dialog box.

2.17.2. Custom Fonts Dialog

You can create a new custom typography scheme with the help of this Custom fonts dialog box.

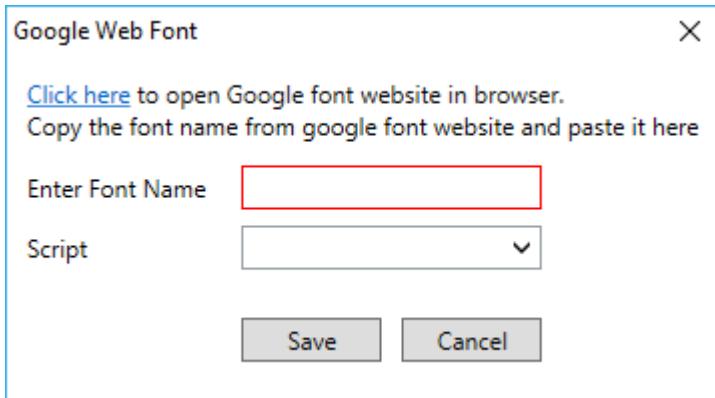

1 Google Web Font

Displays a drop-down list of the Google web fonts that can be used on web pages without any crash limitation. You can select any out of these.

Browse-

Even you can browse more fonts by clicking **Browse** button. A window will open as shown below:

From here, you can directly move to the Google font website to choose your preferred web font and enter that font name in the given text box and select script type and just **Save** it. It will be added to the Google web fonts list of TemplateToaster.

2 Custom Fonts

It is a drop-down list of custom fonts and you can select any preferred font. Even you can Browse your own custom font with help of **Browse** button that will help you to locate the desired file. And it will be added to the current list of fonts.

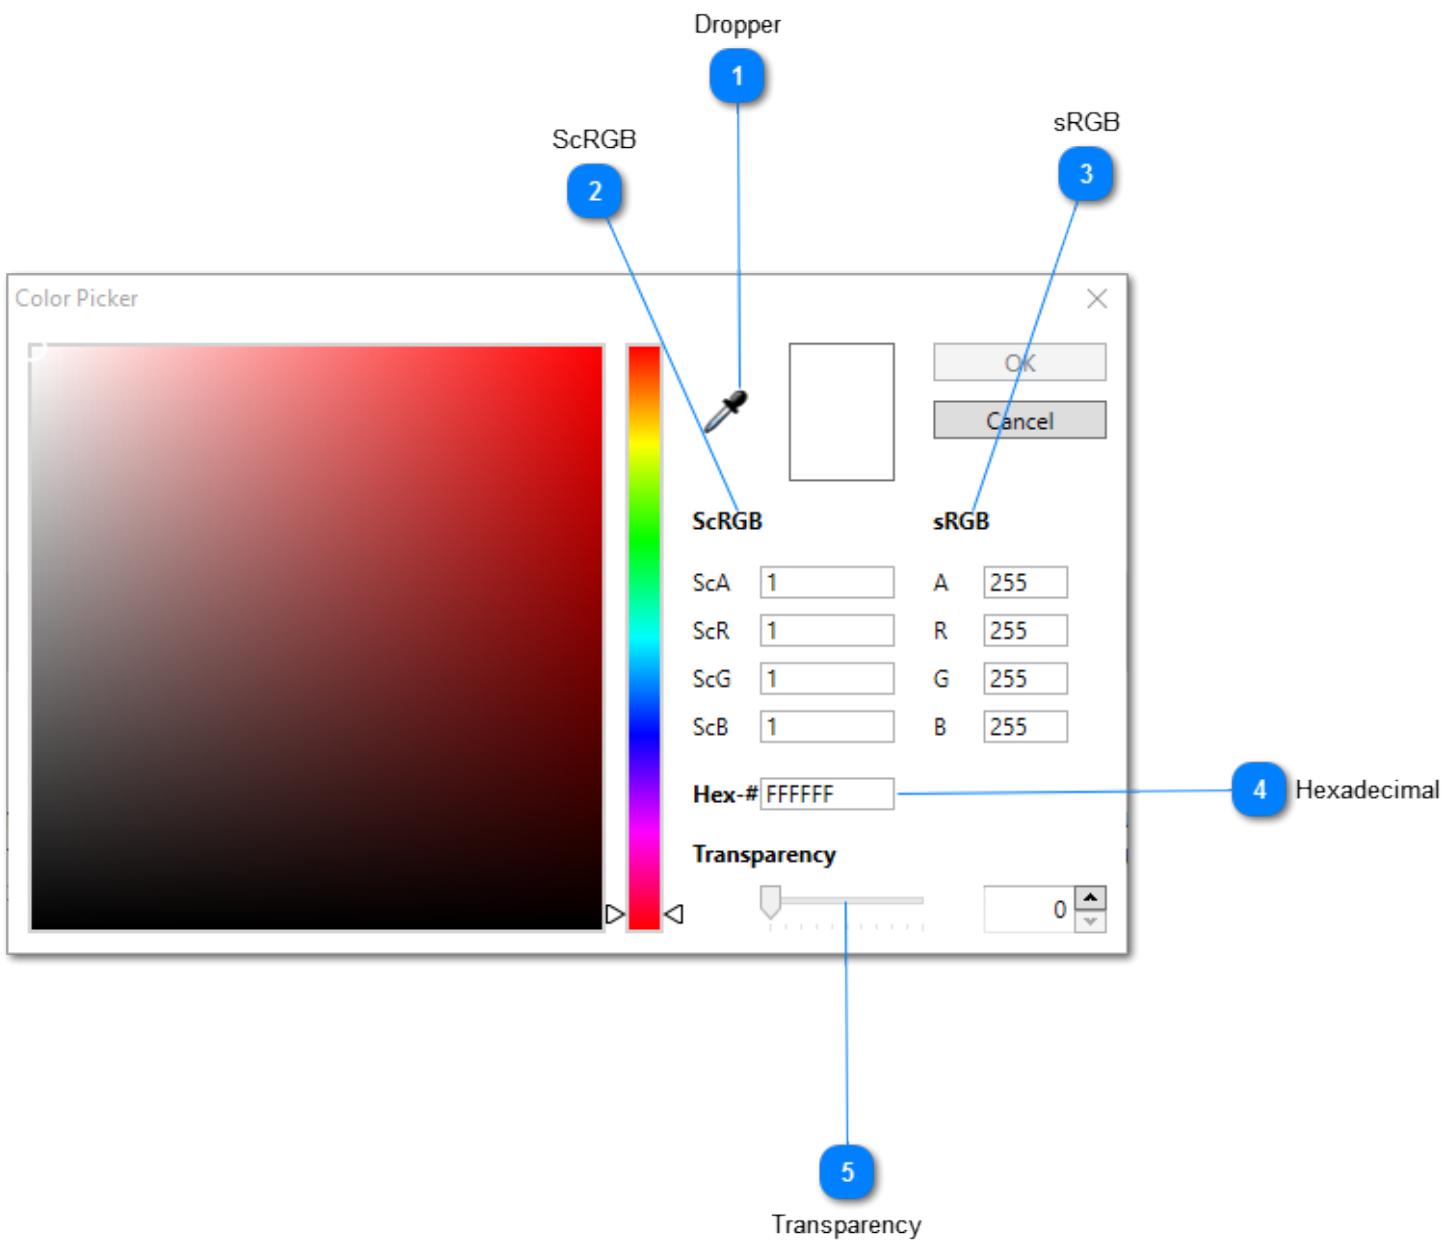

3 System Fonts

Shows a drop- down list of primary fonts that are available with the operating system. You can choose any font as per your need.

4 Add Font

Adds your selected font style to the main typography list.

2.17.3. Color Picker

1 **Dropper**

Enables you to pick a desired color from any location.

2 **ScRGB**

ScRGB

ScA
ScR
ScG
ScB

ScA-

It is used to set ScRGB alpha channel value of the color.

The alpha channel of a Color structure determines the amount of transparency the Color has. An alpha value of 1 indicates the Color is completely opaque and a value of 0 indicates the color is completely transparent.

ScR-

Sets ScRGB red channel value of the color.

ScG-

Specifies the ScRGB green channel value of the color.

ScB-

Sets ScRGB blue channel value of the color.

3 sRGB

sRGB
A
R
G
B

It stands for "Standard RGB" (and RGB stands for Red-Green-Blue"). All the colors you see on your computer display, are made up of various mixtures of red, green, and blue colors.

4 Hexadecimal

Hex-#

Facilitates you to input any valid hexadecimal value of a color.

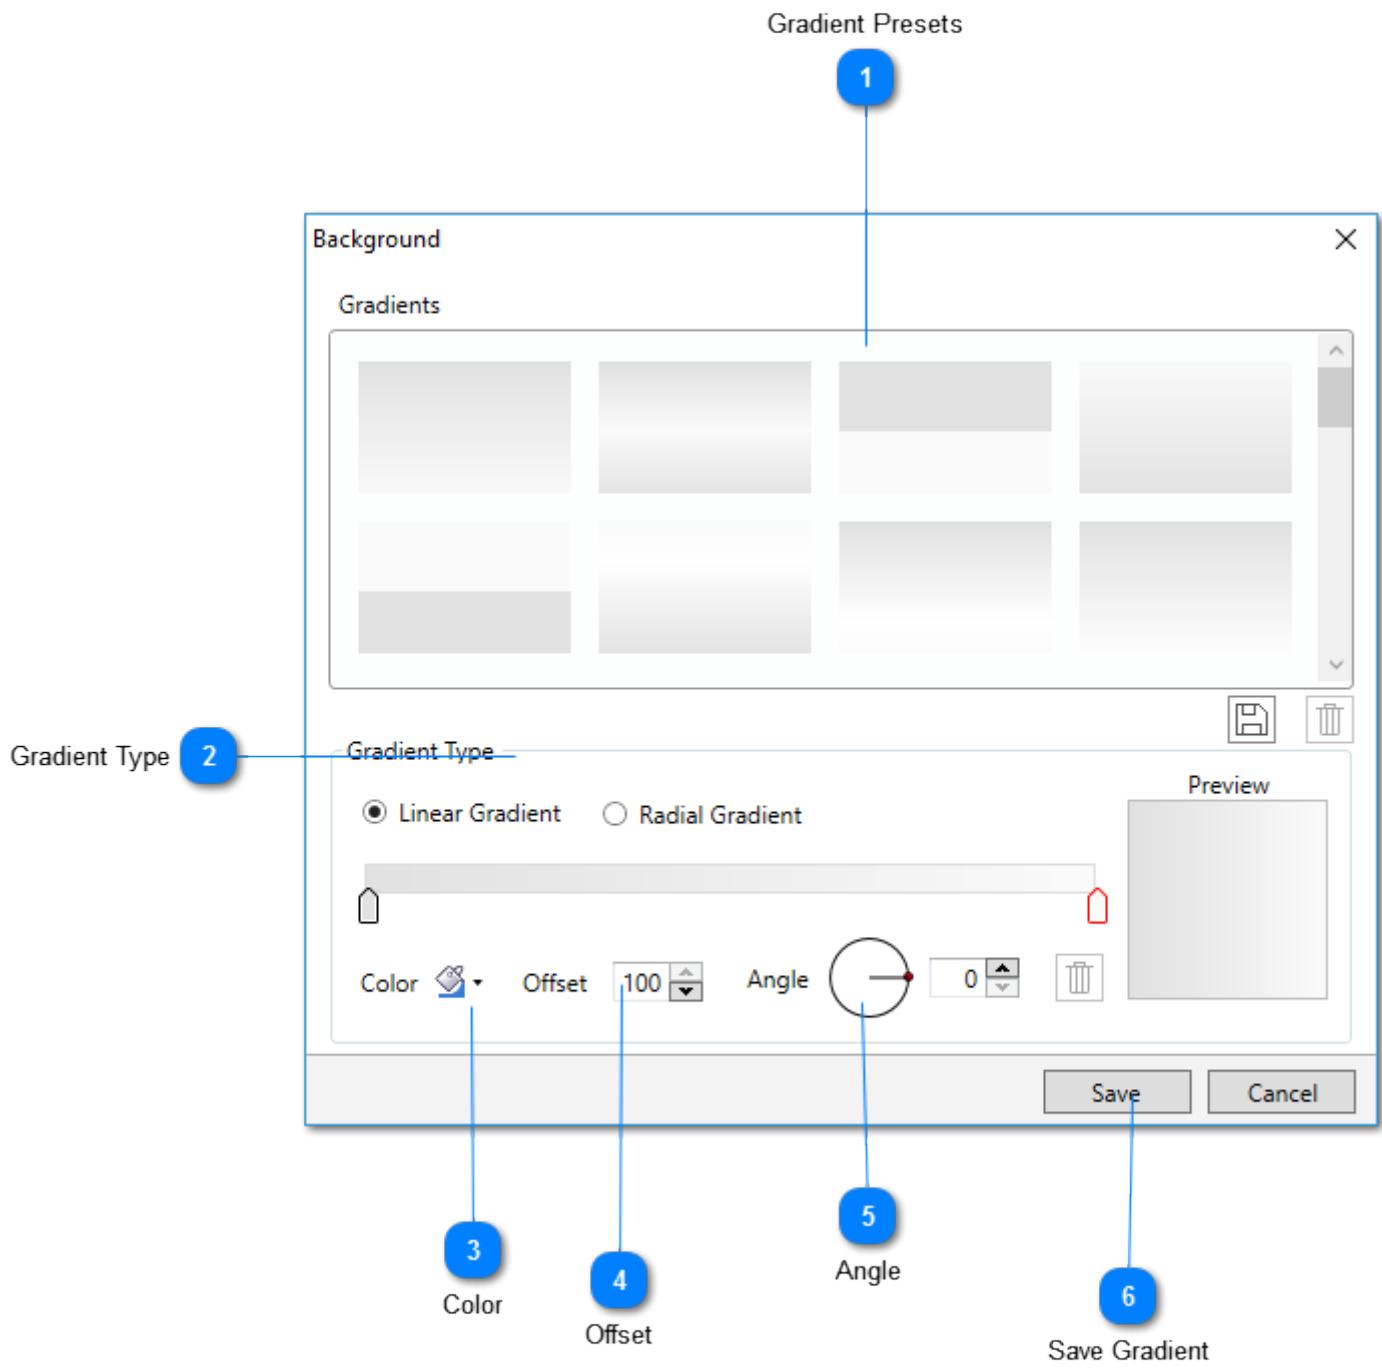

5 Transparency

Transparency

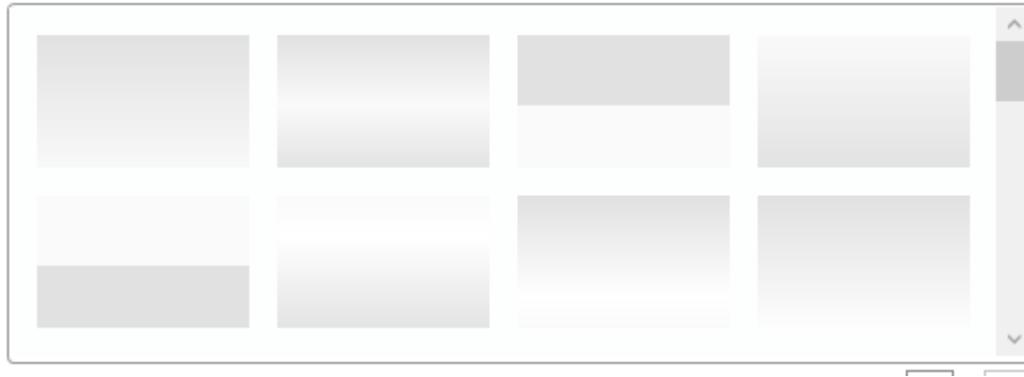

You can set the transparency for the color according to your requirement.

2.17.4. Gradient

1 Gradient Presets

TemplateToaster offers some pre-designed (or preset) gradients. You can choose any from the preset gradient fills.

2 Gradient Type

- Gradient Type -

Linear gradient shades are in a straight line from the starting point to the end point.

Radial gradient shades are in a circular pattern from the starting point to the end point.

3 Color

Provides the second color apart from the background color to form a gradient.

4 Offset

Offset is used to set the location of the color stops.

5 Angle

Offset 100 Angle

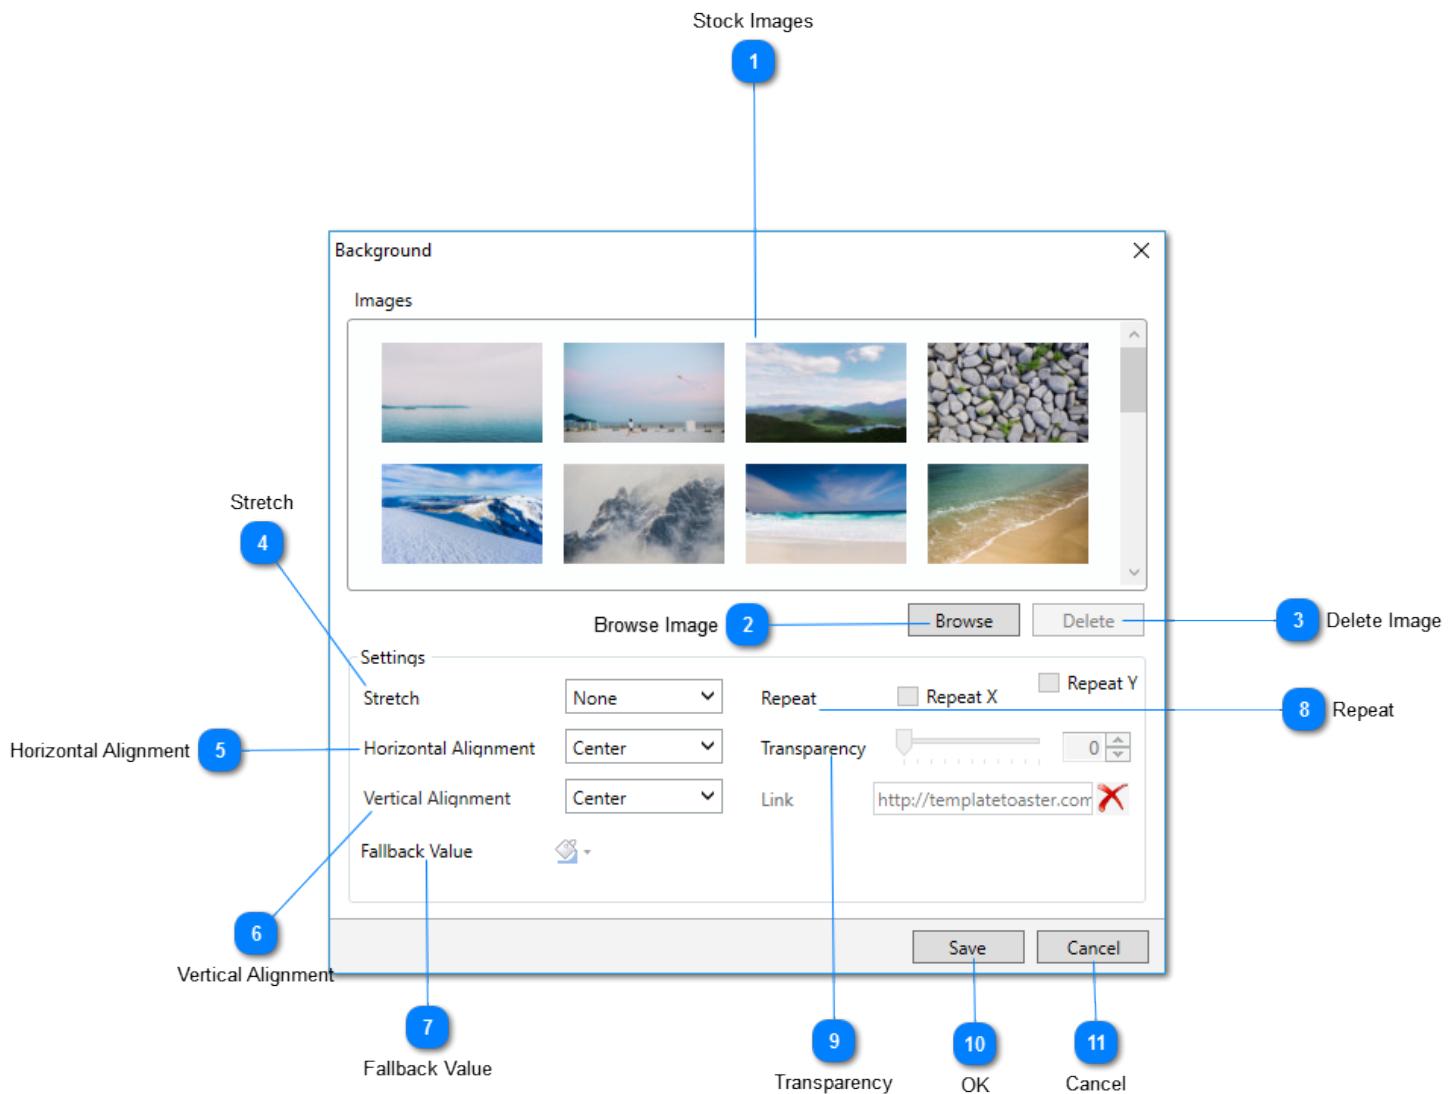

Specifies the angle between the two colors. You can specify a custom angle to create your own gradient style.

