Embedding a video with *movie15*

- ▶ Uses *Screen annotations* introduced in PDF 1.5.
- ▶ Embeds the video data directly inside the generated PDF file.
- ▶ Also generates a *File Attachment annotation*, allowing easy extraction of the media file from the document (in PDF viewers that supports this type of annotation).

Example

```
\includemovie[controls,
  text={\includegraphics[scale=.3]{testvideo.png}}]{}{}%
  {testvideo.avi}
```
