Embedding a video with *media9*

- Uses non-standard *Rich Media annotations*, introduced in Adobe Reader 9 and above.
- Embeds a Flash player to read the video.
- Requires the PDF viewer to be able to execute Flash code.

Example

```
\includemedia[%
  width=4cm,height=2cm,
  activate=pageopen,
  addresource=testvideo.avi,
  flashvars={source=testvideo.avi}]{}%
  {VPlayer.swf}
```