6 Save Gradient

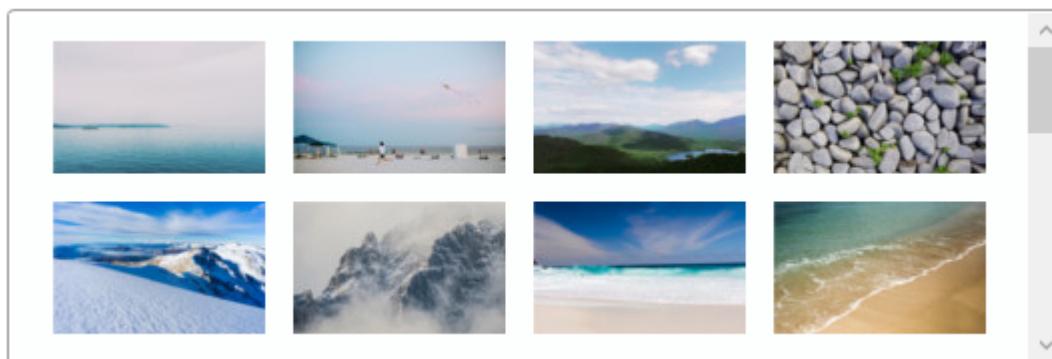

To save your custom gradients.

2.17.5. Background Images

1 Stock Images

You can choose any image from the stock of TemplateToaster.

2 Browse Image

Browse

To browse your system to apply your own image(s) in the background.

3 Delete Image

Deletes an image which you've browsed from your system.

4 Stretch

Avails you with different settings to handle the display of an image at a destination location. The available choices are as following:

Stretch

None-

The image will preserve its original size, if you select "None".

Fill-

The image will be resized to fill the destination dimensions. The aspect ratio is not preserved.

Uniform-

The image will set to fit the destination dimensions while preserving its native aspect ratio.

Uniform to Fill-

The image will resize to fill the destination dimensions while preserving its native aspect ratio. If the aspect ratio of the destination rectangle differs from the source, the source content is clipped to fit in the destination dimensions.

5 Horizontal Alignment

Provides the following choices to align the background image horizontally as:

Horizontal Alignment

Left - aligns the background image to left side.

Center - aligns the background image to the center.

Right - aligns the background image to the right side.

6 Vertical Alignment

Includes three choices to vertically align a background image as follows:

Vertical Alignment

Top - aligns the image to the top.

Center - aligns the image in the center.

Bottom - aligns the image to the bottom.

7 Fallback Value

To choose a fallback color.

8 Repeat

Repeat Repeat X Repeat Y

Repeat X-

Repeats the image in the direction of X-axis.

Repeat Y-

Repeats the image in the direction of Y-axis.

9 Transparency

Transparency 

You can select the transparency level for the background image with this.

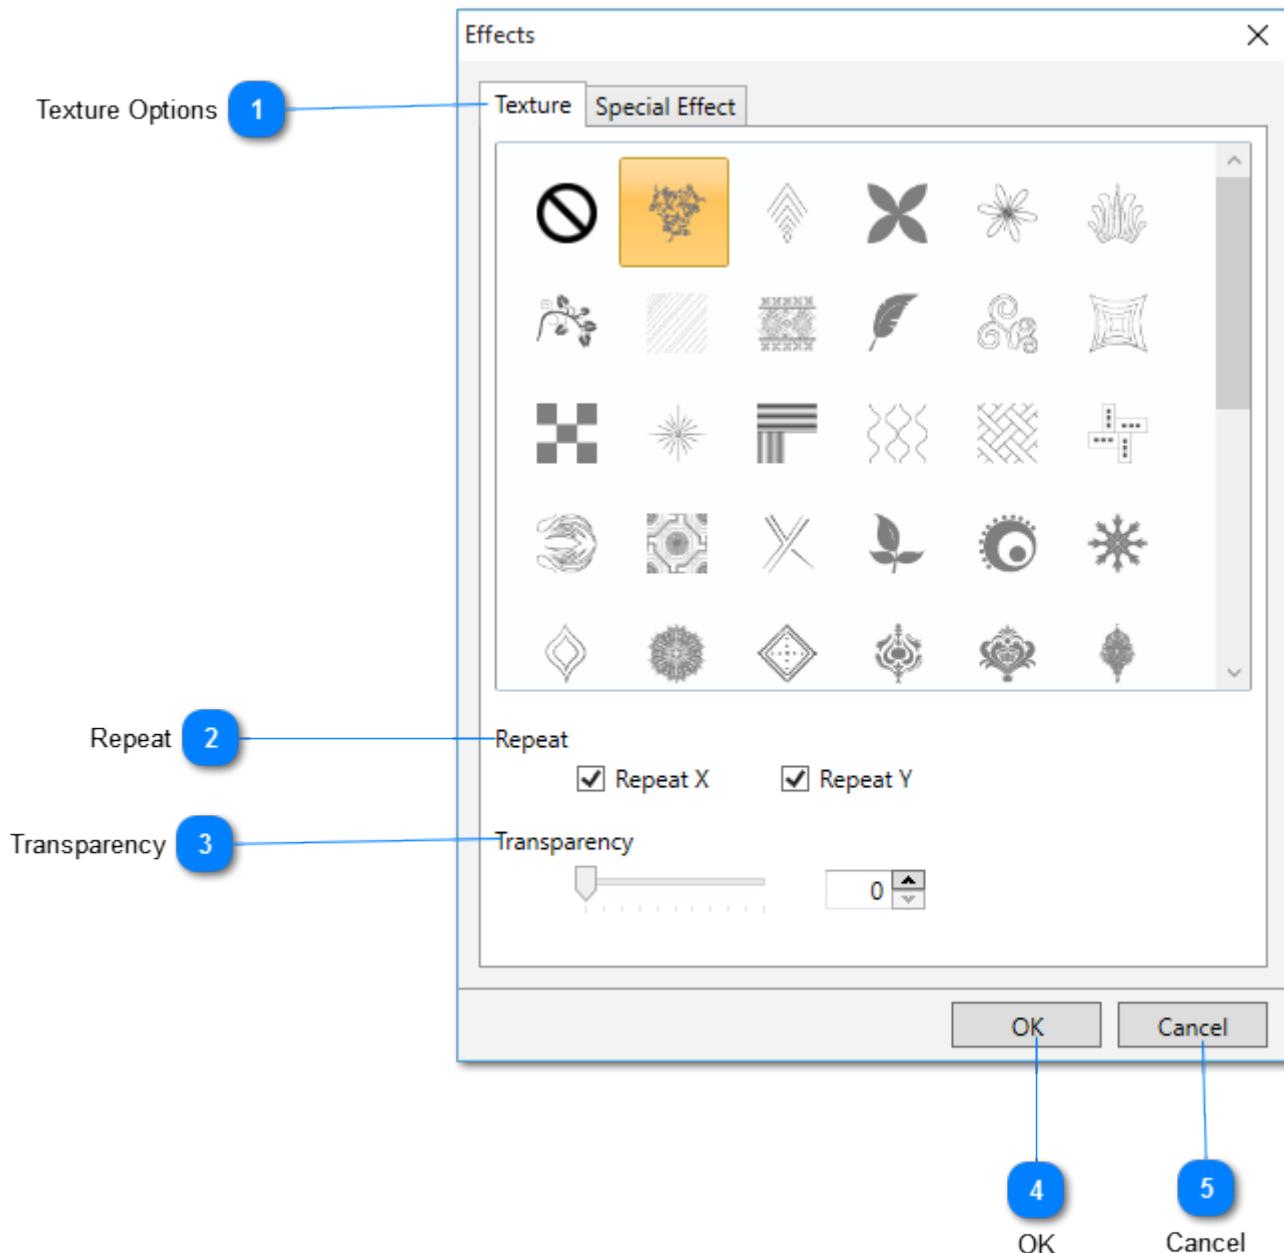

10 OK

Press "OK" button to apply the background image.

11 Cancel

Press "Cancel" button to drop the changes.

2.17.6. Texture

1 Texture Options

Texture

Adds texture to the background. To try different textures, hover your mouse pointer on different textures, and then select the best suited texture for the background.

2 Repeat

Repeat

Repeat X Repeat Y

Repeat -X-

It will repeat the texture in the direction of X-axis.

Repeat -Y-

It will repeat the texture in the direction of Y-axis.

3 Transparency

You can select the transparency level of the texture.

4 OK

A rectangular button labeled "OK" in a standard font.

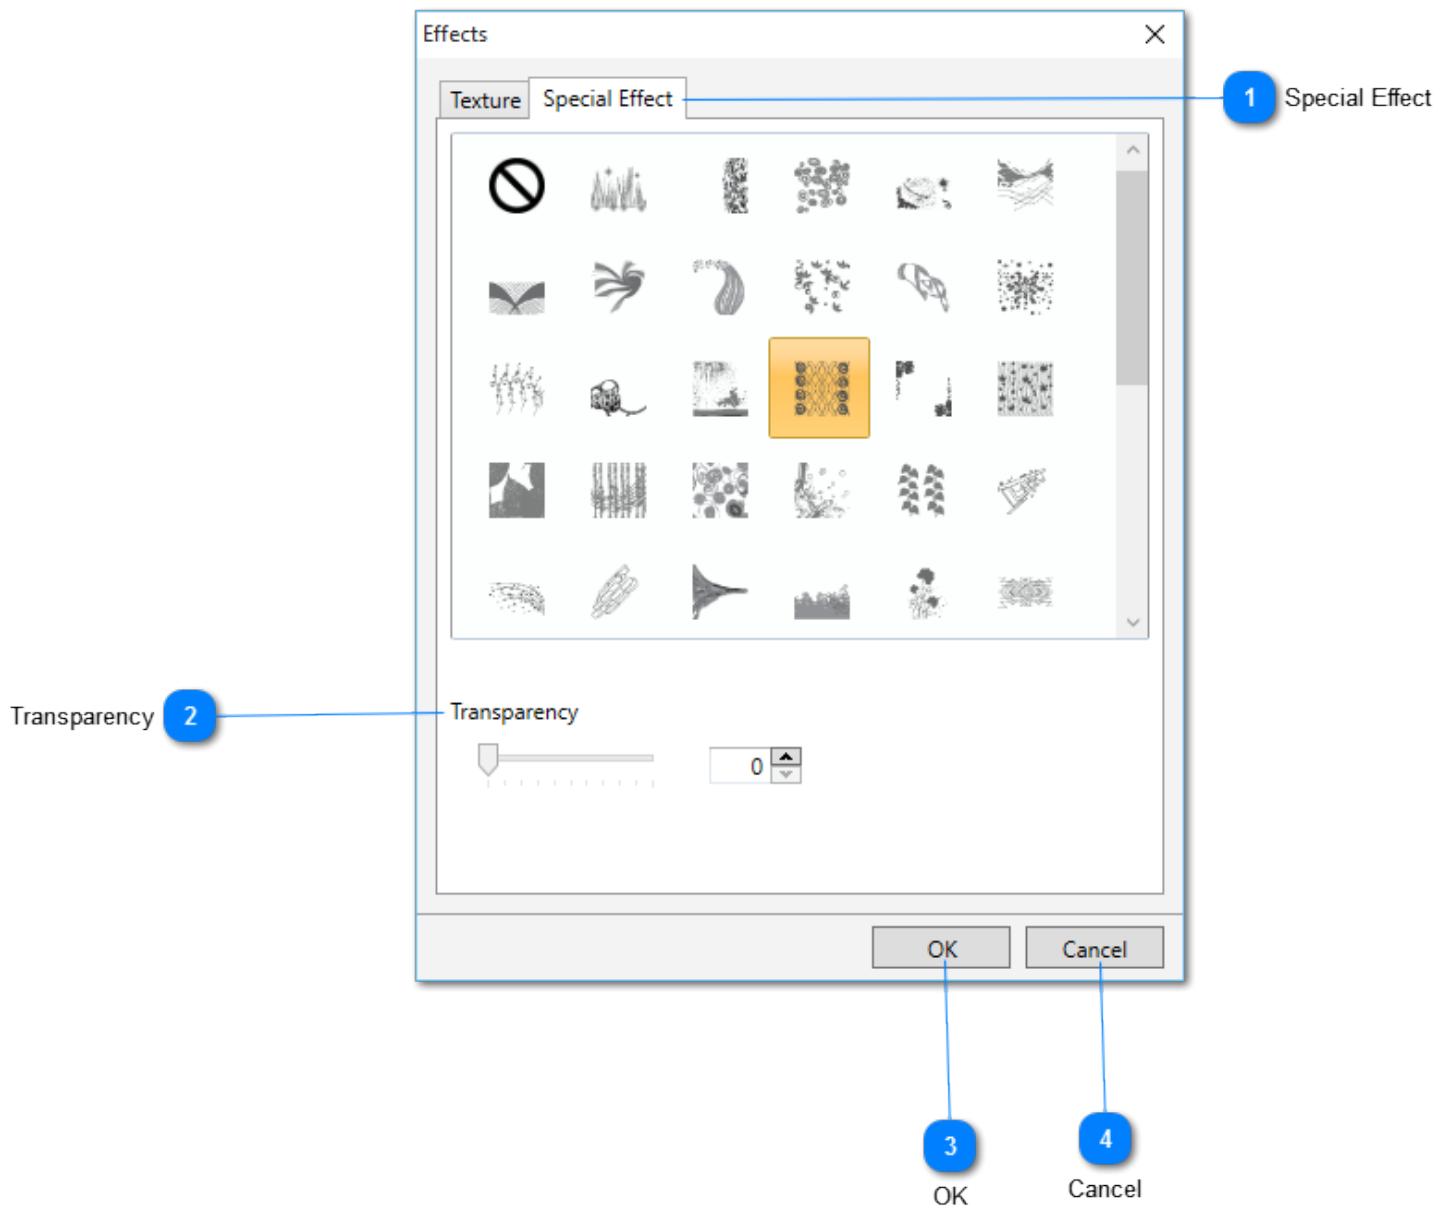

Press OK button to apply the texture.

5 Cancel

A rectangular button labeled "Cancel" in a standard font.

Press Cancel button to drop the changes and close the dialog.

2.17.7. Effects

1 Special Effect

Special Effect

To apply different types of the special effects to the background. Special Effects are like textures with some different set of effects. To preview different special effects, hover your mouse cursor on different special effects, and select the best suited special effect for the background.

2 Transparency

Transparency

Specifies the target window in which the link should open.

4 Save

Creates the hyperlink.

5 Cancel

Cancel

Cancels the changes and closes the dialog box.

3. Upload Your Theme/Template/Website

In this section, you will come to know that how you can upload your Theme/Template/Website in your desired CMS. The method of uploading the theme/template/website for each particular CMS is described below:

- [WordPress](#)
- [Joomla](#)
- [Drupal](#)
- [Blogger](#)
- [HTML](#)
- [WooCommerce](#)
- [Magento](#)
- [OpenCart](#)
- [Prestashop](#)
- [VirtueMart](#)

3.1. WordPress

Follow these steps to upload your theme in **WordPress**:

STEP 1: Log in to your administrator dashboard.

The screenshot shows the WordPress dashboard. On the left, there's a sidebar with links: Home, Updates, Posts, Media, Pages, Comments, Appearance, Plugins, Users, Tools, Settings, and a Collapse menu. The main area has a "Welcome to WordPress!" message with links to "Get Started" (Customize Your Site) and "Next Steps" (Edit your front page, Add additional pages, Add a blog post, View your site). It also includes sections for "At a Glance" (1 Post, 7 Pages, 1 Comment) and "Quick Draft" (Title, What's on your mind?, Save Draft). A "More Actions" section has links for Manage widgets or menus, Turn comments on or off, and Learn more about getting started.

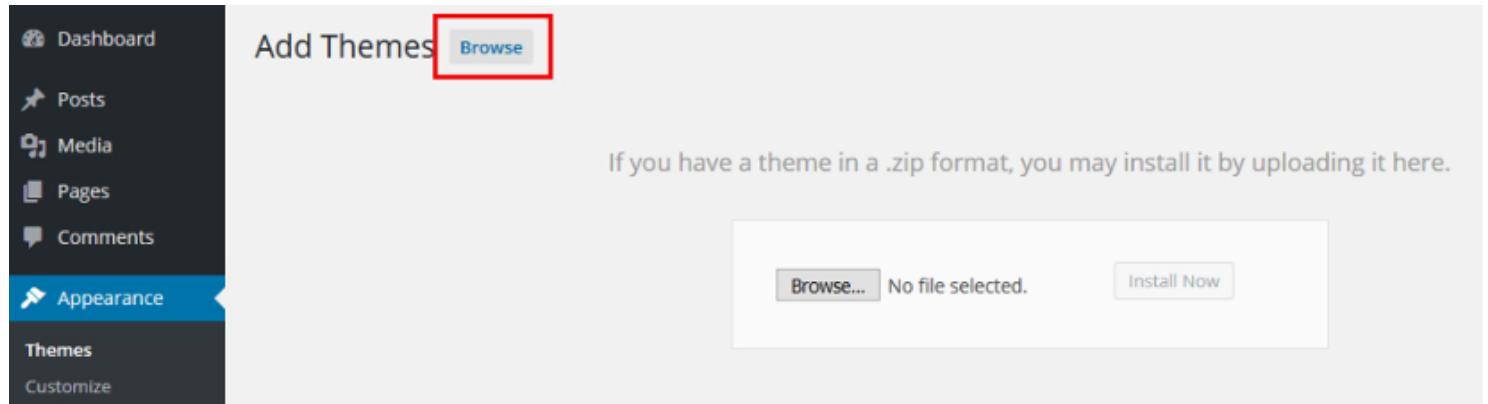

STEP 2: From the left sidebar of dashboard, navigate to **Appearance --> Themes**. Now, click Add New.

The screenshot shows the "Themes" screen. At the top, there's a "Themes" button with a '3' notification, an "Add New" button (which is highlighted with a red box), and a search bar. Below the search bar, there are three theme preview cards: "Twenty Fifteen" (Active), "Twenty Fourteen", and "Twenty Thirteen". Each card shows a thumbnail, the theme name, and a brief description. At the bottom, it says "Active: Twenty Fifteen" and has "Customize" and "Activate" buttons.

STEP 3: As you click Add New button, you will see next screen as shown below. Click "**Upload Theme**" from here.

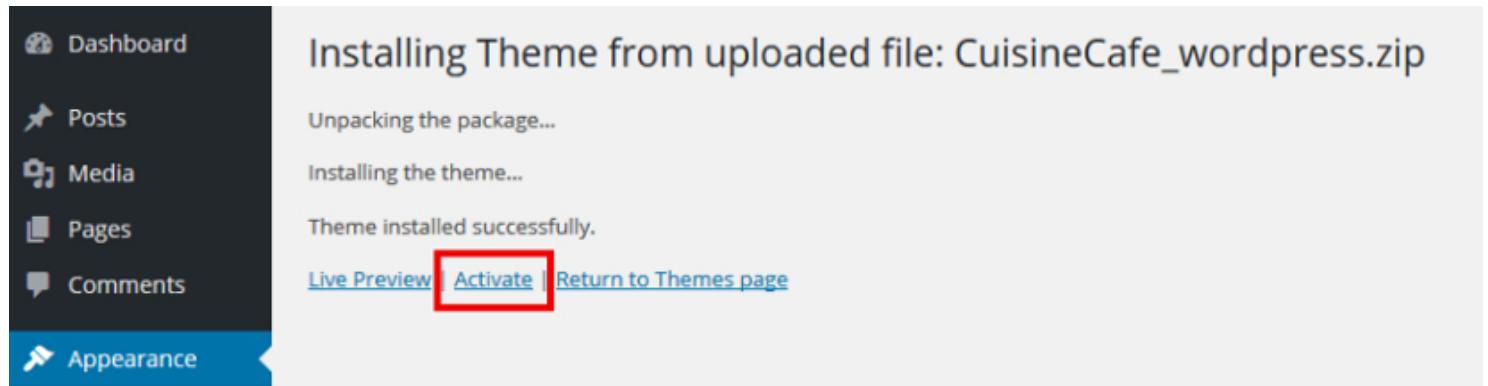

The screenshot shows the "Add Themes" screen. At the top, there's a "Dashboard" button, a "Posts" button, a "Media" button, a "Pages" button, a "Comments" button, and an "Appearance" button. The "Appearance" button is highlighted with a blue box. Below the buttons, there's a search bar with "Search themes...". Underneath the search bar, there are filter options: "Featured", "Popular", "Latest", and "Feature Filter". In the center, there's a large "Upload Theme" button (highlighted with a red box).

STEP 4: Browse your theme and press "Install Now" button .

The screenshot shows the WordPress dashboard with the 'Appearance' menu item selected. On the right, under 'Themes', there is a section titled 'Add Themes'. A red box highlights the 'Browse' button, which is used to upload a theme file. Below it, a message says, 'If you have a theme in a .zip format, you may install it by uploading it here.' There is a 'Browse...' button, a message 'No file selected.', and an 'Install Now' button.

STEP 3: After successful installation, you can **Activate** the theme on your website.

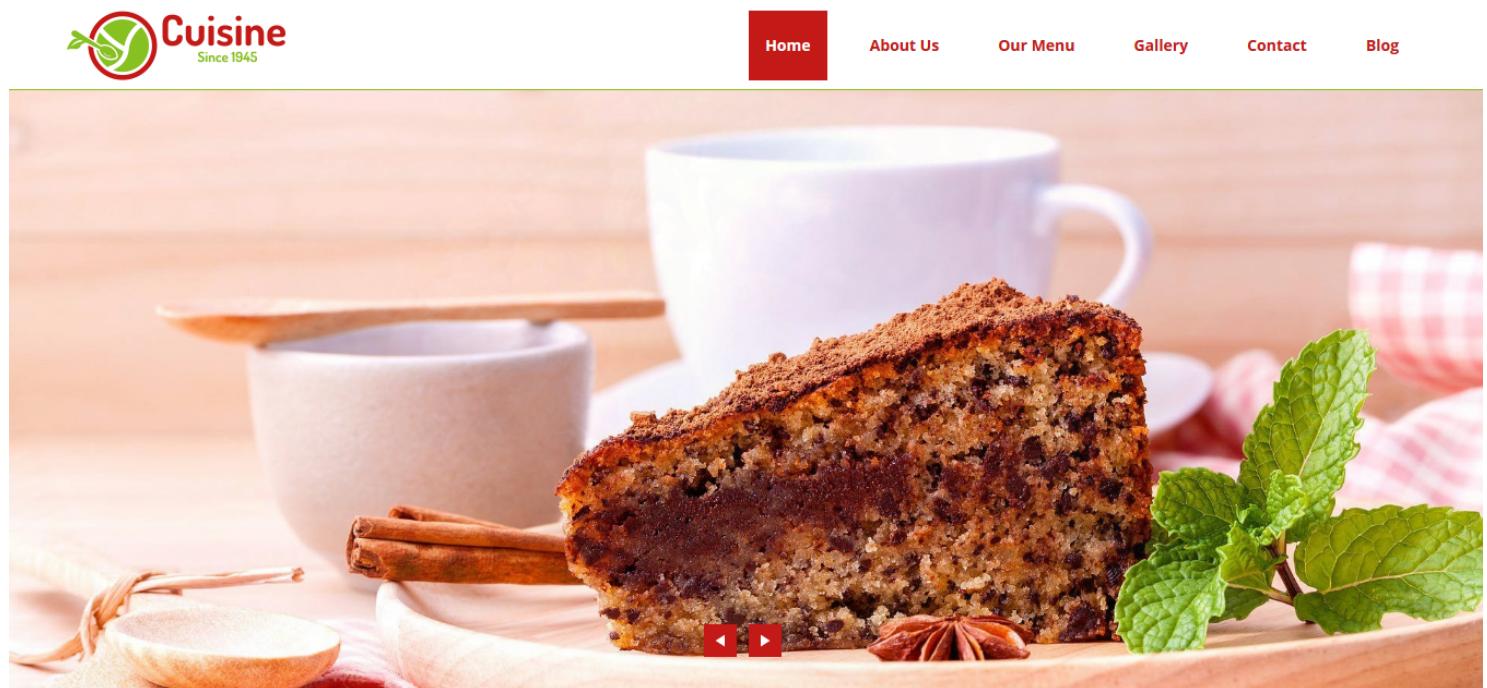

The screenshot shows the WordPress dashboard with the 'Appearance' menu item selected. On the right, there is a message: 'Installing Theme from uploaded file: CuisineCafe_wordpress.zip'. Below it, a status message says 'Unpacking the package...'. Underneath that, another message says 'Installing the theme...'. Finally, a message says 'Theme installed successfully.' At the bottom, there are three links: 'Live Preview', 'Activate' (which is highlighted with a red box), and 'Return to Themes page'.

STEP 4: After activating the theme, you may visit the site to see how it looks on browser.

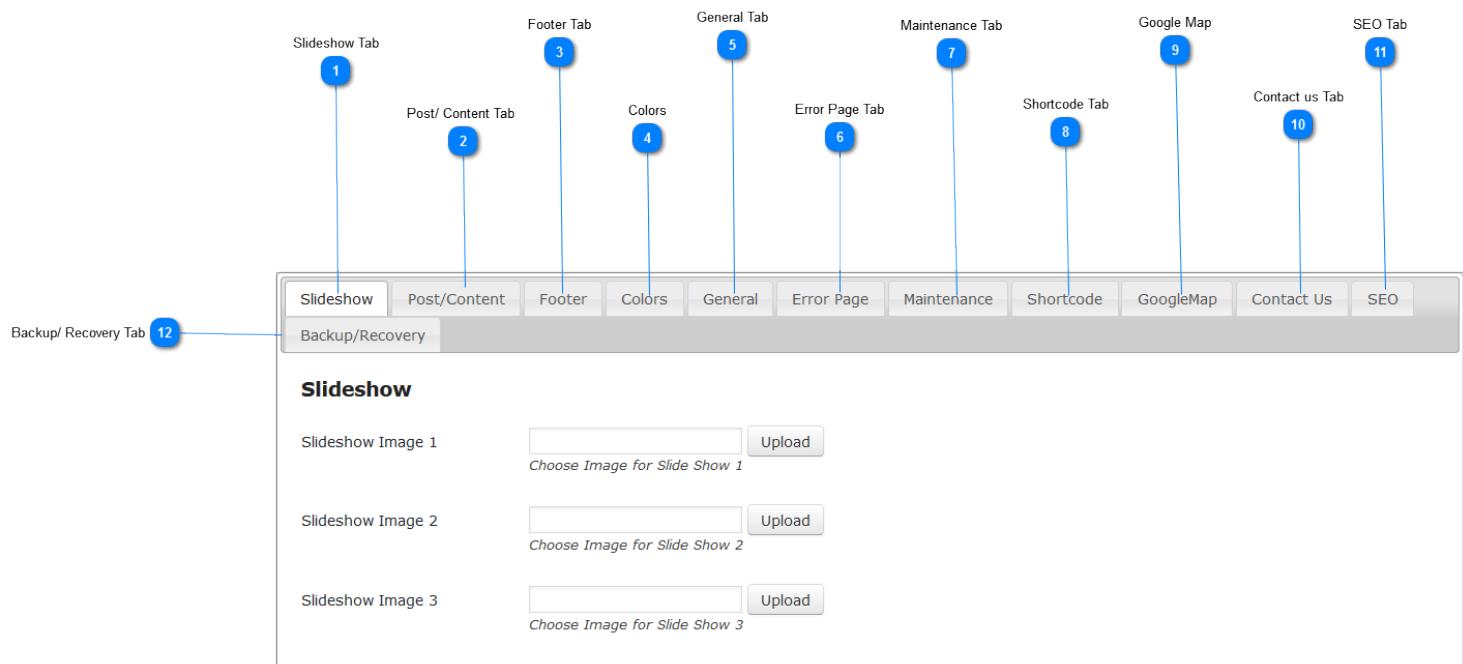

3.1.1. Front Page after Installation

The Website Front Page after activation of the theme is:

3.1.2. Theme Options

Customizing TemplateToaster's theme is so easy, even after installation. You will see an additional tool on the sidebar of your admin dashboard, under the name "Theme Options". These theme options give you flexibility to change some elements of your theme. Let us have a look at these theme options.

1 Slideshow Tab

Slideshow

This tab shows you the options of Slideshow of your theme. It allows you to replace the images used in the slideshow by uploading new ones, even after installing the theme.

2 Post/ Content Tab

Post/Content

This tab contains the options for customizing the post settings.

The screenshot shows the WordPress admin interface for the UFinance theme. The left sidebar has a dark background with white icons and text. The main content area has a light gray background. At the top, there's a yellow bar with the text "Import website content?" and a blue "Yes" button. Below it, the title "Theme Options For UFinance" is displayed next to a gear icon. A navigation bar below the title contains several tabs: Header, Slideshow, Post/Content (which is highlighted in blue), Footer, Colors, General, Error Page, Maintenance, Shortcode, GoogleMap, and Contact Us. Under the Post/Content tab, there are two sub-tabs: SEO and Backup/Recovery. The main content area is titled "Post/Content". It contains the following settings:

- Number of Featured Posts:** A text input field containing "1" with the placeholder "How many posts would you like to be displayed as featured on the front page?".
- Number of Columns:** A text input field containing "4" with the placeholder "How many columns would you like to display the posts after featured posts".
- Show Breadcrumbs On Page:** A switch button labeled "OFF".
- Show Breadcrumbs On Post:** A switch button labeled "OFF".
- Breadcrumbs Prefix:** An empty text input field with the placeholder "Choose breadcrumbs text".
- Breadcrumbs Separator:** An empty text input field with the placeholder "Set your Breadcrumbs separator".

At the bottom of the form, there is a blue "Save Options" button. Below the form, a small note says "Thank you for creating with WordPress." and the version number "Version 4" is visible on the right.

Number of Featured Posts -

You can specify the number of featured posts to display on the home page of the site.

Number of Columns -

You can specify in how many columns to show the featured posts.

Show Breadcrumb on Page -

Breadcrumbs is basically the type of text-based website navigation that breaks the site into links of categories and sub categories allowing major categories of information to be linked in a sequential order. Breadcrumb navigation is displayed to the user, so that they can easily navigate between the pages.

Select the On option, if you wish to display the Breadcrumbs, otherwise keep it Off to hide the Breadcrumbs.

Show Breadcrumb on Post -

You can show/hide the breadcrumb on the post.

Breadcrumb Prefix -

Set a breadcrumb prefix using this option.

Breadcrumb Separator -

You can set a desired separator on the breadcrumb using this option.

This includes following options to customize the Footer:

3.2. Joomla

Follow these steps to upload your theme/template in **Joomla**:

STEP 1: Log in to your Control Panel.

The screenshot shows the Joomla Control Panel interface. The top navigation bar includes links for System, Users, Menus, Content, Components, Extensions, and Help. On the right, there are links for Joomla Website and a gear icon. The main content area is divided into several sections:

- CONTENT**: Includes links for Add New Article, Article Manager, Category Manager, and Media Manager.
- STRUCTURE**: Includes links for Menu Manager and Module Manager.
- USERS**: Includes link for User Manager.
- CONFIGURATION**: Includes links for Global Configuration, Template Manager, and Language Manager.
- EXTENSIONS**: Includes link for Install Extensions.
- You have post-installation messages**: A message box stating: "There are important post-installation messages that require your attention. To view those messages please click on the Review Messages button below. You can review the messages at any time by clicking on the Components, Post-installation messages menu item of your site's Administrator section. This information area won't appear when you have hidden all messages." It contains a "Review Messages" button.
- LOGGED-IN USERS**: Shows a Super User entry last updated on 2015-11-27.
- POPULAR ARTICLES**: A list of articles with their counts and creation dates:
 - 14 Sample Sites (2011-01-01)
 - 14 Australian Parks (2011-01-01)
 - 10 Fruit Shop (2011-01-01)
 - 8 Typography (2011-01-01)
 - 5 Using Joomla! (2011-01-01)
- RECENTLY ADDED ARTICLES**: A list of articles with their names, types, and last update dates:
 - Users Super User (2011-01-01)
 - Custom HTML Module Super User (2011-01-01)
 - Quick Icons Super User (2011-01-01)
 - Login Module Super User (2011-01-01)
 - Statistics Module Super User (2011-01-01)

The bottom of the screen shows a footer with links for View Site, Admin, Log out, and a status message: "Joomla! is up-to-date." The footer also displays the Joomla version (3.4.3) and copyright information (© 2015 Joomla Website).

STEP 2: From the top navigation bar of panel, navigate to **Extensions -> Extension Manager**.

The screenshot shows the Joomla Control Panel interface. At the top, there's a navigation bar with links like System, Users, Menus, Content, Components, Extensions, Help, and a Joomla Website link. Below the navigation is a sidebar with sections for Content (Add New Article, Article Manager, Category Manager, Media Manager), Structure (Menu Manager, Module Manager), Users (User Manager), Configuration (Global Configuration, Template Manager, Language Manager), and Extensions (Install Extensions). The main content area has sections for LOGGED-IN USERS (Super User Administration, last updated 2015-11-27), POPULAR ARTICLES (Sample Sites, Australian Parks, Fruit Shop, Typography, Using Joomla!, all posted on 2011-01-01), and RECENTLY ADDED ARTICLES (Joomla! is up-to-date, Checking extensions ..., Custom HTML Module, Login Module, Statistics Module, all posted on 2011-01-01). A red box highlights the 'Extension Manager' option in the Extensions dropdown menu.

STEP 3: Click the browse button and install the theme by clicking upload and install button.

The screenshot shows the 'Extension Manager: Install' page. The left sidebar has a 'Install' tab selected, with other options like Update, Manage, Discover, Database, Warnings, Install Languages, and Update Sites. The main content area has a message about the Joomla Extensions Directory (JED) and an 'Add "Install from Web" tab' button. Below that are tabs for Upload Package File (selected), Install from Directory, and Install from URL. A large 'Upload & Install Joomla Extension' section contains a 'Extension package file' input field with a 'Browse...' button (highlighted with a red box), and a 'Upload & Install' button. The bottom of the screen shows a footer with View Site, Visitors, Admin, Log out, and Joomla! 3.4.3 — © 2015 Joomla Website.

STEP 4: After uploading the theme, set the theme as your default theme.

3.2.1. Theme Options

Customizing TemplateToaster's theme is so easy, even after installation. You will see an additional tool when you go in the specific template settings, under the name "Theme Options". These theme options give you flexibility to change some elements of your theme. Let us have a look at these theme options.

The screenshot shows the Joomla! Template Manager interface. At the top, there are tabs for System, Users, Menus, Content, Components, Extensions, Help, and a Joomla Website icon. Below the tabs, the title is 'Template Manager: Edit Style' for 'Agency_Joomla - Default'. There are buttons for Save, Save & Close, Save as Copy, and Close. The 'Header Options' tab is active. A callout diagram with numbered circles (1-7) points to specific sections: 1. Header Options, 2. Footer Options, 3. Color Options, 4. Sidebar Options, 5. Style Options, 6. Menu Style Options, and 7. Menu Assignment. On the right, there are dropdown menus for 'Default' (set to 'All') and 'Template' (set to 'agency_joomla'). At the bottom, there are links for View Site, Visitors, Admin, and Log out, along with the Joomla! version information (3.4.3).

1 Header Options

This tab provides you the option for customizing the header settings.

The screenshot shows the Joomla! Template Manager interface. At the top, there are tabs for System, Users, Menus, Content, Components, Extensions, Help, and VirtueMart. Below the tabs, the title is 'Templates: Edit Style' for 'amlfp2017 - Default'. There are buttons for Save, Save & Close, Save as Copy, and Close. The 'Header Options' tab is active. A callout diagram with numbered circles (1-8) points to specific sections: 1. Change Header Background Image, 2. Horizontal Alignment, 3. Vertical Alignment, 4. Stretch, 5. Display Site Title, 6. Site Title, 7. Site Title Font Size, and 8. Heading Tag For Title. Other tabs include Slideshow Options, Footer Options, Color Options, Sidebar Options, Style Options, Menu Style Options, and Menu Assignment. At the bottom, there are links for View Site, Visitors, Administrator, Messages, and Log out, along with the Joomla! version information (3.6.5).

2 Footer Options

This tab contains the options for customizing the footer settings.

The screenshot shows the Joomla Template Manager: Edit Style interface. The top navigation bar includes links for System, Users, Menus, Content, Components, Extensions, Help, and the Joomla Website logo. The main title is "Template Manager: Edit Style" with a subtitle "Agency_Joomla - Default". Below the title are buttons for Save, Save & Close, Save as Copy, and Close. A "Help" button is also present. The "Footer Options" tab is selected. The configuration area includes fields for displaying social media icons (Facebook, LinkedIn, GooglePlus, Twitter) and a footer link. Each section has a "Show" or "Hide" button, an icon selection tool, and a URL input field. The footer link URL is set to "http://www.templatetoaster.com". Other settings include font sizes for footer links (14px) and text (14px). The bottom of the screen shows a footer with "View Site", visitor counts (0 visitors, 2 admins), and a "Log out" link. The Joomla version is 3.4.3.

3.2.1.1. Article Options

You can add **Articles** in Joomla from the article manager on the top of the screen under content option.

The screenshot shows the Joomla Article Manager interface for adding a new article. At the top, there's a navigation bar with links like System, Users, Menus, Content, Components, Extensions, and Help. The main title is "Article Manager: Add New Article". Below the title are four buttons: Save (green), Save & Close (green), Save & New (green), and Cancel (red). A status message "Joomla!™" is visible on the right.

The main content area has tabs for Content, Publishing, Images and links, Options, Configure Edit Screen, and Permissions. The Content tab is selected, showing a rich text editor toolbar with options like Edit, Insert, View, Format, Table, Tools, and various icons for bold, italic, underline, etc. Below the toolbar is a large text area containing the letter "p". At the bottom of the text area are buttons for Article, Image, Page Break, and Read More, along with a "Toggle editor" link.

On the right side, there are several configuration fields:

- Status: A dropdown menu set to "Published".
- Category: A dropdown menu set to "- Sample Data-Articles".
- Featured: A button group where "Yes" is highlighted in green.
- Access: A dropdown menu set to "Public".
- Language: A dropdown menu set to "All".
- Tags: A text input field with placeholder text "Select some options".
- Version Note: An empty text input field.

3.2.1.2. Category Options

You can add **Categories** in Joomla from the Category manager on the top of the screen under content option.

The screenshot shows the Joomla Category Manager interface for adding a new category. At the top, there's a navigation bar with links for System, Users, Menus, Content, Components, Extensions, and Help. The title bar says "Category Manager: Add A New Articles Category". On the right, there's a Joomla logo and a "Help" link. Below the title bar, there are four buttons: "Save" (green), "Save & Close" (green), "Save & New" (blue), and "Cancel" (red). The main form starts with a "Title *" field and an "Alias" field with the placeholder "Auto-generate from title". Below these are tabs for "Category", "Publishing", "Permissions", and "Options", with "Category" being the active tab. Under the "Category" tab, there's a "Description" rich text editor with standard toolbar buttons like Bold, Italic, Underline, etc. To the right of the editor, there are several configuration fields: "Parent" set to "No parent", "Status" set to "Published" (highlighted in green), "Access" set to "Public", "Language" set to "All", "Tags" (a dropdown menu), "Note" (a text input field), and "Version Note" (a text input field). At the bottom left, there are links for "View Site", "Visitors" (0), "Admin" (1), and "Log out". The bottom right shows the Joomla version "Joomla! 3.4.3 — © 2015 Joomla Website".

3.2.1.3. Featured Article Options

You can add **Featured Articles** in Joomla by clicking featured articles on the top of the screen under content option.

The screenshot shows the Joomla Article Manager interface for adding a new article. At the top, there's a navigation bar with links for System, Users, Menus, Content, Components, Extensions, and Help. The title "Article Manager: Add New Article" is displayed, along with buttons for Save, Save & Close, Save & New, and Cancel. A Joomla! logo is in the top right corner.

The main area has tabs for Content, Publishing, Images and links, Options, Configure Edit Screen, and Permissions. The Content tab is selected. Below the tabs is a toolbar with buttons for Edit, Insert, View, Format, Table, and Tools, followed by a rich text editor toolbar with various styling options like bold, italic, underline, etc.

The article content area contains a single character 'p'. Below it are buttons for Article, Image, Page Break, and Read More, along with a Toggle editor button.

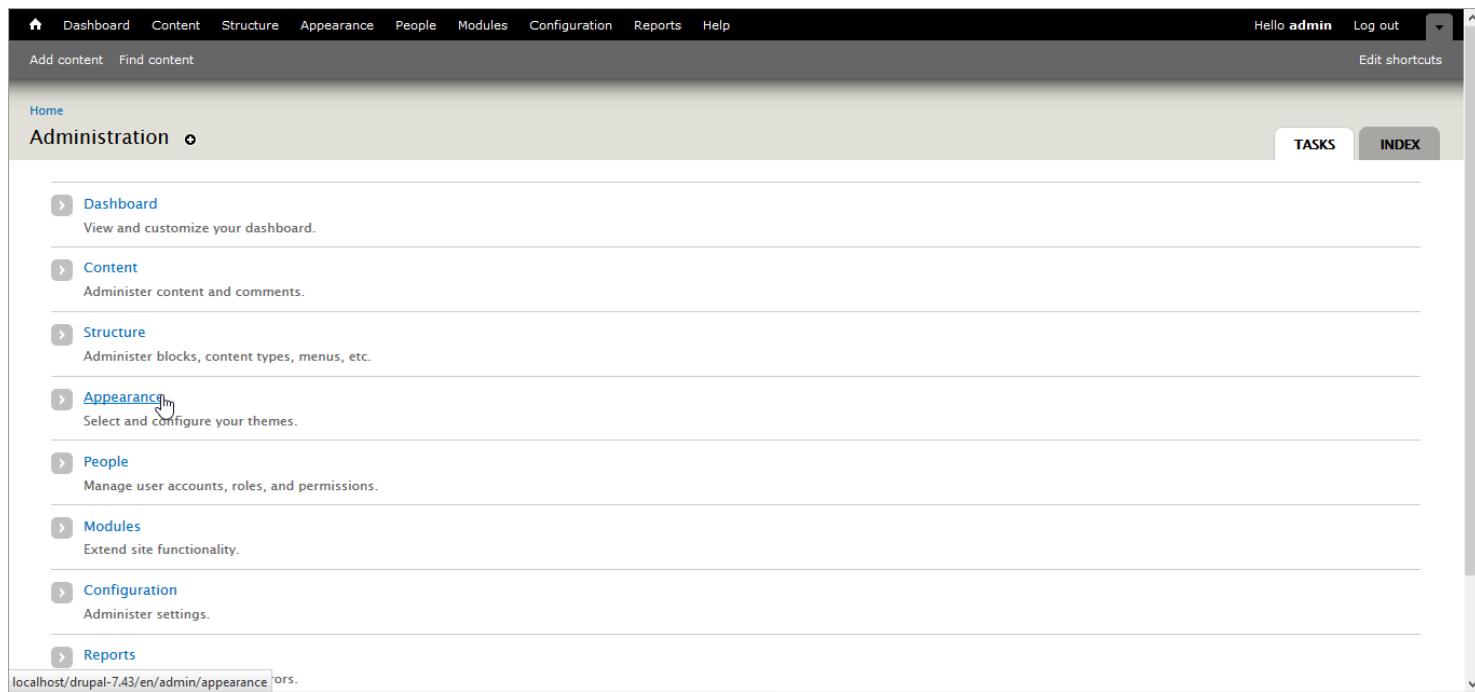

On the right side, there are configuration fields:

- Status: Published (green button)
- Category: Sample Data-Articles (dropdown menu)
- Featured: Yes (button)
- Access: Public (dropdown menu)
- Language: All (dropdown menu)
- Tags: Select some options (text input)
- Version Note: (empty text input)

3.3. Drupal

Follow these steps to upload your theme in **Drupal**:

STEP 1: Log in to your administrator Dashboard in Drupal.

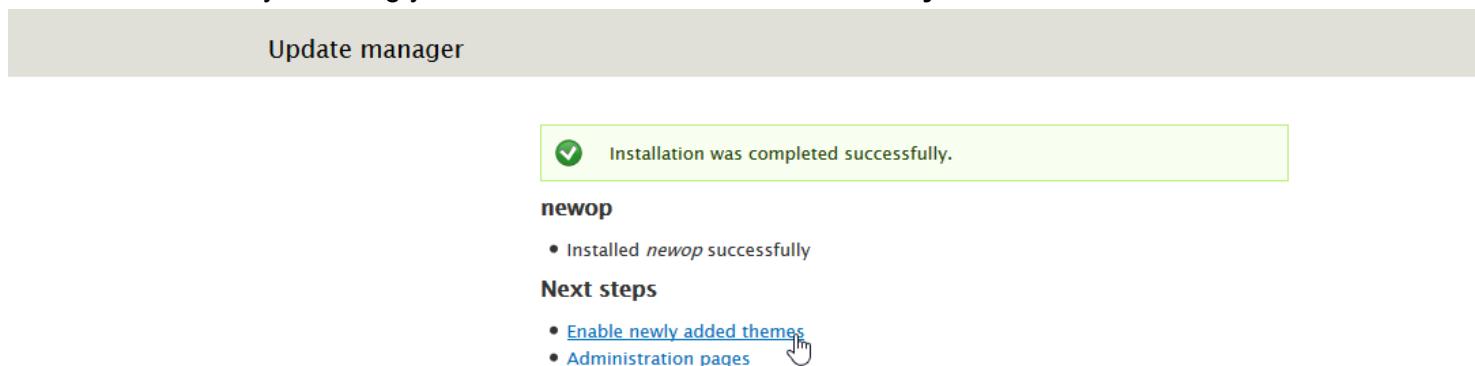

The screenshot shows the Drupal 7.43 administrator dashboard. At the top, there is a navigation bar with links: Home, Dashboard, Content, Structure, Appearance, People, Modules, Configuration, Reports, and Help. On the right side of the top bar, it says "Hello admin" and "Log out". Below the navigation bar, there is a search bar with "Add content" and "Find content" buttons, and a link to "Edit shortcuts". The main content area has a title "Home" and a subtitle "Administration". There are two tabs at the top of this section: "TASKS" (which is selected) and "INDEX". A sidebar on the left lists various administrative tasks with icons: Dashboard, Content, Structure, Appearance, People, Modules, Configuration, and Reports. Each task has a brief description below it. The "Appearance" task is highlighted with a yellow arrow pointing to it. The URL in the browser's address bar is "localhost/drupal-7.43/en/admin/appearance".

STEP 2: From the to menu of dashboard, navigate to **Appearance** and Click **Install new theme**.

STEP 3: As you click Install new theme, you will see a browse window as shown below. Browse your theme and press "**Install Now**" button.

STEP 4: After the successful installation of your theme , a confirmation message will display as following. Now Enable the theme by selecting your theme  from **Enable newly added themes**.

The screenshot shows the "Update manager" page. At the top, there is a green success message box with a checkmark icon and the text "Installation was completed successfully." Below this, there is a section titled "newop" with a bullet point "Installed newop successfully". Underneath, there is a "Next steps" section with two items: "Enable newly added themes" with a hand cursor icon and "Administration pages".

STEP 5: After enabling the theme, you are done and may visit the site to see how it looks on browser.

Theme Settings

Customizing TemplateToaster's theme is so easy, even after installation. You will see an additional **Theme settings** Tab in Settings page. These theme settings give you flexibility to change some elements of your theme. Let us have a look at these theme options:

The screenshot shows the 'Appearance' tab selected in the top navigation bar. Below it, there are sections for 'Add content' and 'Find content'. A note about the favicon is present. The main area is titled 'THEME SETTINGS' and contains a 'Menu style options' tab. This tab includes dropdown menus for 'Slideshowabovecolumn1' through 'Slideshowbelowcolumn1', all set to 'Horizontal'.

1 Menu style options

This tab provides you the options for styling the custom menu. If you select the **Horizontal** then it will give the "main menu" look . But if you opt **Vertical** then your menu will have the sidebar menu style.

The screenshot shows the 'SELECT MENU STYLE' section. It has dropdown menus for 'Slideshowabovecolumn1' (set to 'Horizontal'), 'Slideshowabovecolumn2' (set to 'Horizontal'), and 'Slideshowabovecolumn3' (set to 'Horizontal').

2 Style options

This tab is used for styling blocks in menu positions. If you opt for TTDefault then it will give a Sidebar widget look to the block and if No Style, then no styling will be there at all.

SELECT POSITION STYLE

3.4. Blogger

Follow these steps to upload your theme in **Blogger**:

STEP 1: While exporting the theme in TemplateToaster You have to add google account. If you do not have any google account then add new account and click ok.

STEP 2: Log in to your administrator dashboard.

HTTPS support coming to Blogspot

posted by Google Blogs at Blogger Buzz

This morning we posted an update about Blogspot to Google's Security Blog <https://googleonlinesecurity.blogspot.com/2015/09/https-support-coming-to-blogspot.html>. Since 2008, we've worked to encrypt the connections between our users and Google servers. Over the years we've announced that Search, Gmail, Drive, and many other products have encrypted connections by default, and most recently, we'...

Blogger Guide

Customise your blog's template

Share your blog to Google+

Send feedback

STEP 3: Navigate to **Template --> Backup/Restore** from the left sidebar menu, to add the theme. After clicking Backup/Restore you will get a dialog box as shown below.

The screenshot shows the 'Template > Backup / Restore' dialog box. At the top, it says 'Before editing your template, you may want to save a copy of it.' Below this is a 'Download full template' button. The next section is titled 'Upload a template from a file on your hard drive.' It includes a 'Browse...' button which has 'main.xml' selected, and an 'Upload' button. In the bottom right corner of the dialog box is a 'Close' button.

STEP 4: Browse and add the .xml file of your template.

This screenshot is identical to the one above, showing the 'Template > Backup / Restore' dialog box. The 'main.xml' file is selected in the 'Browse...' field, and the 'Upload' button is highlighted with a cursor. The rest of the interface, including the sidebar with blog management links and the preview area, remains the same.

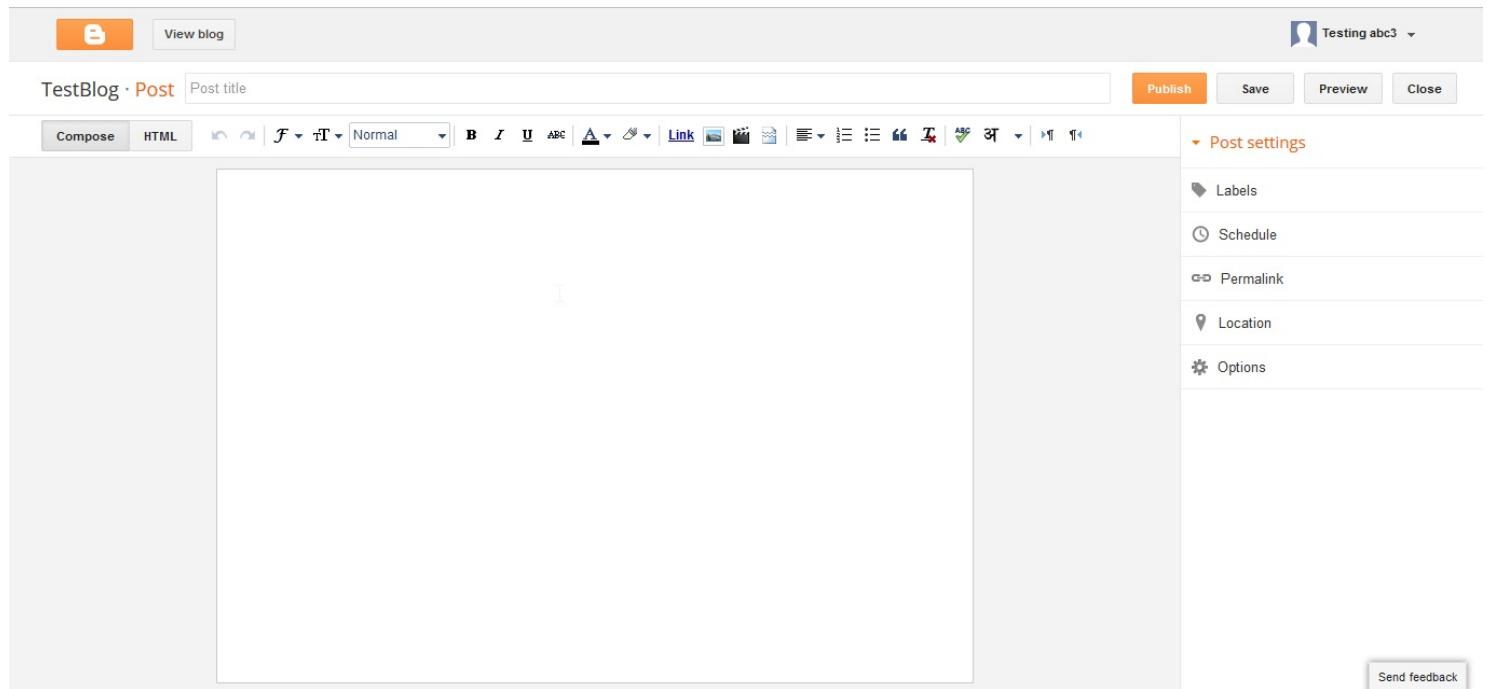

STEP 5: Your theme is uploaded now. You can view blog to see your uploaded template.

3.4.1. Page Options

You can add **Pages** in Blogger from the page option on the left side of the screen. Select **New Page** for adding new pages.

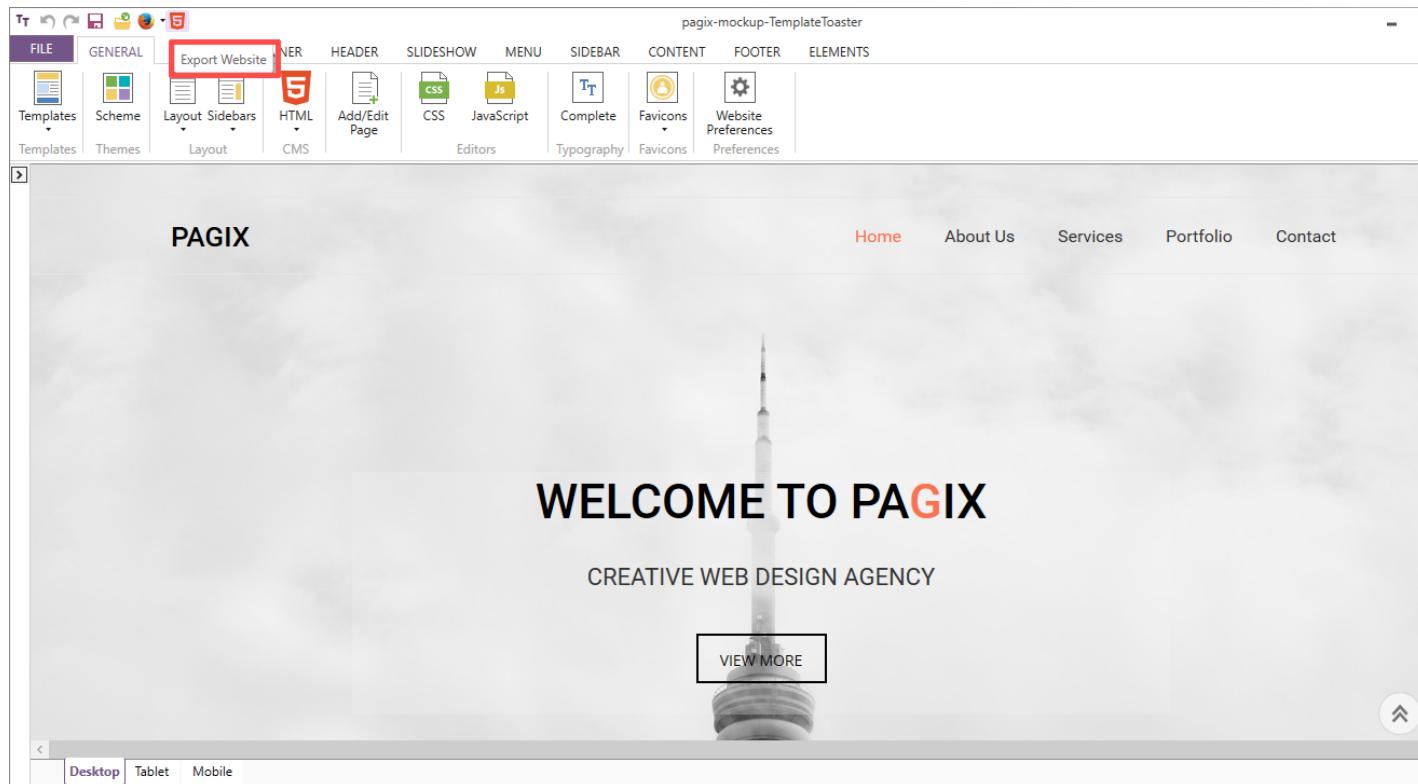

3.4.2. Post Options

You can add **Posts** in Blogger from the post option on the left sidebar menu of the dashboard.

3.5. HTML

STEP 1: Export your website from File >> Export >> Html Website.

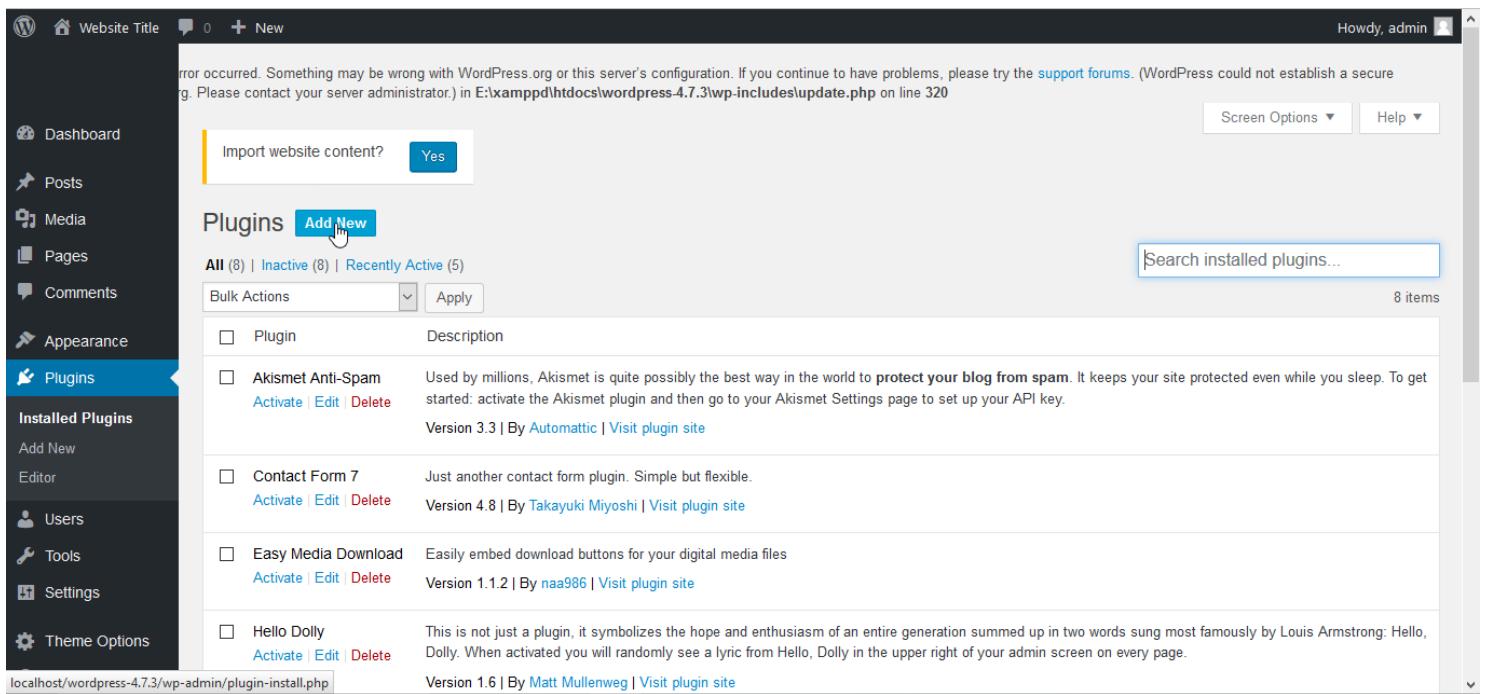

STEP 2: Now just extract the zip file that you just exported and put this file into the local server .

STEP 3: You are ready to see the website on the browser.

3.6. WooCommerce

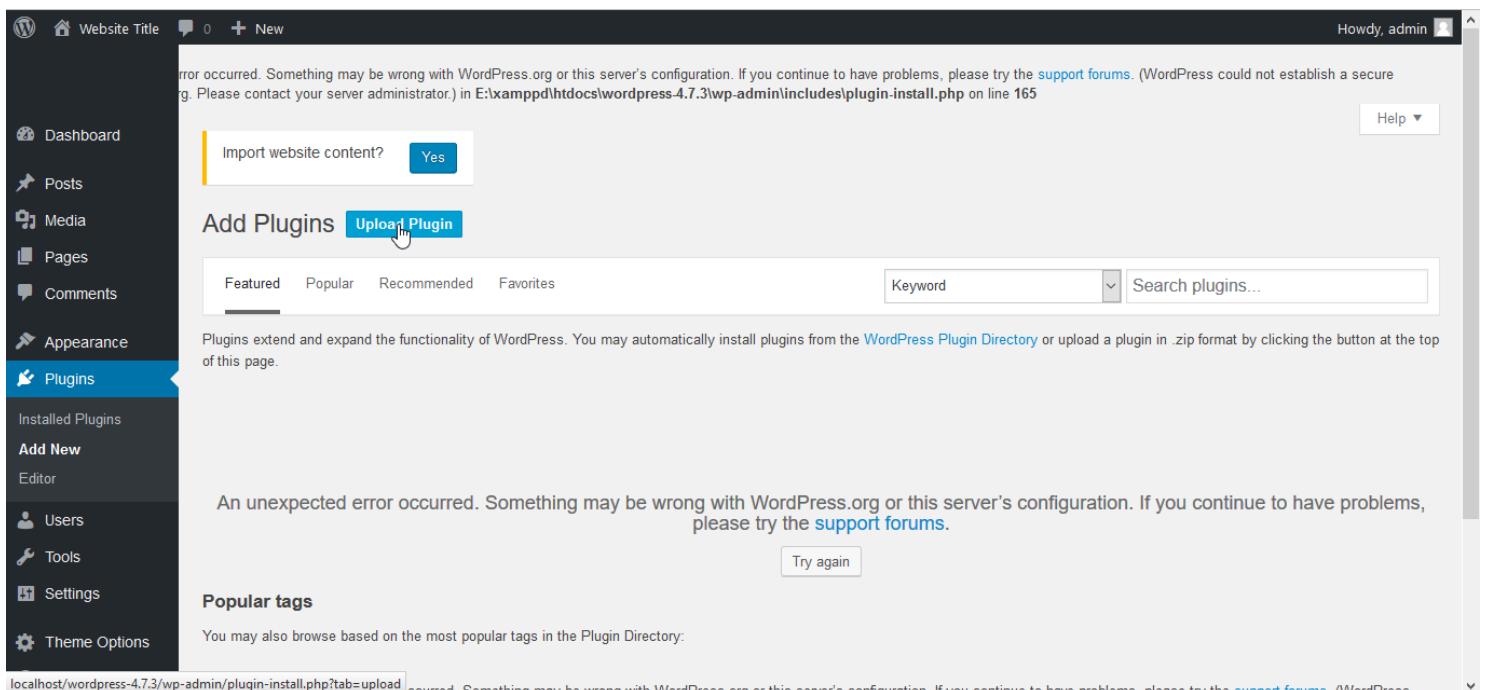

For uploading your theme in **WooCommerce**, firstly you need to Install the WooCommerce on your WordPress platform. This can be done by using the WooCommerce **plugin**. So here are the steps to install a WooCommerce Plugin :

STEP 1: Log into your WordPress dashboard and from left sidebar menu, select **Plugins** to **Add New** plugin.

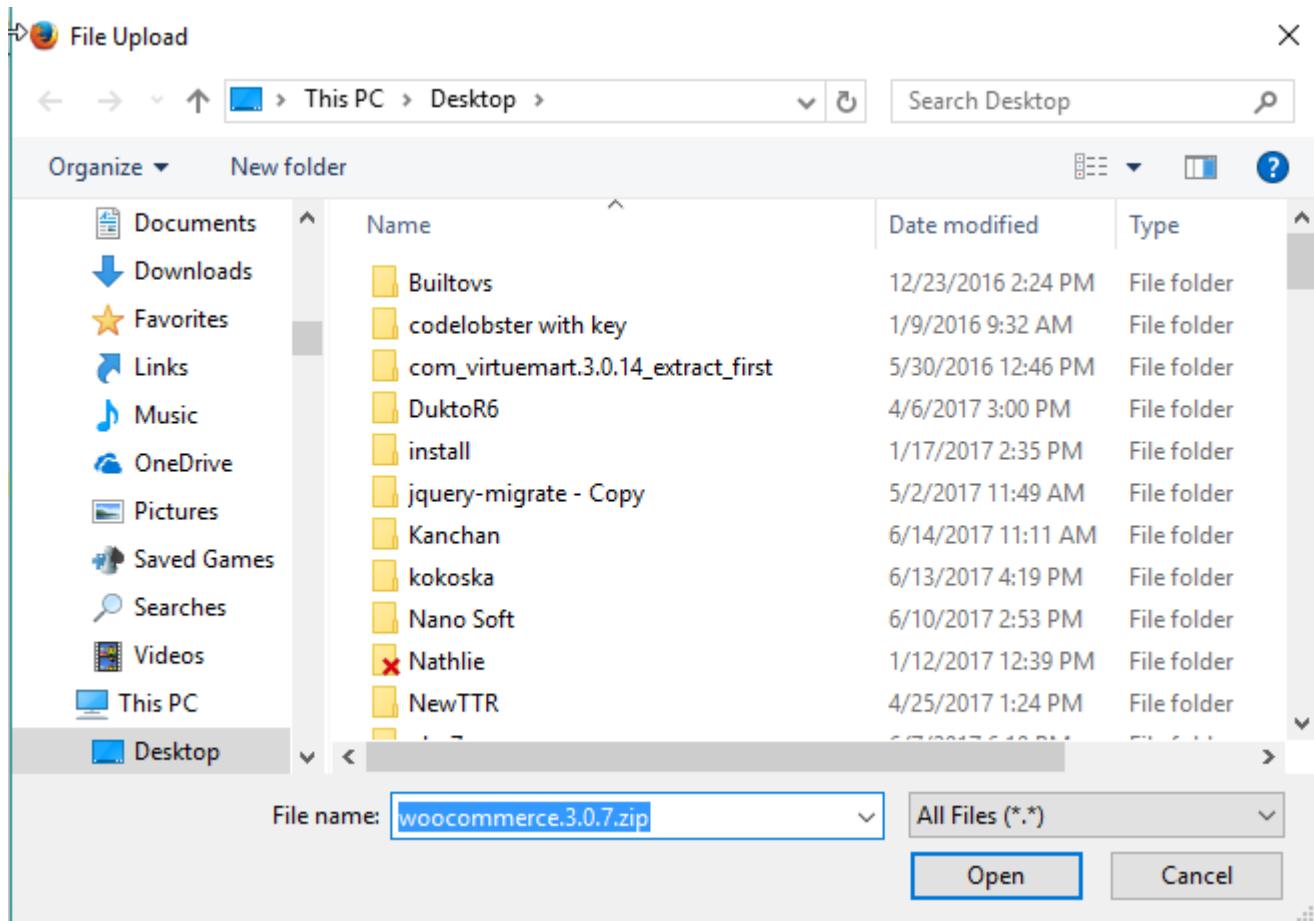

The screenshot shows the WordPress admin dashboard with the 'Plugins' menu item selected. On the right, the 'Add New' button is highlighted with a mouse cursor. The page displays a list of installed plugins, including Akismet Anti-Spam, Contact Form 7, Easy Media Download, and Hello Dolly. A search bar at the top right is visible, along with 'Screen Options' and 'Help' buttons.

STEP 2: This will open a new window of **Add Plugins**. Now, click **Upload Plugin** button.

The screenshot shows the 'Add Plugins' page. The 'Upload Plugin' button is highlighted with a mouse cursor. Below it, there are tabs for 'Featured', 'Popular', 'Recommended', and 'Favorites'. A search bar with 'Keyword' and 'Search plugins...' is also present. A message at the bottom states: 'An unexpected error occurred. Something may be wrong with WordPress.org or this server's configuration. If you continue to have problems, please try the support forums.' A 'Try again' button is shown below the message. A section titled 'Popular tags' is visible at the bottom.

STEP 3: As you click Upload Plugin, you will see next screen to browse the **woocommerce.3.7.0.zip** plugin file. Just select the file and click **Open** to start the installing.

STEP 4: Once your plugin is installed, it will display a Page Setup screen as shown below:

Your store needs a few essential [pages](#). The following will be created automatically (if they do not already exist):

Shop	The shop page will display your products.
Cart	The cart page will be where the customers go to view their cart and begin checkout.
Checkout	The checkout page will be where the customers go to pay for their items.
My account	Registered customers will be able to manage their account details and view past orders on this page.

Once created, these pages can be managed from your admin dashboard on the [Pages screen](#). You can control which pages are shown on your website via [Appearance > Menus](#).

[Skip this step](#) [Continue](#)

STEP 3: Just press **Continue** to make other settings regarding Store locale setup, Shipping & tax and Payments.

Page setup Store locale Shipping & tax Payments Ready!

STEP 6: Finally, you can go for [Uploading The Theme/Template](#) of your WooCommerce compatible website.

3.6.1. Uploading the Theme/Template

Follow these steps to upload your theme in **WooCommerce**.

STEP 1: Log in to your administrator dashboard.

The screenshot shows the WordPress administrator dashboard. On the left, there's a sidebar with links for Home, Updates, Posts, Media, Pages, Comments, Appearance, Plugins, Users, Tools, and Settings. The main area has a "Welcome to WordPress!" message, a "Get Started" section with a "Customize Your Site" button, and a "Next Steps" section with links to edit the front page, add pages, add a blog post, and view the site. Below these are sections for "At a Glance" (1 Post, 7 Pages, 1 Comment) and "Quick Draft" (Title, What's on your mind?, Save Draft). A message at the bottom says "WordPress 4.3.1 running Twenty Fifteen theme."

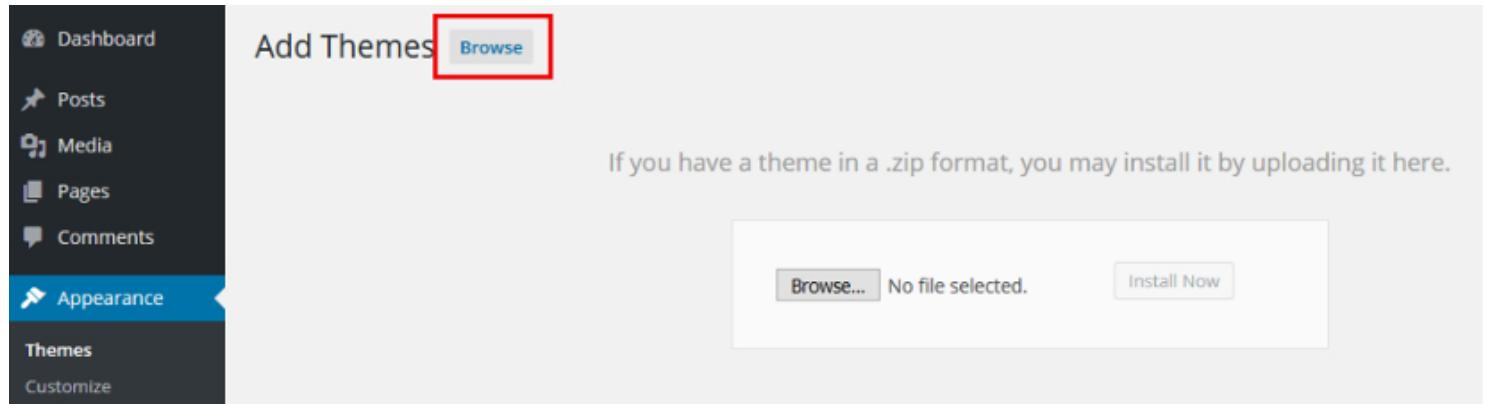

STEP 2: From the left sidebar of dashboard, navigate to **Appearance --> Themes**. Now, click Add New.

The screenshot shows the "Themes" screen in the WordPress dashboard. It displays three themes: "Twenty Fifteen" (active), "Twenty Fourteen", and "Twenty Thirteen". The "Add New" button is highlighted with a red box. There's also a search bar labeled "Search installed themes...".

STEP 3: As you click Add New button, you will see next screen as shown below. Click "**Upload Theme**" from here.

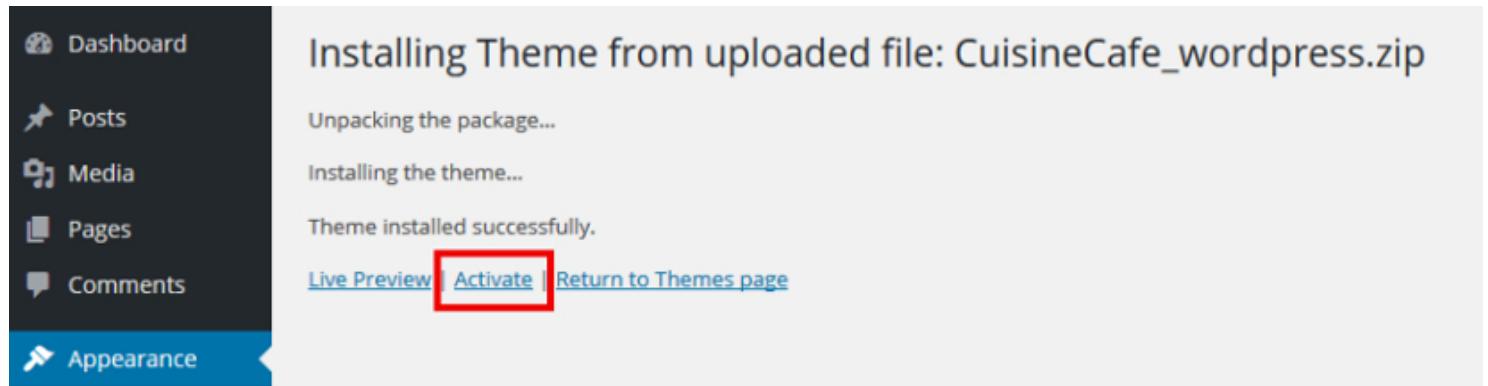

The screenshot shows the "Add Themes" screen in the WordPress dashboard. It has a search bar "Search themes...", filter options for "Featured", "Popular", "Latest", and "Feature Filter", and a large "Upload Theme" button which is highlighted with a red box.

STEP 4: Browse your theme and press "Install Now" button .

The screenshot shows the WordPress dashboard with the 'Appearance' menu item selected. On the right, under 'Themes', there is a section titled 'Add Themes'. A red box highlights the 'Browse' button, which is part of a form for uploading a theme file in .zip format. Below the form, there are 'Browse...' and 'Install Now' buttons, and a message stating 'No file selected.'

STEP 3: After successful installation, you can **Activate** the theme on your website.

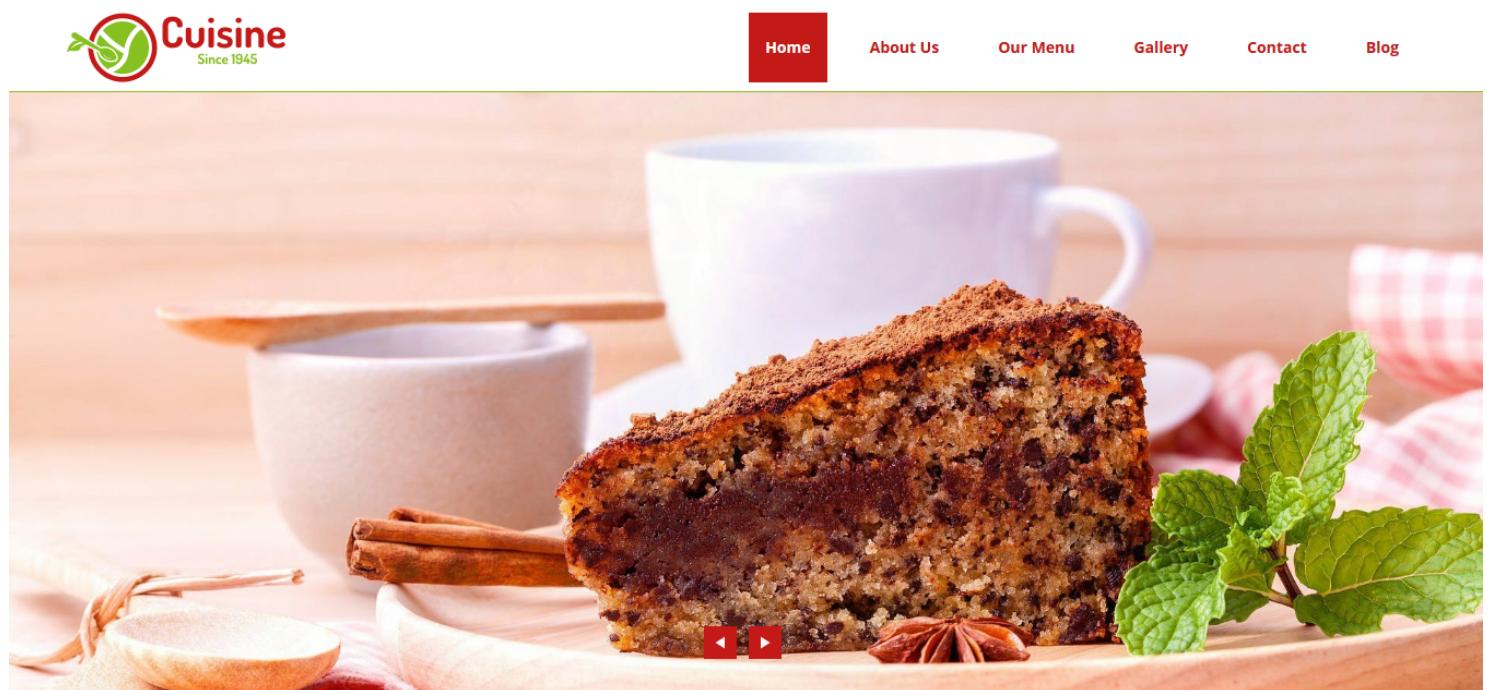

The screenshot shows the WordPress dashboard with the 'Appearance' menu item selected. On the right, it displays the progress of installing a theme from an uploaded file named 'CuisineCafe_wordpress.zip'. The steps shown are 'Unpacking the package...', 'Installing the theme...', and 'Theme installed successfully.' Below this, there are three links: 'Live Preview', 'Activate' (which is highlighted with a red box), and 'Return to Themes page'.

STEP 4: After activating the theme, you may visit the site to see how it looks on browser.

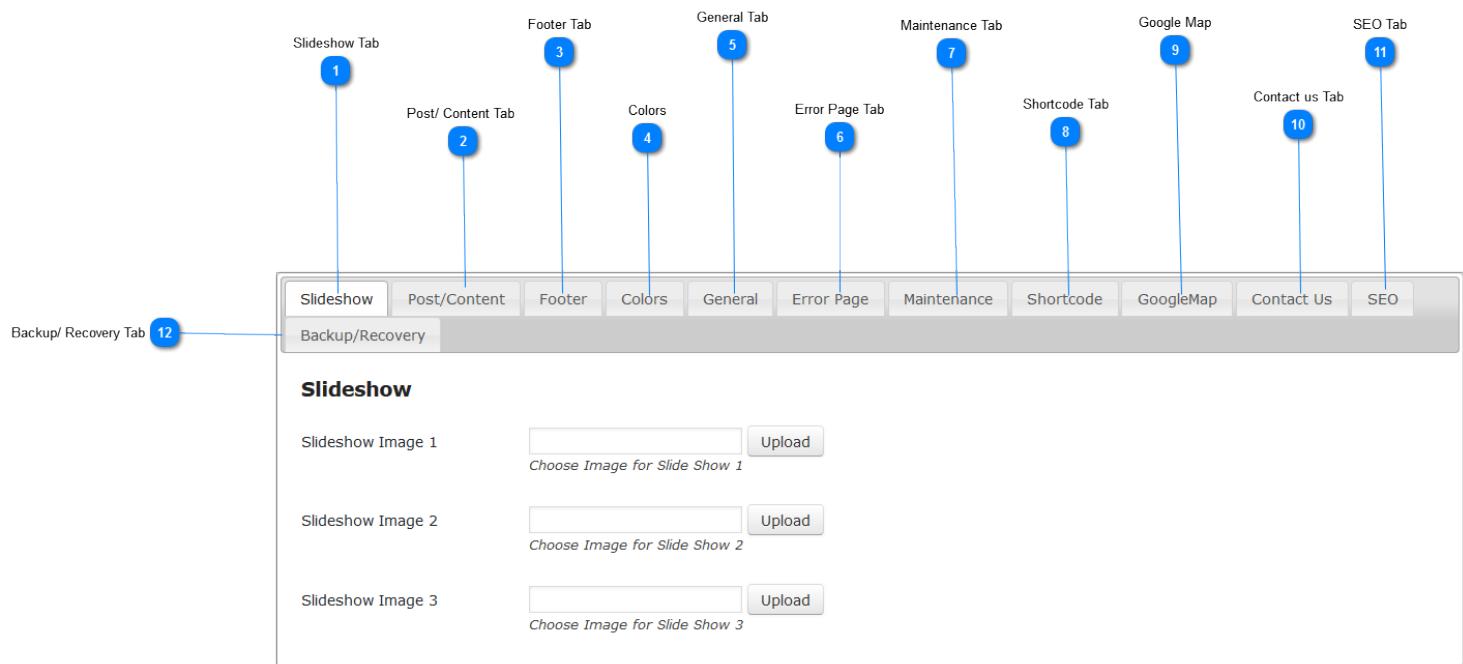

3.6.1.1. Front Page after Installation

The Website Front Page after activation of the theme is:

3.6.1.2. Theme Options

Customizing TemplateToaster's theme is so easy, even after installation. You will see an additional tool on the sidebar of your admin dashboard, under the name "Theme Options". These theme options give you flexibility to change some elements of your theme. Let us have a look at these theme options.

1 Slideshow Tab

Slideshow

This tab shows you the options of Slideshow of your theme. It allows you to replace the images used in the slideshow by uploading new ones, even after installing the theme.

2 Post/ Content Tab

Post/Content

The screenshot shows the WordPress admin interface for the UFinance theme. The left sidebar has a dark background with white icons and text. The main area is titled "Theme Options For UFinance". A horizontal menu bar at the top includes "Header", "Slideshow", "Post/Content" (which is highlighted in blue), "Footer", "Colors", "General", "Error Page", "Maintenance", "Shortcode", "GoogleMap", and "Contact Us". Below this, there are two tabs: "SEO" and "Backup/Recovery". The "Post/Content" tab contains several configuration options:

- Number of Featured Posts:** Set to 1. A note below says, "How many posts would you like to be displayed as featured on the front page?"
- Number of Columns:** Set to 4. A note below says, "How many columns would you like to display the posts after featured posts?"
- Show Breadcrumbs On Page:** A switch button is set to "OFF".
- Show Breadcrumbs On Post:** A switch button is set to "OFF".
- Breadcrumbs Prefix:** An empty input field with the placeholder "Choose breadcrumbs text".
- Breadcrumbs Separator:** An empty input field with the placeholder "Set your Breadcrumbs separator".

At the bottom of the form is a "Save Options" button.

This tab shows you the options for customizing the post settings.

Number of Featured Posts -

You can specify how many featured posts to display on the home page of the site.

Number of Columns -

You can specify in how many columns to show the featured posts.

Show Breadcrumb on Page -

Breadcrumbs is basically the type of text-based web site navigation that breaks the site into links of categories and sub-categories allowing major categories of information to be linked in a sequential order. Breadcrumb navigation is displayed to the user, so that they can easily navigate between the pages.

Select the On option, if you wish to display the Breadcrumbs, otherwise keep it Off to hide the Breadcrumbs.

Show Breadcrumb on Post -

You can show/hide the breadcrumb on the post.

Breadcrumb Prefix -

Set a breadcrumb prefix using this option.

Breadcrumb Separator -

You can set desired separator on the breadcrumb using this option.

STEP 2 : Login to the backend of Magento and go to **system -> design**.

The screenshot shows the Magento Admin Panel interface. At the top, there's a navigation bar with links for Dashboard, Sales, Catalog, Customers, Promotions, Newsletter, CMS, Reports, and System. The 'System' link is highlighted. On the left, there's a 'Dashboard' sidebar with sections for Lifetime Sales (₹0.00), Average Orders (₹0.00), Last 5 Orders (a table with 5 rows), and Last 5 Search Terms (a table with 5 rows). The main content area has tabs for Orders and Amounts. A vertical sidebar on the right lists system management options: My Account, Notifications, Tools, Web Services, Design (which is highlighted with a red box), Import/Export, Manage Currency, Transactional Emails, Custom Variables, Permissions, Magento Connect, Cache Management, Index Management, Manage Stores, Order Statuses, and Configuration. A message at the bottom of this sidebar says 'No Data Found'. At the very bottom of the page, there are buttons for Revenue, Tax, Shipping, and Quantity.

STEP 3 : In Design select **Add Design Change** from extreme right of the screen.

The screenshot shows the Magento Admin Panel with the 'System' tab selected. Under the 'Design' section, there is a search bar and filter options. A red box highlights the '+ Add Design Change' button in the top right corner of the page area.

STEP 4 : In Add Design Change option, select the **Custom Design** dropdown and select your theme.

The screenshot shows the 'New Design Change' form. The 'General' tab is selected. In the 'General Settings' section, the 'Custom Design' dropdown is open, showing a list of themes. The 'base' theme is selected. Other options include 'default', 'blank', 'iphone', 'ipad', 'ipad2', 'ipad3', 'ipad4', 'ipad5', 'ipad6', 'ipad7', 'ipad8', 'ipad9', 'rwd', and 'default'. A red box highlights the 'Custom Design' dropdown.

(Note: providing values to **Date From** and **Date To** is not mandatory. These two options can be utilized to provide a time period for which the Custom Design that you selected will remain active and visible on your website.)

STEP 5 : Select the **Save** button after filling in the required fields and you are ready to use the theme.

3.8. OpenCart

Follow these steps to upload your theme/template in **OpenCart**:

STEP 1: Export your theme as a zip file with a File name at any desired location.

STEP 2: Log in to your administrator dashboard.

The screenshot shows the OpenCart 2.3.0.2 administrator dashboard. At the top, there's a navigation bar with icons for Home, Dashboard, Catalog, Extensions, Design, Sales, Customers, Marketing, System, Reports, and a Logout link. A red warning message in a box says: "Warning: Install folder still exists and should be deleted for security reasons!". Below the header, the main dashboard area has several sections:

- Dashboard:** Shows TOTAL ORDERS (3), TOTAL SALES (297), TOTAL CUSTOMERS (2), and PEOPLE ONLINE (0). Each metric has a "View more..." link.
- World Map:** A world map where the United States is highlighted in blue.
- Sales Analytics:** A bar chart titled "Sales Analytics" showing Order and Customer counts over a 30-day period. The chart shows one order on day 02.
- Recent Activity:** A section showing "No results!".
- Latest Orders:** A table listing the latest orders. The data is as follows:

Order ID	Customer	Status	Date Added	Total	Action
5	admin admin	Pending	02/06/2017	\$106.00	
2	admin3 admin	Pending	29/05/2017	\$106.00	
1	admin3 admin	Pending	26/05/2017	\$85.00	

At the bottom of the dashboard, there's a footer with the text: "OpenCart © 2009-2017 All Rights Reserved. Version 2.3.0.2".

STEP 3: From the left sidebar of dashboard, navigate to **Extensions --> Extension Installer**. Now, click Upload.

Extension Installer [Home](#) / [Extension Installer](#)

Upload your extensions

* Upload File ? [Upload](#) [Clear](#)

Progress 0%

Files that will be overwritten

[Continue](#)

STEP 4: Browse your theme and press "**Continue**" after selecting the theme. A success confirmation message will be displayed after the successful installation of the theme.

STEP 5: From Left Sidebar menu, Navigate to **Extensions--> Extensions--> Extension Type**. Here in **Choose the extension type**, select **Themes(1)**.

Extensions [Home](#) / [Extensions](#)

Extension List

Choose the extension type

Save

STEP 8: Now in Extensions navigate to **Extensions --> Modifications**. After refreshing your screen, you can see your **TemplateToaster** Theme here.

STEP 9: You are done and may visit the site to see how it looks on browser just by clicking home.

3.9. Prestashop

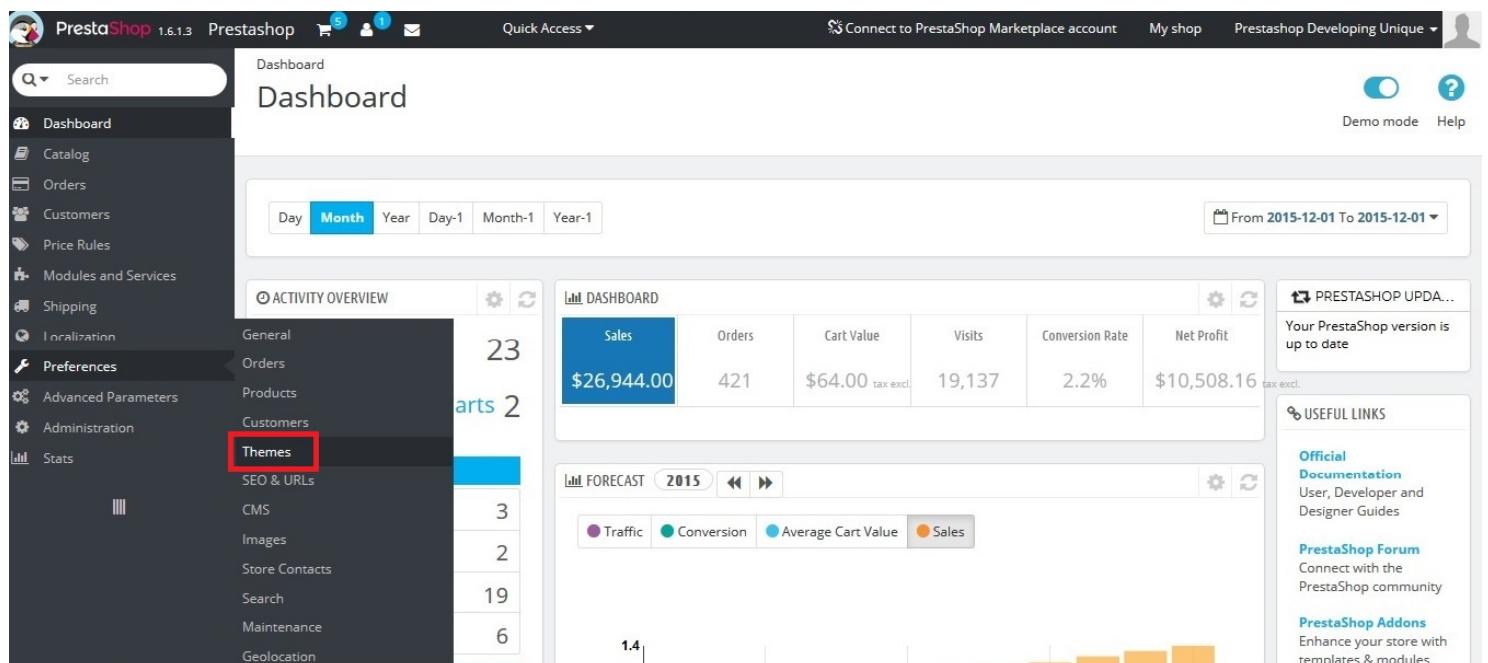

Follow these steps to upload your theme in **Prestashop**:

STEP 1: Copy the 'Theme' Folder from the Exported folder and Paste it at Prestashop (Root) -> Themes -> Paste Your theme here. Then Log into your dashboard.

default-bootstrap	12/30/2016 12:28 ...	File folder
.htaccess	12/15/2016 3:53 PM	HTACCESS File
debug.tpl	12/15/2016 3:53 PM	TPL File
index.php	12/15/2016 3:53 PM	Codelobster Docu...
javascript.tpl	12/15/2016 3:53 PM	TPL File
live_edit.tpl	12/15/2016 3:53 PM	TPL File

STEP 2: Then from Backoffice Go to **Preference -> Themes -> Add new theme -> Create New theme**.

a) Preference -> Themes

The screenshot shows the Prestashop 1.6.1.3 backoffice dashboard. On the left, there is a sidebar with various menu items: Dashboard, Catalog, Orders, Customers, Price Rules, Modules and Services, Shipping, Localization, Preferences (which is currently selected and highlighted in blue), Advanced Parameters, Administration, Stats, SEO & URLs, CMS, Images, Store Contacts, Search, Maintenance, and Geolocation. The 'Themes' menu item is located under the 'Modules and Services' section and is also highlighted with a red box. The main dashboard area displays activity overview, sales statistics, and a forecast chart.

b) Preference -> Themes -> Add new theme

The screenshot shows the 'Themes > Theme' section of the PrestaShop 1.6.1.11 admin interface. On the left sidebar, 'Preferences' is selected. At the top right, there are links for 'Connect to PrestaShop Marketplace account', 'My shop', 'Admin Admin', and a user profile icon. A red box highlights the 'Add new theme' button, which has a blue plus sign icon. Below it are buttons for 'Export theme' and 'Help'. The main content area displays the 'default-bootstrap version 1.0' theme, designed by PrestaShop. It includes a preview image of the theme, customization options for sliders, banners, colors, and advanced settings, and tabs for Logo, Invoice & Email Logos, Icons, and Mobile. A large, stylized 'YourLoan' logo is displayed prominently.

c) Preference -> Themes -> Add new theme -> Create New theme

The screenshot shows the 'Themes > Import theme' section of the PrestaShop 1.6.1.3 admin interface. The left sidebar shows 'Preferences' is selected. The top right features links for 'Connect to PrestaShop Marketplace account', 'My shop', 'Prestashop Developing Unique', and a user profile icon. A red box highlights the '+ Create a new theme' button, which is located under the 'CREATE A NEW THEME' section. This section also includes a note about duplicating an existing theme or creating one from scratch, and a 'Save' button. Other sections include 'IMPORT FROM FTP' (with a dropdown for selecting an archive) and a general import area.

STEP 3: Fill the required fields, Theme and Directory Name should be the same as the name of the exported theme. Do select the preview image from the exported theme. Select the Default Left, Right Sidebars if you want them in the Theme.

Themes > Add new > Theme

THEME

- * Name of the theme: [Input field]

STEP 5: Copy and merge the Override folder given at root folder.

STEP 6: Move your all javascripts to End, to do this Go to Prestashop Backoffice -> Advanced Parameters -> Performance -> CCC (Combine, Compress and Cache) -> Move JavaScript to the end -> Yes.

PrestaShop 1.6.1.11 qwerty Quick Access ▾ Connect to PrestaShop Marketplace account My shop Admin Admin ▾

Advanced Parameters / Performance

Performance

CCC (COMBINE, COMPRESS AND CACHE)

CCC allows you to reduce the loading time of your page. With these settings you will gain performance without even touching the code of your theme. Make sure, however, that your theme is compatible with PrestaShop 1.4+. Otherwise, CCC will cause problems.

Smart cache for CSS

Smart cache for JavaScript

Minify HTML

Compress inline JavaScript in HTML

Move JavaScript to the end

Apache optimization

MEDIA CONTENT WILL ONLY WORK WITH CCC!

3.9.1. Theme Options

The screenshot shows the PrestaShop 1.6.1.3 theme options interface. At the top, there's a navigation bar with icons for search, dashboard, catalog, orders, customers, price rules, modules and services, shipping, localization, preferences, advanced parameters, administration, and stats. The 'Preferences' icon is highlighted.

The main area displays the 'Themes > Theme' section. It shows the 'default-bootstrap' theme version 1.0, designed by PrestaShop. Below it, there are sections for 'Customize your theme' and 'Configure your theme'. A preview of the theme is shown on the left, and a 'Theme Configurator' button is on the right.

A diagram on the right illustrates the customization tabs:

- 1 LOGO**: Points to the 'Header logo' input field.
- 2 INVOICE AND EMAIL LOGOS**: Points to the 'Invoice & Email Logos' tab.
- 3 ICONS**: Points to the 'Icons' tab.
- 4 MOBILE**: Points to the 'Mobile' tab.
- 5 HEADER**: Points to the 'Header' tab.
- 6 COLORS**: Points to the 'Colors' tab.
- 7 META TAGS**: Points to the 'Meta Tags' tab.

Below the customization tabs, there's a 'Visit the theme catalog' button and a 'Save' button.

The bottom section shows a preview of the 'Unix' theme for the 'SOFSTER' shop, followed by a 'LIVE FROM PRESTASHOP ADDONS!' section.

3.9.2. Product Options

You can add **New Products** in Prestashop from the Catalog option on the left sidebar of the screen. To add new product go to **Catalog -> Product**.

a) Catalog -> Product.

The screenshot shows the Prestashop Admin Panel with the following details:

- Left Sidebar:** Contains links for Dashboard, Catalog (highlighted), Orders, Customers, Price Rules, Modules and Services, Shipping, Localization, Preferences, Advanced Parameters, Administration, and Stats.
- Top Bar:** Includes a search bar, quick access icons, and links to Connect to Prestashop Marketplace account, My shop, and Prestashop Developing Unique.
- Page Title:** Catalog / Products
- Section Header:** Products
- Statistics:** Out of stock items (13.33%), Average Gross Margin % (70%), Purchased references (30 DAYS), and Disabled Products (0%).
- Filter:** Filter by category (checkbox).
- Table Headers:** ID, Image, Name, Reference, Category, Base price, Final price, Quantity, Status.
- Table Data:** A list of 7 products:
 - ID 1: Faded Short Sleeves T-shirt (demo_1), Category: T-shirts, Price: \$16.51
 - ID 2: Blouse (demo_2), Category: Blouses, Price: \$27.00
 - ID 3: Printed Dress (demo_3), Category: Casual Dresses, Price: \$26.00
 - ID 4: Printed Dress (demo_4), Category: Evening Dresses, Price: \$50.99
 - ID 5: Printed Summer Dress (demo_5), Category: Summer Dresses, Price: \$30.51
 - ID 6: Printed Summer Dress (demo_6), Category: Summer Dresses, Price: \$30.50
 - ID 7: Printed Chiffon Dress (demo_7), Category: Summer Dresses, Price: \$20.50
- Actions:** Bulk actions and individual edit buttons for each product row.

b) Now navigate to Catalog -> Product -> **Add new product**.

3.9.3. Attribute Options

You can add **New Attributes** in Prestashop from the Catalog option on the left sidebar of the screen. To add new attribute go to Catalog -> Attribute.

The screenshot shows the Prestashop Admin Panel with the following details:

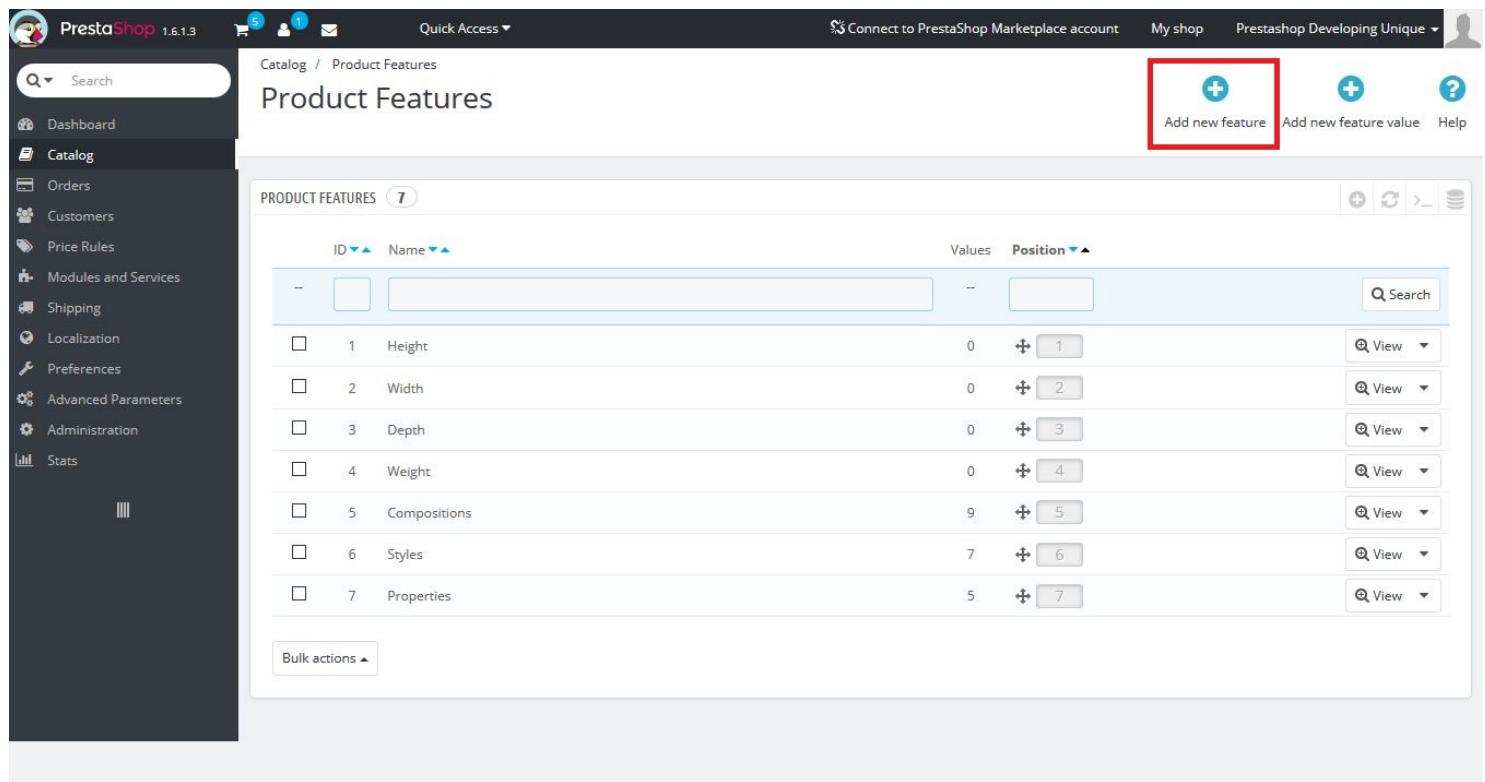

- Left Sidebar:** Contains links for Dashboard, Catalog (highlighted), Orders, Customers, Price Rules, Modules and Services, Shipping, Localization, Preferences, Advanced Parameters, Administration, and Stats.
- Top Bar:** Shows the Prestashop logo (1.6.1.3), Quick Access, Connect to Marketplace account, My shop, and Prestashop Developing Unique.
- Page Title:** Catalog / Product Attributes
- Main Content:** The "Product Attributes" section. It lists three attributes:

ID	Name	Values count	Position	Action
1	Size	4	1	View
2	Shoes Size	6	2	View
3	Color	14	3	View

A "Bulk actions" button is also present.
- Top Right Buttons:** Add new attribute (highlighted with a red box), Add new value, and Help.
- Bottom:** Footer with links for Contact, Bug Tracker, Forum, Addons, and Training, along with social media icons for Twitter, Facebook, Google+, and YouTube.

3.9.4. Feature Options

You can add **New Features** in Prestashop from the Catalog option on the left sidebar of the screen. To add new feature go to **Catalog -> Feature**.

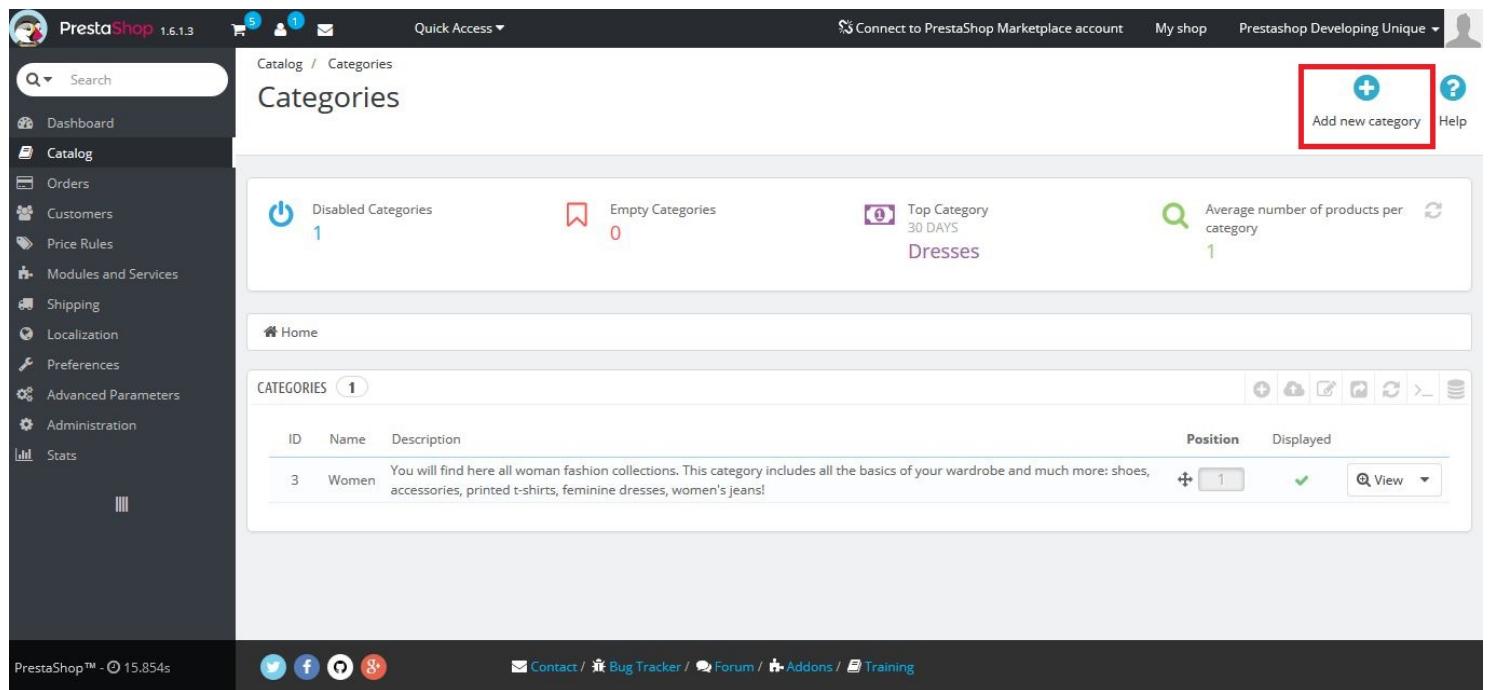

The screenshot shows the Prestashop Admin Panel with the following details:

- Left Sidebar:** Contains links for Dashboard, Catalog (highlighted in blue), Orders, Customers, Price Rules, Modules and Services, Shipping, Localization, Preferences, Advanced Parameters, Administration, and Stats.
- Top Bar:** Includes the Prestashop logo (1.6.1.3), a search bar, Quick Access, a Marketplace account link, My shop, and Prestashop Developing Unique.
- Page Header:** Shows Catalog / Product Features.
- Main Content:** The Product Features page lists seven features with their IDs, names, values, and positions. The features are: Height (ID 1, Value 0, Position 1), Width (ID 2, Value 0, Position 2), Depth (ID 3, Value 0, Position 3), Weight (ID 4, Value 0, Position 4), Compositions (ID 5, Value 9, Position 5), Styles (ID 6, Value 7, Position 6), and Properties (ID 7, Value 5, Position 7). Each row has a 'View' button.
- Buttons:** At the top right, there are three buttons: 'Add new feature' (highlighted with a red box), 'Add new feature value', and 'Help'.
- Table Headers:** The table has headers for ID, Name, Values, and Position.
- Actions:** A 'Bulk actions' button is located at the bottom left of the table area.

3.9.5. Category Options

You can add **New Categories** in Prestashop from the Catalog option on the left sidebar of the screen. To add new category go to **Catalog -> Category**.

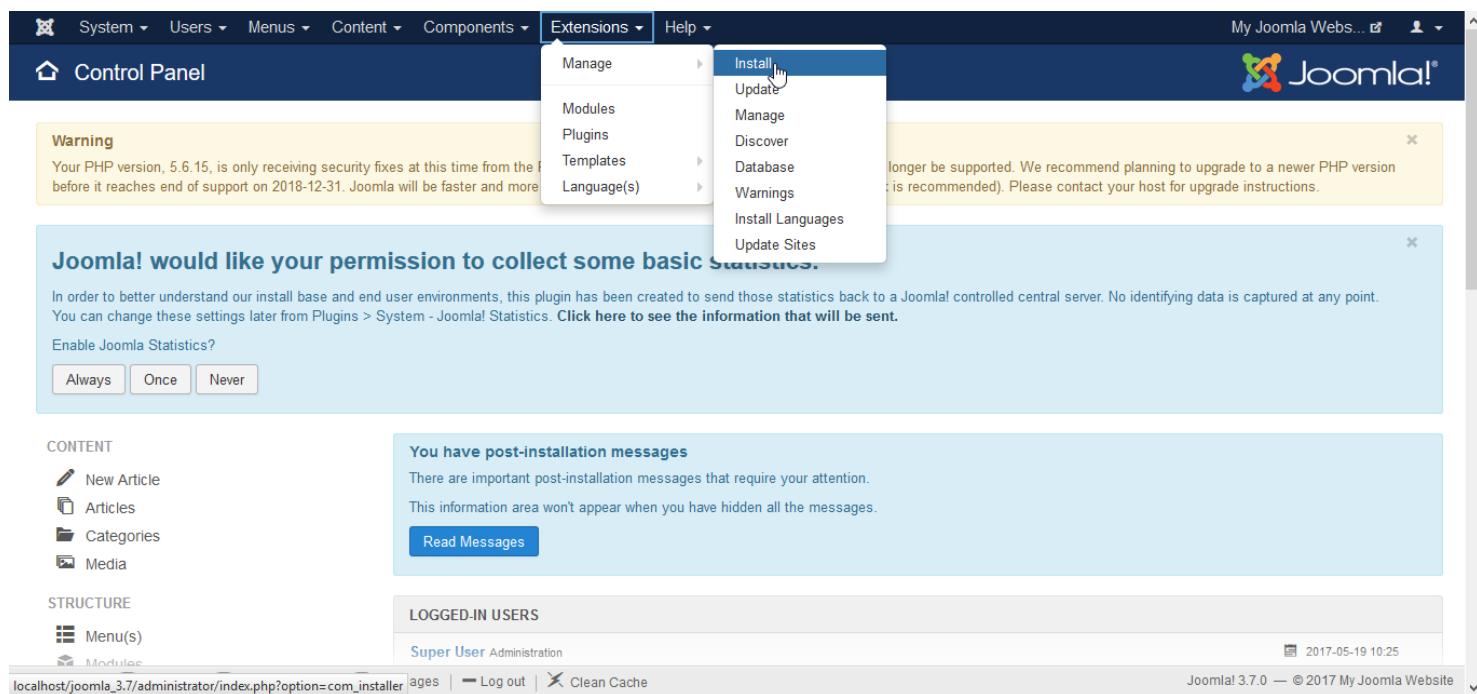

The screenshot shows the Prestashop 1.6.1.3 admin interface. The left sidebar includes links for Dashboard, Catalog (which is selected), Orders, Customers, Price Rules, Modules and Services, Shipping, Localization, Preferences, Advanced Parameters, Administration, and Stats. The main content area is titled 'Categories' and shows a summary of categories: 'Disabled Categories' (1), 'Empty Categories' (0), 'Top Category 30 DAYS' (Dresses), and 'Average number of products per category' (1). Below this is a 'Home' link. The 'CATEGORIES' section lists one item: 'Women' (ID 3). The table columns are ID, Name, Description, Position, and Displayed. The 'Position' column for Women is set to 1, and the 'Displayed' column has a checked checkbox. At the bottom of the page, there are social media icons for Twitter, Facebook, Google+, and YouTube, along with links for Contact, Bug Tracker, Forum, Addons, and Training.

3.10. VirtueMart

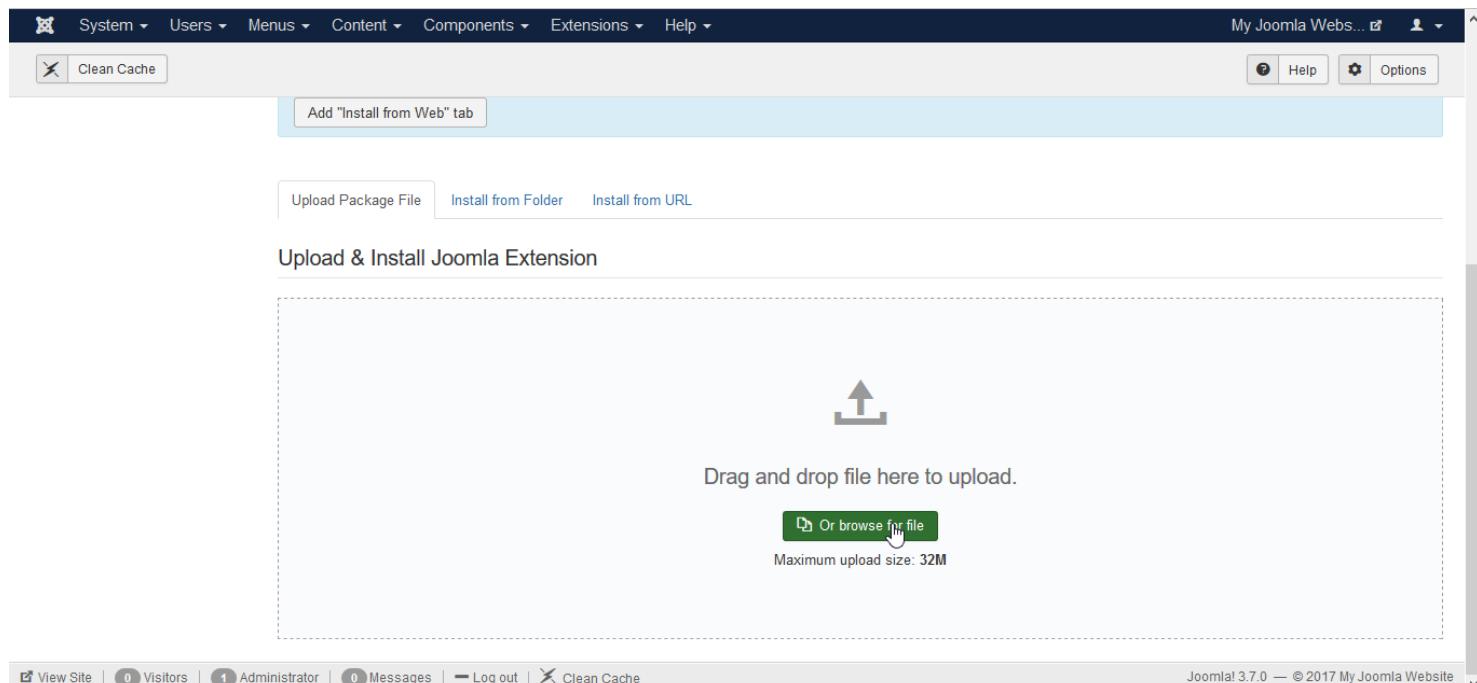

For uploading your theme in **VirtueMart**, firstly you need to Install the VirtueMart on your Joomla platform. This can be done by using the **virtuemart plugin**. So here are the steps to install a VirtueMart Plugin :

STEP 1: Log into your Joomla Control Panel and from top menu navigate to **Extensions -->Manage --> Install**.

The screenshot shows the Joomla 3.7 administrator interface. The top navigation bar has 'Extensions' selected in the dropdown. A sub-menu for 'Install' is open, showing 'Install' as the active option. A modal window titled 'Joomla! would like your permission to collect some basic statistics.' is in the foreground. It contains a message about sending statistics to a central server and three buttons: 'Always', 'Once', and 'Never'. Below the modal, the 'CONTENT' and 'STRUCTURE' menus are visible. The bottom status bar shows the URL 'localhost/joomla_3.7/administrator/index.php?option=com_installer', the date '2017-05-19 10:25', and the Joomla version 'Joomla! 3.7.0 — © 2017 My Joomla Website'.

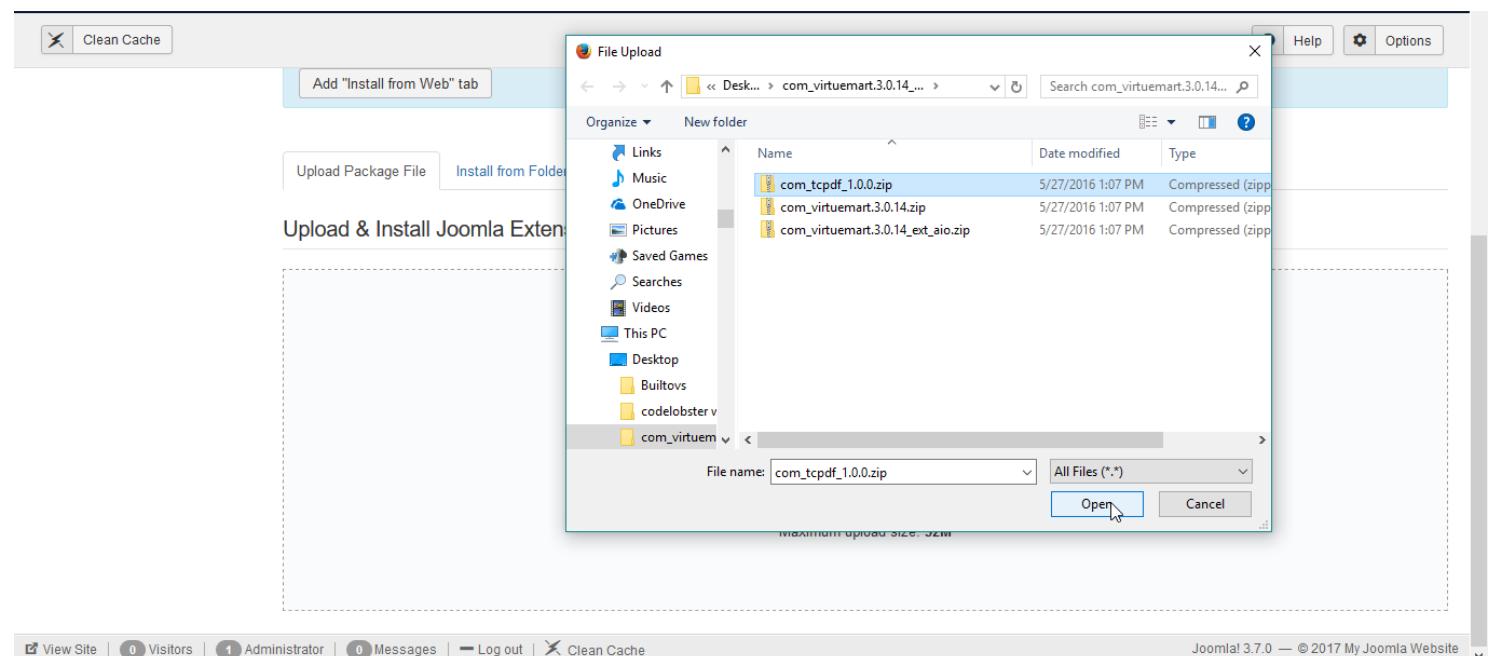

STEP 2: As you select Install, a browse screen will open as shown below. From here, you can locate your Virtuemart zip file.

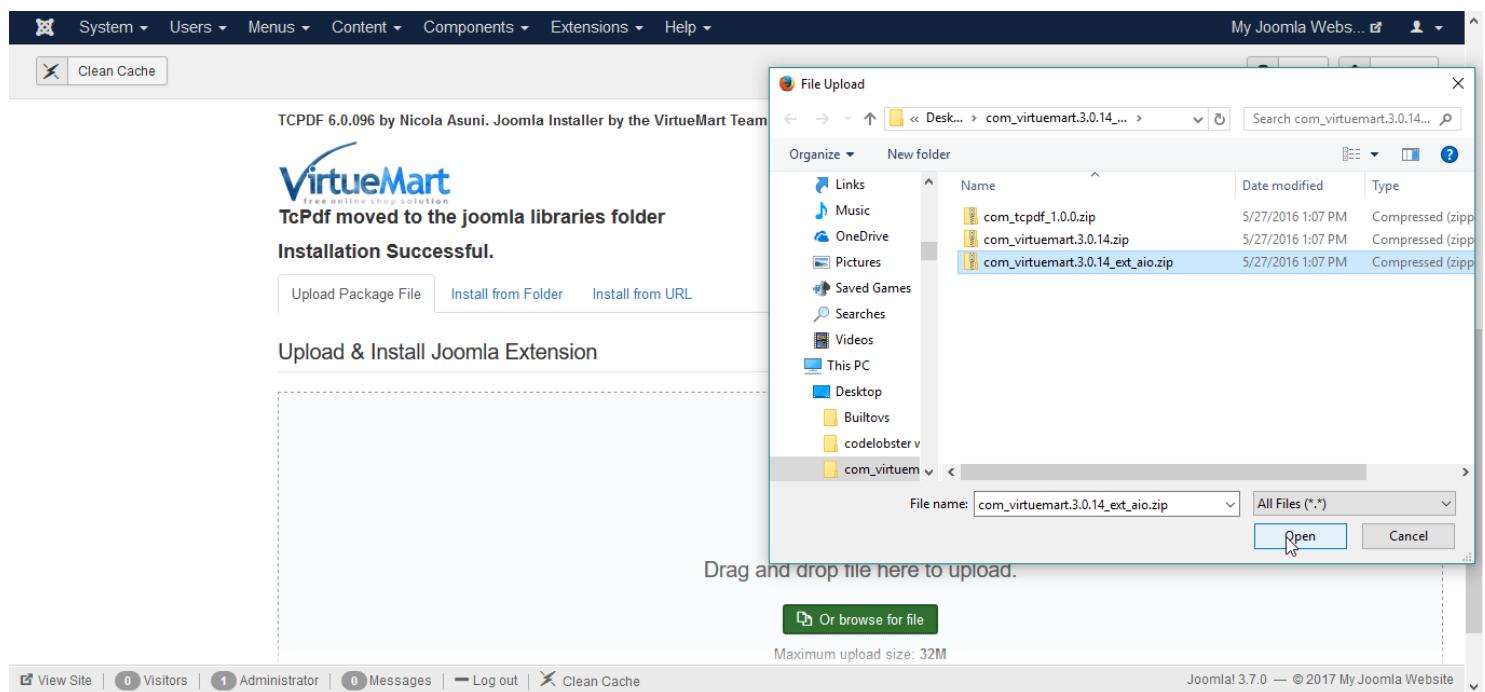

The screenshot shows the 'Upload & Install Joomla Extension' screen. It has three tabs at the top: 'Upload Package File' (selected), 'Install from Folder', and 'Install from URL'. Below the tabs is a large dashed box containing a central area with an upward arrow icon and the text 'Drag and drop file here to upload.'. Underneath this area is a button labeled 'Or browse for file' and the note 'Maximum upload size: 32M'. The bottom status bar shows the Joomla administrator menu and the URL 'localhost/joomla_3.7/administrator/index.php?option=com_installer'.

STEP 3: The com_virtuemart.3.0.14 zip file contains 3 zip files as shown below. You have to follow correct sequence to install all these 3 files one by one once extracted. The sequence will be:

1. **com_virtuemart.3.0.14.zip**
2. **com_virtuemart.3.0.14_ext_aio.zip**
3. **com_tcpdf_1.0.0.zip**

STEP 4: Once you installed all the three files; an installation success message will display on the screen as follows:

STEP 5: While Installing Plugin, you can also install the sample data that will include useful product features.

The AIO component (com_virtuemart_aio) is used to install or update all the plugins and modules essential to VirtueMart in one go.

Do not uninstall it.

Optional step: Install Sample Data Installing the Sample Data is an optional step. Useful if VirtueMart is new to you.

STEP 7: You are all set for Uploading The Theme/Template that you created with TemplateToaster.

Uploading the Theme/Template

Follow these steps to upload your theme in **VirtueMart**:

STEP 1: Log in to your Control Panel.

The screenshot shows the Joomla! 3.4.3 Control Panel dashboard. The top navigation bar includes links for System, Users, Menus, Content, Components, Extensions, and Help. The Joomla! logo is in the top right. The left sidebar has sections for CONTENT (Add New Article, Article Manager, Category Manager, Media Manager), STRUCTURE (Menu Manager, Module Manager), USERS (User Manager), CONFIGURATION (Global Configuration, Template Manager, Language Manager), EXTENSIONS (Install Extensions), and a status bar with View Site, Visitors, Admin, and Log out. The main content area features several modules: a post-installation message about review messages, a list of logged-in users (Super User Administration), a list of popular articles (Sample Sites, Australian Parks, Fruit Shop, Typography, Using Joomla!), and a list of recently added articles (Custom HTML Module, Quick Icons, Login Module, Statistics Module). The footer displays the Joomla! version and copyright information.

STEP 2: From the top navigation bar of panel, navigate to **Extensions -> Extension Manager**.

The screenshot shows the Joomla Control Panel interface. At the top, there's a navigation bar with links like System, Users, Menus, Content, Components, Extensions, Help, and a Joomla Website link. Below the navigation is a sidebar with sections for Content (Add New Article, Article Manager, Category Manager, Media Manager), Structure (Menu Manager, Module Manager), Users (User Manager), Configuration (Global Configuration, Template Manager, Language Manager), and Extensions (Install Extensions). The main content area has several boxes: one for post-installation messages (with a 'Review Messages' button), a 'LOGGED-IN USERS' box showing 'Super User Administration' (last login 2015-11-27), a 'POPULAR ARTICLES' box listing 'Sample Sites', 'Australian Parks', 'Fruit Shop', 'Typography', and 'Using Joomla!' (all posted on 2011-01-01), and a 'RECENTLY ADDED ARTICLES' box listing 'Joomla! is up-to-date.', 'Checking extensions ...', 'Custom HTML Module', 'Login Module', and 'Statistics Module' (all by Super User, posted on 2011-01-01). At the bottom, there's a footer with site statistics (View Site, 0 Visitors, 1 Admin, Log out) and a copyright notice (Joomla! 3.4.3 — © 2015 Joomla Website).

STEP 3: Click the browse button and install the theme by clicking upload and install button.

The screenshot shows the 'Extension Manager: Install' page. The left sidebar has a 'Install' tab selected, with other options like Update, Manage, Discover, Database, Warnings, Install Languages, and Update Sites. The main content area has a message about the Joomla Extensions Directory (JED) and an 'Add "Install from Web" tab' button. Below that are tabs for 'Upload Package File' (which is selected), 'Install from Directory', and 'Install from URL'. A large 'Upload & Install Joomla Extension' section contains a 'Extension package file' input field with a 'Browse...' button (which is highlighted with a red box), and an 'Upload & Install' button. At the bottom, there's a footer with site statistics (View Site, 0 Visitors, 1 Admin, Log out) and a copyright notice (Joomla! 3.4.3 — © 2015 Joomla Website).

STEP 4: After uploading the theme, set the theme as your default theme.

Screenshot of the Joomla! Template Manager: Styles page. A message box at the top right says "Default style successfully set." The main table lists seven styles:

Style	Default	Assigned	Location	Template	ID
Agency_Joomla - Default			Site	Agency_joomla	10
Beez3 - Default			Site	Beez3	9
Beez3 - Fruit Shop			Site	Beez3	4
Hathor - Default			Administrator	Hathor	5
isis - Default			Administrator	Isis	8
protostar - Default			Site	Protostar	7

STEP 5: Now you may visit the site and can see how it looks on browser.

Screenshot of the Joomla! Template Manager: Styles page. The "View Site" button in the bottom left corner is highlighted with a red oval. The main table lists the same seven styles as the previous screenshot:

Style	Default	Assigned	Location	Template	ID
Agency_Joomla - Default			Site	Agency_joomla	10
Beez3 - Default			Site	Beez3	9
Beez3 - Fruit Shop			Site	Beez3	4
Hathor - Default			Administrator	Hathor	5
isis - Default			Administrator	Isis	8
protostar - Default			Site	Protostar	7

3.10.2. Theme Options

Customizing TemplateToaster's theme is so easy, even after installation. You will see an additional tool when you go in the specific template settings, under the name "Theme Options". These theme options give you flexibility to change some elements of your theme. Let us have a look at these theme options.

The screenshot shows the Joomla! Template Manager interface. At the top, there are tabs for System, Users, Menus, Content, Components, Extensions, Help, and a Joomla Website icon. Below the tabs, the title is 'Template Manager: Edit Style' for 'Agency_Joomla - Default'. There are buttons for Save, Save & Close, Save as Copy, and Close. The 'Header Options' tab is active. A callout diagram with numbered circles (1-7) points to specific sections: 1. Header Options, 2. Footer Options, 3. Color Options, 4. Sidebar Options, 5. Style Options, 6. Menu Style Options, and 7. Menu Assignment. On the right, there are dropdown menus for 'Default' (set to 'All') and 'Template' (set to 'agency_joomla'). At the bottom, there are links for View Site, Visitors, Admin, and Log out, along with the Joomla! version information (3.4.3).

1 Header Options

This tab provides you the option for customizing the header settings.

The screenshot shows the Joomla! Template Manager interface. At the top, there are tabs for System, Users, Menus, Content, Components, Extensions, Help, and VirtueMart. Below the tabs, the title is 'Templates: Edit Style' for 'amlfp2017 - Default'. There are buttons for Save, Save & Close, Save as Copy, and Close. The 'Header Options' tab is active. A callout diagram with numbered circles (1-8) points to specific sections: 1. Change Header Background Image, 2. Horizontal Alignment, 3. Vertical Alignment, 4. Stretch, 5. Display Site Title, 6. Site Title, 7. Site Title Font Size, and 8. Heading Tag For Title. Other tabs include Slideshow Options, Footer Options, Color Options, Sidebar Options, Style Options, Menu Style Options, and Menu Assignment. At the bottom, there are links for View Site, Visitors, Administrator, Messages, and Log out, along with the Joomla! version information (3.6.5).

2 Footer Options

This tab provides you the option for customizing the footer settings.

The screenshot shows the Joomla Template Manager: Edit Style interface. The top navigation bar includes links for System, Users, Menus, Content, Components, Extensions, Help, and the Joomla Website logo. Below the header, there are buttons for Save, Save & Close, Save as Copy, and Close. The main area is titled "Style Name * Agency_Joomla - Default". A horizontal menu bar at the top of the form includes Details, Header Options, Footer Options (which is selected), Color Options, Sidebar Options, Style Options, Menu Style Options, and Menus assignment. The "Footer Options" section contains several configuration items:

- Display Facebook Icon:** A button with "Show" and "Hide" options. Below it is a "Facebook Icon" field with a preview icon, a "Select" button, and a "Remove" button (X).
- Facebook Icon Url:** A text input field containing "http://www.facebook.com/TemplateToaster".
- Display LinkedIn Icon:** A button with "Show" and "Hide" options. Below it is a "LinkedIn Icon" field with a preview icon, a "Select" button, and a "Remove" button (X).
- LinkedIn Icon Url:** A text input field containing "http://www.templatetoaster.com".
- Display GooglePlus Icon:** A button with "Show" and "Hide" options. Below it is a "GooglePlus Icon" field with a preview icon, a "Select" button, and a "Remove" button (X).
- GooglePlus Icon Url:** A text input field containing "http://www.templatetoaster.com".
- Display Twitter Icon:** A button with "Show" and "Hide" options. Below it is a "Twitter Icon" field with a preview icon, a "Select" button, and a "Remove" button (X).
- Twitter Icon Url:** A text input field containing "http://twitter.com/templatetoaster".
- Display Footer Designed By:** A button with "Show" and "Hide" options. Below it is a "Footer Designed By Url" field containing "http://templatetoaster.com".
- Footer Designed By Link Font Size:** A text input field containing "14".
- Footer Designed By Font Size:** A text input field containing "14".

At the bottom of the page, there are links for View Site, Visitors (0), Admins (2), Log out, and the Joomla! 3.4.3 — © 2015 Joomla Website footer information.

3.10.2.1. Category Options

You can add **Categories** in VirtueMart from the Category manager on the top of the screen under the Content option.

The screenshot shows the Joomla! Category Manager interface for adding a new category. At the top, there's a navigation bar with links for System, Users, Menus, Content, Components, Extensions, and Help. On the right, it says "Joomla Website" and has a gear icon. Below the navigation is a title bar with "Category Manager: Add A New Articles Category". Underneath are several buttons: "Save" (green), "Save & Close" (green), "Save & New" (green), "Cancel" (red), and a "Help" button. The main area starts with a "Title *" input field and an "Alias" dropdown set to "Auto-generate from title". Below these are tabs for "Category", "Publishing", "Permissions", and "Options". The "Category" tab is selected. The "Description" section contains a rich text editor toolbar with options like Edit, Insert, View, Format, Table, Tools, and various styling icons. To the right of the editor are several configuration fields: "Parent" (set to "- No parent -"), "Status" (set to "Published" in a green button), "Access" (set to "Public"), "Language" (set to "All"), "Tags" (a dropdown menu with "Select some options"), "Note" (an empty text input), and "Version Note" (an empty text input). At the bottom left are buttons for "Article" and "Image", and a "Toggle editor" button. The bottom of the screen shows a footer with links for "View Site", "Visitors" (0), "Admin" (1), and "Log out", along with the text "Joomla! 3.4.3 — © 2015 Joomla Website".

3.10.2.1.1. Article Options

You can add **Articles** in VirrtueMart from the article manager on the top of the screen under the content option.

The screenshot shows the Joomla! Article Manager interface for adding a new article. At the top, there's a navigation bar with links for System, Users, Menus, Content, Components, Extensions, and Help. The Joomla! logo is in the top right. Below the header, the title "Article Manager: Add New Article" is displayed, along with buttons for Save, Save & Close, Save & New, and Cancel. A toolbar below the title includes buttons for Save, Save & Close, Save & New, and Cancel. The main content area has tabs for Content, Publishing, Images and links, Options, Configure Edit Screen, and Permissions. The Content tab is selected, showing a rich text editor toolbar with options like Bold, Italic, Underline, Insert, View, Format, Table, and Tools. The editor itself is a large text area with a placeholder "p". Below the editor are buttons for Article, Image, Page Break, and Read More. To the right of the editor, there are several configuration fields: Status (set to Published), Category (set to Sample Data-Articles), Featured (set to No), Access (set to Public), Language (set to All), Tags (with a placeholder "Select some options"), and Version Note (an empty text area). At the bottom of the page, there are links for View Site, Visitors (0), Admin (1), Log out, and the Joomla! version (3.4.3) and copyright information.

3.10.2.2. Featured Article Options

You can add **Featured Articles** in VirtueMart by clicking featured articles on the top of the screen under the Content option.

The screenshot shows the Joomla! Article Manager interface for adding a new article. At the top, there's a navigation bar with links for System, Users, Menus, Content, Components, Extensions, and Help. The title "Article Manager: Add New Article" is displayed. Below the title are several action buttons: Save, Save & Close, Save & New, and Cancel. On the right side, the Joomla! logo is visible.

The main area is divided into sections:

- Title ***: A text input field containing "p".
- Alias**: A dropdown menu set to "Auto-generate from title".
- Content**: A tabbed section with tabs for Content, Publishing, Images and links, Options, Configure Edit Screen, and Permissions. The Content tab is selected.
- Editor Tools**: A toolbar with buttons for Edit, Insert, View, Format, Table, and Tools, along with a rich text editor interface.
- Status**: A dropdown menu set to "Published".
- Category ***: A dropdown menu set to "- Sample Data-Articles".
- Featured**: A toggle switch set to "Yes".
- Access**: A dropdown menu set to "Public".
- Language**: A dropdown menu set to "All".
- Tags**: A text input field with placeholder text "Select some options".
- Version Note**: An empty text input field.

At the bottom of the editor, there are buttons for Article, Image, Page Break, and Read More, along with a "Toggle editor" button. The footer of the page includes links for View Site, Visitors (0), Admin (1), Log out, and the text "Joomla! 3.4.3 — © 2015 Joomla Website".

4. FAQs

Q1. Is the exported Wordpress theme compatible with plugins?

Ans. The exported Wordpress theme has been tested for compatibility with many popular Wordpress plugins like WPML, W3Cache, Yoast etc.

Q2. Is the Exported theme compatible with Woocommerce plugin and BBpress?

Ans. Yes, the Exported theme is compatible with both Woocommerce plugin and BBpress. In case of generating a Woocommerce compatible theme the user is required to check the Woocommerce compatible option while exporting the template.

Q3. Can I Move TemplateToaster From One Computer to Another?

Ans. Yes, simply deactivate TemplateToaster from current computer, install it on a new computer and you'll be able to activate it again using your purchased license key.

Q4. Can I sell the templates or themes created with TemplateToaster?

Ans. Sure, you can sell the exported templates to desired number of persons.

Q5. How Many Browsers TemplateToaster support?

Ans. It supports all the major browsers including Firefox, Chrome, Internet Explorer, Opera, Safari etc.

Q6. Do you impose any restriction in Trial Version?

Ans. Trial version adds trial watermarks all over the exported templates and you can not save your projects as .ttr file for future editing. However, you can export the templates to install on your CMS like WordPress, Joomla etc.
